PART 3281—PULP AND PAPER

[General Conservation Order M-241-a as Amended Feb. 16, 1944]

CONSERVATION OF PAPER AND PAPERBOARD

§ 3281.64 *General Conservation Order M-241-a—*(a) *Definitions.* For the purpose of this order:

(1) A "converted product" means any article or type of converted paper resulting from the processing of pulp, paper, or paperboard which alters the original form or characteristics of the pulp, paper, or paperboard. The term includes all articles on any of the lists to this order, but shall not include:

(i) Paper or paperboard manufactured in the first instance by a paper or paperboard mill.

(ii) A "newspaper" as defined in General Limitation Order L-240.

(iii) "Wall paper" as defined in General Limitation Order L-177.

(iv) A "box" as defined in General Limitation Order L-239.

(v) A "magazine" as defined in General Limitation Order L-244.

(vi) A "book" as defined in General Limitation Order L-245.

(vii) A "greeting card" as defined in General Limitation Order L-289.

(viii) A "book match" as defined in General Limitation Order L-263.

(ix) A "paper shipping sack" as defined in General Limitation Order L-279.

(x) Fibre shipping containers, cans, drums, tubs, barrels, dividers, partitions and separators.

(xi) Cups, pails and nested food containers.

(xii) A "display" as defined in General Limitation Order L-294.

(xiii) A "grocery", "variety" and "notion bag" as defined in General Limitation Order L-261.

(xiv) Looseleaf binders.

(xv) Specialty bags.

(xvi) A "flashlight" as defined in General Limitation Order L-71.

(2) A "converter" is any person who, regardless of the identity or nature of his business, manufactures or assembles any converted product.

(b) *Computation of quotas for a portion of a calendar quarter.* Each converter whose quota provisions for a current calendar quarter are affected by this or any subsequent amendment to this order shall compute his permitted quota on a pro rata basis from the effective date of the order for the balance of the current calendar quarter.

(c) *Unrestricted consumption of pulp, paper and paperboard in the manufacture of certain converted products.* Any converter may consume any quantity of pulp, paper and paperboard in the manufacture and assembly of any converted product shown on List A of this order.

(d) *Restriction on consumption of pulp, paper and paperboard in the manufacture of certain named converted products.* (1) No converter shall consume in the manufacture or assembly of any converted product on List B, List C or List D of this order any quantity, in tons, of pulp, paper and paperboard greater than the quantity ascertained:

For the final quarter of 1943, and for each calendar quarter thereafter, by applying the entire percentage figure for each such converted product, as shown in paragraph (d) (2) of this order, to the quantity, in tons, of pulp, paper and paperboard consumed by such person in the manufacture or assembly of such product during the corresponding calendar quarter of 1942.

(2) The following percentage figures shall be used for the calculations described in the preceding paragraph (d) (1):

	Percent
(i) List B products	110
(ii) List C products	100
(iii) List D products	80

(3) [Deleted Oct. 5, 1943]

(e) *Restrictions on consumption of pulp, paper and paperboard in the manufacture of converted products not specifically listed.* (1) No converter shall during the final calendar quarter of 1943 or during any calendar quarter thereafter consume in the manufacture or assembly of any converted product not named on List A, List B, List C or List D of this order, any quantity, in tons, of pulp, paper and paperboard greater than 65 percent of the tonnage consumed in the manufacture or assembly of such converted product during the corresponding calendar quarter of 1942.

(2) In the instance of any converted products not named on any of the lists of this order, the following processes and operations shall not be considered as processing:

(i) Cutting, trimming or rewinding to a different size when such is performed as part of any established finishing room procedure and provided the paper or paperboard so processed is not intended for a use which serves to defeat the purpose of the order. (*Example:* the cutting of plain paper to a given size for use as a tray cover, the manufacture of which is curtailed by this order).

(ii) Punching or corner cutting.

(iii) Super-calendering.

(iv) Laminating.

(v) Coating, friction calendering, flint glazing, plating and embossing.

(vi) Collating and binding.

(vii) Printing, when such contributes to the functional value of the product to such a degree that the product would be incapable of performing the use intended if not printed, (*Examples:* advertising streamers, posters, menus, programs, timetables, sheet music, patterns, decalcomania transfers, checks), or when such printing is an intermediate process in the manufacture of an article or type of converted paper.

(viii) Printed wrappers (excluding gift wrappings) when printing is the only conversion operation other than cutting or trimming.

(ix) Embossing, corrugating, creping and crinkling for industrial and non-decorative uses.

(f) *Alternate method of calculating quotas.* As an alternate method of calculating quarterly quotas for any converted product, any person may, after the filing of a notice in writing with the War Production Board, elect to apply the percentages established by paragraphs (d) and (e) (1) of this order to one fourth of his total yearly consumption of pulp, paper and paperboard in such product during 1942. When such election has been made and the required notice in writing has been given to the War Production Board, the method of determining quotas may not thereafter be changed.

(g) *Converter's responsibility in determining coverage of this order.* It shall be the duty of each converter to determine in the first instance which of his products are included among the converted products referred to in this order. In case of doubt he may apply to the War Production Board in writing describing the product in question, for a specific ruling determining whether or not the same is so included. The War Production Board may of its own motion in any case, by telegram or letter, issue a specific ruling determining whether or not a particular product of a particular converter is so included.

(h) *Inventory restrictions.* (1) No person shall knowingly deliver to any converter and no converter shall accept delivery of, any quantity of any grade of pulp, paper or paperboard if the inventory of such grade in the hands of the converter accepting delivery is, or will by virtue of such acceptance become, either

(i) In excess of two carloads, or

(ii) If in excess of two carloads, greater than 45 days' supply, on the basis of either his average rate of consuming such grade of pulp, paper or paperboard for the preceding quarter or his average rate of consuming such grade of pulp, paper or paperboard as projected for the then current quarter.

(2) After January 1, 1944, no person shall knowingly deliver to any converter and no converter shall accept delivery of, any quantity of any grade of pulp, paper or paperboard if the inventory of such grade in the hands of the converter accepting delivery is, or will by virtue of such acceptance become, either

(i) In excess of two carloads, or

(ii) If in excess of two carloads, greater than 30 days' supply, on the basis of either his average rate of consuming such grade of pulp, paper or paperboard for the preceding quarter or his average rate of consuming such grade of pulp, paper or paperboard as projected for the then current quarter.

(i) *Allocations.* The War Production Board may from time to time direct the production and delivery of specific quantities of any converted product included in this order. Such directions will be made to insure the satisfaction of war requirements both direct and indirect and essential civilian requirements and shall take precedence over any preference rating to the extent indicated by the War Production Board.

(j) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(k) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(l) *Violations.* Any person who wilfully violates any provisions of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition any such person may be prohibited from making or obtaining further deliveries of or from processing or using material under priority control and may be deprived of priorities assistance.

(m) *Communications.* All communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Paper Division, Washington 25, D. C. Ref: M-241-a.

Issued this 16th day of February 1944.

PART 3284—BUILDING MATERIALS

[General Limitation Order L-161, as Amended Feb. 16, 1944]

ELECTRIC FUSES

§ 3284.61 *General Limitation Order L-161*—(a) *Definitions.* For the purposes of this order:

(1) "Electric fuse" means a thermal device used in an electrical circuit to prevent the flow of electricity in excess of a specified capacity in amperes. The term does not include an electric fuse of 2300 volt size or larger, or a "circuit breaker."

(2) "Non-renewable" electric fuse means a fuse containing a fuse link which cannot readily be replaced.

(3) "Manufacturer" means any person who makes, fabricates, assembles, casts or in any way processes material for the manufacture of electric fuses.

(4) "Copper" means unalloyed copper metal.

(5) "Copper base alloy" means any alloy in the composition of which the percentage of copper metal by weight equals or exceeds 40% of the total weight of the metal.

(b) *Restrictions on manufacture.* (1) No manufacturer may use in the manufacture, casting, processing or assembly of a non-renewable electric fuse any copper or copper base alloy except as a conductor of electric current.

(2) After April 1, 1944, no manufacturer may use in the manufacture, casting, processing or assembly of a non-renewable electric fuse any vulcanized fibre tubing. As exceptions to this rule, vulcanized fibre tubing may be used in the following types of uses:

(i) Fuses rated 61 amperes or more;

(ii) Fuses rated 600 volts or more;

(iii) Time delay non-renewable cartridge fuses;

(iv) Any fuse (other than midget type) which is manufactured to fill an order from or for the account of the Navy or from any other person for use by the Navy;

(v) Any fuse (other than midget type) which is manufactured to fill an order from any person for direct application to 440 volt A. C. circuits on vessels of the United States Maritime Commission or the War Shipping Administration.

In addition to the above exceptions, a manufacturer may use in the manufacture of fuses any vulcanized fibre tubing which he has in his inventory on April 1, 1944, but if such tubing is suitable for this paragraph, it must be so used.

(c) *Restrictions on sale and delivery.* No manufacturer may sell or deliver any electric fuse or any component part of an electric fuse except: (1) to fill an order carrying a rating of AA-5 or higher; (2) to another manufacturer; (3) as a replacement part (as defined in General Limitation Order L-158); or (4) to fill an order for a component part essential for repair of electronic equipment, pursuant to paragraph (b) (2) (iii) of Order L-265. This restriction applies only to manufacturers.

(d) *Applicability of regulations.* This order, and all transactions affected by it are subject to all present and future regulations of the War Production Board.

(e) *Appeals.* Any appeal from the provisions of this order shall be filed on Form WPB-147 with the field office of the War Production Board for the district in which is located the plant or branch of the appellant to which the appeal relates.

(f) *Communications.* All reports and communications concerning this order shall be addressed to: War Production Board, Building Materials Division, Washington 25, D. C., Ref: L-161.

(g) *Violations.* Any person who willfully violates any provision of this order or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, materials under priority control, and may be deprived of priorities assistance.

PART 3288—PLUMBING AND HEATING EQUIPMENT [1]

[General Limitation Order L-74, as Amended Feb. 16, 1944]

OIL BURNERS

§ 3288.71 [1] *General Limitation Order L-74*—(a) *Definitions.* For the purpose of this order:

(1) "Oil burner" means any devise which is designed for burning fuel oil for furnishing heat. It includes, but is not limited to the following types:

(i) Mechanical, steam or air atomizer oil burner.

(ii) Vertical or horizontal rotary oil burner.

(iii) Mechanical vaporizing oil burner.

(iv) Pot type vaporizing oil burner.

It shall include any oil burner for any boiler burner unit or for any furnace burner unit, any oil burner used as part of any water heater and any combination oil and gas burner, but does not include any oil burner used as a part of any domestic cooking appliance or of any domestic heating stove as defined in L-23-c, or any oil burner used in connection with any locomotive scheduled under L-97, or any oil burner used as a part of any commercial cooking and food and plate warming equipment as defined in L-182.

(2) "Class A oil burner" means any oil burner which is designed by the producer or approved by the Underwriters Laboratory to burn No. 5, No. 6 or heavier fuel oil, or which regardless of what grade fuel oil it burns, is designed or manufactured specifically for shipboard use or for heat processing.

(3) "Class B oil burner" means any oil burner which is designed by the producer or approved by the Underwriters Laboratory to burn No. 1 (except a Class C oil burner), No. 2, No. 3, or No. 4 fuel oil, but does not include any oil burner designed or manufactured specifically for shipboard use or for heat processing.

(4) "Class C oil burner" means any pot type vaporizing oil burner which is designed by the producer or approved by the Underwriters Laboratory to burn No. 1 fuel oil, but does not include any oil burner designed or manufactured specifically for shipboard use or for heat processing.

(5) "Fuel oil" means any liquid petroleum product commonly known as fuel oil, including Numbers 1, 2, 3, 4, 5, and 6, bunker C, diesel oil, kerosene, range oil, gas oil, or any other liquid petroleum product used for the same purposes as the above designated grades.

(6) "Replacement" means replacement of any oil burner by another oil burner.

(7) "New installation" includes an oil burner installed in a new heating plant or an oil burner installed as a conversion from any other fuel.

(8) "Producer" means any person who manufactures, fabricates or assembles oil burners.

(b) *Restrictions on producers of Class B oil burners.* No producer shall manufacture or assemble a Class B oil burner or deliver such a burner either assembled or in sets of parts except to fill an order already received, which has been approved on Form WPB-1319. He may produce or assemble such burners only to the extent necessary to fill orders on hand which he cannot fill from his inventory of completely assembled burners. Any person who wants to buy a Class B oil burner from a producer should file Form WPB-1319 in triplicate with the War Production Board, Plumbing and Heating Division, Washington 25, D. C.

(c) *Restrictions on delivery of Class B oil burners for installation; restrictions on installation.* No dealer or distributor may deliver a Class B oil burner for installation, either assembled or in sets of parts, and no person may install a Class B oil burner, except as follows:

(1) *Replacement.* A dealer may deliver any Class B oil burner from his stock for installation as a replacement, and the installation may be made, if the owner of the premises has applied for and obtained the approval of the appropriate War Production Board District office on Form WPB 1319. The dealer may deliver and the installation may be made without advanced approval from any source, if the burner to be replaced is over ten years old, or has actually broken down and is beyond repair during the season in which it is in use. No installation may be made for replacement unless the installer arranges to have the old burner scrapped or dismantled, but this requirement does not mean that the installer is entitled to take the old burner without the owner's consent or without crediting him with its value.

(2) *New installations.* Any person may deliver a Class B burner from a dealer's inventory for a new installation if the Petroleum Administration for War has specifically approved in writing the delivery of fuel oil for a Class B oil burner on the premises in question.[2] The authorization of a local War Price and Rationing Board to accept delivery of fuel oil will not be sufficient.

(3) *Food processing installations.* Any person may deliver a Class B burner from a dealer's inventory for use in raising and preparing crops, poultry, livestock and other agricultural products for market.

(4) *Burners assembled in other products.* If the War Production Board has approved the delivery of a Class B oil burner on Form WPB-1319 for physical incorporation in or assembly with another product, such as a water heater, further authority is not required for delivery of the other product, but the restrictions of L-79 (prohibiting delivery except to fill a rated order) must be complied with.

(5) *Sales to dealers.* Any dealer or distributor may sell or deliver any Class B oil burner to another dealer or distributor for resale.

(6) *Oversea shipment.* Any person may deliver a Class B burner to fill a rated order for shipment to a foreign country or a territory or overseas possession of the United States.

(d) *Restrictions on sale of Class A and Class C oil burners.* On and after January 4, 1944, Class A and Class C oil burners may be delivered only on orders bearing a preference rating of AA-5 or higher. PART 3288—PLUMBING AND HEATING EQUIPMENT [1]

[General Limitation Order L–75, as Amended Feb. 16, 1944]

COAL STOKERS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of metals for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3288.76 [1] *General Limitation Order L–75*—(a) *Definitions.* For the purposes of this order,

(1) "Coal stoker" means any device designed and produced for the purpose of feeding coal as a fuel to a combustion chamber; including, but not limited to, any feed screw, ram, spreader, or moving grate. Coal stokers shall not include any device designed and produced for the purpose of feeding coal as a fuel to a locomotive.

(2) "Class A coal stoker" means any coal stoker which has a grate area of 36 square feet or less, and a coal feeding capacity in excess of 60 pounds per hour. For the purpose of this paragraph, side dump plates designed to burn coal shall be considered a part of the grate area.

(3) "Class B coal stoker" means any coal stoker which has a maximum coal feeding capacity not in excess of 60 pounds per hour.

(b) *General restrictions*—(1) *Restrictions on orders for Class A coal stokers.* No person shall place an order for the manufacture of a Class A coal stoker unless such order is accompanied by the authorization of the War Production Board on Form WPB–1319. Any order so authorized by the War Production Board shall be deemed a "rated order" for the purposes of § 944.2 of Priorities Regulation No. 1. Use of Form WPB–1319 has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(2) *Restrictions on delivery.* On and after the 4th day of November, 1942, notwithstanding any contract or preference rating, no manufacturer of a Class A coal stoker shall deliver or transfer any such stoker except:

(i) In accordance with specific authorization given by the War Production Board.

(ii) Such Class A stokers as are listed as unfilled orders in the schedule required to be filed with the War Production Board by paragraph (b) (3) of this order.

The War Production Board may, in its discretion, at any time before delivery of a Class A stoker by a manufacturer, revoke or modify any authorizationfor the delivery of a Class A stoker granted under the provisions of this paragraph (b).

(3) *Filing of schedule of production and delivery by manufacturers of Class A coal stokers.* On the 4th day of November, 1942, each manufacturer of Class A coal stokers shall file, by registered mail, a schedule of production and delivery with the War Production Board, Plumbing and Heating Division, Washington, D. C., setting forth the following information:

All unfilled orders for Class A coal stokers received on or before the 4th day of November, 1942; a brief description of each stoker (including feeding capacity in pounds per hour and extent of completion); the schedule date of each delivery and the name and address of the person ordering each stoker, together with any preference rating applied or extended to such delivery.

No manufacturer shall change the date of any delivery as so scheduled to a later date without specific authorization from the War Production Board.

(4) *Specific exemptions.* Until the 23rd day of November, 1942, the provisions of this paragraph (b) shall not apply to any order for Class A coal stoker to be used by the Army, Navy, Maritime Commission or War Shipping Administration of the United States.

(5) *Restriction on manufacture of Class B stokers.* No person shall manufacture a Class B stoker.

(c) *Manufacture of replacement parts.* Nothing in this order shall be construed to prohibit or restrict the manufacture of replacement parts for any type of coal stoker.

(d) *Avoidance of excessive inventories.* No person shall accumulate inventories of any materials (whether raw, semi-processed or processed) for manufacture into coal stokers in excess of the minimum amount necessary to maintain production of coal stokers to the extent permitted by this order.

(e) *Records.* All persons affected by this order shall keep and preserve for not less than two years accurate and complete records concerning inventories, production and sales.

(f) *Audit and inspection.* All records required to be kept by this order shall, upon request, be submitted to audit and inspection by duly authorized representatives of the War Production Board.

(g) *Reports.* Each manufacturer to whom this order applies shall execute and file with the War Production Board such reports and questionnaires as said Board shall from time to time request.

(h) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(i) *Appeals.* Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him may apply for relief by addressing a letter to the War Production Board setting forth the pertinent facts and the reasons why such person considers that he is entitled to relief. The War Production Board may thereupon take such action as it deems appropriate.

(j) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(k) *Applicability of other orders.* Insofar as any other order heretofore or hereafter issued by the War Production Board, limits the use of any material to a greater extent than the limits imposed by this order, the restrictions of such other order shall govern, unless otherwise specified therein.

(l) *Routing of correspondence.* Reports to be filed and other communications concerning this order shall be addressed to the War Production Board, Plumbing and Heating Division, Washington, D. C., Ref: L–75.

Issued this 16th day of February 1944.

PART 3289—RADIO AND RADAR

[General Limitation Order L–151, as Amended Feb. 16, 1944]

DOMESTIC WATTHOUR METERS

§ 3289.11 *General Limitation Order L–151*—(a) *Definition.* Wherever it appears in this order, the term "domestic watthour meter" is used to mean any device designed and manufactured for the purpose of measuring the consumption of electrical energy with respect to time, and includes single phase, two and three wire types, with capacities up to 25 amperes and voltages up to 240 volts, for use on alternating current of any frequency. The term does not include electric energy meters for use on direct current or on polyphase circuits, maximum demand meters, or integrating meters, calibrated in terms other than electric energy (i. e., meters integrating weight, pressure, etc.).

(b) *Prohibition of production.* No person shall manufacture or assemble any new domestic watthour meters or any new parts for the conversion of domestic watthour meters from one to another type. This order does not prohibit the use or delivery of existing parts for the conversion of domestic watthour meters from one to another type, such as the conversion of non-socket to socket type meters, three-wire to two-wire or two-wire to three-wire meters, or meters from one current rating to a higher current rating.

(c) *Restrictions on delivery.* No person shall deliver or accept delivery of any new domestic watthour meter unless it is a delivery:

(1) To or for the account of the Army, Navy, Maritime Commission or War Shipping Administration.

(2) Between persons who own or operate electric power utilities which serve the public generally.

(3) Authorized by the War Production Board on Form WPB–1319. Any prospective purchaser may apply for such an authorization by filing Form WPB–1319 in accordance with the current instructions for filing such forms. These form applications should be filed with the nearest Utility Inventory Control Office of the War Production Board, addressed to the attention of the Regional Utility Engineer. The locations of these Regional Utility Inventory Control Offices are given on List A at the end of this order. As a general rule, favorable consideration will be given to the purchase of new domestic watthour meters only where one or more of the following factors appear to establish the need for them:

(i) The meters are to measure the consumption of electric energy by individual homes in a war housing project, which cannot be metered with a master meter, and delay in obtaining individual used meters would delay the occupancy of such dwellings.

(ii) The meters are required for the replacement in service of damaged meters, and the applicant cannot obtain prompt delivery of used meters for that purpose, and does not have such meters available in his own inventory for replacements.

(iii) Special or emergency conditions require the prompt delivery of new meters.

Unless one of the above conditions exists, a prospective purchaser should obtain his requirements of domestic watthour meters from such sources of supply as the excess inventories of electric utilities, used meter dealers, and meter repair shops. Information as to excess stocks of such meters in the hands of utilities may be obtained from Regional Utility Inventory Control Offices (See List A at the end of this order).

(d) *Parts for maintenance or repair.* The provisions of paragraphs (b) and (c) of this order on production and delivery do not apply to the production or delivery of parts for the maintenance or repair of domestic watthour meters. No person, however, shall manufacture so many of such parts that his inventory thereof will at any time exceed his average monthly inventory of such parts during the calendar year 1941.

(e) *Monthly reports.* On or before the tenth day of each calendar month each manufacturer of domestic watthour meters shall file with the War Production Board a report, in duplicate, in letter form, which shall show the following information as of the first of the month:

(1) Inventory of domestic watthour meters.

(2) Deliveries of domestic watthour meters during the preceding calendar month.

(3) Unfilled orders on hand for domestic watthour meters.

(f) *Applicability of War Production Board regulations and orders.* This order and all things done under it are subject to the provisions of all applicable regulations and orders of the War Production Board.

(g) *Violations and penalties.* Any person who wilfully violates any provision of this order, or who conceals any material information or furnishes false information to any department or agency of the United States is guilty of a crime. If convicted, he may be punished by fine or imprisonment; or any such person may be deprived of any or all priorities assistance. For example, he may be prohibited from getting, delivering, processing, or using anything which is subject to priority control by the War Production Board.

(h) *Appeals from this order.* Any person may appeal for relief from any provision of this order by writing a letter which explains fully what provisions he is appealing from and why he thinks he should be relieved from those provisions. He should send this letter, with two signed copies, to the War Production Board.

(i) *Letters and reports.* Letters about this order, or reports filed under it, should be addressed to the War Production Board, Washington 25, D. C., Ref: L–151; and the reports required by paragraph (e) of the order should be addressed to the attention of the Office of War Utilities. All other letters or reports, however, should be addressed to the attention of the Radio and Radar Division. All reports and forms required by this order have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

Issued this 16th day of February 1944.

(6) "To produce a new domestic sewing machine" means to complete the manufacturing operations on a new domestic sewing machine other than the final assembly of the machine head into a cabinet, portable base and cover, or table and stand.

(7) "Manufacturer" means any person who produces any new domestic sewing

machine or who manufactures or assembles any sewing machine part, attachment or attachment part.

(8) "Restricted period" means the period from April 25, 1942 to June 15, 1942, inclusive.

(9) "Average daily production" or "average daily manufacture" means the total production or manufacture within a specified period divided by the number of days (including Sundays and holidays) contained in such period.

(10) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency or any organized group of persons whether incorporated or not.

(b) *General restrictions.* (1) During the restricted period no manufacturer shall:

(i) Produce more new domestic sewing machines than 75% of his average daily production of such new machines in the year 1940 multiplied by the number of days (including Sundays and holidays) in the restricted period; or

(ii) Manufacture more new attachments of any type than 75% of his average daily manufacture of new attachments of such type in the year 1940 multiplied by the number of days (including Sundays and holidays) in the restricted period.

(2) No manufacturer shall manufacture any new sewing machine parts except that during the year 1944 a manufacturer may produce sewing machine parts for use as repair parts under the following conditions:

(i) He may put into process in the manufacture of needles not more iron and steel than 75% of the iron and steel, by weight, contained in the needles manufactured by him during the two-year period ending December 31, 1941;

(ii) He may put into process in the manufacture of sewing machine parts (other than needles) not more iron and steel than 62½% of the iron and steel, by weight, contained in the sewing machine parts (other than needles) manufactured by him for use as repair parts during the two-year period ending December 31, 1941; and

(iii) He may not put into process any non-ferrous metal except that copper and copper base alloy may be used for the purpose of conducting electricity, provided that he does not put into process more copper and copper base alloy than 50% of the amount of copper and copper base alloy, by weight, used for the purpose of conducting electricity in the sewing machine parts produced by him for use as repair parts during the two-year period ending December 31, 1941.

(3) No manufacturer shall on and after May 25, 1942, and no person other than a manufacturer shall on and after July 15, 1942, install any new sewing machine part, other than a repair part, in a new or used domestic sewing machine, except to complete the new domestic sewing machines, the production of which is permitted under the terms of paragraph (b) (1).

(4) On and after June 16, 1942, no manufacturer shall:

(i) Produce any new domestic sewing machines or (except as provided in paragraph (b) (5) of this order) assemble any new sewing machine parts for the production of such machines; or

(ii) Manufacture or assemble any new attachments or new attachment parts.

(5) Nothing in the foregoing provisions shall limit the final assembly by a manufacturer or any other person of a new domestic sewing machine head into a cabinet, portable base and cover, or table and stand: *Provided*, That such head, cabinet, base and cover, or table and stand were not produced or manufactured in violation of the terms of this or of any other order heretofore or hereafter issued by the Office of Production Management or the War Production Board.

(6) Manufacturers shall sell materials in their inventory only in accordance with the provisions of Priorities Regulation No. 13 (Part 944) and all other applicable orders and regulations.

(c) *Restrictions on transfer of domestic sewing machines.* On and after June 5, 1943, no manufacturer of domestic sewing machines shall transfer the physical possession of or title to:

(1) Any domestic sewing machines except in accordance with a letter of authorization from the War Production Board to be issued prior to June 14, 1943, which letter will permit the transfer without restriction of all domestic sewing machines other than those specified in paragraph (c) (2) below.

(2) Any domestic sewing machines which are required by the Army or Navy of the United States, the War Shipping Administration, the United States Maritime Commission or for lend-lease and export purposes. The domestic sewing machines not released by the letter of authorization referred to in paragraph (c) (1) above are to be held for transfer to the persons or for the purposes specified in this paragraph (2). In order to obtain a release for any of such domestic sewing machines, a specific authorization of the War Production Board is required on Form WPB–1319 pursuant to an application filed on said Form.

(d) *Inventory restrictions.* No manufacturer shall accumulate for use in the manufacture of domestic sewing machines, attachments, or parts thereof inventories of raw materials, semi-processed materials, or finished parts in quantities in excess of the minimum amount necessary to maintain production of domestic sewing machines, attachments, or parts thereof at the rates permitted by this order.

(e) *Records.* All persons affected by this order shall keep and preserve for not less than two years accurate and complete records concerning inventories, production and sales.

(f) *Audit and inspection.* All records required to be kept by this order shall, upon request, be submitted to audit and inspection by duly authorized representatives of the War Production Board.

(j) *Applicability of other orders.* In so far as any other order heretofore or hereafter issued by the Office of Production Management or the War Production Board limits the use of any material in the production of domestic sewing machines, attachments, sewing machine parts or attachment parts to a greater extent than the limits imposed by this order, the restrictions in such other order shall govern unless otherwise specified therein.

(k) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(l) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to the War Production Board, Consumer Durable Goods Division, Washington, D. C., Ref.: L–98.

PART 3291—CONSUMERS DURABLE GOODS

[General Limitation Order L–140–a as Amended Feb. 16, 1944]

CUTLERY

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of metals used in the production of cutlery for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3291.175 *General Limitation Order L–140–a*—(a) *Definitions.* For the purposes of this order:

(1) "Cutlery" means any professional food processing cutlery, as defined in Schedule A, any professional kitchen cutlery, as defined in Schedule B, any household kitchen cutlery, as defined in Schedule C, any household table cutlery, as defined in Schedule D, any pocket cutlery, as defined in Schedule E, any scissors, shears and trimmers, as defined in Schedule F, any hand hair or fetlock clippers, as defined in Schedule G, any industrial cutlery, as defined in Schedule H, and any hunting or fixed blade sheath knife, any carving sets, any poultry shears, any implement designed or intended for manicuring, for pedicuring or for extracting blackheads, including but not limited to nail files, nail nippers, nail clippers, pushers, picks, cuticle scissors, cuticle pushers, cuticle clippers and cuticle nippers, and any other hand operated, fixed or folding, cutting blade or fork with a handle or handles of any material attached so as to become an integral part of the implement. "Cutlery" shall not include any article of flatware, as defined in Order L–140–b, when issued, or any of the articles subject to Order L–30–d, as amended from time to time, or surgical instruments.

(2) "Manufacturer" means any person engaged in the business of fabricating or assembling any new cutlery from any raw material, purchased parts or previously used or fabricated material, or who performs any hand or mechanical fabricating or assembling operation on an article of cutlery.

(3) "Process" means the first change by a manufacturer in the form of material (whether raw material, semi or fully fabricated material or finished parts) from that form in which it is received by him, or the first assembly by a manufacturer of material which is not changed in form by him. Any manufacturer who did not maintain records during the base period as to his processing of metals in terms of weight, but who maintained records in terms of units of cutlery only, may apply all percentages contained in this order and schedules in terms of units rather than in terms of weight.

(4) "Base period" means the period beginning July 1, 1940 and ending June 30, 1941, inclusive.

(5) Gauges when referred to in this order, are subject to commercial tolerances.

(b) *Restrictions on kinds of cutlery which may be manufactured.* No manufacturer shall process any metal for new cutlery which is not of a type defined in a schedule in this order.

(c) *Restrictions on quantity of cutlery produced.* No manufacturer shall process more metal in the production of any new cutlery than the amount specified for that class of cutlery in the appropriate schedule attached to this order.

(d) *Exceptions for military orders.* In addition to the production permitted by paragraph (c) above a manufacturer may process sufficient additional amounts of metal to fill purchase orders or contracts for cutlery to be delivered by him to or for the account of

(1) The War Shipping Administration,

(2) The United States Maritime Commission,

(3) The United States Navy (excluding purchase orders placed by or for delivery to United States Navy Ship's Service Departments or United States Marine Corps post exchanges for resale by them within the 48 United States and the District of Columbia and not for use as equipment). The War Production Board may specifically authorize on Form WPB–1319, pursuant to an application filed on said Form, the filling of purchase orders for cutlery for delivery to United States Navy Ship's Service Departments or United States Marine Corps post exchanges for resale within but for use outside the 48 United States and the District of Columbia. Form WPB–1319 is to be filed and executed only by the Bureau of Naval Personnel, Navy Department, Washington, D. C., and if a specific authorization is granted, such authorization will be forwarded to the manufacturer specified.

(4) The United States Army (excluding purchase orders placed by or for delivery to United States Army post exchanges for resale by them within the 48 United States and the District of Columbia and not for use as equipment). The War Production Board may specially authorize on Form WPB–1319, pursuant to an application filed on said form, the filling of purchase orders for cutlery for delivery to and use by post exchanges located in areas designated by the United States Army as "staging areas." Form WPB–1319 is to be filed and executed only by the Army Exchange Service of New York, and if a specific authorization is granted, such authorization will be forwarded to the manufacturer specified.

(e) *Specifications.* No manufacturer shall process any metal for the production of any new cutlery which does not conform to the specifications contained in the applicable schedules in this order except that these specifications do not apply to orders for household table cutlery, pocket cutlery and hunting or fixed blade sheath knives, or orders for other cutlery accepted by the manufacturer prior to July 1, 1943: *Provided*, That such orders are for the agencies specified above in paragraph (d).

(f) *Metal restrictions.* No manufacturer shall process any metals other than iron, carbon steel, gold and silver in the production of cutlery, except

(1) Lead for bolsters or rivets;

(2) Chromium for plating;

(3) Zinc as provided in Schedule G and H of this order subject to the restrictions contained in the M–11 series, as amended from time to time.

(g) *Hardness of knife blades and sharpening steels.* No manufacturer shall process any steel for the production of:

(1) Knife blades for cutlery which when finished tests less than 45, Rockwell C Scale;

(2) Sharpening steel which when finished tests less than 62, or more than 68, Rockwell C Scale.

(h) *Special provision affecting distribution of overruns, rejects and cancellations.* When material for the production of cutlery is obtained with priorities assistance and, because of cancellations of orders or other reasons, can no longer be used for the purpose for which the assistance was given, such material may only be used as allowed in § 944.11, paragraph (b) of Priorities Regulation No. 1. Similarly, when such material has been manufactured into cutlery to fill a specific contract and that cutlery, because of overruns, rejects, cancellations or other reasons, cannot be used for that purpose, it may be used or disposed of only as allowed in that section. One of the ways in which these materials or products may be used or disposed of is outlined in subparagraph (5) of that paragraph, which permits use and disposal in any manner specifically authorized in writing by the War Production Board. Applications for such authorization may be made on Form WPB–1319.

(i) *Partial revocation of L–140.* On and after July 1, 1943, the restrictions contained in L–140 are hereby superseded and L–140 is hereby revoked in so far as it applies to the production of any cutlery other than silver plated flatware restricted in paragraph (b) (5) of that order.

(j) *Avoidance of excessive inventories.* No manufacturer shall accumulate for use in the production of cutlery inventories of raw materials, semi-processed materials or finished parts in quantities in excess of the minimum amount necessary to maintain production as permitted by this order.

(k) *Reports.* (1) Prior to July 15, 1943, every manufacturer of cutlery shall execute and file in duplicate with the War Production Board, Washington 25, D. C., Ref: L–140–a, a report as to the aggregate amount of all metals processed by that manufacturer during the base period and grouped in accordance with the classes as specified in the definitions contained in the individual schedules attached to this order. Manufacturers who compute their processing of metals in units in accordance with paragraph (a) (3) of this order may file such report in units. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(2) Every manufacturer affected by this order shall execute and file with the War Production Board, Washington 25, D. C., Ref.: L–140–a, on or before the 10th day of July, 1943, and on or before the 10th day of each calendar month thereafter, Form WPB–1600 (formerly PD–655).

(l) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the regulations of the War Production Board, as amended from time to time, except as provided in paragraph (j) (2).

(m) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(n) *Appeals.* Any appeal from the provisions of this order shall be filed on Form WPB–1477 (PD–500) with the field office of the War Production Board for the district in which is located the plant or branch of the appellant to which the appeal relates.

(o) *Communications.* All reports to be filed hereunder or communications concerning this order should be addressed to the War Production Board, Consumers Durable Goods Division, Washington 25, D. C., Ref: L–140–a.

Issued this 16th day of February 1944.

Upon receipt of such form, the War Production Board will approve the proposed production and shipping schedules or make such changes therein as it shall deem necessary, and will thereupon return to the manufacturer a copy of such form as approved or changed.

(2) In addition to the restrictions contained in paragraphs (b), (c) and (d) of this order, each manufacturer shall produce and ship sterilizer equipment in accordance with his production and shipping schedule as approved or changed by the War Production Board, regardless of any preference rating which any order may bear or any order or regulation of the War Production Board.

(g) *Other allocation action.* With respect to sterilizer equipment, the War Production Board may, notwithstanding any other order, preference rating, or regulation of the War Production Board:

(1) Direct the return or cancellation of any unfilled order on the books of a manufacturer; or

(2) Cancel orders placed with one manufacturer and direct that they be placed with another manufacturer.

FLOOR SANDING, FLOOR FINISHING, FLOOR MAINTENANCE, AND RUG SCRUBBING MACHINES, INDUSTRIAL VACUUM CLEANERS, AND BLOWERS FOR CLEANING PURPOSES

§ 3302.26 *Limitation Order L–222*—(a) *Definitions.* For the purpose of this order:

(1) "Floor finishing or floor maintenance machines" means any motorized or hand-powered mechanical device, designed for the purpose of floor finishing or maintenance. The term includes, but is not limited to, the types of machines on List A attached to this order as amended from time to time, and excludes independent motor-operated vacuum producing units, floor sanding machines and machines specifically designed for the manipulation of wet cement.

[1] Formerly Part 3123, § 3123.1.

(2) "Floor finishing" and "floor maintenance" include, but are not limited to, the operations of grinding, staining, sealing, scraping, oiling, waxing or polishing floors or decks, and the collection and removal of dust, grime, oil, reclaimable materials or refuse from floors or decks, either separately or in conjunction with the operations of washing, scraping, sterilizing and wiping floors or decks.

(3) "Floor sanding machines" means machines used for the smoothing of floors or decks, other than stone or tile floors, by the use of abrasives such as, but not limited to, sandpaper and steel wool.

(4) "Rug scrubbing machines" means both portable rug shampooing machines and portable rug scrubbing machines.

(5) "Industrial vacuum cleaners" means machines in which a combination of a motor operated vacuum producer (stationary or portable), an air impeller line and a portable tool with attachments is used primarily for the collection and removal by suction of dust, oil, reclaimable materials or refuse in either the wet or dry state. "Industrial vacuum cleaners" shall not include any vacuum cleaners designed primarily for household use or any motor operated vacuum producing units incorporated in floor sanding, floor finishing or floor maintenance machines.

(6) "Blowers" means combination blowers and exhausters, i. e., machines in which a combination of a motor operated air pressure producer, an air impeller line and a portable tool with attachments is normally used for the removal of dust, materials or refuse by air pressure. "Blowers" shall not include any machines used solely for the handling of air or other gaseous mixtures.

(7) "New machines" means any machines which have neither been used, sold, rented, nor lent for the purpose of being used but includes any machines which have been used only for demonstrations, trial loans, instruction or repair loans.

(8) "Supplies" means replaceable items, such as but not limited to, polishing brushes, cleaning brushes, sanding drums and discs, stones, hoses and bags, wand handles and similar attachments which are expended in the operations of floor sanding, floor finishing, floor maintenance, rug cleaning, vacuum cleaning and air pressure cleaning.

(9) "Manufacturer" means any person engaged in the fabrication or assembly of new floor sanding machines, new floor finishing or floor maintenance machines, new rug scrubbing machines, new industrial vacuum cleaners and new blowers or of parts designed specifically for any of such machines. The term also includes wholesaling or retailing subsidiaries or divisions of such a person.

(10) "Distributor" means any person engaged in the business of selling, renting or lending of new floor sanding machines, new floor finishing or floor maintenance machines, new rug scrubbing machines, new industrial vacuum cleaners and new blowers, other than a manufacturer.

(3) Except as permitted by paragraph (b) (4) of this order, no manufacturer shall fabricate or assemble any new industrial vacuum cleaners or blowers, or parts for such new cleaners or blowers, except to the extent necessary to fill orders for new industrial vacuum cleaners or blowers authorized on Form PD–722, approved by the War Production Board on Form WPB–1843 (formerly PD–722) before May 16, 1944, or on Form WPB–1319. No application made on such form will be approved unless accompanied by an order rated AA–5 or higher or unless the applicant indicates a need for such machine justifying such rating.

(4) *Repair parts other than supplies.* During the calendar quarter commencing January 1, 1943, and during any calendar quarter thereafter, no manufacturer shall fabricate repair parts having an aggregate manufacturing cost in excess of 2 per cent of that manufacturer's total billed sales of new floor sanding machines, new floor finishing or floor maintenance machines, new rug scrubbing machines, new industrial vacuum cleaners and new blowers during the calendar year of 1941.

(5) *Supplies.* The restrictions of paragraph (b) of this order shall not apply to the fabrication or assembly of supplies.

Within five days after their expiration, all expired authorization forms shall be returned for cancellation to the War Production Board, Service Equipment Division, Washington, D. C., Ref.: L–222.

(2) Nothing in this paragraph (c) shall be construed to prohibit the sale, loan, rental or delivery of new machines from one manufacturer or distributor to another to fill an order, or part of an order, received by the latter which has been authorized by the War Production Board on Form WPB–1843 (formerly PD–722) on or before May 16, 1944, Form WPB–1319.

In addition, each producer shall submit similar forward estimates of his production for the following three quarterly periods.

(d) *Allotments to claimant agencies.* (1) Two months preceding the quarter to be covered by the allotment or on or before February 1, May 1, August 1, November 1, each claimant agency shall transmit to the Office of Rubber Director its total requirements for the quarterly period in each of the following groups and sub-groups:

Group A—Truck-bus tires:

In addition, each claimant agency shall furnish to the Office of Rubber Director its estimated requirements for each group and sub-group for the following three quarterly periods.

(2) Upon the basis of requirements submitted by each claimant agency to the Office of Rubber Director, War Production Board will allot on or before the 15th day of the second month preceding the quarter to be covered by the allotment, to each claimant a quantity of tires by groups and sub-groups for the following quarterly period and shall also make tentative allotments to each claimant for the following three quarterly periods.

(3) Within 5 days after receipt of its allotment, each claimant agency shall furnish to the Office of Rubber Director a statement showing the break-down of its allotment by group and sub-group between original equipment and replacement.

(e) *Issuance of production directives to producers.* Not later than 10 days after the time prescribed in the preceding paragraph for the issuance of allotments to the claimant agencies, War Production Board will issue to each producer, a directive for the period covered by the allotments, prescribing the percentage of the producer's facilities by groups and sub-groups, allocated to the production of the following classes of orders:

(1) Vehicle manufacturers authorized by military claimants; (2) replacement by military claimants; (3) vehicle manufacturers authorized by indirect military claimants; (4) indirect military replacement.

"Indirect Military" refers to claimants not designated as military claimants in paragraph (b) (4).

(f) *Claimant Agency procurement under allotment.* No claimant agency shall accept delivery of any tires, which have not been specifically allotted to it. In the event that a claimant agency modifies its requirements so that its procurement in any group or sub-group will be less than its allotment for any quarter, it shall immediately notify the Office of Rubber Director.

Original Equipment

(g) *Notification to vehicle manufacturers.* (1) On or before the first day of the month preceding the quarter covered by its allotment, each claimant agency will, within its allotment, determine the number of tires by groups and sub-groups which may be shipped to each of its vehicle manufacturers during the quarterly period, and will authorize each vehicle manufacturer in writing to accept delivery of a specified number of tires. No vehicle manufacturer may accept delivery of tires for his production of vehicles or equipment unless he has been specifically authorized to accept such delivery by the claimant agency.

(2) A claimant agency may transfer all or part of its allotment of tires to the appropriate War Production Board Divisions for distribution among vehicle manufacturers in accordance with this paragraph (g). In such event, however, the War Production Board Divisions will issue authorizations in writing to the vehicle manufacturers under the claimant agency symbol.

(3) Each claimant agency or War Production Board Division will furnish copies of its authorizations to the Office of Rubber Director.

(h) *Vehicle manufacturer's certification to his supplier.* Each vehicle manufacturer who has been authorized to accept delivery of tires in accordance with the preceding paragraph shall certify to his supplier not later than the 15th day of the month preceding the first month of the quarterly period in which shipments are to be made to him that he is authorized by the appropriate claimant agency to accept delivery of a specified number of tires. The certification shall be in substantially the following form signed by an authorized official:

Agency identification number of symbol ____. The undersigned certifies, subject to the criminal penalties for misrepresentation contained in section 35 (A) of the United States Criminal Code, that he is authorized to accept delivery of the following tires by the claimant agency identified above for his production during the quarterly period commencing ____, 1944, and to use any preference rating applied or extended by him; that the monthly deliveries specified will not result at any time in an inventory exceeding 10 days' supply based upon his total authorized monthly production:

Size	Ply	Type	Quantity

The identification number shall consist of the appropriate claimant agency symbol followed by the major program number.

No certification other than the above is required. The standard form of certification provided in Priorities Regulation No. 7 may not be substituted.

A single certification may be used for tires authorized by more than one claimant agency, provided the tires authorized by each agency are clearly identified.

(i) *Producers' shipments for original equipment.* (1) No producer may ship tires to a vehicle manufacturer unless the vehicle manufacturer certifies to him on or before the 15th day of the month preceding the quarter in which shipments are to be made, that he is authorized by the appropriate claimant agency to accept delivery of a specified number of tires during the quarterly period, in accordance with the preceding paragraph.

(2) Not more than 40% of the tires in any size or group authorized for shipment to a vehicle manufacturer during a quarterly period may be shipped in any calendar month during the period without specific authorization in writing by the Office of Rubber Director, War Production Board.

(j) *Unplaced certified orders of vehicle manufacturers.* Any vehicle manufacturer who is authorized to accept deliveries of tires and who has been unable to place his certified order after he has made every effort to do so within the time prescribed by paragraph (h), shall refer the unplaced order to the Office of Rubber Director, War Production Board, on or before the 20th day of the month preceding the first month of the quarterly period. The Office of Rubber Director will endeavor to place any such order on the basis of open capacity reports received from producers, and in the event that such orders cannot be placed without adversely affecting the interests of one or more claimant agencies, disposition of unplaced orders shall be made in consultation with the claimant agencies affected.

Open Capacity Reports

(k) *Report by producer of his open capacity.* Each producer shall report to the Office of Rubber Director by letter, not later than the 20th day of the month preceding the first month of the quarterly period, the open capacity he has available for the production of tires in each group and sub-group, after making provision for the scheduling of all orders placed with him as of the last day for placement of orders for production during the quarter. This report shall be based upon the percentage allocation of his production facilities made by directive issued to him in accordance with paragraph (e).

Producers' Acceptance of Orders

(l) *Acceptance of orders after expiration of period for placement.* No producer shall accept any orders for tires after the 15th day of the month preceding the first month of the quarterly period for production during the quarter without specific authorization from the Office of Rubber Director, War Production Board, except orders for indirect military replacement. Within his percentage allocation of facilities for indirect military replacement, a producer may accept, produce and ship orders for indirect military replacement, provided the production or shipment of any such orders does not interfere with his frozen schedule as provided in paragraph (p).

(m) *Acceptance or fulfillment of orders in excess of authorized production.* No producer shall accept or fill any orders for tires for delivery in any quarterly period in excess of the percentage allocation of his facilities for the particular class of order established by his production directive issued under paragraph (e).

Claimant Agency Replacement

(n) *Replacement tires to claimant agencies; unplaced orders.* (1) A producer may produce and ship replacement tires to a claimant agency within the applicable percentage allocation of his facilities for replacement established by his production directive, provided not more than 40% of the tires in any size or group to be delivered to a claimant agency for replacement purposes during a quarterly period may be shipped in any calendar month during the period without specific authorization by the Office of Rubber Director, War Production Board.

(2) Any order for replacement tires which a claimant agency, after diligent effort on its part, is unable to place on or before the 15th day of the month preceding the first month of the quarterly period in which deliveries are requested, shall be referred by the claimant agency to the Office of Rubber Director within 5 days after the expiration of the period for placement of orders. The Office of Rubber Director will endeavor to place any such order on the basis of open capacity reports received from producers and in the event that the order cannot be placed without adversely affecting the interests of one or more claimant agencies, disposition of the unplaced order shall be made in consultation with the claimants affected.

Scheduling Provisions

(o) *Directions by military claimant agencies.* Within its allotment, each military claimant agency may issue the following written directions to a producer:

(1) Diverting a particular shipment of tires scheduled for its account by the producer from one vehicle manufacturer to another or for replacement purposes (or vice versa).

(2) Changing tire sizes to be produced for its account by a producer within a particular sub-group, provided neither the productive capacity required nor the total number of tires to be produced is increased by the change.

This paragraph does not apply to original equipment tires which have been allotted to vehicle manufacturers by the appropriate War Production Board Division on behalf of a military claimant, in which case action may be taken only under paragraph (q) upon recommendation of the appropriate War Production Board Division to the Office of Rubber Director.

Copies of directions issued under this paragraph should be transmitted to the Office of Rubber Director, War Production Board.

(p) *Frozen production schedule.* On the first day of the quarterly period, each producer's production schedule shall become a frozen schedule within the meaning of Priorities Regulation No. 18 for the quarterly period, and may not be altered except as provided in that regulation. Written directions may, however, be issued by a claimant agency in accordance with paragraph (o).

The following orders shall automatically become part of a producer's frozen schedule:

(1) Orders for original equipment tires which have been certified under paragraph (h) and which the producer has accepted and agreed to ship during the quarter.

(2) Orders placed with him by the Office of Rubber Director, War Production Board on the basis of his open capacity report for the quarterly period.

(3) Orders for replacement tires which he has accepted and agreed to fill during the quarterly period.

(q) *Other scheduling provisions.* With respect to the production or shipment of tires, the War Production Board may notwithstanding any other order, pref-

erence rating, directive, rule, or regulation (except Priorities Regulation No. 18) of the War Production Board or other Governmental agency:

(1) Direct the return or cancellation of any purchase order on the books of a producer.

(2) Direct changes in the production or shipping schedule of a producer.

(3) Cancel purchase orders placed with one producer and direct that they be placed with another producer.

Miscellaneous Provisions

(r) *Effect of preference ratings.* Within the percentage allocation of his facilities for each class of order, a producer shall accept orders without regard to preference ratings. Receipt of higher rated orders after acceptance of lower rated orders of the same class does not furnish any basis for rejecting the lower rated orders, even though it means that the higher rated orders must be refused because the allocation of the producer's facilities applicable to orders of that class has been filled.

The above applies only to the acceptance of orders (certified in the case of vehicle manufacturers) during the period for placement which expires on the 15th day of the month preceding the quarter.

In arranging the sequence of production and shipments of orders in each tire sub-group after the period for placing orders has expired, the producer shall be governed by Priorities Regulation No. 1, unless otherwise directed in writing by the Office of Rubber Director, War Production Board under the provisions of this order.

(s) *Status of unfilled orders at end of quarter.* Unless authorized in writing by the Office of Rubber Director, War Production Board, no producer shall carry over any order which he has accepted for delivery during a particular quarter and which he has been unable to produce and ship during that quarter to the following quarter. Any vehicle manufacturer whose certified order was not produced and shipped during the quarterly period for which it was accepted, should refer his unfilled order to the claimant agency or War Production Board Division from which he received his authorization.

(t) *Duplication of orders.* No purchaser of tires shall duplicate an order for tires in any group or sub-group even though he intends to cancel or reduce his orders to the authorized or allotted amount prior to delivery.

(u) *Use of producer's interchangeable facilities.* A producer shall use his interchangeable facilities in accordance with List 6, Appendix II, Rubber Order R–1 as amended.

(v) *Farm machinery.* No "producer" of farm machinery and equipment (as defined in Order L–257) shall use for original equipment purposes any pneumatic tires allotted to him under this order except for the following items of equipment within his quota under Orders L–257 and L–257a.

(1) Wheel type tractors including garden type.

(2) Combines.

(3) Pick-up hay balers and field hay harvesters.

(4) Corn pickers.

(5) Power sprayers over 10 gallons per minute.

(w) *Applicability of regulations.* Except as otherwise provided, this order and all transactions affected thereby are subject to all applicable provisions of the regulations of the War Production Board as amended from time to time.

(x) *Appeals.* Any appeal from the provisions of this order shall be made in writing to the Office of Rubber Director, War Production Board, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(y) *Communications.* All reports required to be filed under this order and all communications concerning this order shall, unless otherwise directed, be addressed to the Production and Priorities Department, Office of Rubber Director, War Production Board, Washington 25, D. C., Reference: Order R–1.

Issued this 16th day of February 1944.

Chapter XI—Office of Price Administration

PART 1448—EATING AND DRINKING ESTABLISHMENTS

[Restaurant MPR 6–2]

FOOD AND DRINK SOLD FOR IMMEDIATE CONSUMPTION IN CHICAGO REGION

In the judgment of the Regional Administrator, the prices of food and beverages sold for immediate consumption in Region VI have risen in some instances to an extent and in a manner inconsistent with the Emergency Price Control Act of 1942, as amended, and Executive Orders 9250 and 9328.

In the judgment of the Regional Administrator for Region VI, the maximum prices established by this regulation are generally fair and equitable and are necessary to check inflation and to effectuate the purposes of the act. So far as practicable, the Regional Administrator gave due consideration to prices prevailing between October 1 and 15, 1941, and consulted with the representatives of those affected by this regulation.

A statement of the considerations involved in the issuance of this regulation is issued simultaneously herewith.*

Therefore, in accordance with the direction of the President to take action which will stabilize prices affecting the cost of living, and under the authority therewith delegated by the President pursuant to the Act of Congress approved October 2, 1942, entitled "An Act to Aid in Stabilizing the Cost of Living," 77th Congress, Second Session, and under the authority of Executive Order 9250, Executive Order 9328, and the Emergency Price Control Act of 1942, the Regional Administrator for Region VI hereby issues this Restaurant Maximum Price Regulation No. 6–2 establishing, in general, as maximum prices for food and drink sold for immediate consumption in the states of Iowa, Minnesota, Nebraska, North Dakota, South Dakota, Wisconsin and Illinois, except the counties of Cook, Du Page, Kane, Lake and McHenry, the prices prevailing therefor during the seven-day period beginning April 4, 1943, and ending April 10, 1943.

§ 1448.502 *Maximum prices for food and drink sold for immediate consumption.* Under the authority vested in the Regional Administrator for Region VI by the Emergency Price Control Act of 1942, as amended, Executive Order 9250, Executive Order 9328, and General Order No. 50, issued by the Office of Price Administration, Restaurant Maximum Price Regulation No. 6–2 (Food and Drink Sold for Immediate Consumption), which is annexed hereto and made a part hereof, is issued.

AUTHORITY: § 1448.502 issued under 56 Stat. 23, 765; Pub. Law 151, 78th Cong.; E.O. 9250, 7 F.R. 7871, E.O. 9328, 8 F.R. 4681; Gen. Order 50, 8 F.R. 4808.

SECTION 1. *Sales at higher than maximum prices prohibited.* If you own or operate a restaurant, hotel, bar, cafe, club, delicatessen, soda fountain, boarding house, or any other eating or drinking place, you must not offer or sell any "Food Item" (including any beverage) or "meal" at a price higher than the maximum price which you figure according to the directions in the next two sections (sections 2 and 3). You may, of course, sell at lower than maximum prices.

SEC. 2. *How you figure maximum prices for food items and meals you offered in the seven-day period from April 4, 1943, to April 10, 1943.* (a) Your maximum price for any food item or meal other than a bakery product, which you offered in the seven-day period beginning Sunday April 4, 1943, and ending April 10, 1943, is the highest price at which you offered the same food item or meal in that seven-day period.

(b) Your ceiling price for any bakery product sold separately and not as part of a meal, is the highest price charged during the seven-day period, plus the amount, if any, by which the cost of such bakery product has been increased by your customary supplier after April 10, 1943 and before November 15, 1943.

SEC. 3. *How you figure maximum prices for food items and meals you did not offer in the seven-day period.* You must figure your maximum price for a food item or meal which you did not offer during the seven-day period as follows:

(a) If you offered the same food item or meal at any time during the four weeks from March 7 to April 3, 1943, inclusive, and if you have adequate records of the prices you then charged, take as your maximum price the highest price at which you offered that food item or meal during that four-week period.

(b) If you did not offer the food item or meal during the five-week period from March 7 to April 10, 1943, inclusive, or if you do not have adequate records of prices charged prior to the seven-day period you must proceed as follows:

(1) Determine the cost of the raw food which you use in preparing the new food item or meal.

(2) From the food items and meals for which you have already established maximum prices, choose a food item or meal which currently has a raw food cost equal to or less than the new food item or meal.

(3) Take as your maximum price for the new food item or meal your maximum price for the food item or meal chosen for comparison. The food item or meal chosen for such comparison should be of the same class as the new food item or meal. (See sections 20 and 21 for definitions and classes of food items and meals.) If, however, you have no food item or meal of the same class, you may use for comparison the most similar food item or meal of another class having a food cost equal to or less than your food cost for the new food item or meal. "Currently" as used herein means current on the day you figure your price.

(c) If you are unable to determine a maximum price for a new food item or meal according to paragraphs (a) or (b), then your maximum price is a price which is in line with your maximum prices for other food items or meals in the next higher cost range. A price is "in line" if the customer receives as much value for his money from the one item or meal as from the other. In comparing values, quality, size of portions and the margin over food cost, are the things that count. A price established under this paragraph must always be lower than the price for the food item or meal used as the basis for computing the "in line" price.

(d) Once your maximum price for a food item or meal has been fixed, it may not be changed, except as provided in section 4.

SEC. 4. *How you figure your prices for seasonal items.* First, determine your maximum price for a "seasonal food item" (defined in section 20 (e) in accordance with the appropriate rule of sections 2 and 3 of this regulation). Thereafter, this price must be varied in proportion to any seasonal change in the raw food cost of the item: *Provided,* That in no event shall the price be higher than the maximum price as originally determined. If in the past it has been your practice to maintain one price throughout the season, you need not vary your maximum price according to this rule provided the maximum price was based upon estimated average raw food cost of the item for the entire season.

SEC. 5. *No maximum price for any food item or meal to be higher than the highest maximum price for a food item or meal of the same class offered in the five-week period beginning March 7, 1943 and ending April 10, 1943.* Under no circumstances are you permitted to charge a higher price for a new food item or meal than your highest price for food items or meals of the same class offered in the five-week period beginning March 7, 1943 and ending April 10, 1943.

The provisions of this section shall not apply to seasonal dessert specialties specified in section 21 (a), class 25.

SEC. 6. *Holiday differentials.* Notwithstanding the provisions of the foregoing section, any proprietor who has, customarily, in the regular course of his business, charged higher prices for food items or meals on holidays, such as New Year's Eve, Thanksgiving Day, Labor Day, etc. may continue to maintain his customary differentials.

SEC. 7. *Substitution of food items in meals.* If you have already determined your maximum price for a meal you may substitute for any food item other than the entree (or main dish) in that meal any other food item of the same class without refiguring your maximum price, provided the new food item costs you approximately as much and offers customers about the same value as the food item which it replaces. A meal becomes a "new" meal whenever the entree (or main dish) is changed or a new food item is substituted which costs you less or offers your customers lower value than the food item which it replaces, and you must therefore determine its maximum prices in accordance with the rules established by section 3.

SEC. 8. *Prohibition against manipulation of meal offerings.* You must not manipulate your meal offerings in a manner which will force your customers to spend more for meals than they did during the seven-day period. Among other things you must not:

(a) Reduce the number of meals offered at prices equal to or below your "middle price" for meals of the same class served on any day during the seven-day period without making a corresponding reduction in the number of meals offered at prices above that middle price. By "middle price" is meant the price most nearly at the mid-point of your price range for meals of the same class. (Note that Sunday meals and week-day meals are meals of different classes.)

(b) Fail to offer at least as many different meals at (or below) the lowest price charged by you for meals of the same class on any day you select in the seven-day period, as you did on that day.

SEC. 9. *Evasion.* (a) You must not evade the provisions of this regulation by any scheme or device whatsoever. Some, but not all, practices which will be regarded as evasive are:

(1) Dropping food items from meals, deteriorating quality or reducing quantity without making appropriate reductions in price. For any change in quantity or quality resulting in a cost saving, you shall reduce your maximum price by an amount which is proportionate to the saving in cost. (You must maintain a raw food cost ratio at least equal to such ratio prior to the deterioration or reduction);

(2) Withdrawing the offer, or increasing the price of any meal ticket, weekly rate, or other arrangement by which customers may buy food items or meals at less than the prices they must pay when purchasing by item or meal;

(3) Increasing any cover, minimum, bread-and-butter, service, corkage, entertainment, check-room, parking or other special charges, or increasing any additional charge for the sale of a food item or meal to be consumed off the premises, or making such charges when they were not in effect in the seven-day period, except that a cover or minimum charge in effect during the seven-day period may be increased in accordance with

*Copies may be obtained from the Office of Price Administration.

customary practice, where it was the practice to vary the charge in accordance with the type of entertainment offered and the increase does not cause the charge to go above the highest charge made during the last twelve-month period;

(4) Discontinuing a no-tipping practice without a compensating reduction in your maximum prices;

(5) Requiring as a condition of sale of an item or meal the purchase of other items or meals when such condition was not in effect during the seven-day period, except that you may refuse to sell coffee unless a customer also purchases another food item;

(6) Reducing the selection of meals offered at table d'hote prices when the food items which you customarily offered in such meals are being offered at a la carte prices which, when added together, total more than the table d'hote price for the complete meal or give your customers less value for their money.

(b) You will not be considered evading the provisions of this regulation, however, if you do any of the following things, even though you did not do any of these things during the seven-day period:

(1) You may limit your customers to one cup of coffee per meal.

(2) You may limit your customers to one pat of butter per meal, and when necessitated by the restrictions of the rationing program, you may vary the size of such pat of butter.

(3) You may limit the amount of cream served with any food item or meal or you may substitute milk for cream when either action is necessitated by the restrictions of any War Food Administration distribution order or other allocation or rationing regulation.

(4) You may reduce the quantity, or eliminate altogether, condiments (such as catchup, chili sauce, etc.) which you may have customarily placed at the disposal of your customers and which now are, or may hereafter be, subject to any rationing order or rationing regulation of the Office of Price Administration.

(5) You may reduce the amount of sugar served with each cup of coffee or tea, or each bowl of cereal, fruit or other similar food items with which sugar is served, to but not less than, one teaspoonful, except that less may be served if your available supply is not adequate.

You may not, however, make the curtailment authorized in the foregoing subparagraphs and furnish the curtailed item at an additional charge. For example, if during the seven-day period you furnished catchup, you may not now discontinue furnishing this item free, and at the same time offer to furnish it for an additional charge.

SEC. 10. *Rules for proprietors not in operation during the seven-day period.* (a) If you acquire another's business subsequent to the effective date of this regulation and continue the business in the same place, you are subject to the same maximum prices and duties as the previous proprietor. Prior to acquiring another's business, however, you may apply to your District Office for permission to price under paragraph (b) or (c) of this section. If such permission is granted, it may be subject to such conditions as the Director of the appropriate District Office of the Office of Price Administration deems necessary in order to insure that maximum prices are established in line with those prevailing during the period April 4 to 10, 1943.

(b) If you were not in operation during the seven-day period, you must fix maximum prices in line with the maximum prices of the nearest eating or drinking place of the same type as yours. If the maximum prices thus fixed are not so in line, the Director of the appropriate District Office of the Office of Price Administration may issue an order requiring you to reduce your maximum prices. You are subject to the record requirements of section 12 and the posting requirements of section 13 immediately upon the opening of your place.

(c) If you cannot price under paragraphs (a) or (b) above, you must apply for a price to the appropriate District Office. Your application must be filed ten days prior to the date you plan to commence operations and present the following information:

(1) Your name and address.

(2) A brief description of your business and the manner of operation.

(3) The menus or price lists required to be filed under section 12 (b) and, if you are a seasonal operator, the prices you charged during a representative week of your last season.

(4) The date when you plan to commence operations.

(5) The names of two establishments similar to yours.

You may charge the prices listed if they are not disapproved by the Director of the appropriate District Office of the Office of Price Administration prior to the date specified for the commencement of operations. The Director may, at any time, after proper investigation and hearing, establish maximum prices for your business in line with the maximum prices established under this regulation for eating and drinking places in the area covered by this regulation.

SEC. 11. *Taxes.* If in the seven-day period you stated and collected the amount of any tax (including the Illinois Retailers Occupational Tax) separately from the price you charged, you may continue to do so. You may also separately state and collect the amount of any new tax or of any increase in the amount of a previous tax on the sale of food or drink or on the business of selling food or drink, if the tax is measured by the number or price of items or meals.

SEC. 12. *Records*—(a) *Filing of menus.* General Order No. 50 required you to file with your War Price and Rationing Board on or before May 1, 1943, a signed copy of each menu or list of your prices in effect during the seven-day period beginning Sunday, April 4, 1943, and ending April 10, 1943. If you have not already filed, you must do so immediately. Failure to do so will also constitute a violation of this regulation.

(b) *Filing by proprietors not in operation during the seven-day period.* The proprietor of an eating or drinking place which was not open during the seven-day period (including newly opened places) shall file menus or a price list in accordance with paragraph (a) above, except that (1) the filing shall be for the seven-day period beginning with the first Sunday that place is open after April 4, 1943, and (2) the filing shall be made within three weeks of such first Sunday.

(c) *Records of the seven-day period.* You must make available for examination by any person during ordinary business hours a copy of each menu used by you in the seven-day period from April 4 to 10, 1943, or if you are a new proprietor, in the seven-day period referred to in paragraph (b) above. If you did not use menus, or if your menus were incomplete, you must make available for such examination a list of the highest prices you charged during such seven-day period.

(d) *Customary records.* You must preserve all your existing records relating to your prices, costs and sales. You must also continue to maintain such records as you ordinarily kept. All such records shall be subject to examination by the Office of Price Administration.

(e) *Future records.* Beginning with the effective date of this regulation, you must keep for examination by the Office of Price Administration, two copies of each menu used by you each day. If you do not use menus, you must prepare, in duplicate, and preserve for such examination, a record of the prices charged by you each day, except that you need not record prices which are the same as, or less than, prices you previously recorded for the same items or meals. Proprietors who operate a number of eating or drinking places in the same city which have customarily been subject to central control may keep the records required by this paragraph for those places at a central office or the principal place of business within the city.

SEC. 13. *Posting.* (a) Beginning March 6, 1944, each menu must have clearly and plainly written on or attached to it the following statement:

> All prices are our ceiling prices or below. By OPA regulation, our ceilings are based on our highest prices from April 4 to 10, 1943. Our menus or price lists for that week are available for your inspection.

If you were not in operation during the seven-day period April 4 to 10, 1943, substitute the following statement:

> All prices are our ceiling prices, or below. By OPA regulation, our ceilings as a new proprietor are in line with competitive prices from April 4–10, 1943. Our menus or price lists for our first week of operation are available for your inspection.

If you do not use menus, you must post the first statement quoted above at a place or places where it can easily be read by your customers.

(b) If you do not use menus, you must post your prices for food items and meals currently offered by you at a place or places where they can easily be read by your customers.

SEC. 14. *Operation of several places.* If you own or operate more than one eating or drinking place, you must do everything required by this regulation for each place separately except as provided in section 12 (e).

SEC. 15. *Relation to other maximum price regulations.* The provisions of this regulation shall supersede other regulations, including the General Maximum Price Regulation, heretofore issued by the Office of Price Administration, insofar as they establish maximum prices for meals and food items sold by eating and drinking places. However, a price charged during the seven-day period of this regulation shall not become a maximum price under this regulation if it exceeded the maximum price established by another regulation applicable at that time. In such case, the lawful maximum price applicable at that time shall be the maximum price hereunder.

SEC. 16. *Geographical application.* This Restaurant Maximum Price Regulation No. 6–2 applies to the states of Iowa, Minnesota, Nebraska, North Dakota, South Dakota, Wisconsin and Illinois, except the counties of Cook, Du Page, Kane, Lake and McHenry.

SEC. 17. *Enforcement.* Persons violating any provisions of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages and proceedings for suspension of licenses, provided for by the Emergency Price Control Act of 1942, as amended, and to administrative suspension order proceedings under any applicable rationing orders and Procedural Regulation No. 4.

SEC. 18. *Exempt sales.* Sales by the following eating or drinking places, or persons, are specifically exempt from the provisions of this regulation:

(a) Eating and drinking places operated in connection with special church, Sunday school and other religious occasions.

(b) Hospitals, except for food items and meals served to persons other than the patients when a separate charge is made for such food items and meals.

(c) Eating and drinking places located on board common carriers (when operated as such), including railroad dining cars, club, bar and buffet cars; peddlers aboard railroad cars traveling from station to station; and newsstands located on the premises of a railroad station.

(d) Eating and drinking places operated by a school, college, university or other educational institution or a students' fraternity or other students' organization or association primarily for the convenience or accommodation of students and faculty and not for profit as a commercial or business enterprise or undertaking.

(e) Eating cooperatives formed by officers in the Armed Forces (as for example, Officers' Mess) operated as a nonprofit cooperative (where no part of the net earnings inures to the benefit of any individual), which sells food items or meals on a cost basis (or as near thereto as reasonable accounting methods will permit), and substantially all sales which are made to officers who are members of the cooperative.

(f) Bona-fide private clubs which file with the appropriate District Office a statement setting forth that:

(1) The club is a non-profit organization and is recognized as such by the Bureau of Internal Revenue;

(2) It sells food items and meals only to members and bona-fide guests of members;

(3) Its members pay dues of more than a merely nominal amount (the amount of dues paid by each class of members and the period covered by such dues should be indicated) and are elected to membership by a governing board, membership committee, or other body; and

(4) It is otherwise operated as a club.

Five days after filing such information or earlier if so notified by the District Director, a private club may consider itself exempt unless and until it is otherwise notified by the District Director.

Any club which subsequent to such filing, changes its operations with respect to any of the requirements stated above shall immediately notify the appropriate District Office accordingly. Any club which sells food items or meals to persons other than members and bona-fide guests of members is subject to this regulation with respect to all sales.

SEC. 19. *Adjustments.* (a) Each District Director of the Office of Price Administration may adjust the maximum prices for any eating establishment located in his District under the following circumstances:

(1) The establishment is operating under such hardship as to cause a substantial threat to the continuance of its operations; and

(2) It is determined with reasonable certainty that such discontinuance will result in a serious inconvenience to consumers in that they will either be deprived of all restaurant service or will have to turn to other establishments that present substantial difficulties as to distance, hours of service, selection of meals or food items offered, capacity, or transportation; or

(3) By reason of such discontinuance, the same meals or food items will cost the customers of the eating establishment as much as or more than the proposed adjusted prices.

(b) If you are the proprietor of an eating establishment which satisfied the requirements specified above, you may apply for an adjustment of your maximum prices by submitting in duplicate to the appropriate District Office a statement setting forth:

(1) Your name and address.

(2) A description of your eating establishment including: type of service rendered (such as cafeteria, table service, etc.), classes of meals offered (such as breakfast, lunch and dinner), number of persons served per day during the most recent thirty-day period (in counting the number of persons served, anyone who was served more than once is to be counted separately for each occasion he was served), and such other information as may be useful in classifying your establishment.

(3) The reasons why your customers will be seriously inconvenienced if you discontinue operations.

(4) The names and addresses of the three nearest eating places of the same type as yours.

(5) A list showing your present maximum prices and your requested, adjusted prices.

(6) A profit and loss statement for your restaurant business for the most recent three-month accounting period, and a copy of your last income tax return if one was filed separately for your restaurant business.

(7) Such other information as the District Director may reasonably require to ascertain the facts called for by section 19 (a).

SEC. 20. *Definitions and explanations.* (a) "Person" means individual, corporation, partnership, association or other organized group of persons or legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, any other government, or any of its political subdivisions, and any agencies of any of the foregoing.

(b) "Meal" means a combination of food items sold at a single price. Examples of meals are a five-course dinner, a club breakfast, and a blue-plate special. Two or more kinds of food which are prepared or served to be eaten together as one dish are not a "meal." Examples of such dishes are: Ham and eggs, bread and butter, apple pie and cheese. See section 21 (b) for "classes of meals." Two "meals" may be considered the "same" only if they consist of identical combinations of food items, and belong to the same class of meals.

(c) "Offered" means offered for sale for consumption in or about the eating or drinking place, and includes the listing or posting of prices for items and meals even though the items and meals so offered were not actually on hand to be sold.

(d) "Food item" means an article or portion of food (including beverages) sold or served by an eating or drinking place for consumption in or about the place or to be taken out for eating without change in form or additional preparation. It includes two or more kinds of food which are prepared or served to be eaten together as one dish, such as ham and eggs, bread and butter, apple pie and cheese. Food items, otherwise identical, are not the same for the purpose of establishing maximum prices under sections 2 and 3, when they are items in different classes. (See section 21 (a) for "classes of food items".) For example: Lamb chops offered a la carte for dinner or lunch are in class 13 while if offered for breakfast, they are in class 4.

(e) "Seasonal food item" means a food item (including beverage) not generally offered for sale throughout the year and normally available in quantity only during certain seasonal production periods of each year. Examples are: certain shell-fish, such as oysters; certain fresh fish, such as salmon, trout and shad; certain vegetables, such as summer squash; and certain fruits, such as berries and melons.

(f) Unless the context otherwise requires, the definitions set forth in section 302 of the Emergency Price Control Act of 1942 and in the General Maximum Price Regulation, issued by the Office of Price Administration, shall apply to other terms used herein.

SEC. 21. *Classes of food items and meals.* (See definition of "food item" and "meal" contained in section 20.)

SEC. 23. *Licensing.* The provisions of Licensing Order No. 1, licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation or schedule. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

Under Licensing Order No. 1, a license is automatically granted without application by the seller.

SEC. 24. *Revocation and amendment.* (a) This regulation may be revoked, amended, or corrected at any time.

PART 1364—FRESH, CURED AND CANNED MEAT AND FISH PRODUCTS

[MPR 512]

ICELAND HERRING

In the judgment of the Price Administrator, the establishment of the maximum prices fixed by this regulation is necessary in order to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328.

The Price Administrator has consulted and advised with representative members of the industry which will be affected by the regulation. In the judgment of the Price Administrator the prices established are generally fair and equitable and will effectuate the purposes of the act. The prices established are not below the average prices for these types of sales in the year 1941.

Such specifications and standards as are used in this regulation were, prior to such use, in general use in the trade or industry affected, or insofar as they were not in general use, their use is essential to effectuate price control, and there is no effective alternative.

A statement of the considerations involved in the issuance of this regulation has been issued herewith and filed with the Division of the Federal Register.*

§ 1364.353 *Maximum prices for sales of Iceland herring.* Under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328, Maximum Price Regulation No. 512 (Iceland Herring), which is annexed hereto and made a part hereof, is hereby issued.

NOTICE TO WHOLESALERS AND RETAILERS

Our OPA ceiling price for (describe item by kind, variety, grade and container, type and size) has been changed by the Office of Price Administration. We are authorized to inform you that if you are a wholesaler or retailer pricing this item under Maximum Price Regulation No. 421, 422 or 423, you must refigure your ceiling price for this item on the first delivery of it to you from your customary type of supplier containing this notification after February 20, 1944. You must refigure your ceiling price following the rules in section 6 of Maximum Price Regulation No. 421, 422, or 423 whichever is applicable to you.

For a period of 60 days after determining the new maximum price for the item, and with the first shipment after the 60-day period to each person who has not made a purchase within that time, each seller shall include in each receptacle containing the item, the written notice set forth above, or securely attach it to the outside. However, for sales direct to any retailer, the seller may supply the notice by attaching it to, or stating it on, the invoice covering the shipment, instead of providing it with the goods.

(b) Such person shall, subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942, submit such reports to the Office of Price Administration and keep such other records in addition to or in place of the records required in paragraph (a) of this section as the Office of Price Administration may from time to time require.

SEC. 7. *Prohibition against selling or buying above maximum prices.* Regardless of any contract or obligation no person shall sell or deliver, or buy or receive in the course of trade any Iceland herring at a price higher than the maximum price established for it by this regulation; and no person shall agree, offer, solicit or attempt to do any of the foregoing.

However, prices lower than the maximum prices may be charged and paid.

SEC. 9. *Enforcement.* Any person violating a provision of this regulation is subject to the criminal penalties, civil enforcement actions, license suspension provisions, and suits for treble damages provided by the Emergency Price Control Act of 1942, as amended.

SEC. 10. *Licensing.* The provisions of Licensing Order No. 1, licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violation of the license or one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

ARTICLE IV—MISCELLANEOUS PROVISIONS

SEC. 11. *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1[3] issued by the Office of Price Administration.

SEC. 12. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual application for adjustment.

"Valve" means any manually or motor-operated device designed to regulate, direct, or stop the movement of any liquid, gas, or vapor, in a piping system, tank, or any other restricted area, and includes, but is not limited to, angle, check, cross, gate, globe, or plug valve, or any evolution of these basic types.

"Reconditioned valve" means any used valve which has been subjected to the following reconditioning steps:

(3) All defective or worn parts have been replaced with new parts;

(4) The valve has been reassembled and painted;

(5) A hydrostatic test at double the rated water working pressure of the valve has been applied and the valve was found to be free from leaks, defects, and in free working order.

"Manufacturer's net maximum price to jobbers" means the manufacturer's published list price less the applicable published ("J" sheet) discount extended by the manufacturer on sales to jobbers during the period October 1–15, 1941.

(f) *Installed sales.* The sale of a reconditioned valve or a used valve on an installed basis is not covered by this section. Such a sale is covered by the applicable Maximum Price Regulation.

(g) *Notification of purchasers of existence of this section 6.33.* Every person selling reconditioned valves or used valves subject to this section shall, before making an initial sale to each purchaser, notify each purchaser of the existence of this section and, upon request of such purchaser, make available a copy of it for examination.

In conformity with the Fair Labor Standards Act of 1938, as amended, and with § 511.11 of the rules and regulations issued pursuant thereto, notice is hereby given to all interested persons that a public hearing will be held beginning on March 15, 1944, at 10:00 a. m., in the Chamber of Commerce Auditorium, San Juan, Puerto Rico, for the purpose of receiving evidence to be considered by the Special Industry Committee No. 3 for Puerto Rico in determining the highest minimum wage rates for all employees in Puerto Rico who within the meaning of the said Act are "engaged in commerce or in the production of goods for commerce," which, having due regard to economic and competitive conditions, will not substantially curtail employment and will not give any industry in Puerto Rico a competitive advantage over any industry in the United States outside of Puerto Rico.

The Special Industry Committee No. 3 for Puerto Rico was created by Administrative Order No. 227 to be published in the FEDERAL REGISTER on February 17, 1944. It is charged, in accordance with the provisions of the Fair Labor Standards Act of 1938, as amended, and rules and regulations promulgated thereunder, with the duty of investigating conditions in the industries of Puerto Rico and of recommending to the Administrator minimum wage rates which may be lower than 30 cents but not higher than 40 cents per hour for all employees in Puerto Rico who within the meaning of said Act are "engaged in commerce or in the production of goods for commerce," excepting employees exempted by the provisions of section 13 (a) and employees coming under the provisions of section 14. Before any minimum wage rates recommended by the Committee are made effective, a public hearing will be held pursuant to section 8 of the act, at a time and place to be announced by the Administrator and at which all interested persons will have an opportunity to be heard.

Administrative Order No. 227 directed the Special Industry Committee No. 3 to proceed first to investigate conditions and to recommend to the Administrator minimum wage rates for employees in the sugar, rum, industrial alcohol, shipping, banking and insurance, tobacco and needlework industries and shall thereafter, in such order as the Committee may elect, investigate conditions respecting, and recommend minimum wage rates for, the employees in other industries in Puerto Rico.

Any person who, in the opinion of the Committee or its duly authorized subcommittee, has a substantial interest in the proceeding and is prepared to present material pertinent to the question under consideration, may appear on his own behalf or on behalf of any other person. Persons wishing to appear are requested to file with Russell Sturgis, Territorial Representative of the Wage and Hour Division, 606 Banco Popular Building, Tetuan and San Justo Streets, San Juan, Puerto Rico, not later than March 13, 1944, Notice of Intention to Appear, a copy of which is to be sent to the Administrator of the Wage and Hour Division, 165 West 46th Street, New York 19, New York. All testimony will be taken under oath and subject to reasonable cross-examination by any interested person present. Testimony so received will be offered as evidence at the public hearing to be held on such minimum wage recommendations as Special Industry Committee No. 3 for Puerto Rico may make.

Written statements of persons who cannot appear personally will be considered by the Committee provided that twenty copies thereof are received not later than March 13, 1944, at the Wage and Hour Division of the United States Department of Labor, 606 Banco Popular Building, Tetuan and San Justo Streets, San Juan, Puerto Rico. 1. The plan for joint action above referred to is hereby approved and the carriers are directed to put the plan in operation forthwith, subject to the following provisions, which shall supersede any provisions of such plan that are in conflict therewith.

2. Each of the carriers forthwith shall file a copy of this order with the appropriate regulatory body or bodies having jurisdiction over any operations affected by this order, and likewise shall file, and publish in accordance with law, and continue in effect until further order, tariffs or supplements to filed tariffs, setting forth any changes in rates, charges, operations, rules, regulations, and practices of the carrier which may be necessary to accord with the provisions of this order and of such plan; and forthwith shall apply to such regulatory body or bodies for special permission for such tariffs or supplements to become effective on the shortest notice lawfully permissible, but not prior to the effective date of this order.

3. Whenever transportation service is performed by one carrier in lieu of service by another carrier, by reason of a diversion, exchange, pooling, or similar act made or performed pursuant to the plan for joint action hereby approved, the rates, charges, rules, and regulations governing such service shall be those that would have applied except for such diversion, exchange, pooling, or other act.

4. The provisions of this order shall not be so construed or applied as to require any carrier subject hereto to perform any service beyond its transportation capacity, or to authorize or require any act or omission which is in violation of any law or regulation, or to permit any carrier to alter its legal liability to any shipper. In the event that compliance with any term of this order, or effectuation of any provision of such plan, would conflict with, or would not be authorized under, the existing interstate or intrastate operating authority of any carrier subject hereto, such carrier forthwith shall apply to the appropriate regulatory body or bodies for the granting of such operating authority as may be requisite to compliance with the terms of this order, and shall prosecute such application with all possible diligence. The coordination of operations directed by this order shall be subject to the carriers' possessing or obtaining the requisite operating authority.

5. All records of the carriers pertaining to any transportation performed pursuant to this order and to the provisions of such plan shall be kept available for examination and inspection at all reasonable times by accredited representatives of the Office of Defense Transportation.

6. The plan for joint action hereby approved and all contractual arrangements made by the carriers to effectuate the plan shall not continue in operation beyond the effective period of this order.

7. Communications concerning this order should refer to "Supplementary Order ODT 3, Revised-173," and unless otherwise directed, should be addressed to the Division of Motor Transport, Office of Defense Transportation, Washington, D. C.

This order shall become effective February 21, 1944, and shall remain in full force and effect until the termination of the present war shall have been duly proclaimed, or until such earlier time as the Office of Defense Transportation by further order may designate.

Issued at Washington, D. C., this 16th day of February 1944.

Regional and District Office Orders.

[Region II Order G-27 Under RMPR 122]

SOLID FUELS IN DELAWARE

Order No. G-27 under §§ 1340.260 and 1340.259 (a) (1) of Revised Maximum Price Regulation No. 122. Solid fuels sold and delivered by dealers. Solid fuels delivered by dealers in the State of Delaware—Delaware Coal Area I.

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator of the Office of Price Administration by §§ 1340.260 and 1340.259 (a) (1) of Revised Maximum Price Regulation No. 122, it is ordered:

(a) *What this order does*—(1) *Dealers' maximum prices; area covered.* If you are a dealer in solid fuels, this order fixes the maximum prices which you may charge, and if you are a purchaser in the course of trade or business, this order fixes the maximum prices which you may pay, for certain kinds, sizes and quantities of solid fuel, delivered to or at any point in the State of Delaware. That area comprises two zones as follows:

Zone 1: Zone 1 includes that portion of the State of Delaware north of the Chesapeake and Delaware Canal with the exception of the towns of St. Georges and Delaware City.

Zone 2: Zone 2 comprises all of the State of Delaware not included in Zone 1.

(2) *Schedules of prices, charges and discounts.* The applicable prices, authorized charges and required discounts, from which you shall determine the maximum prices for designated kinds, sizes and quantities of solid fuels delivered within Zones 1 and 2 are set forth in Schedules I and II hereafter.

(3) *To what sales this order applies.* If you are a dealer in solid fuels, you are bound by the prices and discounts, and by all other provisions of this order for all deliveries within Zones 1 and 2.

You shall determine the maximum price for "Direct-Delivery" sales, as hereinafter defined, by reference to the appropriate Schedule of this order covering the zone to which delivery is made, whether or not you are located in one of the two zones.

You shall determine your maximum price for a "yard" sale, as hereinafter defined, by reference to the appropriate schedule of this order covering the zone in which the purchaser takes physical possession or custody of the anthracite.

(b) *What this order prohibits.* Regardless of any contract or other obligations, you shall not:

(1) Sell or, in the course of trade or business, buy solid fuels of the kinds, sizes, and in the quantities set forth in the schedules herein, at prices higher than the maximum prices computed as set forth in paragraph (c) of this order, although you may charge, pay or offer less than maximum prices.

(2) Obtain any price higher than the applicable maximum price by:

(i) Changing the discounts authorized herein, or

(ii) Charging for any service which is not expressly requested by the buyer, or

(iii) Charging for any service for which a charge is not specifically authorized by this order, or

(iv) Charging a price for any service higher than the Schedule price for such service, or

(v) Using any tying agreement or requiring that the buyer purchase anything in addition to the fuel requested by him, except that a dealer may comply with requirements or standards with respect to deliveries which have been or may be issued by an agency of the United States Government.

(vi) Using any other device by which a higher price than the applicable maximum price is obtained, directly or indirectly.

(c) *How to compute maximum prices.* You must figure your maximum price as follows:

(1) *Use the schedule which covers your sale.* (Schedule I applies to sales on a "direct-delivery" basis, "yard sales", and "sales of bagged coal" within Zone 1. You will find Schedule I in paragraph (d). In like manner, Schedule II applies to similar sales in Zone 2. You will find Schedule II in paragraph (e).)

(2) Take the dollars-and-cents figure set forth in the applicable table of the schedule, for the kind, size, and quantity of solid fuel you are selling.

(3) Deduct from that figure the amount of the discount which you are required to give, as specified therein. Where a discount is required, you must state it separately on your invoice.

(4) If, at your purchaser's request, you actually render him a service for which this order authorizes a charge, you may add to the figure obtained as above no more than the maximum authorized service charge. You must state that charge separately on your invoice. The only authorized service charges are those provided for in the schedules.

(5) If you deliver a fraction of a net ton, even if less than one-half ton, and the applicable schedule provides a discount on the basis of one ton or one-half ton, you shall allow a proportionate discount, making your calculation to the nearest full cent. For example, if you are required to deduct 75¢ per ton for each payment, you shall deduct 56¢ for three-quarters of a ton.

(6) If you deliver a fraction of a net ton, but not less than one-half ton, and the applicable schedule provides a serv-

ice charge on the basis of one ton, you shall add no more than a proportionate service charge, making your calculation to the nearest full cent. For example, if the transaction permits a service charge of 50¢ per ton, you shall not add more than 38¢ for performance of that service in connection with the delivery of three-quarters of a ton.

(d) *Schedule I.* Schedule I establishes specific maximum prices for certain kinds, sizes, and quantities of solid fuels, delivered to or at any point within Zone 1. There is a separate table of prices for "direct-delivery" sales, "yard sales", and "sales of bagged coal".

Where a purchaser requests that two or more sizes or kinds of fuel be commingled in one delivery, then, in that event, if those sizes and kinds are separately weighed at the point of loading, or when bagged, the dealer may commingle those sizes and kinds in the truck or other vehicle, or in the bags, in which the delivery is made. The price for fuel so commingled shall be calculated on the basis of the applicable per net ton price, or, in the case of bagged coal, on the basis of the applicable bagged price, for each size and kind in the combination, and the invoice shall separately state the price, so determined ,for the quantity of each size and kind in the combination.

(g) *Ex Parte 148; freight rate increase.* Since the ex parte freight rate increase has been rescinded by the Interstate Commerce Commission, dealers' freight rates are the same as those of December, 1941. Therefore, you may not increase any scheduled price on account of freight rates.

(h) *Addition of increase in suppliers' maximum prices prohibited.* You may not increase the specific maximum prices established by this order to reflect, in whole or in part, any subsequent increase to you in your suppliers' maximum price for the same fuel. The specific maximum prices already reflect increases to you in your supplier's maximum prices occurring up to the effective date of this order. If increases in your supplier's maximum prices should occur after such date, as the result of any amendment to or revision of a maximum price regulation issued by the Office of Price Administration governing sales and deliveries made by such suppliers, the Regional Administrator will, if he then deems it to be warranted, take appropriate action to amend this order to reflect such increases.

(i) *Taxes.* If you are a dealer subject to this order you may collect, in addition to the specific maximum prices established herein, provided you state it separately, the amount of the Federal tax upon the transportation of property imposed by section 630 of the Revenue Act of 1942 actually paid or incurred by you, or any amount equal to the amount of such tax paid by any of your prior suppliers and separately stated and collected from you by the supplier from whom you purchased. On sales to the United States or any agency thereof, or to the State of Delaware or any political subdivision thereof, you need not state this tax separately.

(j) *Adjustable pricing.* You may not make a price adjustable to a maximum price which will be in effect at some time after delivery of the fuel has been completed; but the price may be adjustable to the maximum prices in effect at the time of delivery.

(k) *Petitions for amendment.* Any person seeking an amendment of any provision of this order may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1, except that the petition shall be filed with the Regional Administrator and acted upon by him.

(l) *Right of amendment or revocation.* The Regional Administrator or the Price Administrator may amend, revoke or rescind this order, or any provisions thereof, at any time.

(m) *Applicability of other regulations.* If you are a dealer subject to this order, you are governed by the licensing provisions of Licensing Order 1. Licensing Order 1 provides, in brief, that a license is required of all persons making sales for which maximum prices are established. A license is automatically granted. It is not necessary to apply for the license. The license may be suspended for violations in connection with the sale of any commodity for which maximum prices are established. If your license is suspended, you may not sell any such commodity during the period of suspension.

(n) *Records.* If you are a dealer subject to this order, you shall preserve, keep, and make available for examination by the Office of Price Administration, a record of every sale of solid fuels hereunder, showing the date, the name and address of the buyer, if known, the per net ton price charged, and the solid fuel sold. The solid fuel shall be identified in the manner in which it is described in the order. The record shall also state separately each service rendered and the charge made for it.

(o) *Posting of maximum prices: Sales slips and receipts.* (1) If you are a dealer subject to this order, you shall post all your maximum prices (as set forth in the applicable schedule or schedules of this order) in your place of business in a manner plainly visible to and understandable by the purchasing public.

(2) If you are a dealer subject to this order, you shall, except for a sale of less than one-half ton, give each purchaser a sales slip or receipt showing your name and address, the kind, size, and quantity of fuel sold to him, the date of the sale or delivery and the price charged, separately stating the amount, if any, of the required discounts which must be deducted from and the authorized service charges and the taxes, which may be added to the specific maximum prices prescribed herein.

In the case of all other sales, you shall give each purchaser a sales slip or receipt containing the information described in the foregoing paragraph, if requested by such purchaser or if, during December 1941, you customarily gave purchasers such sales slips or receipts.

(p) *Enforcement.* (1) Persons violating any provision of this order are subject to civil and criminal penalties, including suits for treble damages, provided for by the Emergency Price Control Act of 1942, as amended.

(2) Persons who have any evidence of any violation of this order are urged to communicate with the Wilmington District Office of the Office of Price Administration; or with the Price Panel of the Appropriate War Price and Rationing Board.

(q) *Definitions and explanations.* When used in this Order No. G-27, the term:

(1) "Person" includes an individual, corporation, partnership, association or any other organized group of persons, or legal successor or representative of the foregoing, and includes the United States or any agency thereof, or any other government, or any of its political sub-divisions, or any agency of any of the foregoing.

(2) "Sell" includes sell, supply, dispose, barter, exchange, lease, transfer, and deliver, and contracts and offers to do any of the foregoing. The terms "sale", "selling", "sold", "seller", "buy", "purchase" and "purchaser" shall be construed accordingly.

(3) "Dealer" means any person selling solid fuel of the kinds and sizes set forth in the schedules herein, and does not include a producer or distributor making sales at or from a mine, a preparation plant operated as an adjunct of any mine, or a briquette plant.

(4) "Direct-delivery", except with respect to sales in 100 lb. lots, means delivery to the buyer's bin or storage space by dumping or chuting directly from the seller's truck or other vehicle or, where such delivery to the buyer's bin or storage space is physically impossible, by discharging at the point nearest and most accessible to the buyer's bin or storage space and at which the coal can be discharged directly from the seller's truck. "Direct-delivery" in 100 lb. lots shall mean depositing in buyer's bin or other storage space designated by buyer.

(5) "Carry" and "wheel" refer to the movement of solid fuel to buyer's bin or storage space, in baskets or other containers, or by wheelbarrow or barrel, from the seller's truck or other vehicle, or from the point nearest and most accessible to the buyer's bin or storage space at which coal is discharged from the seller's truck in the course of "direct delivery".

SOLID FUELS IN AKRON, BARBERTON, CUYAHOGA FALLS, OHIO

Revised Order No. G–5 under Revised Maximum Price Regulation No. 122. Solids fuels sold and delivered by dealers. Maximum prices for specified solid fuels in the municipalities of Akron, Barberton, and Cuyahoga Falls in the State of Ohio.

For the reasons stated in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator of Region III of the Office of Price Administration by § 1340.260 of Revised Maximum Price Regulation No. 122, it is hereby ordered:

(a) *What this order does.* This order establishes maximum prices for sales of specified solid fuels made within the corporate limits of Akron, Barberton, and Cuyahoga Falls, Ohio. These are the highest prices that any dealer may charge when he delivers such fuel at or to a point in such area; they are also the highest prices that any buyer in the course of trade or business may pay for them.

(b) *What this order prohibits.* Regardless of any obligation, no person shall:

(1) Sell or, in the course of trade or business, buy solid fuels at prices higher than the maximum prices set by this Revised Order No. G–5, but less than maximum prices may at any time be charged, paid or offered;

(2) Obtain a higher than ceiling price by:

(i) Charging a higher price than the scheduled price for a service or making a charge for a service not authorized by this order,

(ii) Making a charge higher than the scheduled charge authorized for the extension of credit,

(iii) Using any other device by which a higher than maximum price is obtained, directly or indirectly,

(iv) Using any tying agreement or requiring that the buyer purchase anything in addition to the fuel requested by him, except that a dealer may comply with any requirements or standards with respect to deliveries which have been or may be issued by an agency of the United States Government.

(c) *Schedule for sales of coal*—(1) *Price schedules.* This schedule sets forth maximum prices for sales of specified sizes, kinds, and quantities of solid fuels. Column I describes the coal for which prices are established; Column II shows maximum prices for sales on a "direct delivery" basis, where account *is not* paid within thirty (30) days from date of delivery; Column III shows maximum prices for sales on a "direct delivery" basis, where account *is* paid within thirty (30) days from date of delivery (including cash sales); Column IV shows maximum cash or credit prices for all "yard sales" to dealers and to consumers. All prices are for sales on a net ton basis.

(d) The maximum prices for all sales by dealers of solid fuel not provided for by this revised Order No. G–5 shall be the maximum prices established by Revised Maximum Price Regulation No. 122.

(e) *Schedule of service charges.* The maximum price for any service rendered by a dealer in connection with a sale or handling of solid fuel shall be the highest price charged by the dealer during December 1941 for the same service. If, during December 1941, the dealer rendered any service without charge, he shall continue to do so. Although a dealer may have, during December 1941, rendered other services than those here enumerated, dealers customarily render these services subject to this order: carry, wheel, trimming and storing in the bin, bagging, shovel and dust treatment of coal.

(f) *The transportation tax.* The transportation tax imposed by section 620 of the Revenue Act of 1942 may be collected in addition to the maximum prices set by this order, provided the dealer states it separately from the price on his invoice or statement. However it need not be stated separately on a sale to the United States or any agency thereof, the District of Columbia, any state government or any political subdivision thereof.

(g) *Addition of increase in suppliers prices prohibited.* The maximum prices set by this order may not be increased by a dealer to reflect increases in purchase costs or in supplier's maximum prices occurring after the effective date hereon; but increases in the maximum prices set hereby to reflect such increases are within the discretion of the Regional Administrator.

(h) *Petitions for amendment.* Any person seeking an amendment of any provision of this order may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1 except that the petition shall be filed with the Regional Administrator and acted upon by him.

(j) *Right of amendment or revocation.* The Regional Administrator or Price Administrator may amend, revoke or rescind this order, or any provision thereof, at any time.

(k) *Records.* Every person making a sale of solid fuel for which a maximum price is set by this order shall keep a record thereof showing the date, the name and address of the buyer, if known, the per net ton price charged and the solid fuel sold. The solid fuel shall be identified in the manner in which it is described in the order. The record shall also separately state each service rendered and the charge made for it.

(l) *Posting of maximum prices; sales slips.* (1) Each dealer subject to this order shall post all the maximum prices set by it for all his types of sales. He shall post his prices in his place of business in a manner plainly visible to and understandable by the purchasing public. He shall also keep a copy of this order available for examination by any person inquiring as to his prices for solid fuel. No report of the maximum prices established by this order need be made by any dealer under § 1340.262 (c) of Regulation No. 122.

(2) Every dealer selling solid fuel for sales of which a maximum price is set by this order shall, within thirty days after the date of delivery of the fuel, give to the buyer a statement showing: the date of the sale, the name and address of the dealer and of the buyer, the kind, size, and quantity of the solid fuel sold, the price charged and separately stating any item which is required to be separately stated by this order.

(m) *Enforcement.* (1) Persons violating any provision of this order are subject to civil and criminal penalties, including suits for treble damages, provided for by the Emergency Price Control Act of 1942, as amended.

(2) Persons who have any evidence of any violations of this order are urged to communicate with Cleveland District Office of the Office of Price Administration.

(3) "Dealer" means any person selling solid fuel except producers or distributors making sales at or from a mine, a preparation plant operated as an adjunct of any mine, a coke oven, or a briquette plant.

(4) "Direct delivery" means dumping or chuting the fuel from the seller's truck directly into the buyer's bin or storage space; but, if this is physically impossible, the term means discharging the fuel directly from the seller's truck at a point where this can be done and at the point nearest and most accessible to the buyer's bin or storage space.

(5) "Yard sales" shall mean deliveries made by the dealer in his customary manner at his yard or at any place other than his truck.

THE NORTH AMERICAN CO.

NOTICE REGARDING FILING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 12th day of February, 1944.

Notice is hereby given that a declaration or application (or both) has been

filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by The North American Company, a registered holding company.

Notice is further given that any interested person may, not later than February 25, 1944, at 5:30 p. m., e. w. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request and the nature of his interest, or may request that he be notified if the Commission should order a hearing thereon. At any time thereafter, said declaration or application, as filed or as amended, may be granted, as provided in Rule U-23 of the rules and regulations promulgated pursuant to said act, or the Commission may exempt such transaction as provided in Rules U-20 (a) and U-100 thereof. Any such request should be addressed: Secretary, Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania.

All interested persons are referred to said declaration or application, which is on file in the office of the said Commission, for a statement of the transactions therein proposed, which are summarized below:

The North American Company proposes to pay on April 1, 1944, a dividend to its holders of common stock of record on March 3, 1944. Such dividend will be payable in the common stock of Pacific Gas and Electric Company having a par value of $25 per share, owned by The North American Company, at the rate of one share of common stock of Pacific Gas and Electric Company on each 100 shares of the common stock of The North American Company outstanding. No certificates will be issued for fractions of shares of stock of Pacific Gas and Electric Company, but, in lieu thereof, cash will be paid at the rate of 31 cents for each 1/100th of a share of stock of Pacific Gas and Electric Company, this rate being based on the approximate market price as of February 9, 1944, the date the proposed dividend was declared. The North American Company estimates that the payment of the above-mentioned dividend will involve the distribution of not more than 75,000 shares of the 1,785,621 shares of common stock of Pacific Gas and Electric Company owned by it and use of not more than $420,000 of cash; and that the payment of such dividend will result in a charge of approximately $2,800,000 to earned surplus.

The North American Company has requested that the Commission enter an order permitting said declaration to become effective or granting said application on or before February 28, 1944.

By the Commission.

PART 1075—CONSTRUCTION

[Preference Rating Order P-19-h, Interpretation 1]

CMPL-224 AND GA-1456 AUTHORIZATIONS

The following interpretation is issued with respect to Preference Rating Order P-19-h:

Reference is made in various War Production Orders to P-19-h orders or to orders in the P-19 series, and in some of these orders the delivery of material or equipment is not allowed, unless the material or equipment is rated under a P-19-h order or an order in the P-19 series. Order P-19-h has in a large measure been superseded by CMPL-224 authorizations and this last form has in turn been superseded by form GA-1456. Consequently any reference to a P-19-h order or to an order in the P-19 series is also reference to an authorization on form CMPL-224 or GA-1456, and if the delivery of an item is permitted under a P-19-h order or an order in the P-19 series it also may be delivered under a CMPL-224 or GA-1456 authorization.

Issued this 17th day of February 1944.

A statement of the considerations involved in the issuance of this amendment issued simultaneously herewith has been filed with the Division of Federal Register.*

Maximum Price Regulation No. 120 is amended in the following respects:

1. In § 1340.210 (a) (10), the clause, "except as otherwise provided in subdivision (i) below for the services indicated therein" is amended to read, "except as is otherwise provided in subdivisions (i) and (ii) below".

2. Section 1340.210 (a) (10) (i) is redesignated § 1340.210 (a) (10) (ii).

3. In § 1340.210 (a), a new undesignated paragraph is added after subparagraph (10) to read as follows:

No person may pay and no person may receive a service charge over the maximum prices otherwise established by this regulation for the services rendered in the obtaining of supplies of coal or in handling shipments of coal by water unless the Administrator grants permission in writing to do so. Provision is made in subdivisions (i) and (ii) below for the obtaining of such permission; subdivision (i) states how and by what persons such permission may be obtained with regard to shipments other than those by lake and tidewater and subdivision (ii) states the same with regard to lake and tidewater shipments.

4. In § 1340.210 (a) (10), new subdivision (i) is added to read as follows:

(i) With regard to shipments other than those by lake and tidewater a distributor may obtain such permission where the requirements of (a) below are met by filing two copies of a signed application containing the information required in (b) below with the Solid Fuels Branch, Office of Price Administration, Washington 25, D. C.

(a) *Conditions under which permission to pay a service charge will not be granted.* In no event will a service charge be permitted to be paid or received where:

(1) The distributor is or at any time since May 18, 1942 has been related to the producer or his sales agent directly or indirectly by ownership control or affiliation of any kind.

(2) In general the tonnage requirements of the person desiring to purchase from the distributor exceed 10,000 net tons per year, or the situation of the customer is such that the services of a distributor are not required.

(3) The coal to be procured by the distributor will be obtained from the same mine or the same producer or an affiliate of the same producer as the mine, producer or affiliate which supplied the customer of the distributor at any time since May 18, 1942. This condition shall not, however, be applicable where the customer of the distributor is operating a manufacturing plant which was converted from oil to coal since January 1, 1942 and such customer has since that date been supplied coal by a distributor, or where the customer of the distributor is in New England and is now receiving via all-rail transportation part or all of the coal requirements he formerly received by tidewater or where the customer's requirements are supplied by a distributor under a direction issued by the Solid Fuels Administration for War.

(b) *Information which the distributor's application should contain.* A signed application filed in duplicate with the Solid Fuels Branch shall disclose:

(1) The kind, size, tonnage, distributor's f. o. b. mine purchase price of coal which the customer of the distributor needs, the service charge the distributor proposes to make and to which the customer agrees, and the method of shipment of the coal.

(2) A brief statement of the kind, size and tonnage of coal as well as total tonnage purchased by the customer of the distributor since January 1, 1943 from each source of supply together with the name and address of each supplier. The source of supply shall be identified as producer or distributor and by the names, mine index numbers of, and the producing district in which the mines from which the coals are to be shipped are located.

(3) A brief statement as to why applicant's services are necessary to his customer in the proposed transaction.

(4) A statement from the distributor's customer that it will not base any request for an increase in its maximum price for any commodity or service in whole or in part upon the added cost of the service charge and if customer is a reseller of coal subject to Revised Maximum Price Regulation No. 122 that it understands that the service charge it proposes to pay to the distributor may not be added to its maximum price in the resale of the coal and if customer is a person eligible for compensation under Revised Compensatory Adjustment Regulation No. 1 such service charge shall not be included in the current delivered cost of coal.

(5) Any other data deemed relevant by the applicant.

(c) *Records to be kept by the distributor receiving permission to make a service charge.* If such permission to make a service charge is granted, the distributor making such service charge shall maintain records for the effective period of this subdivision (i) in connection with

[1] 8 F.R. 14560, 15256, 15455, 15456, 16280, 16419, 16738, 16998.

any transaction on which such a service charge is made. The records shall disclose:

(1) The distributor's source of coal supply, including the name and address of each supplier, an identification of these suppliers as distributor or producer and the names, mine index numbers of, and the producing district in which the mines from which the coals are to be shipped are located.

(2) The tonnage of coal shipped the customer, maximum f. o. b. mine price; the purchase price the distributor paid f. o. b. the mine; the amount and kind of all special service charges made in the sale of the coal by the producer and distributor and the amount of the service charge made by the distributor under the Administrator's authorization granted pursuant to this subdivision (i).

(d) Permission to pay a service charge of not more than 17 cents per net ton may be granted by the Administrator by letter or telegram with respect to individual transactions on transactions of a continuing nature for either individual distributors or groups of distributors. In all cases the amount of the service charge shall be separately identified in the invoice for the coal.

This amendment shall become effective February 23, 1944.

PART 1400—TEXTILE FABRICS, COTTON, WOOL, SILK, SYNTHETICS AND ADMIXTURES

[MPR 127,[1] Amdt. 17]

FINISHED PIECE GOODS

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.*

Maximum Price Regulation No. 127 is amended in the following respects:

1. Section 1400.78 (c) (27) is amended to read as follows:

(27) Towels and toweling, other than printed toweling.

2. Section 1400.78 (l) is amended to read as follows:

(l) Sales of better rayon fabrics by converters who prior to February 17, 1944 had certified to the Office of Price Administration that they came within the terms of this paragraph (l) as it read between July 5, 1943 and February 22, 1944.

"Better rayon fabrics" are finished piece goods which

(1) Are composed of 75% or more of rayon, and

(2) Are (i) substantially similar in construction and finish to fabrics which during 1942 sold to dress manufacturers whose minimum price line for dresses then was $16.75 or (ii) plain dyed goods of a type which sold at a price of 85 cents or more per yard during 1942 or printed goods of a type which sold at a price of one dollar or more per yard during 1942.

3. Section 1400.82 (c) (4) is amended to read as follows:

(4) Where goods are trans-shipped from one finishing plant to another (after the goods are partially or wholly finished), the freight charges on such transshipments shall not be included in computing the maximum price under paragraph (a) of this section: *Provided*, (i) That if partially finished goods are trans-shipped from one finishing plant to another for the purpose of screen printing, flock printing, lacquer printing, embossing, or moireing at the second plant, then the freight charges on such trans-shipment may be included in computing the maximum price under paragraph (a) of this section; (ii) That the foregoing limitation shall not apply to the extent that the contrary is expressly provided elsewhere in this regulation.

4. In § 1400.82 (e) (4) the present text is redesignated subdivision (i) and subdivision (ii) is added to read as follows:

(ii) Where fabrics are printed in such a manner that, if by cutting off the edge (or edges) of the fabric which has (or have) been printed more than 80 percent of the original width of the finished fabric could be retained intact in unprinted form, the cost of such printing shall not be included in the finishing cost unless it can be demonstrated that the print design serves a bona fide decorative or functional purpose and prior certification to this effect has been obtained from the Office of Price Administration, Washington 25, D. C.

5. In § 1400.82 (e), subparagraphs (7) and (8) are added to read as follows:

(7) For the purposes of subparagraph (8) below, the cost of each type of processing referred to therein shall be:

(i) In the case of goods finished by a person independent of the converter, the price of such processing as specified in the finishing contract or invoice;

(ii) In the case of goods finished by the converter or by a subsidiary or affiliate of the converter, the price which such person is entitled to charge for such processing under Maximum Price Regulation No. 128 (Processing Piece Goods).

(8) *Special limitations on use of entire finishing cost.* Certain finishing expenses are to be treated in a special manner as explained in subdivision (i) below. These expenses, which are called "excess finishing cost," are listed in subdivision (ii). What constitutes "excess finishing cost" will often depend on whether the goods fall within the converter's "specified finish quota." This quota is dealt with in subdivision (iii).

(i) *How to treat "excess finishing cost."* "Excess finishing cost" shall be disregarded in determining the appropriate division factor pursuant to paragraph (g) of this section and shall not be included in the sum to which (pursuant to paragraph (a) of this section) that division factor is applied, but it may be added to the resulting quotient before the terms factor is applied.

(ii) *What is "excess finishing cost."* "Excess finishing cost" means the following:

(a) Where cotton goods, other than "better cotton wash fabrics,"[3] have been roller-printed, any printing cost[3] in excess of the printing cost which would be applicable to a 15,000-yard run of the pattern.

(b) Where rayon goods[4] have been roller-printed, any printing cost[3] in excess of the printing cost which would be applicable to a 6,000-yard run of the pattern.

(c) The cost of screen printing any rayon goods which (1) are made of combination yarns or (2) have a ceiling price in the grey of less than 27½¢ per yard on the following width bases:

Type of fabric or weave:	*Width Basis*
Plain or dobby-loom except sheers	43½" grey
Box-loom, except sheers	45" reed
Jacquard-loom, except sheers	39" grey
Sheers	46" reed

(d) The cost of applying any of the "specified finishes" designated below to goods which do not fall within the converter's "specified finish quota," as defined in subparagraph (iii) below. The "specified finishes" are embossing, moireing, screen printing, block printing, chenille printing, flock printing, lacquer printing and any type of over-printing (such as pigment type or zinc printing) not expressly mentioned.

(e) The cost of flock printing, chenille printing, lacquer printing or otherwise over-printing goods which (regardless of the sequence in which the operations are performed) are also screen printed, block printed, embossed or moired.

(iii) *Specified finish quota.* (a) For each finish referred to in (ii) (d) above, each converter shall have a "specified finish quota."

(b) Except for a converter who was not in business throughout 1941, the "quota" for shipments made in a given finish during any calendar quarter shall be three-fourths of the yardage of woven goods ordered into process by the converter during the corresponding calendar quarter of 1941 in that finish. However, the quota applicable to the period from February 23, 1944 through March 31, 1944 shall be one-half of the quota computed for the first calendar quarter. Furthermore, a converter shall be permitted to augment his quota for any period by the amount of any unconsumed portion of his quota for the preceding quarter and likewise by borrowing from his quota for the following quarter. If a converter augments his quota for one period by borrowing from his quota for the next quarter, the latter quota shall be correspondingly reduced.

(c) Any converter who was not in business throughout 1941 may file with the Office of Price Administration, Washington 25, D. C., an application for the establishment of one or more "specified finish quotas". The application shall be filed in accordance with subpart B of Revised Procedural Regulation No. 1,[5] issued by the Office of Price Administration, and shall contain a full statement of: (1) the types of processing performed by the converter, (2) current monthly yardage ordered into process and estimated yardage volume for the balance of the calendar year, (3) the type of goods converted, (4) the trades served, (5) the reasons why applicant needs to sell goods in any of the finishes referred to in (ii) (d) above, (6) the names of two or more close competitors; and (7) any other information relevant to whether a quota or quotas should be established and in what amount. No quota will be granted unless it affirmatively appears that the applicant needs the quota in order to serve the actual requirements of his customers. Where such a finding can be made the Administrator will be guided in determining the amount of the quota by the nature of the applicant's business and the "specified finish quotas" of applicant's competitors. A quota may be established in terms of yardage, dollar sales, or percentage of total business and shall be subject to such conditions as the Administrator finds appropriate. Upon the filing of an application and pending final action therein an applicant shall not include the cost of any finish referred to in (ii) (d) above in his finishing cost for the purpose of determining the appropriate division factor under subdivision (g) of this section, but may include the cost of such finish in the sum to which that division factor is applied.

(d) On or before March 23, 1944 every converter who was engaged in business throughout 1941 and who desires to avail himself at any time of one or more "specified finish quotas" shall report to the Office of Price Administration, Washington 25, D. C., his name and address, the amount of each of his "specified finish quotas", and his total dollar volume of finished piece goods sales during 1943. Any converter who fails to make such a report on or before the due date shall be deemed to have waived his right to make use of his quotas, unless he presents a reasonable justification for such failure.

(e) Each converter delivering goods subject to the limitations imposed by this subparagraph (8) shall keep a separate monthly record of all such deliveries. The record shall include the invoice number, yardage delivered, and type of finish.

(iv) *Existing contracts.* Notwithstanding any provision of this subparagraph (8), for goods delivered on or before March 23, 1944 against a firm contract entered into in conformity with this regulation prior to February 17, 1944, the contract price may be charged.

6. Section 1400.82 (k) is amended by deleting the proviso at the end.

This amendment shall become effective February 23, 1944.

NOTE: The record-keeping and reporting requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Maximum Price Regulation No. 128 is amended in the following respects:

§ 1400.25 *Itemizing charges for certain finishing processes.* Where the processing of piece goods by any job processor includes any waterproofing, water repellent, special, exclusive, or patented finishing process, or any embossing, moireing, screen printing, block printing, chenille printing, flock printing, lacquer printing, or any type of over-printing (such as pigment type or zinc printing) not expressly named, such job processor shall ascertain the portion of the total price (not to exceed his maximum price) attributable thereto and shall deliver to the customer a contract, invoice, or similar document stating that portion separately.

Any person who between May 4, 1942 and February 23, 1944 sold or transferred such a business shall either preserve and make available, or turn over, to the transferee all remaining records which he was required to keep of transactions prior to the transfer and which are necessary to enable the transferee to comply with this regulation; any person who after February 22, 1944 sells or transfers such a business shall either preserve and make available, or turn over, to the transferee all records which the transferor was required to keep of transactions prior to the transfer and which are necessary to enable the transferee to comply with this regulation. PART 1407—RATIONING OF FOOD AND FOOD PRODUCTS

[Rev. RO 13,[1] Amdt. 9]

PROCESSED FOODS

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

Revised Ration Order 13 is amended in the following respects:

1. The title of section 1.3 is amended to read as follows: *"Points come in the form of stamps, certificates, tokens, ration coupons and ration checks."*

2. Section 1.3 (a) is amended by deleting the words "tokens or".

3. Section 1.3 (b) is amended to read as follows:

(b) The basic forms of ration currency are green and blue stamps in War Ration Book Four, and tokens which are designated by the Office of Price Administration to be used for the acquisition of processed foods. They are the form in which points are generally given up by "consumers".

4. Section 1.3 (c) is amended by inserting in the first sentence the word "tokens" between the words "(OPA Form R–1201)," and "or ration coupons".

5. Section 2.4 (a) is amended to read as follows:

(a) *A consumer uses stamps.* A consumer gives up points, when he acquires processed foods, by surrendering green or blue "stamps" from his War Ration Book Four.

6. Section 2.4 (b) is amended to read as follows:

(b) *Stamps may be used only during fixed periods.* Each stamp in War Ration Book Four is good for a limited time only and a consumer may use it only during that time. The letter printed on the green stamps and the combination of letter and number printed on the blue stamps serve to indicate the time when the stamp may be used by consumers. The stamps in War Ration Book Four may be used only during periods which will be fixed in a supplement to this order. These periods may be changed by the Office of Price Administration, even after they have begun.

7. Section 2.4 (c) is amended to read as follows:

(c) *General rules for the use of stamps by consumers.* A consumer must give up stamps worth exactly the point value of the processed foods he acquires. The number of points a green stamp is worth is shown by the figure printed on it. Blue stamps are worth 10 points each, regardless of the number printed on them. Stamps must be given up at the time the foods are acquired. The stamps may be used by a consumer only if torn out of the war ration book in the presence of the person who is selling or transferring the foods. A stamp may be used only to get processed foods for the consumer from whose book it is taken or for use at a table at which he eats. If the consumer is unable to give up points exactly equal to the point value of the processed foods acquired by him on and after February 27, 1944 because he does not have stamps of sufficiently small value to make up the proper amount, he may give up, and the transferor may accept, stamps of the nearest higher value, and the transferor must return the excess number of points to the consumer in the form of loose one point stamps through March 20, 1944, or, beginning February 27, 1944, in the form of tokens. Loose one point stamps and tokens may be used by a consumer to acquire processed foods only if he has received the stamps and tokens in this way from his transferor. A transferor may accept loose one point stamps and tokens from a consumer unless he knows or has reason to believe that they were not acquired by the consumer in this way.

8. Section 2.4 (e) is amended by inserting in the first sentence the words "or tokens" between the words "them" and "with".

9. The first sentence of the footnote to section 8.3 (a) is amended by deleting the words "blue stamps from the War Ration Book Two and the green stamps in War Ration Book Four" and by substituting therefor the words "green and blue stamps in War Ration Book Four, tokens,".

10. Section 8.3 (a) is amended by adding the following:

However, any person who sells or transfers processed foods to consumers may retain and need not deposit in his ration bank account enough loose one point stamps, and beginning February 27, 1944 enough tokens for use in returning excess points to consumers pursuant to section 2.4 (c).

11. Section 8.4 (e) is added to read as follows:

(e) *Tokens.* Tokens may be deposited at any time in quantities of 250 or multiples thereof in containers provided for that purpose by the Office of Price Administration.

12. Section 9.4 (a) is amended by adding the following:

If the consumer is unable to give up points exactly equal to the point value of the processed foods transferred because he does not have stamps of sufficiently small value to make up the proper amount, the transferor may accept stamps of the nearest higher value which the consumer has, and the transferor must return the excess points to the consumer, from February 27, 1944 to March 20, 1944, inclusive, in the form of loose one point stamps or tokens. On and after March 21, 1944 he must return the excess points in the form of tokens only.

13. Section 9.4 (b) is amended to read as follows:

(b) *How points are given up.* Points may be given up by, and taken from, a consumer only in the form of stamps from his war ration book, a certificate issued for him, and a ration check issued to him and endorsed by him. Points may also be given up in the form of loose one point stamps from February 27, 1944 to March 20, 1944, inclusive, and in the form of tokens, beginning February 27, 1944.

14. Section 9.4 (d) is amended by adding the following:

However, a transferor may accept loose one point stamps from a consumer from February 27, 1944 to March 20, 1944, inclusive, unless he knows or has reason to believe those stamps were not acquired by the consumer in the way permitted by paragraph (a) of this section. Beginning February 27, 1944, a transferor may also accept tokens from a consumer unless he knows or has reason to believe those tokens were not acquired by the consumer in the way permitted by paragraph (a) of this section.

15. Section 9.4 (e) is amended to read as follows:

(e) *When stamps are good.* Each stamp is good for a limited time and may be accepted for a transfer to a consumer only during that time. The letter printed on the green stamps and the combination of letter and number on the blue stamps serve to indicate the time when the stamps may be used by the consumers. The period during which the green stamps and the blue stamps in War Ration Book Four may be accepted from a consumer is fixed by the Office of Price Administration in a supplement to this order.

16. Section 9.4 (g) (1) is amended by inserting in the first sentence the word "tokens," between the words "stamps," and "or a ration check".

17. Section 9.4 (g) (3) is amended by inserting in the first sentence the words "or tokens" between the words "stamps" and "from".

18. Section 9.4 (j) is added to read as follows:

(j) *Tokens.* Tokens may be accepted from a consumer at any time beginning February 27, 1944.

19. Section 9.5 (d) is amended by inserting in the first sentence the word "tokens," between the words "stamps," and "certificates".

20. Section 9.5 (d) (1) is amended by substituting in the third sentence the words "(OPA Form R–140)" for the words "(OPA Form R–120)".

21. Section 9.5 (d) (5) is added to read as follows:

(5) *Tokens.* Tokens may be accepted at any time, but a transferor need not accept more than 9 tokens from his transferee in any one transaction.

22. Section 9.5 (e) (2) is amended by inserting in the last sentence the word "tokens," between the words "stamps," and "certificates".

23. Section 11.1 (b) is amended by inserting in the fourth sentence the word "tokens," between the words "stamps," and "and certificates".

24. The title of Article XV is amended to read as follows: *"Issuance and Use of Certificates, Ration Coupons, and Tokens."*

25. Section 15.8 (b) is amended by inserting before the end of the parenthesis, the following sentence: "The only exception to that rule is in the use of one point stamps or tokens to give change to consumers."

26. Section 15.9 is added to read as follows:

SEC. 15.9 *How ration tokens may be obtained by persons other than consumers.* (a) On and after February 17, 1944, any person other than a consumer who sells or transfers processed foods may acquire tokens in quantities of 250 or multiples thereof at any ration bank in exchange for the following types of ration currency:

(1) *Stamps.* From February 17, 1944 to February 26, 1944, inclusive, he may use green stamps in sealed envelopes. From February 27, 1944 to May 1, 1944, inclusive, he may use green stamps in sealed envelopes or blue stamps pasted on gummed sheets, OPA Form R–140. Beginning May 2, 1944 he may use stamps only if they are pasted on such gummed sheets. If he uses stamps in sealed envelopes, the envelopes must be handled in all respects in accordance with the procedure described in General Ration Order 7 for the use of such envelopes. If he uses stamps pasted on gummed sheets he may use only stamps valid for transfer or deposit by him at the time he acquires tokens, and each sheet must contain 25 stamps. He must write his name and address on each sheet.

PART 1407—RATIONING OF FOOD AND FOOD PRODUCTS

[RO 16,[1] Amdt. 108]

MEAT, FATS, FISH AND CHEESES

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

Ration Order 16 is amended in the following respects:

1. Section 1.3 (a) is amended by deleting the words "tokens or".

2. The first sentence of section 1.3 (b) is amended to read as follows:

The basic forms of ration currency are brown stamps in War Ration Book Three, red stamps in War Ration Book Four, and tokens which are designated by the Office of Price Administration to be used for the acquisition of all foods covered by this order. They are the form in which points are generally given up by "consumers".

3. Section 1.3 (c) is amended by inserting in the first sentence the word "tokens" between the words "(OPA Form R–1201)," and "or ration coupons".

4. Section 2.3 (a) is amended to read as follows:

(a) *A consumer uses stamps.* A consumer gives up points, when he acquires foods covered by this order, by surrendering brown "stamps" from War Ration Book Three, or red stamps from War Ration Book Four. A brown stamp is not good unless the book from which it is taken has a validation stamp properly placed on its cover.

5. Section 2.3 (b) is amended to read as follows:

(b) *Stamps may be used only during fixed periods.* Each stamp in War Ration Books Three and Four is good for a limited time only and a consumer may use it only during that time. The letter printed on the brown stamps in War Ration Book Three and the combination of letter and number printed on the red stamps in War Ration Book Four serve

to indicate the time when the stamp may be used by consumers. The brown stamps in War Ration Book Three and the red stamps in War Ration Book Four may be used only during periods which will be fixed in a supplement to this order. (Transfers of "meat" by farm slaughterers to consumers, covered in section 3.2, are excepted from this rule.) These periods may be changed by the Office of Price Administration, even after they have begun.

6. Section 2.3 (c) is amended to read as follows:

(c) *General rules for the use of stamps by consumers.* A consumer must give up stamps worth exactly the point value of the foods covered by this order which he acquires, except that fractional amounts are to be handled in the way described in section 10.6. The number of points a brown stamp in War Ration Book Three is worth is shown by the figure printed on it. Red stamps in War Ration Book Four are worth 10 points each, regardless of the number printed on them. Stamps must be given up at the time the foods are acquired. The stamps may be used by a consumer only if torn out of the war ration book in the presence of the person who is selling or transferring the foods. A stamp may be used only to get foods covered by this order for the consumer from whose book it is taken, or for use at a table at which he eats. If the consumer is unable to give up points exactly equal to the point value of the foods acquired by him because he does not have stamps of sufficiently small value to make up the proper amount, he may give up, and the transferor may accept, stamps of the nearest higher value, and the transferor must return the excess number of points to the consumer in the form of loose one point stamps through March 20, 1944, or, beginning February 27, 1944, in the form of tokens. Loose one point stamps and tokens may be used by a consumer to acquire foods covered by this order only if he has received the stamps and tokens in this way from his transferor. A transferor may accept loose one point stamps and tokens from a consumer, unless he knows or has reason to believe that they were not acquired by the consumer in this way.

7. Section 2.3 (e) is amended by inserting in the first sentence the words "or tokens" between the words "them" and "with".

8. Section 2.3 (f) is amended by inserting in the first sentence the words "or tokens" between the words "stamps" and "before".

9. Section 9.2 (d) is amended by changing the parenthetical phrase to read as follows: "(stamps, tokens, certificates, or endorsed ration checks.)"

10. Section 9.2 (h) is amended by changing the parenthetical phrase to read as follows: "(stamps, tokens, certificates, or endorsed ration checks.)"

11. The first sentence of the footnote to section 9.3 (a) is amended by deleting the words "red stamps from War Ration Book Two" and by substituting therefor the words "brown stamps in War Ration Book Three and red stamps in War Ration Book Four, tokens".

12. Section 9.3 (a) is amended by deleting the last two sentences and inserting in their place the following: "However, any person who sells or transfers foods covered by this order to consumers may retain and need not deposit in his ration bank account enough loose one point stamps, and beginning February 27, 1944 enough tokens, for use in returning excess points to consumers pursuant to section 2.3 (c). (Section 4.13 (b) states another exception to this paragraph.)"

13. Section 9.4 (e) is added to read as follows:

(e) *Tokens.* Tokens may be deposited at any time in quantities of 250 or multiples thereof, in containers provided for that purpose by the Office of Price Administration.

14. Section 10.4 (a) is amended by inserting before the period at the end of the last sentence the words "through March 20, 1944, or, beginning February 27, 1944, in the form of tokens"; and adding the following: "On and after March 21, 1944 he must return the excess points in the form of tokens only."

15. Section 10.4 (d) is amended to read as follows:

(d) *How points are given up.* Points may be given up by, and taken from, a consumer only in the form of stamps from his war ration book, a certificate issued for him, and a ration check issued to him and endorsed by him. Points may also be given up in the form of loose one point stamps through March 20, 1944, and in the form of tokens, beginning February 27, 1944.

16. Section 10.4 (f) is amended by changing the first sentence to read as follows: "The seller or transferor may accept a stamp only if it is torn out of a war ration book in his presence, and, if it is a stamp from War Ration Book Three, only if the book has a validation stamp on its cover."

17. Section 10.4 (f) is further amended by inserting in the last sentence the words "through March 20, 1944" between the words "consumer" and "unless"; and by adding the following: "Beginning February 27, 1944, a transferor may also accept tokens from a consumer unless he knows or has reason to believe those tokens were not acquired by the consumer in the way permitted by paragraph (a) of this section."

18. Section 10.4 (g) is amended to read as follows:

(g) *When stamps are good.* Each stamp is good for a limited time and may be accepted for a transfer to a consumer only during that time. The letter printed on the brown stamps in War Ration Book Three and the combination of letter and number printed on the red stamps in War Ration Book Four serve to indicate the time when the stamp may be used by consumers. The periods during which the brown stamps in War Ration Book Three and the red stamps in War Ration Book Four may be accepted from a consumer will be fixed by the Office of Price Administration in a supplement to this order. (Transfers of "meat" by farm slaughterers to consumers, covered in section 3.2 are excepted from this rule.)

19. Section 10.4 (i) (1) is amended by inserting in the first sentence the word "tokens," between the words "detached stamps" and "or a ration check".

20. Section 10.4 (i) (3) is amended by inserting in the first sentence the words "or tokens" between the words "stamps" and "from".

21. Section 10.4 (j) (1) is amended by inserting in the first sentence the word "tokens" between the words "stamps" and "or a ration check".

22. Section 10.4 (m) is added to read as follows:

(m) *Tokens.* Tokens may be accepted from a consumer at any time beginning February 27, 1944.

23. Section 10.5 (e) is amended by inserting in the first sentence the word "tokens" between the words "stamps" and "certificates".

24. Section 10.5 (e) (1) is amended by substituting in the third sentence the words "(OPA Form R–140)" for the words "(OPA Form R–120)".

25. Section 10.5 (f) (1) is amended by inserting in the last sentence the word "tokens," between the words "stamps," and "certificates".

26. Section 10.5 (f) (3) is amended by inserting in the last sentence the word "tokens," between the words "stamps," and "certificates".

27. Section 10.5 (f) (7) is amended by inserting a comma after the words "ration coupons"; and by inserting before the period at the end of the sentence, the following: "* * * through March 20, 1944, or tokens, beginning February 27, 1944."

28. Section 10.5 (e) (5) is added to read as follows:

(5) *Tokens.* Tokens may be accepted at any time, but a transferor need not accept more than 9 tokens from his transferee in any single transaction.

29. Section 12.1 (b) is amended by inserting in the third sentence the word "tokens" between the words "stamps," and "and certificates".

30. The title of Article XVI is amended to read as follows: "*Issuance and Use of Certificates, Ration Coupons, and Tokens.*"

31. Section 16.8 (b) is amended by inserting in the last sentence the words "or tokens" between the words "stamps" and "to give".

32. Section 16.9 is added to read as follows:

SEC. 16.9 *How ration tokens may be obtained by persons other than consumers.* (a) On and after February 17, 1944, any person other than a consumer who sells or transfers foods covered by this order may acquire tokens in quantities of 250 or multiples thereof at any ration bank in exchange for the following types of ration currency:

(1) *Stamps.* From February 17, 1944, to February 26, 1944, inclusive, he may use brown stamps in sealed envelopes. AIR RAID PROTECTION REGULATIONS GOVERNING BLACKOUT, THE CONTROL OF LIGHTING AND RADIO, THE MOVEMENT OF VEHICLES AND OTHER CONVEYANCES, ACTIVITIES OF PERSONS DURING PERIODS OF BLACKOUT AND AIR RAID, AND RELATED MATTERS, WITHIN THE SAULT SAINTE MARIE MILITARY AREA

SECTION I—DEFINITIONS

1. *Period of blackout.* The period of time beginning with the blackout (BLUE) signal (or the air raid (RED) signal if there has been no preceding blackout (BLUE) signal) and continuing during hours of darkness or until the all clear (WHITE) signal. (See also paragraphs 15, 16 and 17.)

2. *Period of air raid.* The period of time beginning with the air raid (RED) signal and ending with the blackout (BLUE) signal, following the air raid (RED) signal. (See also paragraphs 15 and 16.)

3. *Hours of darkness.* The time from a half hour after sunset to a half hour before sunrise the following morning between October 1 and April 30, inclusive, and from one hour after sunset until one-half hour before sunrise the following morning between May 1 and September 30, inclusive.

4. *Civilian defense authorities.* Officials or bodies of a state or political subdivision thereof authorized by legislation, regulation or order to administer matter pertinent to the subject matter of these regulations.

5. *Director of civilian defense.* The Director of Civilian Defense appointed by the President of the United States pursuant to Executive Order No. 8757, dated May 20, 1941, or any amendment thereof, or his authorized representative.

6. *Persons.* Individuals (including officials and employees of the United States, or of any state or territory, or of any political subdivision thereof), partnerships, associations, corporations (municipal, public or private), or any organized groups of individuals whether incorporated or not.

7. *Persons in control of lighting.* a. With respect to light sources attached to publicly or privately owned real property of any character, the persons entitled, as owners or tenants, to occupy or enter such property or parts thereof;

b. With respect to light sources attached to road vehicles,[1] boats,[1] railroad trains,[1] and aircraft, the persons in control of the operation of such conveyances;

c. With respect to light sources not attached to real property or to the conveyances described in the foregoing paragraph b, the persons in possession or entitled to possession thereof;

d. With respect to all light sources, individuals who, by reason of relationship as licensee or guest, may light or extinguish lights; and

e. Employees, agents and representatives of the persons described in the foregoing paragraphs a to d, inclusive, whose duties include the lighting or extinguishing of lights, and all persons having authority to supervise or direct such employees, agents or representatives.

8. *Public way.* Streets, highways, avenues, boulevards, alleys and other public thoroughfares, but not including sidewalks or other ways for use primarily by pedestrians.

9. *Road vehicle.* Every device in, upon, or by which any person or property is or may be transported or drawn upon a public way, not operated on rails, including all such devices motivated by mechanical means, or by animal or human power.

10. *Motor vehicle.* Any road vehicle which is self-propelled.

11. *Boat.* Any means of transportation by water.

12. *Railroad train.* Any means of transportation by rail, except street cars.

SECTION II—AIR WARNING SIGNAL SYSTEM[2]

13. *Transmission of signals.* The air warning signals described in paragraphs 14, 15, 16, and 17 shall be issued, sounded, or announced only upon the order or the authorization of the Region Controller to the warning center which is operated by civilian defense authorities. The Region Controller is responsible only that the warning center receives the order or authorization for the giving of such signals. Civilian defense authorities are responsible for the transmission of such signals from the warning center through their alarm warning systems to the public.[2] In the case of practice blackouts or practice air raids, such air warning signals shall be issued, sounded or announced only upon the order or authorization of the Region Controller to civilian defense authorities.

14. *Yellow signal.* This is a confidential preliminary caution signal not to be given by audible public alarm. It indicates the POSSIBILITY of an air raid. This signal shall be transmitted by civilian defense authorities only to such key persons, essential industries, railroads, and places as such authorities deem essential to initiate proper steps to insure timely blackout or air raid precautions.

15. *Mobilization and blackout (BLUE) signal.* This is an audible warning signal indicating the PROBABILITY of an air raid. This signal will be a long note (approximately two minutes) at steady pitch of sirens, horns, or whistles. Upon the sounding of this signal, civilian defense forces will mobilize or remain mobilized; if during hours of darkness, lighting will be extinguished or obscured except as permitted by paragraphs 20 to 33, inclusive, and pedestrians and traffic may continue or resume movement.

16. *Air raid (RED) signal.* This is an audible public warning signal indicating the PROXIMITY of enemy aircraft and the IMMINENCE of an air raid. This signal (approximately two minutes) will be a series of short blasts of horns or whistles or a warbling or fluctuating sound of varying pitch of a siren. Upon the sounding of this signal, in addition to the actions required by the mobilization and blackout (BLUE) signal, as contained in paragraph 15 above, blackout shall be completed by extinguishing or obscuring all lights, except as permitted by paragraphs 20 to 31, inclusive, and pedestrians, vehicles and other conveyances shall comply with the requirements of paragraphs 34 to 38, inclusive.

17. *All clear (WHITE) signal.* This signal is a public signal indicating ALL CLEAR. This signal may be transmitted by radio, telephone, police, by turning on street lights which have been extinguished on the BLUE signal, or other available means. This signal may also be given by horns, whistles, or sirens, as specified by local civilian defense authorities: *Provided, however,* That such audible signal shall not be the same as the mobilization and blackout (BLUE) signal and the air raid (RED) signal, as provided in paragraphs 15 and 16 above, and shall not resemble said signals so as to be confused therewith. When an ALL CLEAR (WHITE) signal follows a YELLOW signal without an intervening mobilization and blackout (BLUE) or air raid (RED) signal, it shall not be an audible signal but shall be transmitted only in the manner provided for the YELLOW signal, as in paragraph 14 above.

NOTE: Ordinarily, a Yellow Signal shall precede a Blue Signal and a Blue Signal shall precede a Red Signal. However, if sufficient time is not available for these signals to be separated by at least five (5) minutes, the Yellow Signal and/or the Blue Signal may be omitted, so that a Blue Signal may be given without a prior Yellow Signal and a Red Signal may be given without a prior Yellow Signal and/or Blue Signal. A Blue Signal shall follow every Red Signal, after an interval of not less than five (5) minutes and may in turn be followed by a White Signal or by another Red Signal. Upon the sounding of a Blue Signal, pedestrians and vehicles should give consideration to movement to places of safety in anticipation of an air raid (RED) signal. The same action shall be required upon a Blue Signal whether it precedes or follows a Red Signal, that is, a return to a status of blackout rather than a condition of air raid; this will permit traffic and pedestrians to resume movement but maintains the blackout condition indicating that raiders have passed the area so warned but that a condition of blackout is still required in anticipation of another Red Signal upon the approach of a new wave of raiders or return of the original raiders. The sequence of signals in such case would be Blue, Red, Blue, Red, Blue. A White Signal may follow a Yellow Signal or a Blue Signal, but will not follow a Red Signal without an intermediate Blue Signal. A White Signal shall not be given within ten (10) minutes of a preceding Blue Signal. The All-Clear (White) Signal will not be given until the probability of attack no longer exists.

SECTION III—PROHIBITED LIGHTING

18. *Prohibited lighting.* During the period and in the area of blackout occurring during hours of darkness, persons in control of lighting shall cause all lights[1] visible from the outside to be extinguished or blacked-out as promptly as possible, except as permitted in paragraphs 20 to 33, inclusive. The goal or time objective for the completion of all blackout measures shall be five (5) minutes.

19. *Unattended lighting.* At all times during hours of darkness, occupants of premises and operators of road vehicles and other conveyances shall not have any unattended lighting, except as permitted in paragraphs 20 to 31. Lighting shall be considered unattended unless a competent individual, who is a member, employee, or guest of the household or business establishment of the occupier, or who is the operator or occupant of a road vehicle or other conveyance, or who, by arrangement with any such individual has undertaken responsibility for said lighting, can blackout as provided in paragraph 18, above.[2]

SECTION IV—LIGHTING PERMITTED DURING PERIODS OF BLACKOUT AND DURING PERIODS OF AIR RAID

20. *General.* During the periods of blackout or air raid, during hours of darkness, whether attended or not, lighting is permitted as provided in paragraphs 21 to 31 inclusive.

21. *Lights in buildings and residences.* a. In building interiors a small amount of controlled illumination, sufficient to permit reasonable facility of movement without necessitating complete obscuration of doors and windows, is permitted only when the indoor incandescent lamps or lighting units are installed in accordance with the directions contained in subparagraph b below and which:

(1) Are marked "Indoor Blackout—War Department Standard" (See W. D. Specifications—Blackout of Buildings), or

(4) Units shall be placed at least three feet from any window, exterior door, or other opening.

(5) Units shall not be pointed toward any window, exterior door, or other opening.

(6) Units may be installed at any height when openings are covered in the usual manner with drawn window shades, drapes, blinds, or one thickness of newspaper, or whenever each unit has a shade which screens the unit from outside observation above the horizontal.

(7) Units shall be located above the tops of such openings, when exterior openings are not covered and when units are not otherwise shaded from outside observation above the horizontal.

(c) Interior red exit lights are permitted in all public buildings, with the restriction that each exit light shall be so located or shielded as to screen direct light from falling on windows or doors, and that it shall be equipped with one lamp of not more than 15 watts.

22. *Emergency motor vehicles.* Emergency motor vehicles, as defined in paragraph 37, may move during periods stated in paragraph 20 above, using only headlights (on low or depressed beam) and normal tail lights and license plate lights.[1]

Pending the availability of specified filters or automatic cut-offs, flashlights not so equipped may be used provided the light is filtered through (a) three thicknesses of newspaper, or (b) one thickness of newspaper and one sheet of red cellophane. Flashlights shall not be pointed above the horizontal. Pending the availability of lanterns complying with the above specification, lanterns equipped with red or orange globes may be used to mark excavations or other dangerous obstructions.

26. *Water navigation lights.* During the periods as stated in paragraph 20, the following water navigation lights are permitted:

a. Lights on fixed or floating structures except such as are specified by the United States Navy as not essential to indicate safe channels of navigation.

b. Lights on boats to the extent required by the United States Navy.

27. *Aeronautical lights.* During the periods as stated in paragraph 20, the following aeronautical lights are permitted:

a. Flood lights and runway approach lights only at those fields and only to the extent necessary to expedite clearing the air of flights.

b. Position lights on aircraft in flight as required by the Civil Aeronautics Administration.

c. Obstruction lights, except such as are specified by the Region Controller as not essential.

28. *Thermal processes.* During the periods specified in paragraph 20, light emitted from industrial processes, such as furnace glow on glass, pottery and cement works, iron foundries, steel mills, and coke works, is permitted, provided however, that such light shall be shielded, obscured, reduced in intensity or otherwise treated to as great an extent as may be practicable in order to reduce to a minimum the light visible from the outside. Steam or smoke shall be reduced to the minimum.

29. *Railroad lights.* During the periods as specified in paragraph 20 above, all railroad lights on rolling stock and fixed installations are permitted provided they comply with "Rules and Regulations for Railroads During Blackout or Air Raid Alarm, Association of American Railroads".

31. *Specially authorized lights.* Any lights specifically authorized by the Region Controller are permitted during such period and to such extent as he may deem appropriate.

SECTION V—LIGHTING PERMITTED DURING PERIODS OF BLACKOUT BUT PROHIBITED DURING PERIODS OF AIR RAID

32. *Special permitted lights.* During the period and in the area of blackout (BLUE), but not during the period of air raid (RED), (1) street lights and traffic signals, (2) lights in military and naval installations and manufacturing plants or other facilities essential to the war effort, and (3) lights in railroad classification yards, are permitted, provided such lights do not contribute materially to sky-glow and shall be extinguished or blacked out within one (1) minute from the sounding of the air raid (RED) signal when such signal follows a blackout (BLUE) signal.

33. *Lights on road vehicles and other conveyances.* During the period and in the area of blackout (BLUE), but not during the period of air raid (RED):

a. All moving motor vehicles are permitted to use headlights (on low or depressed beam) and normal tail lights and license plate lights.

DEPARTMENT OF THE INTERIOR.

Office of the Secretary.

EMPLOYEES ENGAGED IN MAP REPRODUCTION AND RELATED ACTIVITIES

WAGE FIXING PROCEDURE

The Civil Service Commission has determined that there are excluded from the Classification Act of 1923, as amended, crafts, skilled and semiskilled positions, the incumbents of which are engaged in the quantity reproduction of maps, charts, and similar material through lithographic processes in the Department of the Interior, particularly, in the Geological Survey. The rates of pay for this class of employees are left for determination under wage fixing procedures. For this purpose and to enable the payment to the above-mentioned class of employees of time and one-half for work in excess of 40 hours per week, the following procedure is established:

I. *Wage Board.* A Wage Board, composed of three representatives of the Department, is hereby established to determine prevailing wages for similar work in the District of Columbia in the above-mentioned positions, excluding employees whose rates of pay are fixed on an annual basis pursuant to the Classification Act of 1923, as amended, and to make recommendations with respect to such wages to the Secretary of the Interior.

II. *Procedure to be followed by Board.* In determining the prevailing wages of various trades and occupations being considered by the Board in the locality of the District of Columbia and its environs, the Board shall procure evidence of the wages and compensation being paid to and perquisites received by those employed in these trades and occupations from local contractors, Federal agencies (including wage scales currently being paid pursuant to minima established in connection with the Davis-Bacon Act), private industrial employers, and others employing labor in the locality, whether pursuant to union agreements or otherwise. Hearings for the purpose of adducing evidence of wages paid in the locality may be held when, in the judgment of the Board, this is required in order to determine the prevailing rates of wages.

Based on the evidence procured as to prevailing wages and the perquisites of employment in the locality in the classifications under consideration by the Wage Board, the Board shall make its recommendations to the Secretary of the Interior as to the rates of wages to be paid to the Government employees of the classes above specified. OFFICE OF PRICE ADMINISTRATION.

Regional and District Office Orders.

[Region II Rev. Order G–28 Under RMPR 122]

EMERGENCY SALES OF COKE IN NEW YORK REGION

Revised Order No. G–28 under Revised Maximum Price Regulation No. 122—Solid fuels sold and delivered by dealers. Emergency sales of coke.

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator of the Office of Price Administration by § 1340.259 (a)(1) and Rule 4 under § 1340.254 of Revised Maximum Price Regulation No. 122, and for the period commencing with the effective date of this order and expiring on midnight April 30, 1944, *It is hereby ordered*:

(a) In Region II, consisting of the States of Delaware, Maryland, New Jersey, New York, the Commonwealth of Pennsylvania and the District of Columbia, the maximum prices for the sale and delivery of coke shall be determined in the following manner:

(1) Any dealer in coke, purchasing coke of the kind or kinds customarily sold by him, from his customary sources of supply, shall continue to determine his maximum price for the sale of such coke by the use of the applicable pricing rule contained in § 1340.254 of Revised Maximum Price Regulation No. 122.

(2) Subject to the limitations of paragraph (a) (4) hereof, any dealer who has established a maximum price for coke but purchases coke of a different kind or quality or from different sources of supply than formerly, shall calculate his maximum price for sales of such coke by taking the sum of the following:

First: The per net ton cost of such coke to the dealer f. o. b. supplier's shipping point;

Second: The actual transportation cost from supplier's shipping point to the dealer's yard, dock or other terminal facility; and

Third: The margin over delivered cost on the dealer's similar sale of coke most nearly like the coke for which a maximum price is being calculated hereunder, taking into account class of purchaser, method of delivery, and terms of delivery: *Provided*, That, where sales or deliveries are contemplated in communities where coke is subject to area dollars-and-cents orders issued under Revised Maximum Price Regulation No. 122, dealers shall add no more than the margin prevailing in the area for sales of coke, and used in the determination of area dollars-and-cents prices. On request, the Regional Office or the appropriate District Office of the Office of Price Administration will notify dealers of those margins which must be reported under paragraph (d) hereof.

(3) Subject to the limitations of paragraph (a) (4) hereof, any dealer who has not established a maximum price for coke under Revised Maximum Price Regulation No. 122 may calculate his maximum price for sales of coke by taking the sum of the following:

First: The per net ton cost of such coke to the dealer f. o. b. supplier's shipping point;

Second: The actual transportation cost from supplier's shipping point to the dealer's yard, dock, or other terminal facility; and

Third: The margin over delivered cost on the dealer's similar sale of egg, stove or nut-sized anthracite, or, if he sells no anthracite, of sized bituminous coal, taking into account class of purchaser, method of delivery, and terms of delivery: *Provided*, That, where sales and deliveries are contemplated in communities where anthracite or coke is subject to area dollars-and-cents orders issued under Revised Maximum Price Regulation No. 122, such dealers shall add no more than the margin prevailing in the area, and used in the determination of the area dollars-and-cents prices, for sales of coke, if covered by area order, otherwise for sales of egg, stove or nut-sized anthracite. On request, the Regional Office or the appropriate District Office of the Office of Price Administration will notify dealers of those margins which must be reported under paragraph (d) hereof.

(4) (i) Any dealer who now receives coke at his yard by railroad car or barge, where previously it was not so received, shall calculate his maximum price for yard sales of such coke to other dealers for resale, and for delivered sales, by taking the sum of the following:

First: The per net ton cost of such coke to the dealer f. o. b. supplier's shipping point;

Second: The actual transportation cost from supplier's shipping point to the dealer's yard, dock, or other terminal facility; and

Third: For yard sales to other dealers for resale a margin not to exceed $1.25 per net ton; for delivered sales, a margin not to exceed $3.75 per net ton.

(ii) Any dealer making a purchase of coke at the yard, subject to paragraph (a) (4) (i), shall determine his maximum price for such coke by adding to the seller's yard price a margin not to exceed $2.50 per net ton.

(b) Dealers making sales subject to this order shall not change their customary allowances, discounts, or other price differentials unless such change results in prices lower than the prices permitted by this order (after applying the customary allowances, discounts, or other price differentials).

(c) *Conditions and limitations.* Every dealer making sales of coke pursuant to the pricing authorization of this order must, as a condition to pricing hereunder, keep each kind of coke, from each supplier, separate in storage and delivery from any other kind of coke and from coke shipped by other suppliers, and from any other kind of solid fuel, and sell and invoice it under the description used by the supplier. The invoice shall also set forth the supplier's shipping point.

(d) *Records.* Every dealer making sales of coke subject to this order shall preserve, keep and make available for examination by the Office of Price Administration complete and accurate records of coke purchased and sold hereunder, and a record of every sale of such fuel, showing the date, the name and address of the buyer, if known, the per net ton price charged, and the coke sold. The coke shall be identified in the manner designated by the supplier as well as by the supplier's shipping point. The record shall also state separately each service rendered and the charge made for it.

(e) *Reports.* Every dealer subject to this order shall, within ten days after he determines or redetermines his maximum prices hereunder, report to the District Office of the Office of Price Administration under whose geographical jurisdiction his principal place of business is located:

(1) His maximum price for sales of each kind of coke from each supplier.

(2) The method employed in computing or determining that price including, where applicable, the margin added to delivered costs for sales to different classes of purchasers.

(3) A statement of the margin over delivered costs on the dealer's similar sale of coke most nearly like the coke priced hereunder, to different classes of purchasers.

(f) *Definitions.* When used in this Revised Order No. G–28 the term:

(1) "Coke" means all coke, including reclaimed coke, when sold by dealers for use as fuel.

(2) "Delivered sales" means the customary method of delivery to buyer's premises, whether to the buyer's bin or storage space, or to the point nearest and most accessible to the buyer's bin or storage space and at which the fuel can be discharged directly from the seller's truck.

(3) "Yard sales" means sales accompanied by physical transfer to the buyer's truck or vehicle at the yard, dock, barge, car, or at a place of business of the seller other than at seller's truck or vehicle.

(g) This order shall supersede Revised Maximum Price Regulation No. 122 and any order issued thereunder except as to any sales or deliveries of coke not specifically subject to this order.

(h) Order No. G–28 under Revised Maximum Price Regulation No. 122 as issued on January 15, 1944, is hereby revoked in full as of the effective date of this order.

(i) This order, which may be revoked, amended, or corrected at any time shall, unless earlier revoked or replaced, expire on midnight April 30, 1944.

This Revised Order No. G–28 shall become effective February 11, 1944.

NOTE: The record-keeping and reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Notice is hereby given that a declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by General Gas & Electric Corporation, a registered holding company; and

All interested persons are referred to the said declaration which is on file in the office of the said Commission for a statement of the transaction therein proposed, which is summarized below:

General Gas & Electric Corporation, a subsidiary of Denis J. Driscoll and Willard L. Thorp, Trustees of Associated Gas and Electric Corporation, a registered holding company, proposes to pay out of capital or unearned surplus a quarterly dividend on its $5 Prior Preferred Stock for the quarterly period ended March 15, 1943. As proposed, the amount of the dividend on the 60,000 outstanding shares of this stock will be $75,000, of which approximately $40,125 will be paid to the public holders of 32,110.9 shares. The declaration as filed states that the remaining 27,889.1 shares outstanding are held by the Trustees of Associated Gas and Electric Corporation, who are to waive their right to the receipt of the dividend, which would otherwise be payable to them.

It appearing to the Commission that it is appropriate in the public interest and the interest of investors and consumers that a hearing be held with respect to such matter:

It is ordered, That a hearing on such matter under the applicable provisions of said act and the rules of the Commission promulgated thereunder be held on March 1, 1944, at 9:45 a. m., E. W. T., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. On such date the hearing room clerk in room 318 will advise as to the room in which such hearing will be held.

It is further ordered, That Willis E. Monty or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a trial examiner under the Commission's rules of practice.

1. Whether the proposed declaration of a quarterly dividend out of the capital or unearned surplus of General Gas & Electric Corporation is appropriate and in the public interest and the interest of investors;

2. What terms or conditions, if any, should be imposed in the public interest or for the protection of investors;

3. Whether the proposed action to be taken complies with the provisions of the Public Utility Holding Company Act of 1935 and all rules and regulations promulgated thereunder and is not detrimental to the public interest or the interest of investors or consumers.

THE HARPERS FERRY PAPER CO. AND VIRGINIA PUBLIC SERVICE CO.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 15th day of February 1944.

Notice is hereby given that a joint application-declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by The Harpers Ferry Paper Company, a wholly-owned direct subsidiary of Virginia Public Service Company, and Virginia Public Service Company, a direct subsidiary of General Gas & Electric Corporation, a registered holding company. All interested persons are referred to said document, which is on file in the offices of this Commission, for a statement of the transactions therein proposed, which are summarized below:

The Harpers Ferry Paper Company proposes to sell to Potomac Light and Power Company, a non-affiliated corporation, all of the former's physical property consisting of a hydro-electric generating plant, including a dam, canal and spillways, situated at or near Harpers Ferry, West Virginia, and certain undeveloped lands and water rights located in that vicinity. The proposed consideration to be received therefor is $150,000 in cash, subject to minor adjustments at the date of closing. It is represented that the utility assets are being sold at original cost, which, as at January 1, 1943, was $143,888.90. The balance of $6,111.10 is stated to represent the present day agreed value of the undeveloped real property and water rights. Upon consummation of the sale The Harpers Ferry Paper Company's sole assets will be cash.

It is proposed that, subsequent to the sale by The Harpers Ferry Paper Company of its assets to Potomac Light and Power Company, Virginia Public Service Company will surrender the common stock of The Harpers Ferry Paper Company, the only outstanding securities of that company, and assume the liabilities of said company in exchange for all of its assets, whereupon The Harpers Ferry Paper Company is to be dissolved.

The filing indicates that the State of West Virginia Public Service Commission and the Public Service Commission of Maryland have authorized the transfer of the physical assets of The Harpers Ferry Paper Company to Potomac Light and Power Company to the extent that such assets are located in their respective States.

The filing has designated sections 9 (a), 10, 12 (c), and 12 (d) of the act and Rules U-42, U-43 and U-44 promulgated thereunder as being applicable to the proposed transactions. It appearing that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to said matters and that said joint application-declaration should not be granted or permitted to become effective except pursuant to further order of this Commission;

It is ordered, That a hearing on said matters under the applicable provisions of said act and rules of the Commission

thereunder be held on February 28, 1944, at 10 a. m., E. W. T., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania. On such day the hearing room clerk in room 318 will advise as to the room in which such hearing will be held.

It is further ordered, That Henry C. Lank, or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That, without limiting the scope of the issues presented by said filing, particular attention will be directed at such hearing to the following matters and questions:

1. Whether the proposed transactions are appropriate and in the public interest and in the interest of investors and consumers;

2. Whether the proposed transactions comply with all provisions and requirements of the Public Utility Holding Company Act of 1935 and the rules and regulations promulgated thereunder; and

3. Whether it is necessary or appropriate to impose terms and conditions in the public interest or for the protection of investors or consumers.

By the Commission.

CONSOLIDATED ELECTRIC AND GAS CO. AND CENTRAL ILLINOIS ELECTRIC AND GAS CO.

SUPPLEMENTAL MEMORANDUM FINDINGS AND ORDER APPROVING SALE OF SECURITIES

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 15th day of February 1944.

Consolidated Electric and Gas Company ("Consolidated"), a registered holding company, and its utility subsidiary, Central Illinois Electric and Gas Co. ("Central Illinois"), filed joint applications and declarations pursuant to the Public Utility Holding Company Act of 1935, and particularly sections 6, 7, 9, 10, 12 (c), 12 (d), and 12 (f) of the act and the rules promulgated thereunder, whereby authorization was sought for the reclassification of Central Illinois' common stock, consisting of 74,242 shares without par value and all owned by Consolidated, by the issuance of new common stock of the par value of $15 per share in substitution for such stock without par value. On February 3, 1944, we filed our findings and opinion and entered our order herein granting the applications and permitting the declarations to become effective in respect of the proposed stock reclassification (Holding Company Act Release No. 4874).

Consolidated also applied for approval of a plan submitted by it pursuant to section 11 (e) of the act, in which plan it proposed to sell through competitive bidding, pursuant to our Rule U-50, the 400,000 shares of $15 par value stock so to be acquired by it from Central Illinois and to apply the proceeds received from such sale, to the extent required for that purpose, to the satisfaction and retirement of certain bonds assumed by Consolidated, originally issued by Federated Utilities, Inc., and known as Federated Utilities, Inc. First Lien Collateral Trust 5½% Bonds, due March 1, 1957.

Consolidated further proposed that after consummation of the proposed sale by it of the Central Illinois stock and the application of the proceeds in satisfaction of the assumed Federated Utilities, Inc. bonds above mentioned, any balance of such proceeds remaining should be expended in the retirement of Consolidated's own Collateral Trust Bonds, due August 1, 1957, and August 1, 1962.

By our findings and order of February 3, 1944, cited hereinabove, we approved and authorized the carrying out of the competitive bidding procedure proposed by Consolidated as preliminary to the sale of the reclassified stock of Central Illinois, but reserved jurisdiction in respect of the definitive sale of such stock and in respect of the application of the proceeds of such sale, pending the entry of our further order, or orders, to be entered upon completion of the record when the results of the proposed competitive bidding would be available.

A further hearing has now been held and evidence as to the results of the competitive bidding, and certain other evidence, has been incorporated in the record. From such evidence, it appears that Consolidated, subject to our approval, has accepted the bid of a group of underwriters, headed by Allen & Co., of $17.63 per share for the Central Illinois stock, or an aggregate sum of $7,052,000 for the 400,000 shares to be sold. The underwriters propose to resell the stock to the public for a price of $19.125 per share. This price represents a spread to the underwriters of $1.495 per share, or approximately 8.4% of the price to be paid by such underwriters to Consolidated. We make no adverse findings as to the price to be received by Consolidated or as to the price and terms of the proposed public offering.

It is estimated by Consolidated that the total expenses incurred in connection with the proposed sale by Consolidated of the Central Illinois stock will amount to approximately $51,240. All such expenses are to be borne by Consolidated except approximately $2,500 of legal fees and certain accounting expenses, estimated at $3,500. Included within the estimated expenses is an item of $20,000 representing fees proposed to be paid by Consolidated to Central Republic Company for financial services. We find that the fees and expenses as estimated, other than the financial service fees proposed to be paid to Central Republic Company, are not unreasonable. We make no present determination as to the reasonableness of the fees proposed to be paid to Central Republic Company pending further consideration of that question, reserving jurisdiction for later determination of that question.

We find that the proposed sale by Consolidated of the reclassified common stock of Central Illinois and the deposit of the proceeds of such sale with the trustee under the indenture securing the assumed bonds hereinabove identified, as required by the terms of that indenture, pending the definitive expenditure of such proceeds, are necessary to effectuate the provisions of section 11 (b) of the act and fair and equitable to the persons affected thereby. Consolidated's proposals relative to the definitive application of the sales proceeds will be considered, and approved or disapproved, in separate findings and by separate order, or orders, to be entered herein, and jurisdiction will presently be reserved in respect of such proposals.

In view of the foregoing findings and those heretofore made in this matter:

It is hereby ordered, That, subject to the jurisdiction hereinafter reserved, the sale by Consolidated of the reclassified stock of Central Illinois and the deposit of the proceeds of such sale with the trustee under the indenture securing the Federated Utilities, Inc. bonds assumed by Consolidated, be, and the same are hereby, approved, subject to the terms and conditions prescribed by Rule U-24;

Consolidated having requested that the order of this Commission concerning the sale of the Central Illinois stock conform to the formal requirements of sections 373 (a), 371 (b), 371 (f), and 1808 (f) of the Internal Revenue Code, as amended;

It is further ordered and recited, That the sale and transfer by Consolidated of the stock of Central Illinois owned by Consolidated, and hereby specified and itemized as 400,000 shares of the $15 par value common stock of said Central Illinois Electric and Gas Co., are hereby found necessary or appropriate to the integration or simplification of the Consolidated holding company system and to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935 and said sale and transfer are hereby authorized and ordered to be made, pursuant to said section 11 (b), in accordance with the plan for such action hereinabove summarized;

It is further ordered, That jurisdiction be, and it is hereby, expressly reserved to this Commission (1) further to consider the reasonableness, or unreasonableness of the fees proposed to be paid by Consolidated to Central Republic Company, and to enter such further order, or orders, in respect of the payment of such fees as the Commission may hereinafter determine to be appropriate, and (2) in respect of the proposed definitive application of the proceeds of the sale by Consolidated of the stock of Central Illinois, pending the further order, or orders, of the Commission.

By the Commission.

(c) In approving purchase orders for farm machinery and equipment pursuant to this supplementary order, the Farm Rationing Committees for Hawaii and Puerto Rico shall act in accordance with such instructions and within such limitations as may be issued from time to time by the Director.

§ 1202.354 *Quotas for Hawaii, Puerto Rico and the Virgin Islands.* Quotas for Hawaii, Puerto Rico and the Virgin Islands with respect to items of equipment are hereby established as shown on Schedule I. The Farm Rationing Committees shall approve no orders for any item of equipment in excess of the quota shown on Schedule I, unless authorized to do so by the Director. It shall be the responsibility of the Farm Rationing Committees to charge against the quotas items of equipment shipped by a manufacturer in the continental United States to Hawaii, Puerto Rico or the Virgin Islands pursuant to a purchase order accepted on or after July 1, 1943. (Manufacturers are not charged with any responsibility in carrying out the quota provisions of this supplementary order.)

§ 1202.355 *Action by dealers and other persons in Hawaii, Puerto Rico or the Virgin Islands.* A dealer or other person in Hawaii, Puerto Rico or the Virgin Islands desiring to obtain in the continental United States any farm machinery and equipment produced for farm use under War Production Board Order L-257, as amended, shall submit his proposed purchase order to his Farm Rationing Committee for approval. If such dealer or other person places an order for shipment to the Virgin Islands, he shall indicate the shipping weight of the equipment covered by his proposed order.

§ 1202.356 *Reports of manufacturers in the continental United States.* Each manufacturer in the continental United States who, on or after July 1, 1943, and before January 1, 1944, accepts or has accepted orders for any items of farm machinery and equipment designated with an asterisk (*) on Schedule I for shipment to Hawaii, Puerto Rico or the Virgin Islands, shall, on or before January 10, 1944, report to the Director the item numbers and quantity of such equipment shipped or to be shipped pursuant to such order and the territory or possession to which shipment was or is to be made. Thereafter on or before the 10th of each month, each manufacturer in the continental United States who, during the preceding month, accepts an order for any such farm machinery and equipment to be shipped to any such territory or possession shall make a similar report to the Director with respect to the equipment covered by such order. (This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.)

§ 1202.357 *Distribution and rationing procedure in Hawaii, Puerto Rico and the Virgin Islands.* Notwithstanding any provision of Food Production Order No. 14, the Farm Rationing Committees for Hawaii, Puerto Rico and the Virgin Islands are hereby authorized, in their discretion, to direct the distribution of any type of farm machinery and equipment produced for farm use under War Production Board Order L-257, as amended, and to provide for the transfer for use of such equipment. The Farm Rationing Committees shall at all times serve the objectives sought by the rationing program and allocate such farm machinery and equipment in such manner as will afford the maximum contribution to agricultural production. In so doing, the Farm Rationing Committees may prohibit transfers for agricultural use, except pursuant to purchase certificates issued under their authority, and may prescribe the form of such certificates. Control over such transfers may be exercised by the Farm Rationing Committees under such regulations as they may deem appropriate to carry out the purposes of this supplementary order.

§ 1202.358 *Alaska.* Any manufacturer in the continental United States may transfer and ship to Alaska any farm machinery and equipment produced for farm use under War Production Board Order L-257, as amended. If a manufacturer transfers and ships to Alaska any farm machinery and equipment which is also listed on any of the schedules attached to Supplementary Order No. 1 to Food Production Order No. 14, such equipment shall be supplied out of the reserve established by Supplementary Order No. 1, and such manufacturer shall, on or before the 10th day of the month following the acceptance of the purchase order, report to the Director the item numbers and quantity of such equipment. Notwithstanding any provision of Supplementary Order No. 1, a manufacturer is hereby authorized to transfer such equipment from the reserve pursuant to this supplementary order. If a manufacturer declines to accept an order from Alaska for farm machinery and equipment produced for farm use under War Production Board Order L-257, as amended, he shall promptly notify the Director accordingly, stating the reasons for his action. (The reporting requirement contained in this paragraph has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.)

§ 1202.359 *Appeals.* (a) Any person affected by this supplementary order, who resides in Hawaii, Puerto Rico or the Virgin Islands and who believes that compliance herewith will work an exceptional and unreasonable hardship on him, may appeal to his Farm Rationing Committee for relief. Such appeal may be made by filing a written statement of the relief sought showing the reasons why such person believes he is entitled to relief. The Farm Rationing Committee may grant relief if it would not impair the effectiveness of the rationing program established by or pursuant to this supplementary order and if the granting of similar relief to all persons in like circumstances would not hinder such program. The decision of the Farm Rationing Committee shall be in writing and shall be communicated to the person appealing. If such person is not satisfied with the decision of the Farm Rationing Committee, he may appeal to the Director pursuant to § 1202.278 of Food Production Order No. 14, but in such case the appeal shall be submitted to the Farm Rationing Committee and such committee shall promptly transmit it to the Director, together with its recommendation. Nothing herein shall be construed to authorize the Farm Rationing Committee to increase or establish a quota for any item of equipment. If an appeal involves an increase in or the establishment of a quota, the Farm Rationing Committee shall consider and transmit such appeal to the Director with its recommendation.

(b) Any person affected by this order, who resides in the continental United States and who believes that compliance herewith would work an exceptional and unreasonable hardship on him, may appeal to the Director pursuant to § 1202.278 of Food Production Order No. 14.

§ 1202.360 *Directives.* The Director is hereby authorized to issue such directives to manufacturers in the continental United States and to other persons as he deems necessary or appropriate to carry out the purposes of this supplementary order.

§ 1202.361 *Incorporation into Food Production Order No. 14.* This Supplementary Order No. 2 shall be added to, and become a part of, Food Production Order No. 14, and any violation of this Supplementary Order No. 2 shall be deemed to be a violation of Food Production Order No. 14.

§ 1202.362 *Communications.* All communications concerning this order, unless instructions to the contrary are issued, shall be addressed as follows:

(a) Persons residing in Hawaii should address such communications to the Farm Rationing Committee, in care of the Officer in Charge, Agricultural Adjustment Agency, 418 Dillingham Building, Honolulu, Hawaii, Ref. FPO 14, Supp. 2.

(b) Persons residing in Puerto Rico or the Virgin Islands should address such communications to the Farm Rationing Committee, in care of the Officer in Charge, Agricultural Adjustment Agency, P. O. Box 4349, San Juan, Puerto Rico, Ref. FPO 14, Supp. 2.

(c) Persons residing in the continental United States may address such communications either to the Director of the Office of Materials and Facilities, War Food Administration, Washington 25, D. C., Ref. FPO 14, Supp. 2, or to the appropriate Farm Rationing Committee for a territory or possession.

§ 1202.363 *Food Production Order No. 1 superseded.* Food Production Order No. 1, as amended,[1] is hereby superseded: *Provided, however,* That Food Production Order No. 1 shall continue to remain in full force and effect in any territory or possession for the purpose of allowing or sustaining any suit, action, prosecution, or administrative or other proceedings heretofore or hereafter commenced with respect to any violation committed or right or liability incurred under or pursuant to the terms of such order.

PART 622—CLASSIFICATION

AGRICULTURAL DEFERMENT

Pursuant to authority contained in the Selective Training and Service Act of 1940, as amended, Selective Service Regulations, Second Edition, are amended in the following respect:

1. Amend § 622.25 to read as follows:

§ 622.25 *Class II–C: Reopening present classifications.* The classifications of

[1] Form filed as part of the original document.

all registrants now in Class II–C shall be immediately reopened in sequence of order numbers. Upon such reopening the local board shall first determine whether such registrants shall be continued in Class II–C. If it is determined that such registrants qualify for classification in Class II–C, they shall be continued in that class.

2. Amend the regulations by adding a new section to be known as § 622.25–1 to read as follows:

§ 622.25–1 *Class II–C: Man deferred by reason of his agricultural occupation or endeavor.* (a) In Class II–C shall be placed any registrant who is found to be necessary to and regularly engaged in an agricultural occupation or an agricultural endeavor essential to the war effort.

(b) Class II–C deferments shall be for a period of 6 months or less. At the expiration of the period of the registrant's deferment in Class II–C, his classification shall be reopened. So long as the registrant is necessary to and regularly engaged in an agricultural occupation or an agricultural endeavor essential to the war effort and until a satisfactory replacement in such agricultural occupation or agricultural endeavor can be obtained, the registrant shall be continued in Class II–C at the end of each successive period for which he has been deferred in such class.

(c) When a registrant in Class II–C leaves an agricultural occupation or an agricultural endeavor essential to the war effort, he shall be reclassified in Class I–A, Class I–A–O, or Class IV–E unless, before leaving such agricultural occupation or agricultural endeavor, he requests a determination and a determination is made that it is in the best interest of the war effort for him to leave such agricultural occupation or agricultural endeavor for other work.

(d) Any registrant in Class II–C may file with his local board a written request for a determination required under paragraph (c) of this section. When the registrant's board has made a determination upon such request, it shall advise him thereof in writing.

3. Amend § 622.31–2 to read as follows:

§ 622.31–2 *Class III–C: Reopening and classification anew.* (a) No registrant shall hereafter be placed in Class III–C.

(b) As soon as the local board has completed the reopening and reconsideration of the classifications of registrants in Class II–C as provided in § 622.25, it shall reopen in sequence of order numbers the classifications of all registrants who at that time are in Class III–C and they shall then be classified anew. In classifying such registrants anew, it shall first be determined whether such registrants shall be classified in Class II–C. If it is determined that such registrants qualify for classification in Class II–C, they shall be so classified.

4. Amend the regulations by adding a new section to be known as § 622.31–3 to read as follows:

§ 622.31–3 *Class III–C: Men now deferred by reason of dependency and agricultural occupation or endeavor.* (a) A registrant heretofore classified in Class III–C shall be retained in that class until his classification is reopened and he is classified anew under the provisions of paragraph (b) of § 622.31–2, *Provided*, That he (1) continues to be necessary to and regularly engaged in an agricultural occupation or an agricultural endeavor essential to the war effort and until a satisfactory replacement in such agricultural occupation or agricultural endeavor can be obtained, and (2) has a wife or child with whom he maintains a bona fide family relationship in their home, *Provided*, Such status was acquired prior to December 8, 1941; or who has dependent upon him for support any of the following persons: Wife of child (with whom he does not maintain a bona fide family relationship in their home, divorced wife, parent, brother, sister, grandparent, grandchild, a person under 16 years of age whose support he has assumed in good faith, or a person of any age physically or mentally handicapped whose support he has assumed in good faith, *Provided*, Such status was acquired prior to December 8, 1941.

(b) When a registrant in Class III–C leaves an agricultural occupation or an agricultural endeavor essential to the war effort, he shall be reclassified in Class I–A, Class I–A–O, or Class IV–E unless, before leaving such agricultural occupation or agricultural endeavor, he requests a determination and a determination is made that it is in the best interest of the war effort for him to leave such agricultural occupation or agricultural endeavor for other work.

(c) Any registrant in Class III–C may file with his local board a written request for a determination required under paragraph (b) of this section. When his local board has made a determination upon such request, it shall advise the registrant thereof in writing.

5. The foregoing amendments to the Selective Service Regulations shall be effective immediately upon the filing hereof with the Division of the Federal Register.

PART 1010—SUSPENSION ORDER

[Suspension Order S-487]

SUGARMAN-MOORE COMPANY, INC.

Sugarman-Moore Company, Inc. is an Illinois corporation with offices at 936 North Michigan Avenue, Chicago, Illinois. Its business is that of a contractor and builder. In the months of February and March 1943 the corporation performed construction work on the premises located at 20-22 South Michigan Avenue, Chicago, Illinois, without authorization from the War Production Board, and at a total estimated cost in excess of $1,000.00. This construction by the corporation was a violation of Conservation Order L-41. The corporation was familiar with Conservation Order L-41 and its violation was based on such gross negligence and carelessness as to amount to wilfulness.

This violation of Conservation Order L-41 has hampered and impeded the war effort of the United States. In view of the foregoing, *It is hereby ordered*, That:

§ 1010.487 *Suspension Order No. S-487.* (a) Deliveries of material, directly or indirectly, to Sugarman-Moore Company, Inc., its successors or assigns, shall not be accorded priority over deliveries under any other contract or order and no preference ratings shall be assigned, applied or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders or any other order or regulation of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(b) No allocation shall be made to Sugarman-Moore Company, Inc., its successors or assigns, of any material the supply or distribution of which is governed by any order of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(c) Nothing contained in this order shall be deemed to relieve Sugarman-Moore Company, Inc., its successors or assigns, from any restriction, prohibition, or provision contained in any other order or regulation of the War Production Board, except in so far as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on February 17, 1944 and shall expire on May 17, 1944.

Issued this 10th day of February 1944.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[PR 3, Direction 5 as Amended Feb. 18, 1944]

RATINGS FOR LISTED CHEMICALS AND OTHER MATERIALS

Direction 5 to Priorities Regulation No. 3 is hereby amended to read as follows:

(a) *Purpose.* Owing to the fact that the supply of certain materials is controlled by peculiar factors including their interchangeability and their use both as production materials and for MRO (maintenance, repair and operating supplies), it is necessary to provide special rules for the use of ratings in getting these materials. The purpose of this Direction is to prohibit the use of AA-1 and AA-2 blanket MRO ratings for the materials on the attached list, and to substitute in the place of these ratings, the use of production materials ratings. Where no production materials ratings are available, this direction assigns ratings which may be used in place of AA-1 and AA-2 blanket MRO ratings.

(b) *Restriction on use of certain blanket MRO ratings.* Blanket MRO ratings of AA-1 and AA-2 may not be used to get any of the materials on the attached list for any purpose. An exception to this prohibition, however, is a rating assigned under P-98-b when the rating is applied with the allotment symbol, MRO-P-3, and a rating assigned under P-98 where the rating is applied with the allotment symbol S-3. "Blanket MRO ratings" are defined in paragraph (e) (2) of Priorities Regulation No. 3.

(c) *What ratings may be used instead.* You may use any of the following ratings which may be applicable to your situation for the materials listed in this direction:

(1) *Production materials ratings.* If you have a rating for production materials to be physically incorporated in your product, you may use that rating to get the materials on the attached list as MRO. You may not use the MRO symbol in this case, but your allotment number and symbol, if any, assigned to your production schedule should be used. "Production materials" are defined in paragraph (b) (2) of Priorities Regulation No. 11B and Interpretation No. 1 of that regulation issued June 16, 1943, and also paragraph (b) (1) of CMP Regulation No. 3. For the purpose of this Direction, any rating assigned under Orders P-65 and P-135 are production materials ratings. The amount of these materials which are bought as MRO with any production materials rating must be deducted from your MRO quota under CMP Regulation No. 5, or any other regulation or order which places limits on your purchase of MRO.

(2) *Blanket MRO rating of AA-1 lowered to AA-2X.* If you have a blanket MRO rating of AA-1, you may use an AA-2X rating to get the materials listed in this direction for MRO. If a purchase order bearing a blanket MRO rating of AA-1 is served upon a seller for a product which does not appear on the attached list but which contains any materials listed under "Chemicals" on the attached list, the seller may not extend that AA-1 rating to get the necessary production materials (appearing on the attached list) to make that product. The seller may use a rating of AA-2X instead to get the necessary production materials.

(3) *Blanket MRO rating of AA-2 lowered to AA-3.* If you have a blanket MRO rating of AA-2, you may use an AA-3 rating to get the materials listed in this direction for MRO. If a purchase order bearing a blanket MRO rating of AA-2 is served upon a seller for a product which does not appear on the attached list but which contains any materials listed under "Chemicals" on the attached list, the seller may not extend that AA-2 rating to get the necessary production materials (appearing on the attached list) to make that product. The seller may use a rating of AA-3 instead to get the necessary production materials.

(4) *Ratings for construction projects.* If you have a rating for materials to be physically incorporated in a construction project, you may use that rating to get materials on the attached list for MRO for use in that construction project.

(5) *Specific ratings.* You may use any rating assigned by a preference rating certificate which specifically names the kinds and quantities of material rated to get the materials on the attached list.

(d) *Persons engaged in several activities.* If a person is engaged in several business activities to which different ratings are assigned and it is impracticable to apportion his needs for any material on the attached list between those activities, he must use the rating assigned to the activity in which he is principally engaged. For example, if a person has 75 per cent of his production devoted to filling orders bearing AA-1 production materials ratings, and 25 per cent of his production devoted to filling orders bearing other production materials ratings and it is impracticable to apportion his MRO needs between these, he may use his AA-1 production materials rating to procure items on the attached list to satisfy his entire MRO needs. Also if a person produces only one product but has more than one production rating for the materials going into that product, he must use the rating applicable to the greater portion of his production.

(e) *Applications for special assistance.* Any person who needs any material listed in this direction either as production material or for MRO, and is unable to get it with the rating which he has, may apply on Form WPB-541 (formerly PD-1A) to the nearest local office of the War Production Board for a higher rating.

Issued this 18th day of February 1944.

PART 3290—TEXTILE, CLOTHING AND LEATHER

[General Limitation Order L-215, as Amended Feb. 18, 1944]

TEXTILE, CLOTHING AND LEATHER MACHINERY

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of textile, clothing and leather machinery for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3290.150 *General Limitation Order L-215*—(a) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(b) *Restrictions on purchases of textile, clothing and leather machinery.* No person (including dealers) shall, in any transaction of purchase, lease or rent, accept delivery of any machinery of the kinds on List A at the end of this order without obtaining the approval of the War Production Board on Form WPB-1319 or Form WPB-617 (formerly PD-200). Application for such approval must be filed whether the machinery in question is new, used or rebuilt, unless exempted in paragraph (d) below.

In determining whether to grant or deny applications on Form WPB-1319, the War Production Board will give consideration to the following: availability of the type of machinery in question; the essentiality of the output of activity for which such machinery is to be used; the productive capacity and condition of the machinery to be replaced or supplemented; the labor supply in the area where the machinery is proposed to be used, and any other factors peculiar to the particular application.

(c) *Production and sales schedules of machinery manufacturers.* Each person constructing or assembling for sale or lease any machinery on List A, or reconditioning or rebuilding any textile machinery or equipment for sale or lease, shall file a schedule for the purpose of obtaining approval of his production and deliveries and shall keep his production and deliveries within the limits authorized on these schedules after they have been approved. No person whose operations are covered by this paragraph shall conduct such operations except in accordance with an approved schedule.

The schedule filed by manufacturers of textile machinery and cotton ginning and delinting machinery shall be on Form WPB-1805 (formerly PD-746), and shall be filed on or before the 15th day of each month. Schedules of manufacturers of other types of machinery on List A shall be filed on Form WPB-1806 (formerly WPB-745) not later than 15 days from the end of each calendar quarter.

(d) *Exceptions.* It shall not be necessary to file applications or schedules under paragraph (b) or (c) with respect to the following:

(1) Used or rebuilt textile machinery.

(2) The following tanning, shoe, shoe repairing and other leather working machinery:

(i) Used or rebuilt tanning machinery, whether sold, leased or rented;

(ii) Used or rebuilt shoe manufacturing machinery, whether sold, leased or rented, except eyeletting, clicking, dinking and skiving machinery;

(iii) New, used or rebuilt shoe repairing machinery sold for less than $50;

(iv) All other leather working machinery sold for less than $200, except clicking, dinking and skiving machinery, and power driven eyeletting machines.

(3) Used or rebuilt industrial sewing machines, whether sold, leased or rented.

(4) [Deleted, Feb. 5, 1944.]

(d) A price equal to the total cost of manufacturing and selling the horse collars, plus 2% of such cost, if the profits currently realized by the manufacturer from his total operations are less than 3% of net sales or less than double those earned during the years 1936–1939 inclusive.

The Office of Price Administration may also adjust the maximum prices of purchasers for resale.

Applications may be made by filing a letter in duplicate with the Secretary, Office of Price Administration, Washington, D. C., referring to the Direction of the War Production Board and stating that the manufacturer is entitled to relief under the provisions of this subdivision.

FEDERAL POWER COMMISSION.

[Docket No. G-525]

KANSAS-NEBRASKA NATURAL GAS COMPANY, INC.

NOTICE OF APPLICATION

FEBRUARY 17, 1944.

Notice is hereby given that on February 10, 1944, the Kansas-Nebraska Natural Gas Company, Inc., a Kansas corporation having its principal places of business in Phillipsburg, Kansas, and Hastings, Nebraska, filed with the Federal Power Commission an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, as amended, to authorize the construction and operation of the facilities hereinafter described, and to effect an interconnection between the proposed pipe line and the line of the Central Gas Utilities Company at a point near Wakeeney in Trego County, Kansas.

Applicant proposes to construct and operate an 18-inch natural-gas pipe line approximately 44 miles in length to be constructed from a point in Section 5, Township 25 South, Range 35 West, in Kearny County, Kansas, thence in a generally northeasterly direction to the compressor station of Applicant located in the southwest ¼ of Section 16, Township 18 South, Range 33 West, being approximately four miles west of Scott City, in Scott County, Kansas; a 12¾-inch natural-gas pipe line approximately 115 miles in length to be constructed from said compressor station, thence in a generally northeasterly direction to the present compressor station of Applicant west of Stockton in Rocks County, Kansas; an 8⅝-inch natural-gas pipe line approximately 15 miles in length to be constructed from its Stockton compressor station, in a northerly direction; and appurtenant facilities including the installation of four additional 500-horsepower compressor units in certain of its compressor stations, together with additions to its dehydrating plant situated at its Scott City compressor station. The proposed natural-gas pipe lines after leaving Scott City compressor station will continue through Scott County and into and through the Counties of Lane, Gove, Trego, Graham, Rocks, and into Phillips County, Kansas.

Applicant states that due to the decline of the natural gas reserves in the Otis Field in the State of Kansas, it is necessary to augment its present supply of natural gas by making available reserves in the Hugoton Field in the State of Kansas, by construction of the proposed facilities, in order to assure continuity of adequate service for war, defense and essential civilian requirements in the areas in the States of Kansas and Nebraska now served by Applicant, which embraces 95 communities with an aggregate population of approximately 150,000.

Applicant asserts it does not have any present plan to sell and deliver, through the facilities above described, natural gas to any communities or customers now served with natural gas by any other natural gas company.

Any person desiring to be heard or to make any protest with reference to said application should, on or before the 4th day of March, 1944, file with the Federal Power Commission a petition or protest in accordance with the Commission's provisional rules of practice and regulations under the Natural Gas Act.

(b) The Public Service Commission of the State of Montana, by its orders of January 6, 1944, and January 18, 1944, In the Matter of the Reclassification of Accounts of The Montana Power Company, having set a hearing therein for February 28, 1944, at its offices at Helena, Montana; and

In all other respects the hearing shall be conducted upon behalf of the Federal Power Commission as provided for in the Federal Power Act and the rules of practice and procedure prescribed thereunder, it being intended that each Commission shall control its own record and adopt its own separate final order thereon. EXECUTIVE ORDER 9424

ESTABLISHING IN THE UNITED STATES PATENT OFFICE A REGISTER OF GOVERNMENT INTERESTS IN PATENTS AND APPLICATIONS FOR PATENTS

WHEREAS there exists among the several executive departments and agencies a need for a more adequate source of information with respect to patent rights and interests owned or controlled by the United States Government; and

WHEREAS the establishment in the United States Patent Office, Department of Commerce, of a separate register for the recording of such patent rights and interests would meet this need and would be in the public interest:

NOW, THEREFORE, by virtue of the authority vested in me as President of the United States, it is ordered as follows:

1. The Secretary of Commerce shall cause to be established in the United States Patent Office a separate register for the recording of all rights and interests of the Government in or under patents and applications for patents.

2. The several departments and other executive agencies of the Government, including Government-owned or Government-controlled corporations, shall forward promptly to the Commissioner of Patents for recording in the separate register provided for in paragraph 1 hereof all licenses, assignments, or other interests of the Government in or under patents or applications for patents, in accordance with such rules and regulations as may be prescribed pursuant to paragraph 4 hereof; but the lack of recordation in such register of any right or interest of the Government in or under any patent or application therefor shall not prejudice in any way the assertion of such right or interest by the Government.

3. The register shall be open to inspection except as to such entries or documents which, in the opinion of the department or agency submitting them for recording, should be maintained in secrecy: *Provided, however,* That the right of inspection may be restricted to authorized representatives of the Government pending the final report to the President by the National Patent Planning Commission under Executive Order No. 8977 of December 12, 1941,[1] and action thereon by the President.

4. The Commissioner of Patents, with the approval of the Secretary of Commerce, shall prescribe such rules and regulations as he may deem necessary to effectuate the purposes of this order.

(iv) *Care and maintenance.* There is no authority of law for the expenditure of funds for the improvement of such cemeteries. It is the responsibility of the post commander, under the provisions of Army Regulations, to insure that the cemetery is kept in a clean and attractive condition. This responsibility of the post commander will be carried out by the post engineer and will include such maintenance work as may be necessary or incidental to the upkeep of the cemetery, including grounds, lawns, trees, shrubs, plants, roads, walks, drains, fences, and walls.

(b) *Within boundaries of military reservations leased by United States.* Areas leased by the United States for military purposes may contain private cemeteries. The United States as a general rule does not acquire any rights in such cemeteries unless the cemetery interferes with the administration of the area for military uses. In such cases, the rights of the interested parties are defined in an agreement made by and between the division engineer and the interested parties, upon the recommendation of the commanding officer. A copy of the agreement is furnished the commanding officer for his guidance in administering the area. Commanding officers will provide for protection of the cemetery by fencing, policing, and patrolling when necessary. (R.S. 161; 5 U.S.C. 22) [W. D. Cir. 64, 11 February 1944]

TITLE 24—HOUSING CREDIT

Chapter IV—Home Owners Loan Corporation

[Bulletin 254]

PART 402—LOAN SERVICE DIVISION

MISCELLANEOUS AMENDMENTS

Part 402 is amended as follows:

Section 402.16 (a) shall be amended to read as follows:

§ 402.16 *Reconditioning*—(a) *Advances for reconditioning.* The General Manager may authorize advances for the account of borrowers, vendees, and transferees to accomplish reconditioning of any nature whatsoever, including advances for reconditioning which has been partially or fully performed by home owners not in conformance with established regulations, provided such reconditioning is determined to be in the best interest of the Corporation in order to protect its security, to facilitate the collection of the indebtedness owing to the Corporation, or to promote the orderly liquidation of the assets of the Corporation; and may incur and approve the amount and payment of fees and expenses in connection with such advances, except legal fees and expenses which shall be incurred, approved, and paid as provided in Part 406 of this chapter.

The authority herein granted may be exercised, also, by the regional manager, with the advice of the regional counsel, in those cases where he determines that an advance for reconditioning is in the best interest of the Corporation in order to protect its security or to facilitate the collection of the indebtedness owing to the Corporation, *Provided*, The amount to be authorized (exclusive of legal and inspection fees) does not exceed $1,000.

Section 402.16-5 shall be added, which shall read as follows:

§ 402.16-5 *Incidental expenses.* All funds advanced by the Corporation to the home owner for expenses shall be included in the accepted and approved form of the debt or lien instrument. If the advance is disallowed, the funds advanced by the Corporation for expenses shall be charged to the home owner's account pursuant to the provisions of Form 529-A-R7AB.

Repayment of advances. An advance to a home owner for reconditioning shall be repaid "on demand" or "in monthly instalments," as may be determined by the regional manager, who shall notify the regional accountant of the time and manner of the repayment plan. When the advance is to be repayable "in monthly instalments," the total period of repayment shall not exceed the unexpired term of the Corporation's loan, or as extended, nor the statutory period of limitations, and shall be fixed with reference to the estimated life of the reconditioning and the home owner's ability to repay.

Section 402.16-6 shall be amended to read as follows:

§ 402.16-6 *Home office approval.* If the amount of the advance to be authorized (exclusive of legal and inspection fees) exceeds $1,000, or, regardless of the amount, if the regional manager determines that any part of the advance for reconditioning is in the best interest of the Corporation in order to promote orderly liquidation of the assets of the Corporation, he shall forward the file, together with his recommendation, to the General Manager for determination.

In any cases wherein it appears that an advance may not be authorized due to any of the following circumstances, and the regional manager is of the opinion that it is to the best interest of the Corporation to grant an advance notwithstanding, the case may be submitted to the home office for the review and approval of the General Manager. Each such case shall be submitted to the Deputy General Manager in Charge of Loan Service and the Director of Reconditioning for their review and recommendation and to the legal department for advice:

1. Where the home owner cannot effect subordination or release of liens, except taxes and assessments, which are prior to the lien obtained for the advance;

2. Where it is impracticable to require the home owner to effect subordination or release of intervening liens;

3. Where, because of emergency or for other reasons, it is impracticable to require title examination;

4. Where it is impracticable or impossible to obtain the execution of the required security instrument by any or all parties in interest or title and the advance would not be secured as a lien under the Corporation's loan instrument. (In each such case, the file shall contain the opinion of the regional counsel as to the legal rights and remedies of the Corporation to establish and enforce a lien for such reconditioning as against any or all parties in interest or title.);

5. Where an advance cannot be made in full compliance with procedure regulations, or where the regional manager seeks the advice or the decision of the General Manager as to the eligibility of the home owner for an advance under § 402.16 (a).

Section 402.16-7 shall be added to read as follows:

§ 402.16-7 *Reports and legal advice.* In special cases, if the regional manager determines that Form R-4-D and/or an appraisal report is necessary prior to consideration by him, the case may be referred to the Reconditioning Section and/or the Appraisal Section for the desired reports. Ordinarily, the legal requirements will be indicated by the regional counsel in Block VI after authorization of an advance by the regional manager. However, in any special case where the regional manager requires it, Block VI may be completed prior to consideration of the case by the regional manager.

Title examination. Title examination is not required when the estimated cost of reconditioning is $500 or less. Title examination is required when the estimated cost of reconditioning is greater than $500, unless regional counsel waives title examination and certifies as his opinion that the advance will be secured as a lien under the Corporation's loan instrument and such lien will be prior to encumbrances, except taxes and assessments, which intervened or may intervene between the date of the Corporation's loan and the date of the additional lien to be obtained.

Where title examination is required and intervening liens are disclosed, the home owner shall effect subordination or discharge of all such liens, except liens for taxes and assessments, without expense to the Corporation. If the home owner is unable to effect subordination or release of such liens, the regional manager shall be notified.

Section 402.16-13 shall be added, which shall read as follows:

§ 402.16-13 *Advances for reconditioning partially or fully completed.* When application Form 529-A-R7AB requests an advance for reconditioning which has been partially or fully performed by a home owner not in conformance with the standard regulations, the case shall be reviewed by the control supervisor and the Analysis and Review Section, who shall make a recommendation to the regional manager. If the regional manager approves the further consideration of the advance, the case shall be referred to the regional reconditioning supervisor, who shall cause the necessary inspections to be made, and he shall indicate on the form whether the reconditioning has been performed in a satisfactory manner or whether it will be performed under the supervision of the Reconditioning Section. He also shall indicate the actual or estimated reasonable cost of the reconditioning. Acting upon the recommendations of the Loan Service Division and the information of the regional reconditioning supervisor, the regional manager may grant an advance for such repairs within the limitations of his authority.

Section 402.16-14 shall be added, which shall read as follows:

§ 402.16-14 *Catastrophe.* The General Manager is authorized in an emergency to raise the limitations of authority of the regional manager for the purpose of reconditioning properties which have been damaged or destroyed by flood, earthquake, cyclone, or other catastrophe, and is authorized to waive full compliance with the regulations insofar as a need exists. In each such situation, the Director of Reconditioning and the Deputy General Manager in Charge of Loan Service shall make recommendation to the General Manager.

Effective February 18, 1944.

§ 405.00 *Organization.* The Reconditioning Section shall function under the administrative direction and supervision of the General Manager and be under the immediate charge of a Director of Reconditioning who shall have necessary authority to carry out the rules and regulations of the Corporation relating to matters within the jurisdiction of the Section, and who shall establish qualification standards for all salaried and fee personnel of the Reconditioning Section who perform reconditioning functions of a technical nature, and shall be responsible for the establishment and approval of fees, and cause to be provided such qualified and competent salaried, W. A. E., and fee personnel as may be necessary.

Field staff. The activities of the Reconditioning Section in the field shall be conducted by regional reconditioning supervisors functioning under the executive authority of managers of their respective offices and assisted by adequate staffs of assistants, inspectors and clerical personnel. Questions of a technical nature shall be submitted by reconditioning supervisors to reconditioning officials next superior for instructions. Copies of all correspondence shall be sent to the managers of the respective offices.

§ 405.00–2 *Fee inspectors not employees.* A fee inspector is not an agent or an employee of the Corporation. He is a party who has contracted with the Corporation for the performance of certain enumerated services for an agreed fee. A fee inspector is not authorized to obligate the Corporation in any manner, except where specifically authorized by regulations or by an official duly authorized to grant such authority.

Qualifications and duties. Architects, engineers, builders, or other qualified persons, where practicable and to the best interests of the Corporation, shall be engaged on a fee basis for all types of cases, to make any necessary inspections of properties; to prepare sketches for minor reconditioning; to prepare specifications; to furnish cost estimates; to certify approval or disapproval of the reconditioning construction work; and to perform such other special assignments as hereinafter provided. Each applicant for such fee assignments must execute an approved application form.

§ 405.00–3 *Assignments.* Assignments may be made to any approved fee inspector, irrespective of (1) previous salary employments by the Corporation, (2) present W. A. E. employment by the Corporation, or (3) previous salaried or W. A. E. service on cases reassigned: *Provided,* That fee service shall not be performed on the same day as W. A. E. employment by the Corporation. The services rendered by the fee inspector shall be conducted under the immediate supervision of the regional reconditioning supervisor or a salaried employee designated by him to exercise such supervision. Reconditioning inspections may be made either on a fee or salaried basis by a qualified inspector at the discretion of the regional reconditioning supervisor.

§ 405.00–4 *Fees.* The regional manager and regional reconditioning supervisor shall recommend the fees to be established for fee inspection service to the Director of Reconditioning, for submission to and final approval by the General Manager. The fees shall include all incidental costs, such as mileage, photographs, plans, and all expenses incidental to the service to be rendered on each type of case. The approved schedule of fees established in accordance with the procedure shall be used by the regional reconditioning supervisor in determining the fees to be paid to the inspector, except when such supervisor determines a lower fee adequate for the service to be performed.

§ 405.00–5 *Fees limited.* An individual fee employee shall not receive assignments for inspection services as heretofore described in this part, the compensation for which would exceed $500 in any given month. Under exceptional circumstances where the best interests of the Corporation require it, the Director of Reconditioning may remove temporarily the limit of $500, upon the recommendation of the regional manager and regional reconditioning supervisor. Individual contracts for architectural or engineering services for plans or supervision, or both, will not be included in the computation of the $500 limit of fees for inspection services.

§ 405.00–6 *Fee architects and engineers.* When the scope of the reconditioning work requires the preparation of sketches or working drawings, together with special specifications, if any, in order to visualize properly the work before the case can be advanced for further consideration, approved architects or engineers may be employed on a fee basis pursuant to the following regulations.

Mortgagor cases. The home owner may cause to be prepared at his own expense such drawings and special specifications for approval of the regional reconditioning supervisor; or, if the home owner so elects, the supervisor may assign a fee architect or engineer for said service, provided the contemplated reconditioning first receives a tentative approval by the regional manager. The fee, with the consent and approval of the owner, shall be established as hereinafter provided.

Acquired property cases. In all cases where architectural or engineering services are engaged by the Corporation on acquired properties or properties in the process of being acquired, architectural and engineering services shall not be contracted for until the case has received preliminary approval by the regional manager and approval by him for the fee recommended to be paid.

§ 405.00–7 *Fees for architectural engineering services.* Fees for architectural and engineering services, including the preparation of sketches, working drawings, specifications, and supervision, shall be established by the regional reconditioning supervisor with the approval of the regional manager, and in no instances shall be in excess of the prevailing fee or fees fixed and established by local professional societies. In cases involving advances to home owners, such fees shall be included in the advance and charged to the home owner's account. In the event the reconditioning work is not executed after preliminary approval by the regional manager, and an advance for reconditioning is not made to the home owner, the Corporation may advance the fee, subject to the approval of the Director of Reconditioning, not to exceed 2½% of the estimated cost of the work, *Provided,* The amount so advanced shall not exceed the sum of $75, and, further, that the sketches or working drawings and specifications submitted shall have been approved by the regional reconditioning supervisor. In all cases of acquired properties or properties in the process of being acquired, payments of fees shall be in accordance with the amount and terms of the fee contract approved by the regional manager, both for partial and fully completed cases.

§ 405.00–8 *Fee work unsatisfactory.* If the work of any fee inspector, fee architect, or fee engineer is unsatisfactory, the regional reconditioning supervisor shall withhold payment of any fees for such work, direct that no more work be assigned to such individual, and report the same to the Director of Reconditioning.

PROCEDURE AND FUNCTIONS

§ 405.00–11 *Standards.* The Reconditioning Section shall formulate and establish, under approved procedure, standards of specifications for materials, equipment, and workmanship, and maintain a technical reconditioning service available to mortgagors and to the several divisions of the Corporation.

Master specifications. Unless otherwise specifically provided for in the regulations of reconditioning operations of the Corporation, where the cost of reconditioning exceeds $25 the master specifications, with any addenda approved by the Director of Reconditioning, are required in the preparation of specifications, reports, and agreements.

In such preparations, the scope of the reconditioning shall be listed under the appropriate trade classifications, and reference made to the applicable section and paragraph of the master specifications governing the nature of the reconditioning.

Any individual job specification prepared otherwise than in accordance with master specifications is subject to the review and approval of the regional reconditioning supervisor, or persons appointed by him, before the award of the contract.

§ 405.00–12 *Execution of forms.* The regional manager is authorized to execute on behalf of the Corporation all reconditioning contracts and reconditioning forms in all cases where the expenditure or advance has been authorized in accordance with the regulations. The regional manager may request, in the manner now or hereafter provided, the appointment of deputies to execute forms on his behalf, to exercise any authority, and to perform any duties vested in or required of the regional manager with respect to reconditioning operations; *Provided, however,* That such deputation is limited to the regional reconditioning supervisor and employees of the Reconditioning Section recommended by him. The foregoing limitations with respect to the persons who may be appointed deputies shall not apply to the appointment of deputies to approve, on behalf of the regional manager, vouchers for reimbursement of travel expense and transportation rental, and shall not be construed as prohibiting the appointment of employees of the Property Management Division to execute, as deputies for the regional manager, reconditioning forms when used by that Division in the performance of maintenance repairs.

§ 405.00–13 *Contractors.* The performance of all reconditioning under the supervision of the Reconditioning Section shall be conducted through qualified and approved contractors. Upon application by qualified contractors, whether an individual, partnership, or Corporation, the regional reconditioning supervisor is authorized to approve such applicants as contractors to perform reconditioning services, and is authorized to terminate the services of such approved contractors for cause or when no longer required. To qualify as a contractor, the applicant shall be honest, dependable, and cooperative; shall possess experience, financial responsibility, organization, and equipment facilities, and shall comply with other regulations prescribed as necessary to perform the reconditioning services required by the Corporation.

§ 405.00–15 *Workmen's compensation.* In order to qualify as an approved contractor, an applicant must show evidence of compliance with the State Workmen's Compensation Law when the legal department advises that the compensation law is compulsory and that the contractor is subject to the operation of such law.

§ 405.00–16 *Public liability insurance.* In order to qualify as an approved contractor, the applicant must show evidence of carrying public liability insurance when the legal department advises that the state law imposes upon the owner of a property legal liability to the public for the negligent acts of an independent contractor, his employees, assignees, or agents. In the absence of such legal liability, the regional reconditioning supervisor, with the concurrence of the regional manager, may require the contractor to provide public liability insurance if it is determined that appreciable hazards exist in a particular case.

Waiver of insurance. The requirements of this section may be waived in any case in which the regional reconditioning supervisor, with the concurrence of the regional manager, determines it is necessary or advisable in the interests of the Corporation.

§ 405.00–21 *Job specifications.* Upon receipt of instructions to proceed with the approved reconditioning, the regional reconditioning supervisor shall review the file upon which the approval has been based. If the case has been processed previously on a desk estimate or preliminary inspection, or the case is already authorized and the supervisor deems such data sufficient for the preparation of accurate specifications, he may order their preparation, but in those cases where such data is inadequate, a field inspection shall be ordered to procure proper information for the preparation of specifications.

In those cases where plans and specifications are prepared by fee architects or engineers, the regional reconditioning supervisor shall review such plans and specifications before inviting bids, and determine that same have been prepared to include the authorized scope of work in accordance with the minimum standards of the Reconditioning Section, and that the estimated cost thereof is reasonable and within the authorized amount.

§ 405.00–22 *Mechanical tests.* In certain instances it may be necessary to obtain a mechanical test of the plumbing, heating, or electrical systems. In any case in which the regional reconditioning supervisor deems it advisable, he may order a mechanical test on an approved form from a contractor, inspector, or other qualified person. Wherever feasible, such test should be made prior to the award of contract. In cases under the jurisdiction of the Property Management Division, the expense for such services shall be based upon the approved schedule of costs.

§ 405.00–23 *Special services.* In certain cases it may be necessary to perform services of a special character, such as termite or pest control, roofing examinations, mechanical tests, orchard pruning, sanitation, and similar inspections or services. In such cases the fees applicable for such service shall be negotiated, based upon the approved schedule of fees and expense.

§ 405.00–24 *Bids.* It is the general policy of the Corporation to solicit bids only from qualified and approved contractors. In the event such contractors are not available in the locality, or where the Director of Reconditioning otherwise authorizes, the regional reconditioning supervisor may solicit bids and award contract to a contractor other than an approved one.

Invitation to bid. In all cases where the Corporation engages the contractor, the invitation to bid shall be in rotation as to class or type of contractor so as to provide equitable distribution of reconditioning cases among all contractors: *Provided, however,* That this practice may be waived by the regional reconditioning supervisor in those localities where the number of contractors is limited, or where an emergency condition exists where contractors are not available, or refuse or are unwilling to submit bids. In mortgagor cases, the invitation to bid shall be obtained from qualified and approved contractors selected by the home owner. The Corporation reserves the right to reject any or all bids, and in cases where the bid submitted appears unreasonable or excessive, the regional reconditioning supervisor, where he deems it to the best interests of the Corporation, may solicit additional bids without the necessity of rejecting former bid or bids. A statement shall accompany the voucher disclosing the reason for soliciting the additional bids thus obtained.

Competitive bids. On jobs in excess of $50, competitive bids shall be solicited from two or more contractors, except in cases of emergency repairs or where it is impossible or impracticable to obtain bids or where necessary to effect an immediate sale or tenancy, or in any other cases authorized by the regulations. A statement shall accompany the voucher, disclosing the reason and justification for waiver of competitive bids.

§ 405.00–25 *Award of contracts.* It is the general policy of the corporation to award reconditioning contracts to the lowest acceptable bidder. In cases where the Corporation engages the contractor, a contract may be awarded to a higher bidder when authorized under the regulations or when, upon the written recommendation of the regional reconditioning supervisor, the regional manager determines that it is advantageous for the Corporation to accept a higher bid. In home owner cases, a contract may be awarded to a higher bidder if the home owner deposits with the Corporation the difference between the lowest bid and the higher bid.

Separate contracts. Due to climatic and other justifiable conditions, a separate contract may be awarded for that portion of the reconditioning which can be performed immediately, and an additional contract may be awarded later for the remainder. Where it is to the Corporation's interest, the regional reconditioning supervisor may recommend the award of a separate contract for work of a particular trade or for the purchase and installation of refrigerators, ranges, shades, linoleum, and other fixtures or equipment.

§ 405.00–26 *Reconditioning extras and credits.* Where the need for extra reconditioning arises subsequent to the award of contract and during the progress of the reconditioning, the regional manager, within the limitations hereinafter prescribed, may authorize generally, or in specific cases, regional reconditioning supervisors, or salaried or fee reconditioning inspectors, to award supplementary contracts for extras or credits, providing the total amount of the original and

supplementary contracts shall not exceed the sum authorized for reconditioning in any case unless a greater amount than originally authorized is approved.

When authorized, the regional reconditioning supervisor or inspector may direct the contractor to begin the performance of the extra reconditioning immediately after obtaining a supplemental contract executed by the contractor. Such extra reconditioning shall be evidenced on the supplemental contract form or approved substitute and shall be transmitted to the regional manager or the deputized regional reconditioning supervisor for execution. Competitive bids are not required in the award of extra contracts.

Acquired property cases. On properties under the jurisdiction of the Property Management Division or on properties upon which a sale is completed and reconditioning was previously authorized, the regional manager may authorize generally, in writing or verbally in specific cases, reconditioning supervisors or reconditioning inspectors to award a contract for extra reconditioning, provided that the cost thereof shall not exceed $100 in those cases where the amount originally authorized was $500 or less, and *Provided*, That the cost of such items or extras shall not exceed $200 in those cases where the amount originally authorized exceeded $500. These amounts are in addition to the amount originally authorized.

Extras; home owner cases. On properties securing liens of the Corporation or sold by the Corporation where the sum of the original reconditioning contract amount, together with the cost of the extra, does not exceed the amount of the original authorization, the regional manager may authorize such extra reconditioning. If the sum of the original contract amount, together with the cost of the extra, exceeds the amount of the original authorization, the regional manager may authorize such extra reconditioning with the concurring approval of the home owner. Authorized extra reconditioning shall be evidenced on an approved supplemental contract form. Competitive bids are not required.

Credits. Where the need arises for the omission from the contract of certain reconditioning in connection with properties securing liens of the Corporation, or properties acquired or sold by the Corporation, the regional manager may authorize the regional reconditioning supervisor, either generally in writing or verbally in specific cases, to effect a credit in a fair and reasonable amount. The agreement for the omission of reconditioning shall be evidenced on an approved supplemental contract form and shall be signed by the home owner and contractor.

§ 405.00–27 *Partial payments.* Where the amount of a reconditioning contract is substantial, or where full performance of the contract is delayed or prevented because of conditions beyond the control of the contractor, such as weather, strikes or other exceptional circumstances, the regional manager is authorized to effect partial payment to the contractor in an amount not to exceed 85% of the fair and reasonable cost of the completed reconditioning. In any such case, the regional manager may require a performance and payment bond or other acceptable indemnity, at the contractor's expense, in such form as prescribed by the Legal Department. In the event such indemnity is not required, the prescribed evidence for avoidance of mechanics' liens shall be obtained.

§ 405.00–33 *Chattels.* When requested, the reconditioning section shall inspect and determine the value of any chattels used in connection with any property upon which the Corporation holds a mortgage or other lien, or in connection with any property under the jurisdiction of the Property Management Division. The regional reconditioning supervisor shall make recommendations as to whether it is to the Corporation's interest to permit removal or to settle or acquire any lien upon or interest in any such chattel as provided in Part 406.

ACQUIRED PROPERTY CASES

§ 405.01–4 *Work order cases.* In maintenance cases referred to the Reconditioning Section, where the estimated cost of maintenance, reconditioning materials, or services does not exceed $50, the regional reconditioning supervisor may contact a qualified contractor, mechanic, or material dealer by telephone or other means and negotiate a reasonable price within the amount authorized for such work, materials, or services, and may undertake to have it performed or delivered immediately. In such cases, a description of the work, materials, or services, and the cost thereof shall be prepared on a form approved for such purpose.

§ 405.01–6 *Receivership cases.* Receivership cases of reconditioning will arise on properties under the jurisdiction of a local court, wherein the court has appointed a receiver to assume custody of the property. In such cases, the technical assistance and facilities of the Reconditioning Section may be made available to receivers by the regional manager with the advice of regional counsel.

§ 405.01–7 *Manager's approval.* After approving the required reconditioning, the regional manager shall direct written authorization with appropriate instructions to the regional reconditioning supervisor on an approved form, advising him of the scope of work to be undertaken and the amount approved therefor, with instructions to proceed with the reconditioning. Such authorization, when received by the reconditioning section, shall constitute full authority for the regional reconditioning supervisor to proceed with the preparation of specifications, obtaining bids, and awarding reconditioning contracts.

§ 405.01–11 *Reconditioning by purchaser.* In cases where the agreement for sale provides for reconditioning to be performed by the purchaser at his expense, inspection of the property shall be made as may be determined necessary by the regional manager. In such cases where the nature and scope of work are minor repairs or maintenance items, the inspection may be made by a representative of the Loan Service Division, but in cases where the work is technical or of a structural nature the inspection shall be made by a reconditioning inspector. In the event the work is not being satisfactorily performed or has not been satisfactorily completed, such fact, together with recommendations, shall be reported promptly to the regional manager.

MAINTENANCE PERFORMED BY CONTRACT BROKERS

§ 405.01–15 *Assistance by reconditioning section.* In the performance of authorized maintenance repairs and purchase of equipment incidental thereto by contract brokers for properties in their charge, the regional reconditioning supervisor shall provide the broker with technical advice, the technical facilities and all required forms and instructions of the Reconditioning Section, in order to assist contract brokers in the preparation of suitable specifications, awarding of contracts, and supervision of work in accordance with established reconditioning practices, and the procurement of contractors' receipts, releases, and waivers of lien, as required.

§ 405.01–16 *Obtaining of bids by brokers.* Contract brokers shall prepare suitable specifications on Form R–26 in those cases which must be submitted for the approval of the regional manager. At least two competitive bids shall be obtained for the work, except where the cost thereof does not exceed $50 or where it is not practicable to secure such bids because of the urgency of the situation, the limited number of available contractors willing to submit bids, or for other reasons. The contract broker shall forward the bids, together with his recommendations through the Reconditioning Section to the regional manager for consideration.

§ 405.01–17 *Review by reconditioning supervisor.* The recommendation of the contract broker respecting maintenance repairs or equipment incidental thereto shall be referred to the Reconditioning Section. The regional reconditioning supervisor shall review and approve such recommendations as being in conformance with minimum standards and adequate to meet the requirements of the case, both architecturally and structurally, and, in the case of mechanical equipment, as adequate for the purpose intended; and the estimated costs or bids as being fair and reasonable.

§ 405.01–20 *Work authorized on bids.* Upon authorization of maintenance repairs or the purchase of equipment, a copy of the contract shall be forwarded to the regional reconditioning supervisor, and the appropriate authorization forms, together with two approved copies of the contract, shall be forwarded to the contract broker, who shall deliver one copy of the contract to the contractor with instructions to proceed with the work.

§ 405.01–21 *Work authorized on estimates.* In cases where the regional manager's authority to proceed with the work was predicated on estimates submitted by the contract broker, the broker shall be instructed to obtain bids, and forward same through the Reconditioning Section to the regional manager for approval and signature.

§ 405.01–22 *Completion report.* Upon completion of the repairs, the broker shall inspect the property and, if completed to his satisfaction, shall indicate his approval on one of the executed copies of the contract form, and shall forward the file, including the copy of the contract certified as to completion and the contractor's combination receipt and mechanics' lien release on the approved form, to the regional reconditioning supervisor for review, to determine compliance with prescribed procedure, verification of cost, and for the preparation of vouchers and assembly of all final papers.

RECONDITIONING ADVANCES

§ 405.02–1 *Inspections.* When an application for an advance for reconditioning is referred to the regional reconditioning supervisor, he shall cause an inspection of the property to be made by an inspector, who shall indicate the extent, necessity, estimated cost, including incidental expenses, and other technical or pertinent information. He also shall obtain from the home owner, if available, the names of the contractors to be used for bidding purposes.

§ 405.02–3 *Reconditioning authorized.* After approval of the advance, the case shall be returned to the regional reconditioning supervisor, who shall authorize the preparation of specifications and soliciting of bids from approved contractors selected by the home owner, if he so desires. When bids are obtained, the case shall be referred to the legal department, if required. When so required, the legal department shall cause to be executed and recorded, if necessary, the appropriate debt and lien instruments and the appropriate contract forms. In cases not required under the regulations to be referred to the legal department, the Reconditioning Section shall obtain the execution of all required forms.

Before the reconditioning contract is awarded, the contractor and the home owner shall execute the approved contract forms unless the regional manager has been authorized to sign a contract with the contractor on behalf of the Corporation. Upon execution of all required forms, the contract shall be awarded and notice forwarded to the Accounting Division on an approved form, and the regional reconditioning supervisor shall make assignment of the case to a salaried or fee inspector for intermediate and final inspections.

§ 405.02–4 *Completion.* Upon completion of the reconditioning and its acceptance by the home owner and by the Corporation, the case, including all necessary forms, shall be forwarded for payment, after review by the legal department if required.

§ 405.02–6 *Home owner providing labor.* When an advance for necessary repairs or other reconditioning has been approved in accordance with the regulations of the Corporation, and the home owner requests permission to provide the labor in connection therewith, the regional reconditioning supervisor shall investigate the qualifications and reliability of the person who is to perform the labor and make recommendations to the regional manager. If the regional manager determines to permit the home owner to provide the labor, a contingency allowance shall be included in the advance to assure the Corporation of satisfactory performance of the reconditioning by the home owner, and the regional manager, on behalf of the Corporation, may enter into a contract with the home owner on a form approved for the purpose. The home owner, where practicable, should be required to submit bids for all materials in accordance with the bid requirements of the regulations.

Completion. The reconditioning work shall be performed under the supervision of the Reconditioning Section. When the work has been completed to the satisfaction of the Reconditioning Section and the home owner has satisfactorily complied with the provisions and covenants contained in the contract, the bills for materials and all costs other than labor shall be paid in compliance with the regular procedure for reconditioning, and the Reconditioning Section, through the regional manager, shall notify the regional accountant of the amount of the unexpended portion of the advance, which shall be credited to the home owner's account. The total cost of labor and materials shall not exceed the advance authorized. The regional manager, with the advice of the regional counsel, at his discretion, may authorize payment of material bills prior to the final completion of the work when the circumstances justify.

Default. In the event the home owner fails or refuses to provide the labor to complete the reconditioning, he may contract with persons acceptable to the Corporation to perform the remainder of the labor, which shall be paid for by the home owner from his personal funds, or, when approved by the regional manager, from funds available in the advance; or the regional manager may contract with suitable persons to complete the work under such terms and conditions as the regional manager, with the advice of the regional counsel, shall deem to be for the best interest of the Corporation. When any funds from the advance are used to pay for any portion of the labor, only the unexpended portion of the advance shall be credited to the home owner's account.

§ 405.02–7 *Approval by home owner.* In any case where the home owner refuses to approve the reconditioning after completion, the Corporation, except as otherwise provided, shall make payment to the contractor only in the event the contractor has reduced his claim to judgment. In any case where it is impractical or impossible to obtain the home owner's approval of the reconditioning after completion because of death, incompetency, or other disability, legal or otherwise, and the cost of such reconditioning is included in and secured by the Corporation's lien instrument, the regional manager, upon the advice of the regional counsel, may authorize payment to the contractor or direct any other appropriate action.

§ 405.02–8 *Emergency cases.* In the event reconditioning of an emergency nature is required immediately to protect the Corporation's security, the regional manager shall refer the case to the Reconditioning Section, with authorization to proceed with the reconditioning.

§ 405.02–9 *Abandoned properties.* In the event repairs are necessary to protect vacant, unoccupied, or abandoned properties, the regional manager may process any such case under the regulations governing emergency repairs.

§ 405.02–10 *Award in unusual cases.* In the event the home owner or other parties are uncooperative or unavailable, or there are other disabilities, legal or otherwise, the regional manager may cause a contract to be awarded on behalf of the Corporation under emergency conditions.

INSURANCE LOSS RESTORATION

§ 405.03–1 *Inspection and reports; home owner cases.* When an insurance loss case is referred to the Reconditioning Section, the inspection shall make a complete and detailed report of necessary repairs to effect restoration, estimate the cost thereof, obtain a statement as to the home owner's wishes concerning restoration, and submit same to the Reconditioning Supervisor. A copy of the cost report may be given to the home owner for adjustment purposes if he so requests: *Provided*, That the home owner is informed by the inspector that the furnishing of such copy in no way commits the Corporation to apply the loss proceeds to the restoration of the security property.

§ 405.03–3 *Restoration commenced by home owner prior to inspection.* If the inspection reveals that restoration by the home owner has been commenced without the prior knowledge of the Corporation a report shall be prepared in the same manner as though the repairs had not been started and shall include a report of the scope and amount of work which the home owner contemplates and which is specified in any contract then under way. If the work to be performed by the home owner appears sufficient to satisfactorily restore the security property, this fact shall be included on the report form. The regional reconditioning supervisor shall make such additional inspection assignments as he may deem necessary to protect the Corporation's interests. If the work is not being performed in a satisfactory manner, the regional reconditioning supervisor shall submit the report and his recommendations to the regional manager, forwarding a copy to the control supervisor.

Where it appears that the restoration is being satisfactorily performed, and upon the receipt of appropriate forms executed by the home owner and con-

tractor, lien waivers or releases, as required by the legal department, shall be obtained by the regional reconditioning supervisor, who shall cause to be prepared appropriate vouchers and other final papers. Upon completion of the case, the regional reconditioning supervisor shall indicate on the insurance loss settlement form the expenditures that have been made, and forward it to the Control Supervisor.

§ 405.03–4 *Restoration fully completed by home owner prior to inspection.* Where the inspection reveals the restoration has been fully completed without the prior knowledge of the Corporation, the inspector shall prepare a report, indicating thereon the cost necessary to effect proper restoration, the scope and amount of work which is specified on the contract between the home owner and contractor, and in addition he shall prepare and obtain the proper receipts, releases, or waivers as required by the legal department. The inspector shall inform the home owner and the contractor that the obtaining by the Corporation of the proper receipts, releases, and waivers required by the legal department is not to be understood as in any way committing the Corporation to apply the loss proceeds to the restoration of the security property. The inspector shall certify on his report whether the total cost of restoration incurred by the home owner is commensurate with the amount of reconditioning which was performed in restoring the security property and whether the restoration has been satisfactorily completed.

§ 405.03–5 *Submission of reports and recommendations to control supervisor.* All reports and other forms shall be returned by the inspector to the regional reconditioning supervisor, who shall review and submit his recommendations to the control supervisor, except that receipts, releases, and waivers as required by the legal department may be retained by the Reconditioning Supervisor pending the regional manager's decision regarding the application of the loss proceeds.

§ 405.03–6 *Application of loss proceeds to restoration.* Upon receipt of the regional manager's authorization for the application of the loss proceeds to the restoration of the security property, the Reconditioning Supervisor, where restoration has not been undertaken or completed by the home owner previously, shall approve the award of the contract and conduct of the work, within the amount of insurance funds available, to a contractor of the home owner's choice, acceptable to the Corporation, and otherwise shall handle the case in accordance with reconditioning procedure. Upon completion of the work and execution of an approval by the home owner, such form, together with receipts, releases, and waivers as required by the Legal Department and the inspector's final report and acceptance of the work, shall be sent to the Reconditioning Section for preparation of vouchers and other final papers. When the Reconditioning Section has completed the processing of the case, the regional reconditioning supervisor shall indicate on the copy of the authorization the expenditures which have been made, and shall return such form to the control supervisor.

§ 405.03–7 *Modification procedure.* Modifications of this procedure are permitted by the regional manager when home owners desire to undertake restoration themselves with contractors and contracts of their own choice, provided the Reconditioning Section reviews and approves the specifications and contracts presented by the home owner and provided that such deviation from procedure does not jeopardize the interests of the Corporation. When the home owner utilizes the facilities of the Reconditioning Section, the Reconditioning Supervisor shall make the customary final inspection assignment to a reconditioning inspector, providing also for as many intermediate inspections as may be appropriate to the size and scope of the restoration contract.

§ 405.03–8 *Supplementing loss proceeds; escrow account.* If the restoration contract is in an amount in excess of the insurance funds available, the home owner will be required to place an amount equal to the difference between the amount of the restoration contract and the insurance funds available in escrow for disbursement, according to approved procedure. An advance, however, may be made to the home owner to supplement insurance loss proceeds for the restoration of the security property; such advances shall be made in accordance with Part 402 of this chapter.

§ 405.03–9 *Restoration during foreclosure.* Insurance losses on properties in process of foreclosure shall be handled, with the advice of the regional council, as far as practicable under the same procedure as prescribed for losses on home owner properties. In the event the property is under the management of a broker, the case shall be processed in accordance with procedure prescribed for properties under the jurisdiction of the Property Management Division.

§ 405.03–10 *Insurance losses and restoration; Corporation owned properties.* In the event a Corporation-owned property is not in charge of a contract broker or, if in charge of a broker, the broker does not effect the repairs, or the cost of restoration is in excess of the broker's authority to incur expenses, as provided in Part 403 of this chapter, the case shall be assigned to the Reconditioning Section for processing in accordance with the usual procedure governing the reconditioning of properties under the jurisdiction of the Property Management Division. Where a property is owned by the Corporation, vouchers covering restoration costs shall be defined as "loss restoration," and shall have indicated thereon the cost of restoration attributable to the loss by fire, windstorm, or other hazard.

CONSENT TO MAKE IMPROVEMENTS

§ 405.04–1 *Cases processed by the reconditioning section.* In connection with a request by a home owner for the Corporation's consent to the making of alterations or improvements to, or the removal or demolition of, a property securing indebtedness to the Corporation, where the estimated cost of alterations or improvements or the value of the property to be removed or demolished exceeds $1,000, the control supervisor shall forward the case to the regional reconditioning supervisor, who shall review the request and, if he considers it necessary or desirable, shall cause an inspection report to be made and shall make his recommendation on the appropriate form. Such inspection, if required, shall be made by a salaried inspector if available; otherwise, the inspection may be made by a fee inspector and the cost of such inspection charged to the home owner's account. In the event the estimated cost of alterations or improvements, or the value of the property to be removed or demolished, does not exceed $100, the regional manager, if he considers it necessary or advisable, may assign the case to the regional reconditioning supervisor for review and recommendation.

The assignment of the case to the Reconditioning Section shall include a statement of the proposed alterations or improvements, or the improvements to be removed or demolished, and any other pertinent information relating to such reconditioning.

§ 405.04–2 *Inspections.* If an inspection report is considered necessary or desirable, the inspector shall visit the property and in conference with the home owner determine, if appropriate, (a) the extent and character of the proposed alterations or improvements; (b) the cost thereof; (c) the manner of accomplishing and paying for such alterations or improvements; and (d) the extent and character of the proposed removal or demolition of the improvements. The inspector shall report his general opinion as to whether the proposed alterations or improvements, or the removal or demolition of the improvements, will impair, decrease, or destroy the value or utility of the premises in any way.

§ 405.04–3 *Consent granted.* Whenever a consent for alterations and removals is approved by the regional manager and the character or extent of the alterations or improvements affects the interest of the Corporation, he shall direct the Reconditioning Section to provide observation of the work undertaken by the home owner. The Reconditioning Supervisor shall assign the case to a salaried inspector if available, or a fee inspector, for the purpose of observing and ascertaining that the interest and security of the Corporation are protected. Upon completion of the alterations or improvements or the removal or demolition thereof, the inspector shall make a final report to the Reconditioning Supervisor.

PARTIAL RELEASES, CONDEMNATION, AND SUBSTITUTION OF SECURITY

§ 405.04–5 *Property visit.* The inspector shall visit the property and in conference with the borrower determine, (a) the extent and effect of the proposed construction work; (b) the cost thereof; (c) the manner in which the owner proposes to accomplish same, whether by contract or himself; (d) the manner in which he proposes to pay the contractor; and (e) his apparent ability to provide the funds. The inspector shall report his opinion respecting the likelihood of the borrower's accomplishing the construction successfully at the cost contemplated and in such a manner as will not create any structural or architectural damage to the Corporation's interest, and the possibility of mechanics' and materialmen's liens arising. After a review of the inspector's report, the regional reconditioning supervisor shall forward his comments and recommendations, together with the case file, to the regional manager.

PART 3274—MACHINE TOOLS AND INDUSTRIAL SPECIALTIES

[General Preference Order E–6, as Amended Feb. 19, 1944]

HAND SERVICE TOOLS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of hand service tools and of alloy steel used in their manufacture, for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3274.51 *General Preference Order E–6—(a) Definitions.* For the purposes of this order:

(1) "Mechanic's hand service tool" means any tool listed on Exhibit A hereto attached which is used by hand, and is made of iron or steel or has a principal component part made of iron or steel.

(2) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons whether incorporated or not.

(3) "Producer" means any person engaged in the production of mechanics' hand service tools.

(4) "WPB–547 order" means any order for mechanics' hand service tools now or hereafter placed with a producer by any person acquiring such tools for his own inventory or shelf stock pursuant to a rating assigned on Form WPB–547 (formerly PD–1X).

(5) "Other order" means any purchase order for mechanics' hand service tools except WPB–547 orders.

(6) "Total monthly production" means either.

(i) The total dollar value of each kind of mechanic's hand service tool listed on Exhibit A hereto attached, scheduled to be produced in any given month by a producer, including both special and standard tools of that kind; or

(ii) The total number of units of each kind of mechanic's hand service tool listed on Exhibit A hereto attached, scheduled to be produced in any given month by a producer.

(b) *Restriction on use of steel.* No producer shall manufacture any mechanics' hand service tools out of any alloy steel except those which are in the series specified in Exhibit B hereto attached or except pursuant to specific permission of the War Production Board.

(c) *Allocation of production between WPB–547 orders and other orders.* Commencing with the month of July 1943 and each month thereafter, each producer shall schedule his total monthly production and the delivery thereof as follows:

(1) To the extent that he has WPB–547 orders on hand, he shall schedule between 20 and 25 percent of his total monthly production of each kind of mechanic's hand service tool specified in Exhibit A hereto attached for delivery against WPB–547 orders requiring delivery in such month. No producer shall schedule any order pursuant to this paragraph (c) (1) unless it clearly appears from such order that the rating applied thereto was assigned on Form WPB–547 (formerly PD–1X).

The sequence of deliveries on WPB–547 orders within the percentage limitation thereon which may be delivered in any given month shall be scheduled according to applicable War Production Board regulations.

(2) To the extent that he has other orders on hand, he shall schedule between 75 and 80 percent of his total monthly production of each kind of mechanic's hand service tool specified in Exhibit A hereto attached for delivery against other orders requiring delivery in such month.

The sequence of deliveries on other orders within the percentage limitation thereon which may be delivered in any given month shall be scheduled according to applicable War Production Board regulations.

(3) Any portion of the percentage allocated to WPB–547 orders which has not been taken up by such orders on or before the fifteenth day of the month preceding the month being scheduled, shall be scheduled for delivery against other orders, and vice versa.

(d) *Necessity for preference ratings and authorizations to place orders.* Notwithstanding any other provisions of this order:

(1) No producer shall sell or deliver any mechanics' hand service tools pursuant to any purchase order placed prior to June 12, 1943 unless such order bears a preference rating of A–9 or higher, nor shall any producer sell or deliver any mechanics' hand service tools pursuant to any purchase order placed subsequent to June 12, 1943 unless such order bears a preference rating of AA–5 or higher, or except pursuant to specific permission of the War Production Board.

(2) [Deleted Feb. 19, 1944]

NOTE: Specific authorization to purchase certain types of mechanics' hand service tools is now required by Table 12 under General Scheduling Order M–293.

(e) *Restrictions on inventory.* On and after June 12, 1943, no person purchasing more than ten mechanics' hand service tools of any kind specified on Exhibit A shall accept delivery of any such tools the delivery of which will effect an increase in his inventory beyond a supply required by his current practices for use or for resale during a sixty-day period. In the event that the provisions of Suppliers' Inventory Limitation Order L–63 as applied to any supplier as defined in that order are more restrictive, such provisions shall govern. The restrictions on inventory contained in this paragraph (e) shall not apply to the following designated types of purchase orders:

(1) Purchase orders for mechanics' hand service tools made pursuant to the purchaser's special design or specifications which are not standard items in the producer's production schedules.

(2) Purchase orders placed by the Army, Navy, or Maritime Commission for mechanics' hand service tools required for bases or supply depots outside the continental United States (comprising the several States and the District of Columbia), or for bases or supply depots within the continental United States which are maintained for emergency purposes, or to supply such bases or supply depots outside the continental United States.

(3) Any other purchase order specifically excepted from this restriction by the War Production Board.

(f) *Repair parts.* Nothing in this order shall be construed to prevent the sale and delivery of repair parts for mechanics' hand service tools in accordance with applicable regulations and orders of the War Production Board concerning repair parts.

(g) [Revoked Feb. 19, 1944]

(h) *Applicability of General Scheduling Order M–293.* Those mechanics' hand service tools which are listed on the schedule attached to General Scheduling Order M–293 are also subject to the terms and provisions of that order.

(i) *Reports.* Each producer shall execute and file with the War Production Board Form WPB–2057 and such other reports and questionnaires as said Board may from time to time require, subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(j) *Appeal.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(k) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the regulations of the War Production Board.

(l) *Communications.* All reports, appeals, and other communications concerning this order shall be addressed to: War Production Board, Tools Division, Washington 25, D. C., Ref.: E–6.

(m) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

PART 3291—CONSUMER'S DURABLE GOODS

[Limitation Order L–30–b, Direction 1]

ENAMELED COLD PACK CANNERS

The following direction is issued pursuant to Limitation Order L–30–b:

(a) *What this direction does.* This direction is designed to provide for the production of enameled cold pack canners for use in the 1944 canning season. It permits production before July 1, 1944, only.

(b) *Definition of enameled cold pack canner.* An "enameled cold pack canner" is a covered utensil made of vitreous-enameled iron and steel having a capacity of from 17 to 25 quarts which may be used for canning food products and is designed to hold 7 one-quart jars, 9 one-pint jars or 4 half-gallon jars.

(c) *What sizes of canners may be made.* Each manufacturer is permitted by this direction to make one size of enameled cold pack canner. This may be the same as one of the sizes of stock pots which he makes under Table A of Order L–30–b, or may be made in addition to those sizes, but no cold pack canner made under this direction may be sold by a manufacturer as a stock pot.

(d) *How many cold pack canners may be made.* No manufacturer may produce more enameled cold pack canners before July 1, 1944, than 50% of the number of such canners which he made in the twelve months ending June 30, 1941.

(e) *Effect of Order L–30–b.* Under paragraph (h) of Order L–30–b the iron and steel which a manufacturer uses in making cold pack canners may be used in addition to his quotas for civilian orders of enameled ware under paragraph (e) of that Order.

(f) *Wire racks.* Wire racks may be made of carbon steel for use in the enameled cold pack canners to be produced under this direction. Tin may be used in plating these wire racks. These provisions supersede any provisions in Orders M–126 and M–43 which would prevent the use of these materials.

Issued this 19th day of February 1944.

FLOOR SANDING, FLOOR FINISHING, FLOOR MAINTENANCE, AND RUG SCRUBBING MACHINES, INDUSTRIAL VACUUM CLEANERS, AND BLOWERS FOR CLEANING PURPOSES

§ 3302.26 *Limitation Order L–222*—(a) *Definitions.* For the purpose of this order:

(1) "Floor finishing or floor maintenance machines" means any motorized or hand-powered mechanical device, designed for the purpose of floor finishing or maintenance. The term includes, but is not limited to, the types of machines on List A attached to this order as amended from time to time, and excludes independent motor-operated vacuum producing units, floor sanding machines and machines specifically designed for the manipulation of wet cement.

(2) "Floor finishing" and "floor maintenance" include, but are not limited to, the operations of grinding, staining, sealing, scraping, oiling, waxing or polishing floors or decks, and the collection and removal of dust, grime, oil, reclaimable materials or refuse from floors or decks, either separately or in conjunction with the operations of washing, scraping, sterilizing and wiping floors or decks.

(3) "Floor sanding machines" means machines used for the smoothing of floors or decks, other than stone or tile floors, by the use of abrasives such as, but not limited to, sandpaper and steel wool.

(4) "Rug scrubbing machines" means both portable rug shampooing machines and portable rug scrubbing machines.

(5) "Industrial vacuum cleaners" means machines in which a combination of a motor operated vacuum producer (stationary or portable), an air impeller line and a portable tool with attachments is used primarily for the collection and removal by suction of dust, oil, reclaimable materials or refuse in either the wet or dry state. "Industrial vacuum cleaners" shall not include any vacuum cleaners designed primarily for household use or any motor operated vacuum producing units incorporated in floor sanding, floor finishing or floor maintenance machines.

(6) "Blowers" means combination blowers and exhausters, i. e., machines in which a combination of a motor operated air pressure producer, an air impeller line and a portable tool with attachments is normally used for the removal of dust, materials or refuse by air pressure. "Blowers" shall not include any machines used solely for the handling of air or other gaseous mixtures.

(7) "New machines" means any machines which have neither been used, sold, rented, nor lent for the purpose of being used but includes any machines which have been used only for demonstrations, trial loans, instruction or repair loans.

(8) "Supplies" means replaceable items, such as but not limited to, polishing brushes, cleaning brushes, sanding drums and discs, stones, hoses and bags, wand handles and similar attachments which are expended in the operations of floor sanding, floor finishing, floor maintenance, rug cleaning, vacuum cleaning and air pressure cleaning.

(9) "Manufacturer" means any person engaged in the fabrication or assembly of new floor sanding machines, new floor finishing or floor maintenance machines, new rug scrubbing machines, new industrial vacuum cleaners and new blowers or of parts designed specifically for any of such machines. The term also includes wholesaling or retailing subsidiaries or divisions of such a person.

(10) "Distributor" means any person engaged in the business of selling, renting or lending of new floor sanding machines, new floor finishing or floor maintenance machines, new rug scrubbing machines, new industrial vacuum cleaners and new blowers, other than a manufacturer.

(b) *Restrictions on production*—(1) *Floor sanding and floor finishing or floor maintenance machines.* Except as permitted by paragraph (b) (4) of this order, no manufacturer shall fabricate or assemble any new floor sanding, floor finishing or floor maintenance machines or parts for such new machines.

(2) Except as permitted by paragraph (b) (4) of this order, no manufacturer shall, after August 5, 1943, fabricate or assemble any new rug scrubbing machines or parts for such new machines.

(3) Except as permitted by paragraph (b) (4) of this order, no manufacturer shall fabricate or assemble any new industrial vacuum cleaners or blowers, or parts for such new cleaners or blowers, except to the extent necessary to fill orders for new industrial vacuum cleaners or blowers authorized on Form PD–722, approved by the War Production Board on Form WPB–1843 (formerly PD–722) before May 16, 1944, or on Form WPB–1319. No application made on such form will be approved unless accompanied by an order rated AA–5 or higher or unless the applicant indicates a need for such machine justifying such rating.

(4) *Repair parts other than supplies.* During the calendar quarter commencing January 1, 1943, and during any calendar quarter thereafter, no manufacturer shall fabricate repair parts having an aggregate manufacturing cost in excess of 2 per cent of that manufacturer's total billed sales of new floor sanding machines, new floor finishing or floor

maintenance machines, new rug scrubbing machines, new industrial vacuum cleaners and new blowers during the calendar year of 1941.

(5) *Supplies.* The restrictions of paragraph (b) of this order shall not apply to the fabrication or assembly of supplies.

(6) *Exceptions.* The War Production Board may, from time to time, specifically authorize one or more manufacturers in writing to commence fabrication, to fabricate or to assemble specified quantities of machines and repair parts otherwise restricted by paragraph (b), or to perform any combination of the foregoing operations.

(c) *Restrictions on transfer.* (1) No manufacturer or distributor shall sell, rent, lend or deliver any of the following types of new machines without authorization on Form WPB–1843 (formerly PD–722) approved by the War Production Board prior to May 16, 1944, or on Form WPB–1319 approved by the War Production Board:

(i) Drum type floor sanding machines making a 6-inch path or wider;

PART 3270—CONTAINERS

[Supplementary Order L–103–b as Amended Feb. 19, 1944]

GLASS CONTAINER AND CLOSURE QUOTAS

§ 3270.36 *Supplementary Order L–103–b.* This order lists the only products which may be commercially packed in new machine-made, glass containers or with new metal closures. It specifies closure materials and sets forth the number of glass packages and metal closures which may be used for each listed product. In addition, some restrictions are placed upon the manufacture of closures.

The order limits "commercial packs" only. Although there are certain manufacturing restrictions, the use of glass containers or metal closures for home canning purposes is not affected.

Likewise, the provisions of this order cover only new glass containers and closures. Used containers or closures are not limited. However, closures which are fabricated from used closures—that is, where the used closures are a production material—are regarded as new closures made of "waste" and are governed by the pertinent provisions of this order.

Definitions of the various terms used in this order appear in paragraph (x) hereof.

Restrictions on Use of Glass Containers and Closures

(Note exceptions from these restrictions in paragraphs (p) through (v)).

(a) *Prohibited acceptances and uses of glass containers and closures.* No packer shall accept delivery of or use any new glass container, or any new metal closure for packing any product not listed in a schedule of this order. This restriction insofar as it relates to glass containers shall not go into effect until March 1, 1944.

(b) *Limitations on acceptance and use of glass containers and closures.* Likewise, during any calendar year beginning with 1944, no packer shall accept delivery of or use, for packing any product which is listed in a schedule of this order, more new glass containers or more new metal closures (other than closures made from waste) than his quota for that product. However, jobbers or retailers may obtain closures and glass containers and resell them in conformity with the provisions of this order.

(c) *Closure materials.* No packer shall accept delivery of or use, for packing any product, new metal closures made of any material except those permitted for that product in the schedules of this order. However, blackplate closures (including rejects) may be used wherever tinplate or terneplate is specified, and frozen plate may be used wherever tinplate, terneplate or blackplate is specified. Likewise, closures made of waste may be used in accordance with the following paragraph:

(d) *Closures made of waste.* Closures made of waste shall not be used for packing any product not listed in the schedules attached to this order. Closures made of waste may be used in addition to specified quotas for listed products.

(e) *Home canning jars.* No packer shall pack any commodity in a home canning jar. (Note that the use of these jars for home canning is not restricted).

Quotas

(f) *General.* Closure and glass quotas are stated separately in the attached schedules, and are not necessarily the same for any given product.

Quotas are not interchangeable as between listed products. That is, a packer who packs two products, product A and product B, must compute his quota (in the manner described in the following paragraph (g)) for each product separately. He cannot allot any portion of his quota for product A to product B, even if he does not pack his full quota of product A.

Furthermore, quotas may not be transferred from one packer to another except as provided in Priorities Regulation 7A.

(g) *Computation of quotas.* In most cases where this order provides a quota for the packing of any product, it does so, in the attached schedules, by stating a percentage figure followed by a calendar year—for instance, 100% 1943. Where this appears in the "glass quota" column opposite a product, it means, unless otherwise specified, that a packer's glass container quota for that product during 1944 and subsequent calendar years is computed as follows:

(1) He takes the number of new glass containers which he used for packing that product during the named base year.

(2) He subtracts the number of new glass containers which he used for packing that product during the named base year and which were quota exempt under the provisions of any prior order of the War Production Board or under any previous amendment of this order.

(3) He multiplies the resulting figure by the applicable percentage.

Identical rules apply to the computation of closure quotas, except that unless otherwise specified they are based on the number of new metal closures used during the specified base period.

The schedules of this order provide that the quotas for some products are based on the number of new metal closures or new glass containers accepted rather than those used during the specified base period. Here again, the method of computation, described in this paragraph, applies, except that the word "accepted" should be substituted for the word "used" in steps 1 and 2 above. Only the new metal closures or the new glass containers which a packer actually accepted delivery of and those which were invoiced to him during the applicable base period may be included in his quota base in such cases. But, for the purpose of making charges against quota, a packer must include the new metal closures and the new glass containers which he actually accepts delivery of, and those which are set aside for him or held by another party for his account—whether or not they are actually invoiced to him.

In a few cases, the schedules of this order set forth special rules, not covered by the above, for the computation of quotas for particular products. Such rules must be followed, and supersede the general statements contained in this paragraph (g) to the extent that they conflict with them.

(h) *Use of quotas.* As indicated above, most quotas are based on past use. The word "use" refers only to the actual filling operation in the case of glass and the actual capping operation in the case of closures. Therefore, to the extent that a person did not do this directly during the base period, he has no quota, despite the fact that he may have supplied the actual packer with the product, closures, containers, etc. After December 31, 1943, any packing done for him must be within the quota of the person performing the actual filling and capping operation.

In the case of products whose quotas are based upon acceptances, a person is deemed to have "accepted" glass containers or closures (for the purpose of computing quotas) only to the extent that he himself actually took possession of them or had them invoiced to him. If he did not do this during the base period, he has no quota, and the rules stated in the preceding paragraph of this paragraph (h) apply.

Packers who use or accept new glass containers or metal closures for packing products for the account of others, as well as for their own account, must conduct both operations within their own quotas. Without a special appeals grant under this order, they cannot regard their use or acceptances of glass containers and metal closures for the account of others as an addition to their quotas. This is true even where the other person may represent to the packer that he has a quota which he is not using himself.

On the other hand, packers are entitled to include, in their own quota bases, their use or acceptances of new glass containers or new metal closures, for the account of others during the specified base periods.

Restrictions on Sale and Delivery of Glass Containers and Closures

(i) *General restrictions.* No person shall sell or deliver any glass containers or closures which he knows, or has reason to believe, will be accepted or used in violation of any provision of this order.

(j) *Export deliveries.* During any calendar year, no person shall deliver more empty new glass containers or more new metal closures to any person outside of the 48 States of the United States and the District of Columbia than he delivered to that person during 1943.

(k) *Certificates.* No person shall sell or deliver any new glass containers or new metal closures except under a purchase order or contract validated by the delivery to such person of a purchaser's certificate, signed manually, or as provided in Priorities Regulation 7.

This certificate shall be in substantially the form attached hereto as Exhibit A in the case of sales or deliveries of all glass containers, and of all metal closures except malt and non-alcoholic beverage closures. Attention is called to the fact that this certificate, once filed by a purchaser with a supplier, covers all future deliveries from that supplier to that purchaser.

The certificate should be in substantially the form attached hereto as Exhibit B, where sales or deliveries of malt or non-alcoholic beverage closures are concerned. This certificate differs from Exhibit A in that it must be filed with each purchase order for beverage closures in order to validate the order.

(l) *Outstanding certificates.* Certificates previously filed with a supplier under any previous amendment of this order, shall remain valid insofar as sales or deliveries of glass containers are concerned. Exhibit A certificates previously filed under order M–104, shall remain valid insofar as closure (other than malt or non-alcoholic beverage), deliveries are concerned. In either of the above cases, no new certificate need be filed by any purchaser to validate his orders placed with the supplier to whom the previous certification was made.

(m) *Cases where certificates need not be filed.* No certificates shall be required for the sale or delivery of home canning jars or home canning closures, nor shall any certificates be required for the sale or delivery of any kind of glass containers or closures to: (1) Retailers, for resale empty or unused; or (2) persons purchasing closures or glass containers from retailers.

(n) *Standard certifications.* The standard certification provided for in paragraph (d) of Priorities Regulation 7, cannot be used in place of the certifications provided by this order; nor may the certifications provided by this order be waived in accordance with paragraph (f) of Priorities Regulation 7.

Restrictions Relating Solely to Manufacture of Closures

(o) *Closure material.* (1) No person shall use any zinc, aluminum, tinplate, terneplate, blackplate, frozen plate, waste-waste or waste for the manufacture of the following types of closures:

(i) Cover caps which serve as a protective or decorative closure in addition to any original sealing medium (other than paraffin) such as another closure.

(ii) Double shell or semi-double shell caps.

(iii) Two-piece closures when both pieces are made of metal, except as permitted in paragraph (o) (2).

(2) No person shall use any zinc, aluminum, tinplate, terneplate, blackplate, or wire for the manufacture of any closure of the home canning type, except as, and to the extent permitted in Schedule VII attached to this order. No closure manufactured pursuant to Schedule VII shall knowingly be sold to, or used by, any person for packing any product for sale.

(3) No person shall use any tinplate, terneplate or blackplate heavier than 90 pounds per base box for the manufacture of crown caps. This restriction does not apply to rejects, frozen plate waste-waste, or waste.

(4) No person shall use for the manufacture of closures any tinplate with a tin coating in excess of 1.25 pounds per base box; and all persons manufacturing closures shall, to the greatest extent available, use 0.50 tinplate for the manufacture of closures for which tinplate is permitted by the provisions of this order.

(5) No person shall use any wire for the manufacture of paperboard disc plug caps, having a diameter of two inches or less, for milk bottles.

Exceptions Pertaining to Both Glass Containers and Closures

(p) *Deliveries to certain agencies and persons.* Nothing in this order shall prohibit the purchase, acceptance of delivery, or use (such use to be in addition to any quota specified in the schedules attached to this order) of glass containers or closures by any of the following persons or by any person for packing any product to be delivered to or for the account of any of the following persons:

(1) Army, Navy, Marine Corps, Maritime Commission, or War Shipping Administration of the United States (including persons operating vessels for such Administration or Commission for use thereon).

(2) Any person for packing products for retail sale or distribution through post-exchanges, sales commissaries, officers' messes, servicemen's clubs, ship service stores, or outlets; provided same are located at Army or Navy Camps, are not operated for private profit and are established primarily for the use of Army or Navy enlisted personnel within Army or Navy establishments or on Army or Navy vessels.

(3) American Red Cross, United Service Organizations, or such other nonprofit Defense Recreation Committees, engaged in the operation of recreation centers in the 48 States of the United States or the District of Columbia solely for military personnel, as are certified to be within the exemption provided by this paragraph (p) (3) by the Office of Defense Health and Welfare Services, OEM.

(4) Any agency of the United States purchasing for a foreign country pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act).

(q) *Special provisions in schedules relative to exempt deliveries to certain agencies and persons.* The schedules of this order contain certain limitations on the exception provided by the preceding paragraph (p) in the case of certain products—as, for instance, ice cream mix and malt and nonalcoholic beverages. In such cases, the provisions of the schedules are controlling and supersede paragraph (p) to the extent that they conflict therewith.

Exceptions Relative to Glass Containers Only

(r) *Small users.* The restrictions of this order which pertain to glass containers shall not apply to any person during any calendar year in which he accepts no more than a total of five hundred ($500.00) dollars worth (cost price to him) of empty new glass containers for all products.

(s) *Large size glass containers.* The restrictions of this order which pertain to glass containers shall not apply to any glass container with a capacity larger than 140 fluid ounces.

(t) *Glass containers manufactured prior to the date of this order.* The restrictions of this order shall not prevent any person's acceptance or use, for a product not listed in the schedules of this order, of any glass container manufactured before January 1, 1944, if the glass container in question was originally manufactured for the purpose of packing an unlisted product, or was originally manufactured for packing a listed product but has a capacity not permitted for that product in the attached schedules of this order. This paragraph does not permit the quota free use of glass containers for listed products regardless of when the containers were manufactured.

(u) *Quota free use of certain glass containers in inventory of packer on or before December 31, 1943.* To the extent that as of January 1, 1944, a packer had in his possession, empty glass containers which he was permitted to accept under paragraphs (b) (c) and (d) of order L-103-b as amended November 1, 1943, (excluding containers which he was permitted to accept under paragraph (e) of that order), he may use them during 1944 for packing any listed product in addition to his quota for that product. Nothing in this paragraph shall permit the quota free use of glass containers "borrowed" against anticipated 1944 usage, in accordance with paragraph (e) of this order as amended November 1, 1943.

Exceptions Pertaining to Closures Only

(v) *Small users.* The restrictions of this order which pertain to closures shall not apply to any person during any calendar year in which he accepts no more than five thousand new metal closures for all products.

Prior Appeals

(w) *Appeals granted prior to December 31, 1943 under Order M-104 and Order L-103-b.* All appeals granted prior to December 31, 1943 under orders L-103-b and M-104 are cancelled and shall be ineffective on and after January 1, 1944. Therefore, after that date, no person shall accept delivery of or use or shall manufacture, sell or deliver any new glass container or any new metal closure except in accordance with the provisions of this order—unless he receives a new grant on appeal after January 1, 1944.

Schedules—General Explanation

Schedules I through VI list the only products which may be packed in new glass containers or with new metal closures. Schedule VII relates to the manufacture of home canning closures.

The data set forth in the two "quota" columns, opposite each product, indicate the number of new glass containers and new metal closures (determined in accordance with the general rules set forth in paragraph (g) of Order L–103–b), which may be used for packing that product. However, any special quota provisions which these schedules make applicable to any product, are controlling to the extent that they conflict with paragraph (g).

The "X" mark which appears opposite each product in one of the columns headed "closure material" indicates that, except as listed hereafter, only closures made of the specified material may be used to pack that product. The general exceptions from this rule are:

(i) Closures made of blackplate (including rejects) may be used, within quotas, wherever tinplate or terneplate is specified.

(ii) Closures made of frozen plate may be used, within quota, wherever either tinplate, terneplate or blackplate is specified.

(iii) Closures made of waste may be used in addition to specified quotas for listed products.

All special provisions of these schedules relating to closure materials for specific products must be followed, and control to the extent that they conflict with the above.

After March 1, 1944 all size specifications for glass containers set forth in these schedules must be followed in addition to the provisions of Order L–103 and its schedules.

Attention is called to paragraphs (p) through (v) of Order L–103–b which establish limited exceptions to the provisions of this order. Here again, any special provisions which these schedules contain relative to quota exemptions—as in the case of ice cream mix and certain beverages—must be observed.

Schedule I—Foods

No product packed in a can shall be repacked for sale in a glass container by the same or a different person, in the same or a different form, except as follows (or as otherwise specifically permitted in this schedule):

(i) When required for the packing of other products, pineapple may be repacked from No. 10 cans. Grape juice, grape pulp, citrus peel and pulp may be repacked from reusable cans, 5-gallons or larger. Apricots and peaches, solid pie pack, may be repacked from No. 10 cans or larger. No. 10 cans cut under this provision must be properly cleaned and returned to the nearest detinning plant.

(ii) Tomato paste, tomato pulp or puree, and tomato sauce may be repacked from No. 10, or from 5-gallon or larger reusable cans when required for packing other products, or for repacking in different form (other than in the form of tomato paste or tomato pulp or puree), but none may be repacked in the same form. No. 10 cans cut under this provision must be properly cleaned and returned to the nearest detinning plant.

PART 937—ZINC

[General Preference Order M-11 as Amended Feb. 21, 1944]

SLAB ZINC

§ 937.1 *General Prefefence Order M-11*—(a) *Scope of this order.* This order controls deliveries of zinc from a producer or dealer. No producer or dealer shall deliver zinc to any person, and no person shall accept delivery of zinc from any producer or dealer, except as provided in this order. The order does not relate to the use which may be made of zinc after it is received. The use of zinc in manufacture is controlled by Conservation Order M-11-b or, in the case of certain specific products, by other orders of the War Production Board relating to those products. These use restrictions must also be complied with.

(b) *Definitions.* (1) "Zinc" means all grades of metallic slab zinc (spelter) produced directly from ores, concentrates or other primary material; or redistilled from zinc scrap, including ashes, dross, skimmings, clippings, castings, engravers' plates, die castings, die cast scrap, or any secondary zinc-bearing material.

(2) "Producer" means any person producing zinc and any person who has zinc produced for him under toll agreement.

(3) "Dealer" means any person who regularly receives physical delivery of zinc and sells or holds the same for resale without changing the form. A person who produces any zinc or who has the same produced for him under toll agreement, is a producer as to such zinc, and not a dealer.

(4) "Toll agreement" means any agreement by which title to material remains vested in a person other than the one processing the material.

(c) *Acceptance of deliveries of zinc from a producer.* (1) Except as specifically authorized by the War Production Board on Form WPB-2893, no person, other than the Metals Reserve Company, or a person accepting delivery pursuant to an export license duly issued by the Foreign Economic Administration, shall accept delivery of zinc from a producer. The Metals Reserve Company may accept deliveries of zinc for the sole purpose of stockpiling or redistribution without change in form.

(2) Any person wishing to apply for an authorization certificate to accept delivery of zinc from a producer should apply for authorization not later than the twelfth day of the month preceding the month in which shipment is desired.

(3) An authorization certificate will authorize the holder to accept from a producer deliveries of specified amounts of zinc shipped during the month for which the certificate is issued. A producer is authorized to ship zinc on notification from the purchaser of the date and serial number of the authorization certificate authorizing him to accept delivery of zinc. Any producer may, with the consent of the purchaser, substitute for any amount of any grade of zinc specified in an authorization certificate an equal amount of any lower grade of zinc. A producer need not accept a new order (other than a new order bearing a AAA preference rating), although supported by a preference rating or an authorization certificate if his entire production for the month is committed and he has reason to believe that other purchase orders will be presented during the month by the person or persons to whom his production is committed in amounts at least equal to his production.

(4) No producer shall make any delivery of zinc except as permitted under this paragraph (c).

(d) *Acceptance of deliveries of zinc from a dealer.* No specific authorization will be issued by the War Production Board to permit any person to accept deliveries of zinc from a dealer. However, a person may accept delivery of zinc from a dealer only if such delivery meets all the following conditions:

(1) The delivery in question, combined with all other deliveries of zinc to the purchaser during the calendar month, from whatever source, will not aggregate as much as twenty short tons; and

(2) The purchaser has not requested from the War Production Board authorization for that particular month to accept delivery of zinc in any quantity—see paragraph (c) above (a request to the War Production Board shall be deemed a request within the meaning of this paragraph, regardless of whether it has been granted or denied).

A dealer shall not make any delivery if he knows, or has reason to believe, that the person accepting the delivery will not comply with all the provisions of this paragraph.

(e) *Toll agreements.* No person shall produce any zinc under any existing or future toll agreement until and unless he has made a report to the War Production Board, setting forth the names of the parties to such agreement, the material involved as to kind and grade, the form of the same, the estimated tonnage involved, the estimated rate of deliveries, the length of time the agreement or other similar agreement has been in force, the duration of the agreement, the purpose for which the zinc is to be used, and any other pertinent data. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(f) *Specific directions.* The War Production Board may, from time to time, issue special directions to any person as to the source, destination, special kinds and amounts of zinc, to be delivered or acquired by any person.

(g) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(h) *Reports.* All producers, dealers, and users of zinc shall file, subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942, such reports as the War Production Board may from time to time prescribe.

(i) *Communications.* All applications, statements or other communications filed pursuant to this order or concerning the subject matter hereof, should be addressed to: War Production Board, Zinc Division, WPB Dept. 7515, Washington 25, D. C., Ref.: M-11.

(j) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and, upon conviction, may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control, and may be deprived of priorities assistance.

(k) *Effective date.* Restrictions of this order with respect to remelt and zinc scrap shall cease to be effective immediately. In other respects, this order as amended June 7, 1943 shall continue in effect until April 1, 1944, on which date this amendment shall become effective.

Issued this 21st day of February 1944.

By J. JOSEPH WHELAN,
Recording Secretary.

PART 3290—TEXTILE, CLOTHING AND LEATHER

[General Conservation Order M-317,[1] as Amended Feb. 21, 1944]

COTTON TEXTILE DISTRIBUTION

§ 3290.115 *General Conservation Order M-317*—(a) *Definitions.* In this order:

(1) "Cotton textiles" means the following products, containing more than 50% by weight of cotton or cotton waste, or a combination of the two:

(i) Woven fabrics, whether grey, original mill or regular finish, bleached, dyed or printed, and the following cotton products: bedsheets, pillow cases, blankets, towels, diapers, face cloths and table "linens"; and

(ii) Yarns, whether grey, bleached, colored, mercerized, glazed, polished, single, plied, cabled or braided, including thread, twines and cordage (e. g. tying, sail, seine, etc. twine, rope, sash, cord, etc.) and including any of the foregoing which may be spun on speeder, ring, mule or converted twister spindles.

Blankets containing less than 25% by weight of wool fiber are the only types of blankets which are included in "Cotton textiles."

"Cotton textiles" does not include fabrics or yarns which contain any cotton and which are made on spindles or looms normally engaged in the manufacture of woolen or worsted products, or cotton duck as defined in General Preference Order M-91.

(2) (i) "Producer" means any manufacturer who makes cotton textiles in the United States.

(ii) "Intermediate processor" means any person engaged in the United States in the business of bleaching, dyeing or otherwise finishing cotton textiles and delivering or using them in the United States for his own account in the bleached or otherwise finished state.

(iii) "Processor" means any person engaged in the United States in the business of manufacturing or having manufactured in the United States for his account, any product in which cotton textiles are incorporated.

(iv) "Merchant" means any person engaged in the United States in the business of purchasing cotton textiles for resale in the United States in the form in which purchased.

(v) "User" means any person other than a producer, intermediate processor or processor, who purchases cotton textiles for his own use in the United States in any business, industry, profession or occupation.

(vi) Any person who performs the functions of more than one of the foregoing—regardless of his customary manner of conducting his business—shall, for the purpose of the following be deemed a separate person with respect to each of those capacities, and he is required to:

(a) Accept rated orders for cotton textiles in preference to any other contracts, orders or uses even though he has not in the past accepted or filled orders for that particular cotton textile, and also to fill them in accordance with the rules of Priorities Regulation No. 1;

(b) Use the ratings assigned by this order; and

(c) Apply the inventory restrictions of this order.

(vii) The definitions in subdivisions (i) to (v) above do not include the United States Army, Navy, Maritime Commission or War Shipping Administration.

(3) Trade terms used in this order shall have their usual trade significance unless otherwise specified.

(b) *Assignment of ratings.*[2] The preference ratings specified in the Preference Rating Schedules of this order are assigned to the persons in Column I for the cotton textiles in Column II to be used only as specified in Column III. The revocation of any rating and its effect is stated in the appropriate group of the Preference Rating Schedules.

(c) *Compulsory use of ratings assigned in schedules or by Form WPB-2842.* No intermediate processor, processor or merchant (except a retailer) shall purchase or accept delivery of a cotton textile for a purpose for which a rating for that cotton textile is assigned to him in a Preference Rating Schedule, unless he has applied or extended that rating or a rating assigned on Form WPB-2842. He may not purchase that cotton textile for the specified purpose with any other rating which he may have (whether higher or lower), nor may he purchase it without a rating for that purpose. The provisions of this paragraph do not apply to purchases for delivery or ultimate delivery to, or for incorporation into any product for delivery or ultimate delivery to, the United States Army, Navy, Maritime Commission or War Shipping Administration, nor do they prohibit the use of an AAA rating.

This rule does not change the rating on the finished product. For example, even though a manufacturer (processor), who is given a rating, according to the AA-2X Preference Rating Schedule, to obtain twills to make coated abrasive products, holds an AA-1 order for coated abrasive products, he must use the AA-2X rating given by the schedule to obtain the twills, and may not use the AA-1 rating for this purpose. The AA-1 rating, however, remains applicable to the finished coated abrasive product for all other purposes (such as to determine the sequence of deliveries).

(d) *How ratings for cotton textile are to be applied or extended.* Preference ratings shall be applied and extended as provided in Priorities Regulation 3. In addition, the provisions of subparagraph (1) below shall be followed in the case of products which are to be exported in the form of cotton textiles, and the provisions of subparagraph (2) below are to be followed when cotton textiles are not to be exported.

(1) *Cotton textiles for export.* Except where the cotton textile is for direct or ultimate delivery to, or for incorporation into any product for delivery or ultimate delivery to, the United States Army, Navy, Maritime Commission or War Shipping Administration, the purchaser shall place upon the purchase order an appropriate notation (with the blanks properly filled in), substantially as follows:

These cotton textiles will be exported, or will replace in inventory cotton textiles exported after December 24, 1943.

And also one of the following statements is to be made:

The preference rating was applied by the United States Treasury Procurement Division in connection with contract number ---------. [In the case of United States Treasury Procurement for Foreign Economic Administration];

The preference rating was applied in connection with Export License number ---------, or Release Certificate number ---------. [In the case of export in connection with licenses or release certificates issued by Foreign Economic Administration]

or

The preference rating was applied in connection with the Canadian Cotton Administrator's serial number ---------. [In the case of exports to Canada.]

(This notation is to be used when the rating is for the export of a cotton textile, in the form of cotton textile, as defined in this order. When this is done the requirements of M-328 are met and it is unnecessary to use any other notation.)

(2) *Cotton textiles for domestic use.* A person (other than the United States Army, Navy, Maritime Commission or War Shipping Administration on their direct purchase orders), applying or extending a rating for a cotton textile, which was assigned by a Preference Rating Schedule or under a War Production Board form, shall place upon the purchase order an appropriate notation, substantially as follows:

This rating has been assigned by M-317, Group(s) No. ---------. [Insert applicable group number or numbers of Preference Rating Schedule.]

or

This rating has been assigned under Form WPB ---------, Serial No. ---------. [Insert the War Production Board form number and its serial number.]

(This notation is to be used when the rating for a cotton textile, as defined in this order, is assigned by a Preference Rating Schedule or a War Production Board form. When this is done the requirements of M-328 are met and it is unnecessary to use any other notation.)

The standard certification described in Priorities Regulation 7 may be used in applying or extending the rating, but the specific notation of subparagraph (1) or (2) above must be added.

(e) *Restrictions on extension of rating to obtain fiber or yarn.* (1) No person shall use any preference rating which was assigned, applied or extended for cotton textiles in order to obtain any synthetic fiber or synthetic yarn, except cotton textiles for direct or ultimate delivery to, or for incorporation into any product for direct or ultimate delivery to, the United States Army, Navy, Maritime Commission or War Shipping Administration.

(2) No person shall use any preference rating which was assigned, applied or extended for knitted or woven fabrics, in order to obtain cotton yarns defined in paragraph (a) (1) (ii). If he does not own or control spinning machinery, he may use the rating to obtain cotton yarns for incorporation into products for direct or ultimate delivery to the United States Army, Navy, Maritime Commission or War Shipping Administration. If he does own or control spinning machinery, upon his showing on Form WPB-2842 the extent to which it is insufficient or unsuitable to produce cotton yarns required for incorporation into products for direct or ultimate delivery to the United States Army, Navy, Maritime Commission or War Shipping Administration, the War Production Board may authorize him to use that rating to obtain a specific quantity of cotton yarns for that purpose.

(3) No person owning or controlling spinning machinery shall use any preference rating which was assigned, applied or extended for yarn, in order to obtain cotton yarns defined in paragraph (a) (1) (ii), except to the extent authorized by the War Production Board, upon his showing, on Form WPB-2842, that his own spinning is insufficient or unsuitable to fill that yarn order.

(f) *Obligations in respect of rated orders.* (1) Each producer—even if he is also an intermediate processor, processor, merchant or user—shall, during the first calendar quarter of 1944 and in each succeeding calendar quarter, deliver or set aside for later delivery on rated orders those percentages of his total production (in pounds or yards according to his usual method of operation) of each cotton textile as specified in the Distribution Schedules of this order.

(2) No producer, after January 1, 1944, shall be required to fill rated orders in excess of the percentage of his production of each cotton textile as specified in the Distribution Schedules, computed by calendar quarters.

(3) The War Production Board may establish other percentages with respect to any of the cotton textiles listed in the Distribution Schedules.

(4) No person shall be required to accept any rated order for cotton textiles calling for delivery more than 90 days after the receipt of the order, except from the United States Army, Navy, Maritime Commission or War Shipping Administration.

(g) *Special conditions.* No producer, intermediate processor, processor, merchant or user shall sell, deliver, buy, accept or use a cotton textile or any product containing a cotton textile or assign, apply or extend a preference rating contrary to the provisions in Column III of a Preference Rating Schedule or in Column VI of a Distribution Schedule of this order.

(h) *Exports.* No person shall purchase for export any of the cotton fabrics defined in paragraph (a) (1) (i), other than woven or braided fabrics 12 inches or less in width, except with a preference rated order.

(i) *Inventory restrictions.* No person shall accept delivery of any cotton textiles if his aggregate inventory exceeds or would then exceed the lesser of (1) a practicable minimum working inventory, or (2) his requirements for 90 days (except in the case of merchants and users of cotton textiles used in crop cultivation).

In computing inventory include products in process of manufacture but exclude cotton textiles in transit or in process of conversion.

(j) *Allocation.* The War Production Board may assign preference ratings for or allocate and direct deliveries of cotton textiles pursuant to application on Form WPB-2842.

(k) *Applicability of regulations.* Except as otherwise provided herein, this order and all transactions affected thereby are subject to all applicable regulations of the War Production Board.

(l) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provisions appealed from, and stating fully the grounds of the appeal.

(m) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priorities control, and may be deprived of priorities assistance.

(n) *Communications.* All reports to be filed, appeals and other communications concerning this order should be addressed to: War Production Board, Textile, Clothing and Leather Bureau, Washington 25, D. C., Ref.: M-317.

Issued this 21st day of February 1944.

DISTRIBUTION SCHEDULE—COTTON YARNS, CORDAGE AND TWINE

Column I indicates the corresponding item numbers of the various cotton textiles in this Schedule as each appears on Form WPB-658E (12-15-43).

Column II shows the cotton textiles covered by this schedule.

Column IV shows the minimum percentage which must be delivered by the producer against all rated orders. However, where the percentage in Column IV amounts to 100, seconds which are produced in the normal course of manufacture may be disposed of without regard to this provision to the extent that rated orders are not offered.

Column V shows the percentage beyond which rated orders need not be accepted by the producer. Priorities Regulation 1 applies up to that percentage. If receipt of an order which is rated higher than the previously accepted rated order would result in having more rated orders than the Column V percentage, then the lowest rated order shall be displaced and it may be filled only from that percentage applicable to a subsequent quarter.

The provisions and explanations stated in Column VI apply to the producer, intermediate processor, processor, merchant and user and govern the particular cotton textiles, no matter when produced, converted or ordered, and also products containing those textiles. However, the restrictions in Column VI relating to exports do not apply where the export license or release certificate was issued before January 1, 1944.

PART 3290—TEXTILE, CLOTHING AND LEATHER

[General Conservation Order M-317, Interpretation 1 as Amended Feb. 21, 1944]

COTTON TEXTILE DISTRIBUTION

The following interpretation relates to General Conservation Order M-317 as amended February 21, 1944:

1. Q. Is the denim direction of May 21, 1943, superseded by Order M-317?

A. No. It will continue in effect until expressly revoked in writing.

2. Q. Where a person is given a rating in a preference rating schedule to obtain a particular fabric for a specified end use, is it necessary for that person actually to apply to the War Production Board for the right to use that rating?

A. No. The ratings given by these schedules are assigned in the order and may be applied without application.

3. Q. May a jobber use an AA-5 preference rating to acquire pillow cases in anticipation of business which he expects to get from a hospital?

A. No. The jobber has no rating to use until he receives rated orders from the hospital (user). Only after he has received such an order does the jobber have any rating which he can extend.

4. Q. Suppose, before December 24, 1943, when the order was amended, a spinner of sewing twine had on his books an unfilled and unrated order from a manufacturer of textile bags. Would the manufacturer be allowed to apply an AA-2X preference rating to the remainder of that already placed order?

A. Yes. In Group 1 of the AA-2X preference rating schedule, a processor (manufacturer) is given that rating for sewing twine to be used in the manufacture of textile bags. The rating may be used by him for that purpose, both in connection with unshipped balances of sewing twine orders as well as subsequent orders.

5. Q. Under Group I of the AA-2X preference rating schedule a bag manufacturer is given this rating to obtain flat duck to be used in the manufacture of bags, but he is not given a preference rating to buy this fabric to make tarpaulins. Is he allowed to use flat duck in the manufacture of tarpaulins?

A. Yes. Although the order does not give the bag manufacturer a rating to obtain flat duck to be made into tarpaulins, he is not prohibited from buying flat duck without a preference rating for that purpose. The mill may sell flat duck without a rating to the tarpaulin manufacturer so long as it does not interfere with the filling of rated orders.

6. Q. Does the fact that a particular use or end product is not included in a preference rating schedule mean that no cotton textile may be used for that particular purpose?

A. No. Preference ratings have been given to certain classes of persons to obtain specified cotton textiles for important uses which are described in the preference rating schedules. However, the cotton textiles mentioned in the preference rating schedules or any other cotton textiles may be used for any purpose unless prohibited by Column VI of the distribution schedules of this order or by some other order of the War Production Board.

7. Q. An AA-2X preference rating is given to a manufacturer to obtain window shade cloth for military maps (Group 24). No rating is given in the preference rating schedules to a window shade manufacturer. Does this mean that the window shade manufacturer must obtain a rating in order to get window shade cloth or that he is not allowed to purchase window shade cloth?

A. No. It merely means that a preference rating is not given to him.

8. Q. Is a cotton mill which normally dyes and sanforizes its own production of gray goods for the purpose of sale to manufacturers of work clothing required to accept a rated order for gray sheeting from a bag manufacturer?

A. Yes. Since a work clothes manufacturer has a rating of AA-4 and the bag manufacturer is given a rating of AA-2X, the gray goods must be sold to the bag manufacturer on the AA-2X rating rather than dyed and sanforized for sale to the work clothes manufacturer.

9. Q. A priority is given by the AA-4 preference rating schedule, Group 1, to a manufacturer to obtain fabrics for men's and boys' work clothing. Does work clothing mean anything the manufacturer deems to be work clothing?

A. No. Work clothing is that kind of apparel which is generally recognized and accepted in the trade as work clothing. The rating to be used properly must be used for the special purpose of manufacturing work clothing, and the manufacturer of work clothing must conform with L-181.

10. Q. Are the descriptions of the fabrics listed in Column II, Group 1, of Preference Rating Schedule AA-4 intended to include fabrics which are made wholly of combed or carded yarns or of combinations of both, such as twills or poplins?

A. Yes.

11. Q. When should the notations specified in paragraph (d) of M-317 be used and when should the notations specified in paragraph (b) of Order M-328 be used?

A. If the rating is received by virtue of a Preference Rating Schedule of Order M-317, or by a War Production Board form for a cotton textile as defined in M-317, the certification provided for in Priorities Regulation 3 or the standard certification of Priorities Regulation 7 must be used and, in addition, one of the appropriate notations referred to in paragraph (d) (1) or (d) (2) of M-317 must be used. This will satisfy all certification and notation requirements of M-328.

If the rating is for a product not within the definition of "Cotton textiles" in M-317, then the provisions of paragraph (b) of M-328 must be followed.

It should be noted that the Preference Rating Schedules of M-317 do not assign any rating for export. The answer to Question 16 explains how ratings for export orders are given.

NOTE: See paragraph (d) of M-317 as amended February 21, 1944.

12. Q. What ratings are given for diapers?

A. An AA-4 Preference Rating is given to converters and manufacturers to obtain cloth to be made into diaper cloth or diapers. An AA-5 Preference Rating is given to a hospital for the purchase of diapers.

The effect is that in purchasing diapers, a hospital uses an AA-5 preference rating which may be given to a manufacturer or to a jobber who in turn will pass it on to a manufacturer. This rating of AA-5 does not assist the manufacturer because he already has an AA-4 rating to obtain the fabric with which to make the diapers. It does, however, serve the purpose of giving priorities assistance to hospitals over other types of users.

13. Q. If a manufacturer of work gloves should receive an order from the Navy with an AA-2X rating, may he extend the AA-2X rating to buy mitten flannel or must he use the AA-4 rating given for Group 2 of the AA-4 preference rating schedule?

A. Since he is purchasing that textile for incorporation into a product to be delivered to the Navy, he may use the AA-2X rating and is not required to use the AA-4 rating.

14. Q. The order in subparagraph (a) (2) refers to the United States. Does that mean only the 48 states?

A. For the purposes of this order, United States means not only the 48 states but all the territories and possessions of the United States.

15. Q. Is a Canadian bag manufacturer given a preference rating by any Preference Rating Schedule?

A. No. In the AA-2X preference rating schedule, Group 1, a processor is given that rating for bagging fabrics to make bags. Only a domestic manufacturer is meant. The definition of "processor" relates only to a person engaged in the United States in the business of manufacturing.

16. Q. From where do ratings for export orders come?

A. A rating is given in connection with the granting of export licenses by the Foreign Economic Administration (Office of Economic Warfare). A rating is also given in connection with Treasury Department purchases for the Foreign Economic Administration (Lend-Lease and OFRRO). Canadian importers are being granted ratings by the Canadian Division of the War Production Board in Montreal, Canada, operating in conjunction with the Canadian Wartime Prices and Trade Board. All the ratings are AA-5.

17. Q. Can a domestic exporter or a Canadian importer use the ratings of the Preference Rating Schedules?

A. No.

18. Q. Does the order prohibit shipment without a rating to a Canadian purchaser who made a contract prior to December 24, 1943?

A. Yes it does. However, the Canadian purchaser may apply to the Cotton Administrator, Wartime Prices and Trade Board, Aldred Building, Montreal, for a preference rating.

19. Q. Must the purchaser for export show on his order any export license or serial number or any WPB serial number?

A. No export license or export serial number need be stated on his order. However, if a rating is assigned by Form WPB 2842, the serial number of that form must be inserted in the notation required by paragraph (d) of M-317.

[This interpretation is superseded by paragraph (d) of M-317 as amended Feb. 21, 1944]

20. Q. Do the restrictions of Column VI of the distribution schedules apply even to goods produced or ordered before December 24, 1943, the date of amendment?

A. Yes. The Column VI restrictions apply no matter when the goods were produced,

converted or ordered, and they apply to the producer, intermediate processor, processor, merchant and user. However, the Columns III, IV and V provisions cover only the producer (mill), and relate only to goods produced on and after January 1, 1944, regardless of the date they were ordered.

21. Q. Do the percentages in the distribution schedules apply separately to each construction?

A. No. They apply by groups to all the constructions covered by the respective Column I item numbers. For example, Items 76 thru 81, and 83 in Column I of the Carded Gray Goods Distribution Schedule refer to "other plain print cloths, except bandage cloths" and it is required that 40% be delivered against rated orders. This does not mean 40% of each and every fabric produced by the mill, but 40% of the aggregate yardage of the constructions fitting into those categories.

22. Q. In the Carded Gray Goods Distribution Schedule (Items 46, 47 and 48, 49) referring to bed sheetings 42" and wider (including made up sheets and pillow cases), the requirement is that at least 10% be delivered against rated export orders. May this obligation be satisfied by delivery, in whole or in part, of yard goods (gray or bleached) as well as sheets and pillow cases?

A. Yes. The total yardages are interchangeable. Paragraph (a) (1) (i) defines cotton textiles to include gray or finished fabrics as well as bed sheets and pillow cases.

23. Q. Is a mill which produces soft-filled sheeting and converts it into suede subject to the minimum rated percentages under soft-filled sheetings (Items 12 and 13, Carded Gray Goods Distribution Schedule) as well as the percentages for moleskins and suedes (Item 135)?

A. Yes. Inasmuch as the mill produces both soft-filled sheetings and suedes it must comply with the minimum percentage requirements as to both. However, the suede which is sold on rated export and other rated orders can be credited against the minimum requirements for the delivery of soft-filled sheeting.

24. Q. Are remnants to be excluded from the total of a mill's production for the purposes of the percentages in Columns III, IV and V of the distribution schedules?

A. No. They are to be treated the same as seconds and shorts for the purpose of the distribution schedules.

25. Q. Are seconds and shorts to be considered as part of the mill's total production for the purposes of Columns III, IV and V?

A. Yes. In making calculations a mill's entire production must be considered, including seconds, shorts and remnants. When the Column IV percentage is 100, the privilege is given to the mill to dispose of seconds, shorts or remnants without ratings if no rated orders are available. But if rated orders are presented for seconds, shorts or remnants, those orders must be accepted.

26. Q. Is the mill bound by the provisions in Columns III and IV of the Distribution Schedules even if the rated business is not offered to it?

A. Yes. This does not mean, however, that the War Production Board will grant ratings for uses of cotton textiles which have not heretofore been rated. The percentages in Columns III and IV have been set at levels to cover the quantities of rated business available for each group of fabrics. It, therefore, becomes necessary that each mill actually obtain the specified quotas of rated orders, although the result of this requirement will be that in certain instances mills will be unable to accept their accustomed amount of unrated business.

27. Q. In the heading of each distribution schedule there is a provision which states that if receipt of an order which is rated higher than a previously accepted rated order would result in having more rated orders than the Column V percentage, then the lowest rated order shall be displaced and it may be filled only from that percentage applicable to a subsequent quarter. Does this mean that producers cannot sell their yardage against ratings in excess of the percentage specified in Column V?

A. If after the seller has received the specified quantity of rated orders, another order rated lower than or the same as any of those already accepted is offered to him he may refuse it or he may accept it. This is a case where he is allowed to exceed the Column V percentage with rated orders.

If the newly offered order is rated higher than those he has already accepted, he must accept it, and it must displace the lowest rated order. This is a case where he is not allowed to exceed the Column V percentage with rated orders.

28. Q. The distribution schedules differentiate "bandage cloths" from other types of print cloth. The Preference Rating Schedules do not refer to "bandage cloths". Are "bandage cloths" included in the preference rating schedules?

A. Yes. Print cloths include bandage cloths. They are sub-divided in the distribution schedules, but are not sub-divided in the preference rating schedules.

29. Q. Where Column VI in the Carded Gray Goods Distribution Schedule provides that plain print cloths, 80 sley and higher, "may not be used for export", does that mean that a garment made of such goods may not be exported?

A. Yes. The restriction applies not only to the export of the fabric named in Column II but also to the use of the fabric in any product being produced for export. Furthermore, that restriction controls not only the mill, but also the converter, jobber and cutter.

[This interpretation is superseded by amendment to M-317 issued February 21, 1944, which substituted "These cotton textiles, as piece goods may not be exported" for "May not be used for export," in Column VI.]

30. Q. Suppose rated export orders, exceeding the percentage specified in Column III, are presented. Must the mill accept them?

A. Yes. Those rated orders must be accepted to the extent of the Column V percentage.

31. Q. If a mill is making only one construction of "other plain print cloths, except bandage cloths" (Carded Gray Goods Schedule, Items 76 thru 81, 83) namely 38½" 64 x 60 5.35 yard to meet special quality standards, for which he receives an AA-2 preference rating from an insulating tape manufacturer, is he obliged to deliver 10% for export?

A. Yes. Since Column III specifies 10% as the portion of his production which must be delivered against rated export orders, the mill is obliged to comply unless relieved upon appeal.

32. Q. Does a mill, which is required to deliver a minimum of 10% of its production of Class B sheetings against rated export orders satisfy the requirement by shipments on ratings to a domestic bag manufacturer who will manufacture those goods into bags which will be exported?

A. No. The requirement is that the specified minimum percentage must be delivered against rated orders in the form of a cotton textile. In the case given, the bag manufacturer's order to the mill is not an export, but a domestic, order. Only the bags are covered by an export order.

33. Q. Does delivery of cotton textile to a garment manufacturer who could certify that the garment to be made therefrom is to be exported fulfill the export requirement?

A. No. The provision of Column III of the distribution schedules showing the minimum percentage which must be delivered against rated export orders means rated export orders for a cotton textile and not for a finished product which is not a cotton textile, such as the garment. It is to be noted that when the cotton textile is to be exported, paragraph (d) requires a notation to that effect to be placed by the purchaser on the purchase order.

34. Q. Where a percentage is not specified in Column III of distribution schedules, is the processor relieved of any obligation to accept rated export orders?

A. No. Unless there is a prohibition against export in Column VI, rated orders, export or otherwise, must be accepted up to the Column V percentage. The omission of a percentage in Column III merely indicates that the processor is not required to deliver a minumum percentage against rated export orders.

35. Q. Suppose, before December 24, 1943, when the Distribution Schedules were first adopted, a spinner had received rated contracts for 100 per cent of his first quarter of 1944 production of single machine knitted carded cotton sale yarn (items 16 through 18), does M-317 permit him to cancel those contracts to the extent of 30 per cent of that production, since Column V provides that he is not obliged to accept rated orders for more than 70 per cent?

A. No. The order does not excuse him from performing his existing rated contracts. In his case, only after his existing contracts have been performed will he have the benefit of the provision that "Column V shows the percentage beyond which rated orders need not be accepted by the producer.

Issued this 21st day of February 1944.

Recording Secretary.

ARTICLE I—SCOPE AND PROHIBITION OF THE REGULATION

SECTION 1. *What this regulation does.* This regulation establishes maximum prices for all sales at retail and wholesale of civilian (non-military) rubber footwear. However, this regulation does not apply to sales or deliveries of rubber footwear on war orders which must be priced under Maximum Price Regulation 403.[1] When used in this regulation the term:

(a) "Rubber footwear" means all types of waterproof and canvas rubber footwear for which maximum prices are set forth in an appendix to this regulation.

(b) "Canvas rubber footwear" means all canvas-topped rubber-soled shoes of vulcanized construction.

[1] 8 F.R. 7498, 8837, 10434.

(c) "Waterproof rubber footwear" means all rubber footwear of vulcanized construction which protects shoes or feet from moisture.

SEC. 2. *Where this regulation applies.* The provisions of this regulation shall apply to the 48 states of the United States and to the District of Columbia.

SEC. 3. *Relation to other regulations.* (a) *Regulations superseded.* This regulation supersedes the General Maximum Price Regulation [2] and any other regulation issued by the Office of Price Administration as to transactions covered by this regulation.

(b) *Export sales.* The Second Revised Maximum Export Price Regulation [3] covers export sales or sales to exporters. When used in this paragraph the terms "export sale" and "exporter" have the meanings given to them by Section 11 of the Second Revised Maximum Export Price Regulation.

SEC. 4. *Prohibition against dealing in rubber footwear at prices above the maximum.* On and after the date this regulation takes effect, regardless of any contract or other obligation, no person shall sell or deliver at retail or wholesale any rubber footwear subject to this regulation, and no person shall buy or receive any rubber footwear subject to this regulation in the course of trade or business, at a price which is higher than the maximum price. No person shall agree, offer, solicit, or attempt to do any of the foregoing. However, lower prices may be charged.

ARTICLE II—MAXIMUM PRICES AND TERMS OF SALE

SEC. 5. *Maximum prices for sales at retail of rubber footwear*—(a) *Method of determining the maximum price for each type and brand of rubber footwear.* The seller's maximum price for sales of each type and brand of rubber footwear, shall be the maximum price set forth in Appendix A or Appendix B for that type of rubber footwear for the appropriate price class determined under paragraph (b).

(b) *How the seller determines the appropriate price class.* The seller shall determine the appropriate price class for each type and brand of rubber footwear he sells, as follows:

(1) If the seller sold the type and brand of rubber footwear being priced between September 29, 1942, and February 24, 1944, that type and brand of rubber footwear shall be placed in the same price class as it was under § 1315.1703 of Maximum Price Regulation 229 [4] during that period.

(2) If the seller did not sell the type and brand of rubber footwear being priced between September 29, 1942, and February 24, 1944, the appropriate price class shall be determined by reference to the tables set forth in Appendix A for waterproof rubber footwear, and Appendix B for canvas rubber footwear. The seller shall compare the net price at which he purchased the rubber footwear he is pricing after February 23, 1944, with the range of net prices set forth in those tables for that type of footwear. The range of net prices into which the net price he paid falls, shall determine the appropriate price class.

(3) If, at any time subsequent to February 23, 1944, a seller buys a type and brand of rubber footwear in sufficiently larger quantities so that the net price he pays is lower than the net price which he used in determining the appropriate price class for that type and brand of rubber footwear, he must redetermine the appropriate price class by reference to the tables set forth in Appendix A or Appendix B.

(c) *Meaning of the "net price" at which the seller purchased the rubber footwear he is pricing.* The "net price" at which the seller purchased the type and brand of rubber footwear he is pricing, means the lowest price, without cash discount, at which he purchased that type and brand after February 23, 1944, (or the list price, less all discounts except cash discount). Manufacturers' "seconds", clearly marked as such, shall not be considered as establishing the net price for a type and brand of rubber footwear.

(d) *Discounts.* The seller shall deduct from his maximum price, as found in Appendix A or Appendix B, all discounts, allowances, and any other deductions that he had in effect to different classes of purchasers during the period July 1 to October 25, 1941.

SEC. 6. *Maximum prices for sales at wholesale of rubber footwear.* The maximum price for sales at wholesale of rubber footwear is the price stated in Appendix A or Appendix B for sales at wholesale, less all discounts, allowances, and any other deductions that the wholesaler had in effect to different classes of purchasers during the period April 1 to October 25, 1941.

SEC. 7. *Federal and state taxes.* Any tax upon or incident to the sale, delivery, or processing of rubber footwear imposed by any statute of the United States, or statute or ordinance of any state or subdivision thereof, shall be treated as follows in determining the seller's maximum price: If the statute or ordinance imposing such tax does not prohibit the seller from stating and collecting the tax separately from the purchase price, and the seller does separately state it, the seller may collect, in addition to the maximum price, the amount of the tax actually paid by him or an amount equal to the amount of tax paid by any prior vendor and separately stated and collected from the seller by the vendor from whom he purchased. The tax on the transportation of all property imposed by section 620 of the Revenue Act of 1942 shall, for purposes of determining the applicable maximum price of any rubber footwear, be treated as though it were an increase of 3 percent in the amount charged by every person engaged in the business of transporting property for hire. It shall not be treated as a tax for which a charge may be made in addition to the maximum price.

SEC. 8. *Terms and conditions of sale*—(a) *Credit charges.* Charges for the extension of credit may be added to the maximum prices established by this regulation only if: (1) The seller during the period February 11 to September 29, 1942, required payment of a separately stated additional charge for the extension of credit by purchasers of the same class on sales of the same or similar types of commodities; (2) the amount charged for the extension of credit is not in excess of the charge in effect during the period February 11 to September 29, 1942, for the extension of credit involving the same amount and term; and (3) such charges are quoted and billed separately. No seller may require as a condition of sale that the purchaser must buy on credit.

(b) *Service charges.* In the case of sales at wholesale a service charge of 5 cents a pair may be added to the maximum price on all orders of six pairs or less. Additional charges for services rendered the purchaser by the seller may be charged only if: (1) the seller during the period February 11 to September 29, 1942, required the payment of a separately stated additional charge for such services to purchasers of the same class, and (2) the amount charged for the services is not in excess of the charge in effect during the period February 11 to September 29, 1942, to purchasers of the same class for the same or similar services.

(c) *Transportation charges.* No seller shall require any purchaser, and no purchaser shall be permitted, to pay a larger proportion of transportation costs incurred in the delivery of any rubber footwear than the seller required purchasers of the same class to pay on deliveries of the same or similar types of rubber footwear during April 1 to October 25, 1941, for sales at wholesale, and July 1 to October 25, 1941, for sales at retail.

SEC. 9. *Transfers of stock or business in trade.* If the business, assets or stock in trade are sold, or otherwise transferred after February 1944, and the transferee carries on the business, or continues to deal in the same type of commodities, in an establishment separate from any other establishment previously owned or operated by him, the maximum prices of the transferee shall be the same as those to which his transferor would have been subject if no such transfer had taken place, and his obligation to keep records sufficient to verify such prices shall be the same. The transferor shall either preserve and make available, or turn over, to the transferee all records of transactions prior to the transfer which are necessary to enable the transferee to comply with the record provisions of this regulation.

ARTICLE III—MISCELLANEOUS

SEC. 10. *Petitions for amendment.* Any person seeking a modification of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1.[3]

SEC. 11. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the Administrator or by any official of the Office of Price Administration to whom the authority to grant such authorization has been delegated. The authorization will be given by order.

SEC. 12. *Records.* To aid in the enforcement of this regulation every seller is required to keep and preserve the following records for inspection by the Office of Price Administration:

(a) All existing records showing his purchases of each type and brand of rubber footwear.

(b) Records showing the basis on which the seller sets each maximum price, in a form which will permit filing on demand with the Office of Price Administration.

(c) Records of the same kind as he has customarily kept showing the prices actually charged by him for rubber footwear which he sells after the effective date of this regulation.

SEC. 13. *Posting and filing of maximum prices for sales of rubber footwear at retail.* (a) On and after February 24, 1944, every person offering to sell rubber footwear at retail shall mark the maximum price of such commodity in a manner plainly visible to, and understandable by, the purchasing public, in the business establishment where rubber footwear is offered for sale. The maximum price shall be stated as follows: "Ceiling price $----"; or "Our ceiling $----".

(1) Every seller making retail sales on the basis of orders received by mail shall post or mark his maximum price in all catalogs, flyers, leaflets, circulars, booklets, lists or other printed or similar matter issued and distributed by him after the effective date of this regulation for the purpose of obtaining mail orders. One of the following methods of posting or marking shall be used:

(i) State the maximum price for each rubber footwear commodity listed in each of the publications described above at the place in the publication where such commodity is listed. The maximum price shall be stated substantially as follows: "Ceiling price $———"; or "Our ceiling price $———"; or,

(ii) Print on the front cover of all catalogs, flyers, leaflets, circulars or booklets, or the front page of all lists or publications not having a cover, at the time they are issued, substantially the following statement signed with the name of the seller:

NOTICE TO CUSTOMERS

No price for any article listed or described herein exceeds the ceiling price for that article as determined under the applicable maximum price regulation issued by the Office of Price Administration. As required by that Office, we will, upon request, furnish you with a statement of our maximum prices on any of the commodities listed about which you inquire.

(Signed)----------

Any seller using this method, shall upon request, furnish a statement of the maximum prices for any commodities listed or described in the publication and about which the customer inquires.

(2) Any seller making retail sales by mail may apply to the Office of Price Administration for permission to deviate from the requirements in subparagraph (1). The application shall state why such requirements are inequitable or inappropriate as applied to the applicant's business, and shall show that the requested method of posting is substantially in line with the requirements of posting for mail order sellers set forth in subparagraph (1).

SEC. 14. *Sales slips and receipts.* Any seller who has customarily given a purchaser a sales slip, receipt, or similar evidence of purchase shall continue to do so. Upon request from a purchaser any seller, regardless of previous custom, shall give the purchaser a receipt showing the date, the name and address of the seller, the name of each commodity or service sold, and the price received for it.

SEC. 15. *Licensing.* The provisions of Licensing Order No. 1,[4] licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license or one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

SEC. 16. *Evasion.* The price limitations set forth in this regulation shall not be evaded by direct or indirect methods, in connection with any offer, solicitation, agreement, sale, delivery, purchase or receipt of rubber footwear, alone or with any other commodity or by way of commission, service, transportation, or any other charge, discount, premium, or other privilege, or by tying-agreements or other trade understanding, or otherwise.

SEC. 17. *Enforcement.* Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, license suspension proceedings and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

SEC. 18. *Definitions.* (a) When used in this regulation, the term: "Sale at retail" means a sale to an ultimate consumer. "Sale at wholesale" means a sale by a person who buys rubber footwear and resells it, without substantially changing its form, to any person other than the ultimate consumer.

(b) Unless the context otherwise requires, the definitions set forth in section 302 of the Emergency Price Control Act of 1942, as amended, shall apply to other terms used herein.

PART 1364—FRESH, CURED AND CANNED MEAT AND FISH

[RMPR 148,[1] Incl. Amdt. 15]

DRESSED HOGS AND WHOLESALE PORK CUTS

Sections 1364.22 (d) (2), (d) 3, 1364.29, 1364.32 (a) (7), (a) (9), 1364.32 (c), 1364.35, Schedules I, II, and III amended; § 1364.32 (a) (15) (v) added by Amendment 15, effective February 24, 1944; § 1364.22a revoked by Amendment 15, effective March 1, 1944; so that Revised Maximum Price Regulation 148 shall read as follows:

In the judgment of the Price Administrator, it is necessary and proper, in order to effectuate the purposes of the Emergency Price Control Act of 1942, as amended and Executive Order No. 9250 issued by the President on October 3, 1942, to maintain as the maximum prices for dressed hogs and wholesale pork cuts the prices prevailing with respect thereto during the period March 3, 1942 to March 7, 1942, inclusive. Prices determined as provided in § 1364.22 reflect the prices prevailing during such period. The Price Administrator has ascertained and given due consideration to the prices of dressed hogs and wholesale pork cuts prevailing between October 1 and October 15, 1941, and has made adjustments for such relevant factors as he has determined and deemed to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation.

In the judgment of the Price Administrator the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of said act and Executive order. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.[2]

The maximum prices established herein are not below prices which will reflect to producers of the agricultural commodities from which dressed hogs and wholesale pork cuts are produced a price for their products equal to the highest of the prices required by the provisions of the Emergency Price Control Act of 1942, as amended, and by the Executive Order of October 3, 1942.

Insofar as this regulation uses specifications and standards which were not, prior to such use, in general use in the trade or industry affected, or insofar as their use was not lawfully required by another Government agency, the Administrator has determined, with respect to such standardization, that no practicable alternative exists for securing effective price control with respect to the commodities subject to this regulation.

[Above sentence added by Supplementary Order No. 63, 8 F.R. 12553, effective 9-11-43]

Therefore, under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Order No. 9250 and in accordance with Procedural Regulation No. 1,[3] issued by the Office of Price Administration, Revised Maximum Price Regulation No. 148 is hereby issued.

§ 1364.21 *Prohibition against selling dressed hogs and wholesale pork cuts at prices above the maximum.* On and after November 2, 1942, regardless of any contract, agreement, or other obligation, no person shall sell or deliver dressed hogs or any wholesale pork cut, and no person in the course of trade or business shall buy or receive dressed hogs or any wholesale pork cut at a price higher than the maximum price permitted by § 1364.22; and no person shall agree, offer, solicit or attempt to do any of the foregoing: *Provided*, That on and after June 14, 1943, a war procurement agency in addition to paying to the seller the maximum price for the commodity prescribed by the applicable provisions of this regulation, may pay to Defense Supplies Corporation an amount equivalent to the meat production payments made by Defense Supplies Corporation on account of the production of such meat.

[§ 1364.21 as amended by Am. 5, 8 F.R. 7671]

§ 1364.22 *Maximum prices for dressed hogs and wholesale pork cuts.* Maximum prices for dressed hogs and wholesale pork cuts shall be computed as provided in this section.

(a) *Base price.* The base price for each wholesale pork cut shall be the price specified in Schedule I of Appendix A (incorporated herein as § 1364.35), minus the required deductions, if any, specified in Schedule II of Appendix A (§ 1364.35), plus the permitted additions, if any, specified in Schedule III of Appendix A (§ 1364.35).

(b) *Maximum prices in central price zone.* Except as provided in paragraph (h) of this section, the maximum price for each wholesale pork cut delivered to the buyer within the Central Price Zone, or delivered outside the Central Price Zone by a local delivery beginning in the Central Price Zone, shall be the base price.

(c) *Maximum prices in Chicago price zone.* Except as provided in paragraphs (b) and (h) of this section, the maximum price for each wholesale pork cut delivered to the buyer in the Chicago Price Zone, or delivered to the buyer outside the Chicago Price Zone and the Central Price Zone by a local delivery beginning in the Chicago Price Zone, shall be the base price plus $0.25 per cwt.

(d) *Maximum prices outside central price zone and Chicago price zone.* Except as provided in paragraphs (b), (c) and (h) of this section, the maximum price for each wholesale pork cut delivered to the buyer outside the Central Price Zone and the Chicago Price Zone shall be the base price plus a transportation differential determined as follows:

(1) The seller shall ascertain the point at which local delivery begins, if local delivery is made, or the point of delivery if no local delivery is made. If no carload meat freight rates are established to such point, he shall ascertain the nearest point at which such freight rates are established.

(2) If the point ascertained under paragraph (d) (1) of this section is east of the Mississippi River, but is not in Minnesota, Wisconsin, or in that part of Michigan lying between Lake Superior and Lake Michigan or Lake Huron, the transportation differential for any fresh wholesale pork cut shall be 115 percent of the lowest fresh meat carload freight rate from Chicago, Illinois, to such point adjusted to the nearest $0.25 per cwt. and plus $0.25 per cwt., and the transportation differential for any cured or processed wholesale pork cut shall be 115 percent of the lowest packing house product carload freight rate (applicable to cooked, cured or preserved meats and sausage) from Chicago, Illinois, to such point, adjusted to the nearest $0.25 per cwt. and plus $0.25 per cwt. (Caution: This transportation differential is to be added to the base price, not to the maximum price in the Chicago Price Zone.)

(3) If the point ascertained under paragraph (d) (1) of this section is in Missouri, Arkansas, or in those portions of Louisiana west of the Mississippi River, or in those portions of Texas, Oklahoma or Kansas which lie east of the 99th meridian, the transportation differential for any fresh wholesale pork cut shall be 115 percent of the lowest fresh meat carload freight rate from Kansas City, Missouri, to such point, adjusted to the nearest $0.25 per cwt., and the transportation differential for any cured or processed wholesale pork cut shall be 115 percent of the lowest packing house product carload freight rate (applicable to cooked, cured or preserved meats and sausage) from Kansas City, Missouri, to such point, adjusted to the nearest $0.25 per cwt.

[Subparagraphs (2) and (3) as amended by Am. 15.]

(4) If the point ascertained under paragraph (d) (1) of this section lies in any other part of the United States than those areas referred to in paragraphs (d) (2) and (d) (3) of this section, the seller shall ascertain the lowest of the packing house product carload freight rates (applicable to cooked, cured or preserved meats and sausage) to such point from Kansas City, Missouri, and South St. Paul, Minnesota. The transportation differential for fresh, cured or processed wholesale pork cuts shall be 115 percent of such lowest rate, adjusted to the nearest $0.25 per cwt.

(e) *When products are delivered to the buyer.* Dressed hogs and wholesale pork cuts shall be deemed to be delivered to the buyer at the point where physical possession is taken by the buyer or his

[Paragraph (e) as amended by Am. 1, 8 F.R. 544]

(f) *Maximum prices of wholesale pork cuts listed in Appendix A.* (1) Except as provided in paragraph (h) of this section, if the maximum price for any wholesale pork cut delivered to the buyer cannot be determined under the provisions of the foregoing paragraphs of this section, such maximum price shall be that of the nearest similar wholesale pork cut derived from the same primal cut or combination of primal cuts, making adjustment for the differences in the costs of producing such cuts. Each seller shall file with the Office of Price Administration at Washington, D. C., within 10 days of computation, each maximum price computed under the provisions of this paragraph (f) together with a sworn statement of the method of such computation and the comparative costs included therein, including costs of labor, materials, and overhead, and shrinkage or gain in weight. Any maximum price so computed shall be subject to revision by the Price Administrator. No person shall sell any wholesale pork cut not listed in Schedule I of Appendix A (§ 1364.35), except canned meats subject to the provisions of paragraph (h) of this section, without first filing with the Office of Price Administration at Washington, D. C., a maximum price for such cut as required by the provisions of this paragraph (f).

(2) The last date for computing and filing maximum prices under this paragraph (f) for all wholesale pork cuts, other than those sold exclusively to war procurement agencies, shall be May 31, 1943. On or before June 30, 1943, the Office of Price Administration shall review all maximum prices filed on or before May 31, 1943, and the Price Administrator shall in writing confirm or modify the maximum prices filed by such seller under this paragraph (f). Subject to such conditions as may be prescribed in the order of the Administrator, the Regional Administrator for the area or any District Manager designated by him, may in writing authorize named sellers to charge and receive, for dressed hogs and wholesale pork cuts sold to buyers in that area, the added cost of transportation in addition to the applicable maximum price.

(b) *Definitions.* As used in this regulation, the term

(1) "Packer style" means a dressed hog with the head off, kidneys and leaf fat out, and ham facings off.

(2) "Shipper style" means a dressed hog with the head on, kidneys and leaf fat in, and ham facings on.

(3) "Current Chicago live hog price" of hogs other than oily hogs, stags and boars means the highest price quoted, for live hogs of the applicable weight, in the current Chicago Daily Livestock Market Report of the Agricultural Marketing Administration of the U. S. Department of Agriculture, minus the current live cwt. subsidy rate. "Current Chicago live hog price" of oily hogs means a price determined by deducting from the highest price quoted, for live butcher hogs of the applicable weight, in such current report, $1.00 per cwt. and the current live cwt. subsidy rate. "Current Chicago live hog price" of stags and boars means a price determined by deducting from the highest price quoted for live sows or butcher hogs of the current live cwt. subsidy rate, in such current report, $1.50 per cwt. and the current live cwt. subsidy rate in the case of stags, and $4.00 per cwt. and the current live cwt. subsidy rate in the case of boars. As to all shipments of dressed hogs from points east of the 85th meridian the current report shall be deemed to be that for the third market day preceding such shipment. As to all shipments of dressed hogs from points west of the 85th meridian and east of the 95th meridian and from points east of the Missouri River, south of Kentucky and west of the 88th meridian that for the second market day preceding such shipment. As to all shipments of dressed hogs from any other point, the current report shall be deemed to be that for the current day preceding such shipment. For the designated transportation differential (4) means a transportation differential determined as provided in subparagraphs (1), (2), (3) and (4) of § 1364.22 (d).

(c) *Price instructions.* Except as provided in § 1364.22 (b), the maximum price for each dressed hog shall be fixed as follows:

(1) Ascertain the weight range applicable to the dressed hog to be priced. (Weight ranges for packer style dressed hogs are in the first column of the table in paragraph (a) of this Schedule IV, and weight ranges for shipper style dressed hogs are in the second column.) Ascertain the related live hog weight classification of such dressed hog (on the same line in the table, but in the third column). Multiply the current Chicago live hog price, for hogs of such related live hog weight classification, by the appropriate seasonal denominator (on the same line in the table, but in one of the last four columns).

Example: A butcher hog dressed shipper style and weighing 190 pounds falls in the 180 to 213 pound weight range and in the 240 to 270 pound related live hog weight classification. If it were slaughtered in New York City and shipped on November 24, 1942, the appropriate seasonal denominator would be 1.315, and the current Chicago live hog price would be that reported for Thursday, November 19, 1942, three market days prior to Tuesday, November 24, 1942, ($14.00 per cwt.), minus an assumed current live hog subsidy at that time of $1.30 per cwt., equaling $12.70 per cwt. $12.70 multiplied by 1.315 equals $16.70.

(2) To the price determined under paragraph (c) (1) of this Schedule, add 25¢ per cwt. If the seller delivers such dressed hog by a local delivery to a point more than 50 miles away from the shipping point.

Example: If in the example stated in paragraph (c) (1), such local delivery were made, 25 cents would be added to $16.79 giving a price of $16.95 per cwt.

(3) To the price determined under paragraph (c) (2), add the following permitted fresh kill addition, if the dressed hog is derived from a hog killed in the region where the addition is applicable and delivered by local delivery within such region on the same day as or on the day after killing or sold to the Federal Surplus Commodities Corporation:

Region	Permitted addition per cwt.
(i) New England, New Jersey, Delaware, Maryland, District of Columbia and those portions of New York and Pennsylvania lying east of the 77th meridian	50¢
(ii) Those portions of Pennsylvania and New York lying west of the 77th meridian	35¢
(iii) Virginia; West Virginia; Kentucky; Ohio; Indiana; Chicago, Illinois; and the local peninsula of Michigan (that part of Michigan lying between Lake Michigan and Lake Huron)	15¢

Example: In the example stated in paragraph (c) (2), if the dressed hog is sold to the Federal Surplus Commodities Corporation, or if local delivery is made to a buyer within the region described in subparagraph (3) (i), 50 cents would be added to $16.95 giving a price of $17.45 per cwt.

(4) The maximum price for each dressed hog delivered to the buyer within the Central Price Zone, or delivered outside the Central Price Zone by a local delivery beginning in the Central Price Zone, shall be the applicable price determined under paragraph (c) (1) or (c) (2) of this Schedule.

(5) Except as provided in paragraph (c) (4) of this Schedule, the maximum price for each dressed hog delivered to the buyer in the Chicago Price Zone, or delivered to the buyer outside the Chicago Price Zone and the Central Price Zone by a local delivery beginning in the Chicago Price Zone, shall be the applicable price determined under paragraph (c) (1), (c) (2) or (c) (3) of this Schedule, plus 25¢ per cwt.

(6) Except as provided in paragraphs (c) (4) and (c) (5) of this Schedule, the maximum price for each dressed hog delivered to the buyer outside the Central Price Zone and the Chicago Price Zone shall be the applicable price determined under paragraph (c) (1) (c) (2) or (c) (3) of this Schedule, plus the designated transportation differential.

(d) *Brokers' fees.* The maximum prices fixed pursuant to paragraph (c) of this Schedule IV shall include all charges for brokerage and no addition to such prices may be made for brokers' fees. If the seller pays no brokerage fees on shipments of carload lots, the maximum price shall be reduced by $0.125 per cwt. If the seller pays brokerage on such shipments in an amount less than $0.125 per cwt., the maximum price shall be reduced by the difference between the amount of brokerage actually paid by the seller and $0.125 per cwt.

PART 1439—UNPROCESSED AGRICULTURAL COMMODITIES

[MPR 426,[1] Amdt. 19]

FRESH FRUITS AND VEGETABLES FOR TABLE USE, SALES EXCEPT AT RETAIL

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.*

1. A new paragraph (e) (8) is added to Appendix H, of Article III, section 15 to read as follows:

(8) All weighing and packing by growers and country shippers of the listed commodities shall be done in accordance with customary weighing and packing practices and the requirements of the applicable State Agricultural Code. The provisions of section 1 (f) (5) apply only to those containers of the listed commodities whose maximum prices are named in the applicable table in paragraph (b) hereof, on a per pound basis.

2. Appendix I is added to section 15, Article III, to read as follows:

APPENDIX I—MAXIMUM PRICES FOR CITRUS FRUITS

(a) *Explanation.* This appendix establishes maximum prices for certain sales of oranges, grapefruit, lemons, and tangerines. It supersedes the provisions of Maximum Price Regulation No. 292,[2] and applies to every seller of citrus fruits including growers, country shippers, carlot distributors, terminal brokers, carlot receivers, secondary jobbers, commission merchants and all other sellers except retailers.

Specifically, this appendix:

(1) Establishes designated basing points, maximum prices f. o. b. shipping point, for sales f. o. b. point of shipment,

(2) Establishes maximum prices at the wholesale receiving point for sales through certain named agents and for such sales by all sellers other than retailers,

(3) Establishes maximum prices for all sales of citrus fruits to retail stores, government procurement agencies and institutional buyers.

Each of the citrus fruits is covered by a separate table. Provisions which apply specially to any one kind of citrus fruit are to be found in footnotes to the applicable table. Provisions applicable to all the citrus fruits are to be found in the paragraphs following the tables. The maximum markups which may be added to the f. o. b. or delivered maximum prices, as the case may be, for certain types of sales common to all the citrus fruits, are set forth in a separate table.

Sales by growers of country shippers of five containers (not larger than a "standard" box) or less of citrus fruits in any one lot by mail or express to any one ultimate consumer shall be exempt from the provisions of this regulation, but such sales shall be subject to the provisions of this regulation when made by sellers other than growers or country shippers.

The Office of Price Administration reserves the right to change any basing point named in this Appendix at any time, or to establish new or additional basing points, without changing the maximum prices f. o. b. country shipping point.

(b) *Definitions*—(1) *Container definitions.* (i) For California and Arizona citrus fruits, "standard" or "legal" container means 1⅗ bushel containers (wooden nailed boxes or wire-bound crates) conforming to the specifications of the standard orange box or the standard lemon box respectively, as prescribed by the Agricultural Code of the State of California, or two "half boxes" or two "half strap" boxes, packed and lidded in conformity with the requirements of said Agricultural Code, or a "full box bag" or two "half box bags" containing a quantity of citrus fruit equivalent to that contained in a 1⅗ bushel container as described above.

(ii) For Florida and Texas citrus fruits, "standard" or "legal" container means 1⅗ bushel containers (wooden nailed boxes or wirebound crates) conforming to the specifications for citrus boxes and as published in Freight Container Bureau Tariffs No. 2B, ICC No. 14, and No. 3A, ICC No. 15, as amended, packed and lidded in conformity with the requirements of the Florida Citrus Commission for Florida fruit and in accordance with the requirements of the Texas Commissioner of Agriculture for Texas fruit, or two "half boxes" or two "half strap boxes" packed and lidded in conformity with the requirements of the Agricultural Codes of these states, or a "full box bag" or two "half box bags" containing a quantity of citrus fruit equivalent to that contained in a 1⅗ bushel container as described above.

(iii) "Loose box" means a container of the same size as the standard or legal box filled without any special arrangement or sizing of the fruit and which may be lidded or unlidded.

(2) *Commodity definitions.* (i) "Oranges" includes all oranges, except tangerines.

(ii) "Tangerines" means tangerines, tangelos, satsumas, clementines, temple, and king oranges.

(c) *Maximum price tables applicable to individual citrus fruits.* The following tables state the maximum prices which apply to certain sales of citrus fruits by growers, country shippers, and by intermediate sellers. (For other transactions by these sellers, see the table in paragraph (d) and the provisions of paragraphs (f) (g).)

Except as specified for bulk sales and "on the tree" sales, the maximum prices named in the tables of this paragraph include all costs of harvesting, hauling and packing, and no additional charge may be made for containers.

(d) *Table of maximum markups applicable to all citrus fruits.* The following table states the maximum markups which may be added for certain distributive services. In each case, the maximum price shall be figured by adding the appropriate markup to the named f. o. b. or delivered maximum price (see Column 6 of the applicable table in paragraph (c)), as the case may be. In figuring maximum prices, markups may not be taken cumulatively.

For example: If a carlot receiver buys a carlot of oranges delivered at the wholesale receiving point from a grower selling through a broker, the grower's ceiling price is the maximum delivered price (see Column 6 of the applicable table in paragraph (c)), plus the broker's fee (not to exceed 7¢ per box) and the carlot receiver's ceiling price on the resale (ex store) is the maximum carlot delivered price plus 45¢ per standard box. In other words, the broker's fee comes out of the 45¢ and is not added to it.

[1] Charges determined under MPR 165 shall be used instead of those listed in this table if such charges are lower than the mark-ups shown.

[2] Column 12 does not apply to sales made in bulk. Bulk sales of any quantity shall be priced under column 11.

(e) *Provisions applicable to growers and country shippers*—(1) *Prohibition against certain payments.* No grower or country shipper shall receive, and no person shall pay to any grower or country shipper, an amount in excess of the maximum price f. o. b. country shipping point (if sold f. o. b.) or the maximum price for delivered sales (if sold delivered) (see Column 6 of the applicable table in paragraph (c)), regardless of the type of sale or the type of purchaser, and regardless of any existing or future commitment between buyer and seller, except for allowances made to growers and country shippers for sales through agents, and except as provided for sales by growers and country shippers delivered to premises of retail stores, government procurement agencies, institutional buyers and ultimate consumers. No person who does not pack and ship the citrus fruit being priced and who does not regularly operate a packing and shipping plant for that commodity, shall purchase citrus fruits in bulk (but not washed, graded and stamped) or "on the tree" at a price higher than the maximum price for the applicable purchase and sale named in the applicable table in paragraph (c).

For example: Suppose a grower of Florida "Indian River" oranges receives an offer from an eastern jobber to "split the wholesale markup" on a delivered sale to the buyer's place of business. It is illegal for the grower to accept any amount of money in excess of the maximum price, f. o. b. country shipping point, plus freight from the applicable basing point and the allowance for protective services listed in the table in paragraph (c) for Florida "Indian River" oranges. The grower may enter into a "joint account" with an eastern buyer, but after the sale the gross return to the grower must not exceed the applicable maximum price, f. o. b. country shipping point plus freight from the basing point and the named protective service allowance.

"Country shipper" means any person, including a grower, grower's cooperative, or packer, who grades, sizes, and packs, or otherwise prepares the kind of citrus fruit being priced for shipment and who sells the commodity from a farm, orchard, grove or other country shipping point. A person who has the citrus fruit packed or prepared for him for sale shall be deemed to be a "country shipper", and the country shipping point shall be deemed to be the place where the particular citrus fruit has been prepared for shipment.

"Ultimate consumer" means a person who buys the kind of citrus fruit being priced for direct consumption. However, as used in this Appendix, the term does not include a commercial, industrial, institutional user or government procurement agency.

(2) *Sales by country shippers or growers through brokers, shippers' sales agents, commission merchants or terminal auctions.* (i) For sales of citrus fruits by growers or country shippers in carlots or trucklots through a broker, shipper's sales agent or commission merchant, or in less-than-carlots or less-than-trucklots through a broker or shipper's sales agent, the maximum price in each case is the maximum price, f. o. b. country shipping point, or the maximum delivered price (see Column 6 of the applicable table in paragraph (c)), as the case may be, for the kind of citrus fruit being priced, as named in the applicable table in paragraph (c), plus the actual commission or fee charged for the particular sale (not to exceed the maximum allowable commission or fee which such selling agent may charge under Maximum Price Regulation No. 165 [3]) or the markup shown in Column 4 of the table in paragraph (d), whichever is lower.

"Broker" or "shipper's sales agent" means a person other than a commission merchant or a salaried representative of a grower or country shipper who, for a commission or fee, sells the kind of citrus fruit being priced on behalf of his principal, without packing any part of the particular citrus fruits sold.

"Commission merchant" means a seller's agent who receives the kind of citrus fruit being priced and who, for a commission or fee, sells it in any quantity in a terminal market or other wholesale receiving point, and who, in the case of less-than-carlot and less-than-trucklot sales, performs the wholesale functions of unloading the fruit from the car or truck in which it is received.

[3] 8 F.R. 14990.

"Commission" or "fee" means the charge made by an agent for services performed in connection with the sale of citrus fruits. No amount which the agent pays over to his principal shall be considered part of his fee or commission.

(ii) For sales by growers or country shippers through a commission merchant in less-than-carlots or less-than-trucklots, the maximum price in each case is the maximum delivered price for the kind of citrus fruit being priced, as named in Column 6 of the applicable table in paragraph (c), plus the actual commission or fee charged for the particular sale (not to exceed the maximum allowable commission or fee which such selling agent may charge under Maximum Price Regulation No. 165) or the applicable markup (for ex car or ex store sales, as the case may be, named in Columns 6 and 7 of the table in paragraph (d)), whichever is lower. (For deliveries made in conveyances owned by the seller, see paragraph (iv), below.)

For example: Assume that the maximum price for a carlot of oranges in standard boxes delivered in a particular market is $4.50 per box. Assume the commission merchant is selling ex store, and that his actual fee (and his maximum fee under MPR 165) is 7% of the selling price, or 34¢ per box. The maximum markup for sales by commission merchants (ex store) in Column 7 of the table in paragraph (d) is 45¢ per box. The maximum price for sales through the commission merchant is therefore $4.50 plus 34¢, or $4.84 per box.

(iii) The maximum price in each case for sales by growers or country shippers through a terminal auction is the maximum delivered price named in Column 6 of the applicable table in paragraph (c), plus (1) the respective actual commissions or fees charged for the particular sale (not to exceed the maximum allowable commission or fee which the agent of the auction seller and which the auction company may charge under Maximum Price Regulation No. 165) or the markup named in Column 5 of the table in paragraph (d), whichever is lower, plus (2) any actual unloading charges in the terminal market.

"Terminal auction" means a place where, on the basis of competitive bidding open to any person who has established credit with the auction company or pays cash, the citrus fruit being priced is sold in less-than-carlots or less-than-trucklots, by persons operating through a licensed sales organization, known as an "auction company", for whose services a fee is charged.

(iv) For sales by growers or country shippers delivered from the country shipping point in conveyances owned by the seller to government procurement agencies, to institutional buyers or to retail stores where resale is made to ultimate consumers, the maximum price, in each case, is the price for the kind of citrus fruit being priced, as named in Column 7 of the applicable table in paragraph (c). (For deliveries made in conveyances not owned by the seller, see paragraphs (i), (ii) and (iii) above.) For sales by growers or country shippers to ultimate consumers, the maximum price is the price for the kind of citrus fruit being priced, as named in Column 7 of the applicable table in paragraph (c) multiplied by 1.33.

(f) *Maximum prices for sales by persons other than growers or country shippers.* (1) If any person other than a grower or country shipper purchases and resells in unbroken carlots or unbroken trucklots, the maximum price in each case is the maximum price f. o. b. country shipping point, or the maximum delivered price named in Column 6 of the applicable table in paragraph (c), plus the markup named in Column 8 of the table in paragraph (d).

(2) *Sales by carlot or trucklot receivers in less-than-carlots or less-than-trucklots.* (i) For sales ex car, ex truck, ex dock, or ex terminal sales platform, at a terminal market or any wholesale receiving point the maximum price shall be the maximum delivered price (see Column 6 of the applicable table in paragraph (c)) plus the markup named in Column 9 of the table in paragraph (d) for such sales.

(ii) If a carlot or trucklot receiver breaks a car or truck, unloads into a store or warehouse owned or leased in whole or part by him, and makes sales ex store or ex warehouse, the maximum price in these sales shall be the maximum delivered price (see Column 6 of the applicable table in paragraph (c)) plus the markup named in Column 10 of the table in paragraph (d) for ex store or ex warehouse sales. This price does not include delivery charges. If the carlot or trucklot receiver makes delivery, he may also add the amount which the appropriate regional or district office determines to be applicable to deliveries in these cases (see paragraph (g)).

(iii) If a carlot or trucklot receiver makes a delivered sale to the premises of a purchaser, within the free delivery zone, without first unloading into a store or warehouse owned or leased by him, the maximum price shall be the maximum price for ex car, ex truck, ex dock, or ex terminal sales platform sales plus the amount which the appropriate regional or district office determines to be applicable to such sales (see paragraph (g)).

(3) *Sales through terminal auctions.* (i) The maximum price in each case for sales by persons other than growers and country shippers through a terminal auction is the maximum delivered price, as named in Column 6 of the applicable table in paragraph (c), plus the markup named in Column 9 of the table in paragraph (d). All charges incurred in the making of the sale are included in the named markup, and shall not be added to it.

(ii) "Carlot receiver" or "trucklot receiver" means a person who for his own account and profit buys the citrus fruit being priced in unbroken carlots or unbroken trucklots for resale, in less-than-carlots or less-than-trucklots, to persons other than ultimate consumers. For sales of citrus fruits in unbroken carlots or unbroken trucklots, the seller shall not be considered a carlot or trucklot receiver.

(4) *Sales by secondary jobbers.* (i) The maximum price in each case for sales by secondary jobbers on a delivered basis is the maximum delivered price named in Column 6 of the applicable table in paragraph (c) plus the markup named in Column 11 of the table in paragraph (d). "Delivered" means delivered to the buyer's premises within the free delivery zone and, in the case of retailers, delivered to the retail store.

(ii) The maximum price in each case for sales by secondary jobbers not on a delivered basis is the maximum price for sales on a delivered basis less five cents per container for containers under 50 pounds (gross weight) and ten cents per container for containers 50 pounds or more (gross weight), except as these amounts may be changed by the appropriate regional or district office (see paragraph (g)).

(iii) "Secondary jobber" means a person other than a retailer who for his own account and profit purchases the kind of citrus fruit being priced in less-than-carlots or less-than-trucklots and resells it in any quantities.

(5) *Sales by service wholesalers.* (i) The maximum price in each case for sales by service wholesalers on a delivered basis is the maximum delivered price named in Column 6 of the applicable table in paragraph (c) plus the markup named in Column 12 of the table in paragraph (d). "Delivered" means delivered to the buyer's premises within the free delivery zone and, in the case of retailers, delivered to the retail store.

(ii) A service wholesaler, when selling the kind of citrus fruit being priced on a delivered basis in quantities of one-half container or less, may add to the maximum delivered price for that kind of citrus fruit, as named in the applicable table in paragraph (c), the markup named in Column 13 of the table in paragraph (d), but only if he has first offered to sell to the buyer on a full-container basis. This paragraph applies only where the seller breaks the original container received by him and sells a quantity not in excess of half of the quantity in that container. The paragraph does not apply to sales of "half box bags", "half strap boxes", or other fractional units of a standard or legal container, received by the seller and sold unbroken in the form in which it was received.

(iii) The maximum price in each case for sales by service wholesalers not on a delivered basis is the maximum price for sales on a delivered basis less five cents per container for containers under 50 pounds (gross weight) and ten cents per container for containers 50 pounds or more (gross weight), except as these amounts may be changed by the appropriate regional or district office (see paragraph (g)).

(iv) "Service wholesaler" means a person who maintains a store or warehouse at which the kind of citrus fruit being priced is stored or warehoused, who receives the commodity at the premises of his store or warehouse, who maintains at such store or warehouse facilities for cold storage, sorting, repacking, and other handling of the fruit, who employs salesmen to call on the trade in the city or country points which he services, and who sells to retail stores, government procurement agencies or institutional buyers.

(v) The maximum price for sales by secondary jobbers or service wholesalers delivered to the premises of any purchaser located outside of the free delivery zone is the maximum delivered price named in Column 6 of the applicable table in paragraph (c) plus the markup named in Column 11 of the table in paragraph (d), plus the cost of transportation, beyond the free delivery zone, figured at the lowest common or contract carrier rate for available transportation, from the seller's place of business to the premises of the purchaser. The amount added for transportation shall not exceed 25 cents per cwt. for the first 25 miles beyond the free delivery zone and five cents per cwt. for each successive 25 miles, and the total amount may not exceed 50 cents per cwt., except as these amounts may be changed by the appropriate regional or district office (see paragraph (g)).

(g) *Adjustments by regional and district offices.* The authority delegated by sections 2 (a) and 2 (b) of this regulation to the regional and district offices does not apply to citrus fruits. For citrus fruits, the regional offices of the Office of Price Administration, and such district offices as they in turn may authorize, are authorized:

(1) To determine the limits of the free delivery zone at any wholesale receiving point located within its jurisdiction and to adjust upwards or downwards the allowances for sales by secondary jobbers and service wholesalers on a non-delivered basis and to adjust upwards or downwards the allowances for transportation beyond the free delivery zones, at the lowest rates for customary and generally available means of transportation.

(2) To determine and publish orders announcing the maximum amounts which carlot or trucklot receivers may add to their maximum prices for deliveries made within the free delivery zone at that wholesale receiving point, and to adjust upwards or downwards the maximum markups established for sales by carlot or trucklot receivers ex car, ex truck, ex dock, or ex terminal sales platform, or at auction. However, any upward adjustment that is made under this paragraph shall not exceed the maximum markup established for sales by carlot or trucklot receivers ex store or ex warehouse.

(h) *Record keeping and notification requirements.* Every sale by any person to intermediate sellers shall be accompanied by a notification in writing showing the date of the sale, the names and addresses of the seller and buyer, the quantity being sold and total price charged. When the total actual price includes brokerage, commission, freight, trucking, refrigeration, or any other charge or fee recognized by this Appendix, the notice shall also set forth the nature of such charges, where the giving of such information is not inconsistent with state law.

(i) *Weights.* (1) All weighing and packing of citrus fruits by growers and country shippers shall be done in accordance with customary weighing and packing practices and the requirements of the applicable State Agricultural Code.

(ii) The provisions of section 1 (f) (5) shall apply to those containers of citrus fruits whose maximum prices named in the applicable table in paragraph (c) are stated on a per pound basis.

This amendment shall become effective February 23, 1944, as to maximum prices, f. o. b. shipping point and March 9, 1944, as to all other maximum prices.

NOTE: For the purposes of determining the percentage of baked products baked by institutional users, Form R-1307 Supplement contains the question: "Of the total number of each of the following baked products that you served in December 1942 what percentage of each did you buy?" This question is intended for the purpose of determining the amount of baked goods which the institutional user himself baked on the assumption that all baked products served which he did not buy were products which he baked. For example, if an institutional user reported that he bought 35% of the baked products which he served, it is taken to indicate that he baked the remaining 65%.

In determining the percentage of all baked products that the user himself baked, the percentage of the total number of items that he baked in each of the 6 categories listed in the parentheses is to be found and the average of those percentages is considered to be the percentage of all baked products that he himself baked.

All sales under this subparagraph are made subject to the provisions of § 1364.467 (k), and for the purposes of this subparagraph (6) the term "fabricated veal carcass (War Shipping Administration Specifications)" shall be substituted for the term "wholesale cut" in § 1364.467 (k).

For purposes of this subparagraph (6), a sale of fabricated veal carcasses (War Shipping Administration Specifications) to any person authorized to make such purchase subject to the direction and control of the War Shipping Administration or to a licensed ship supplier for resale as ship stores, shall be deemed a sale to a purveyor of meals.

(7) Notwithstanding the provisions of § 1364.466 (a) (4), the War Shipping Administration or any person authorized by the War Shipping Administration to make purchases under its direction and control, is authorized to purchase and sell fabricated veal carcasses (War Shipping Administration Specifications).

(8) "Fabricated veal carcass, (War Shipping Administration Specifications)", means veal derived from calves of grades choice, good, commercial or utility and satisfying the specifications and requirements contained in War Shipping Administration Food Control Regulation No. 2. "Fabricated veal carcass (War Shipping Administration Specifications)", shall be graded in accordance with § 1364.411 (a) (1) and (2) of this regulation and no such fabricated veal carcass so graded shall be packed for sale and/or delivery to the War Shipping Administration or to any person authorized to make such purchase under the direction and control of the War Shipping Administration, or to a ship operator, except in the presence of an official United States inspector designated by the Food Distribution Administration, or other United States Government agency regularly performing grading and/or inspection service, who shall certify that the cutting, dressing, trimming and other fabrication, the grade, the weight and the other specifications of the War Shipping Administration and/or the Office of Price Administration have been complied with and that the legends affixed to the package by the seller are correct. Certification by the official United States inspector shall be made by affixing a stamp or sticker to the container, which stamp or sticker shall attest the accuracy of all representations appearing upon the container.

(9) For purposes of subparagraphs (6), (7) and (8), hereof, (i) a licensed ship supplier means any person who has been licensed by the War Food Administration under the provisions of Food Distribution Regulation No. 3, as amended, (issued October 8, 1943) to sell and/or deliver meats and other food products to ship operators. (ii) A "ship operator" means any person as defined in Food Distribution Regulation No. 3 who conducts "the business of vessels for the account of the United States under the general agency form of service agreement approved by the Administrator of the War Shipping Administration; or operating, as the owner or owner's agent, a vessel time chartered to the United States, represented by the Administrator of the War Shipping Administration; or operating a vessel, the services of which are employed by the United States, represented by the Administrator of the War Shipping Administration; which is owned, chartered, or operated by any allied or neutral country", or any other person conducting the business of vessels who is designated as a ship operator by the War Shipping Administration.

(10) The form in § 1364.531, Appendix F, is amended by the addition of column headings (6), (7) and (8), to the table designated "Direct Labor Costs in Production of Frozen Boneless Beef" under (b), all to read as follows:

PART 1381—SOFTWOOD LUMBER

[MPR 513]

YELLOW CYPRESS LUMBER

In the judgment of the Price Administrator, the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328. Such specifications and standards as are used in this regulation were, prior to such use, in general use in the industry. A statement of the considerations involved in the issuance of this regulation, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

SECTION 1. *Prices higher than maximum prohibited.* (a) On and after February 26, 1944, regardless of any contract or other obligation, no person shall sell or buy for direct-mill shipment, or deliver or receive on direct-mill shipment, any yellow cypress lumber at prices higher than the ceiling prices fixed by this regulation; and no person shall agree, offer or attempt to do any of these things.

(b) Prices lower than maximum may, of course, be charged and paid.

SEC. 2. *To what products and transactions this regulation applies*—(a) *Products covered.* This regulation covers, under the term "yellow cypress lumber" all items of cypress lumber of all species (except tidewater red which is subject to Maximum Price Regulation 412[1]), whether the item is specifically named in the price tables or not.

(b) *What transactions are covered.* This regulation covers, under the term "sales for direct-mill shipment", all sales of yellow cypress lumber, no matter who the seller is, and regardless of the quantity involved, except sales of yellow cypress lumber which were part of the regular stock of a distribution yard at the time the sale was made.

(c) *How to tell a mill from a distribution yard.* The term "mill", as used here, covers what are known in the trade as sawmills, planing mills, and concentration yards. Three types of establishments are described below: The first, (1), a typical sawmill or planing mill; the second, (2) a typical concentration yard; and the third (3), a typical distribution yard. An establishment which resembles (1) or (2) more than it does (3) is considered a mill, and one which resembles (3) more than it does (1) or (2) is considered a distribution yard.

(1) "A typical sawmill or planing mill" is an establishment which is chiefly engaged in manufacturing lumber from logs or rough lumber by sawing or planing; which is located in or near a lumber producing area; which makes and sells yellow cypress lumber.

[1] 8 F.R. 8712, 12406.

(2) "A typical concentration yard" is an establishment which concentrates and prepares lumber for commercial shipment, which keeps in stock yellow cypress lumber, which has its lumber brought in chiefly in rough green form by truck from small local sawmills and sells chiefly for rail or full truckload shipment, and which has been located at its particular site to be near the lumber producing area.

(3) "A typical distribution yard" is a wholesale or retail lumber yard which gets lumber from mills or other yards; unloads, sorts, and resells or redistributes it; which regularly maintains a varied stock of lumber from different regions; which gets its lumber, except for local species, mostly by rail and sells mostly for truck shipment; which is equipped to make quick deliveries of many different items of lumber; and which has been located at its particular site in order to be near a lumber consuming area.

(4) *New yards or changed status.* In order to prevent violation of this regulation by unnecessary routing through yards, the Office of Price Administration will not recognize distribution yards, either new or resulting from a change in operations, set up after December 31, 1942, unless the yard writes to the Lumber Branch of the Office of Price Administration, Washington, D. C. and proves that it satisfies the requirements of the definition and that the purpose is not to get around this regulation by means of unnecessary yard business. Until approval is received, the new yard cannot consider itself a distribution yard for the purpose of this regulation.

(5) *"CPA contract yards".* "CPA yards", as defined in Second Revised Maximum Price Regulation 215,[2] are considered distribution yards, regardless of the above requirements.

SEC. 3. *Basic prices.* The maximum f. o. b. mill prices for yellow cypress lumber are set forth in the price tables in section 18.

SEC. 4. *Cash discount.* If cash is paid the maximum price must be reduced by the seller's August 1941 cash discount. When a seller was not in business in August 1941, 2 percent cash discount for payment in 10 days shall be allowed. On specific written allocations issued by the Office of Chief of Engineers, War Department, the terms 30 days net may be used by the seller regardless of his established practice.

SEC. 5. *Deduction on sales of rough lumber by certain mills.* In sales of all items of yellow cypress lumber in rough form, except timbers, where shipment originates at a sawmill which has no planing mill or which customarily sells the yellow cypress lumber produced by it in rough form, the maximum prices set forth in the price tables of this regulation:

(a) Shall include delivery within a radius of 30 miles, or

(b) Shall be reduced $2.50 per M'BM where the purchaser himself makes the pick-up at the mill, or

[2] 8 F.R. 14145; 9 F.R. 221.

(c) Shall be reduced $2.50 per M'BM before making the transportation additions provided in section 8 where the seller makes delivery over 30 miles.

SEC. 6. *Addition for direct-mill retail sales.* An addition of $3.50 per thousand board feet may be made by a mill or concentration yard on a sale of 2,000 feet board measure or less only within a radius of 25 miles of the seller's establishment to any consumer or buyer who does not purchase for resale, where the shipment originates at a mill.

SEC. 7 *Lumber not graded by seller.* If the seller himself does not specify the exact grades and items contained in a shipment, and furnish an invoice showing the exact footage of each grade and item sold, based on his own measurement and inspection, the maximum price is either:

(a) 10% below the maximum prices for the grades shown in the buyer's inspection; or

(b) the maximum price for the lowest priced grade in the shipment.

In both cases, the seller must furnish free delivery to the buyer's yard, plant, or other destination, up to a distance of 30 miles. Or if the buyer makes the pick-up at the mill, the maximum price must be reduced $2.50 to compensate for non-delivery. If delivery is made over 30 miles, the regular transportation additions permitted by Section 8 must be reduced by $2.50 per M'BM.

Note that these deductions apply regardless of who the purchaser is. The mill cannot sell to the box plant or the retail yard for more than he can to the concentrator, or vice versa.

SEC. 8. *Transportation charges*—(a) *Rail charges.* (1) Only two methods of selling are recognized by this regulation. Any other method is prohibited, as a device to evade the ceiling by manipulation of freight.

The two permitted methods are: on a delivered basis using the estimated weights in section 19 or on an f. o. b. mill basis with actual freight (figured, of course, on actual weights) to be paid by the purchaser.

The two methods may not be combined in a single transaction; that is, a seller may not sell on a basis which gives him the benefit of favorable estimated weights but requires the use of actual weights on items where estimated weights would be unfavorable to him.

(2) The estimated green weights may be used only when green lumber is actually specified and shipped.

(3) The transportation charge, when estimated weights are used, must be evened out to the nearest quarter-dollar per M'BM (or nearest 5 cents per 1,000 pieces of lath).

(b) *Common or contract carrier (other than rail).* Where transportation is by common or contract carrier (other than rail) the only rule is that actual cost of transportation may be added to the f. o. b. mill ceiling.

(c) *Private truck.* When shipment is by truck owned or controlled by the seller, the following amounts may be added for transportation: For distances up to and including 10 miles, $1.50 per M'BM, over 10 and up to and including 20 miles, $2.00 per M'BM and over 20 and up to and including 30 miles, $2.50 per M'BM. Where the distance is greater than 30 miles, the seller may charge the amount of the railroad charge at the carload rate for the most similar haul or $3.00 per M'BM, whichever is greater. Distance, as used in this paragraph, means the distance from the mill to the point of destination as measured by the speedometer. No addition may be made for the return trip.

(d) *Truck delivery after rail haul.* When truck delivery to yard or job site follows a rail haul, and is specified in the order, the actual cost of truck delivery may be added. This may include the actual cost of handling and reloading involved in transfer from rail cars to trucks.

(e) *All-truck haul.* When an all-truck haul ends in delivery to the job site, no special addition may be made above the charges provided in paragraphs (b) and (c) of this section.

SEC. 9. *Grades, services and extras not specifically priced*—(a) *Conditions.* If a seller wishes to sell a grade which is not specifically priced in the price tables, or wishes to make an addition for special workings, specifications, services, or other extras for which additions are not specifically permitted, he must apply to the Lumber Branch, Office of Price Administration, Washington, D. C., for a maximum price. He must provide the following information:

(1) The requested price;

(2) A complete description of the item to be priced;

(3) The price differential between it and the most comparable item in the price tables, between January 1 and August 1, 1941, from the seller's own records or if that is impossible, from the experience of the trade. If no established price differential existed, a detailed analysis of comparative value should be furnished.

(4) A true copy of the order or of customer's inquiry on the basis of which the application has been submitted.

(5) A statement by the purchaser that none of the items specifically priced in the regulation will serve the purpose for which the stock is intended to be used, which purpose is to be stated; and that it has been his custom to purchase lumber on this special specification.

(b) *Approval.* In each case where a special price is approved, an authorization number will be assigned which must appear on all final invoices covering shipments at the special price. Quotations and deliveries may not be made at the requested price until the price has been approved. Action on the request may be made by letter or telegram.

(c) *Cancellation.* A special price will be cancelled whenever it is found that the grounds on which the price was granted do not exist, or that lumber shipped on the special price is not up to specification, or that the special price or a class of special prices is endangering the general level of prices of yellow cypress lumber.

SEC. 10. *What the invoice must contain*—(a) *Price.* All invoices must contain a sufficiently complete description of the lumber to show whether the price is proper or not. Any working, specification, or extra which affects the maximum f. o. b. mill or delivered prices must be mentioned in the description. The amount added for these does not have to be separately shown.

(b) *Charges for transportation.* In all delivered sales, the invoice must contain the:

(1) Point of origin of shipment;

(2) Destination;

(3) Rail rate, if estimated weights are used; otherwise the actual amount added for transportation;

(4) The words "Direct-mill shipment."

(c) *Delivery and related charges.* Any separate charge which the seller is permitted to make for truck delivery after rail haul must be separately shown on the invoice.

(d) *Direct-mill retail sale.* If the "direct-mill retail sale" mark-up is permissible and is added, this must be separately indicated in the invoice.

SEC. 11. *Exports.* The maximum prices on export sales of yellow cypress lumber are governed by the Second Revised Maximum Export Price Regulation.*

SEC. 12. *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of shipment; but no person may deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after shipment.

SEC. 13. *Prohibited practices*—(a) *General.* Any practice which is a device to get the effect of a higher than ceiling price without actually raising the dollars-and-cents price is as much a violation of this regulation as an outright over-ceiling price.

(b) *Specific practices.* The following are some of the specific practices prohibited:

(1) Getting the effect of a higher price by changing credit practices from what they were in August 1941. This includes decreasing credit periods or making greater charges for extension of credit. In any case, on sales made through the Office of the Chief of Engineers, War Department, terms of 30 days net may be used.

(2) Refusing to ship except in specified or restricted random lengths, or under other circumstances which bring the seller an extra return.

(3) Selling as specified lengths or widths a shipment of lumber which is substantially equivalent to standard or random lengths or widths; or reselling as specified lengths or widths a shipment bought by the seller as standard or random lengths or widths.

[3] 8 F.R. 4132, 5987, 7662, 9998, 15193.

(4) Grading as a special grade lumber which can be graded as a standard grade or wrongly or falsely grading or invoicing lumber in any way.

(5) Making additions for special specifications, services, or other extras which are not specifically permitted.

(6) Refusing to sell on an f. o. b. mill basis, and insisting on selling on a delivered basis.

(7) Unnecessarily routing lumber through a distribution yard.

(8) Quoting a gross price above the maximum price, even if accompanied by a discount the effect of which is to bring the net price below the maximum.

(9) Making the buyer take something he does not want in order to get what he does want.

(10) Getting a higher price by charging the buyer for ripping or resawing, or charging on the basis of an original size larger than the item actually delivered (for example, charging the price of 4 x 4 ripped to 2 x 4 on a sale and delivery of 2 x 4's) except where the items ordered and delivered are non-standard sizes not specifically priced in the tables. This prohibition has no application where the item resulting from remanufacture is priced higher in the tables than the original larger size.

(11) Making any of the additions contained in the footnotes to the tables in section 18 to the prices of the various items set forth in the tables unless the purchaser's order expressly requires the working, grade, condition, size, or length for which the additions are permitted.

(12) Making an addition for double end trimming when standard lengths are ordered and shipped.

(c) *Adding commission to ceiling prohibited.* It is unlawful for any person to charge, receive, or pay a commission for the service of procuring (including buying, selling or locating lumber, or for any related service such as "expediting") which does not involve actual physical handling of lumber, if the commission plus the purchase price results in a total payment by the buyer which is higher than the maximum price of the lumber. For purposes of this regulation, a commission is any compensation, however designated, which is paid for the procurement of lumber. This prohibition has no application to the case of a bona fide employer-employee relationship where the employee serves only one employer, in so far as lumber procurement is concerned, and where the compensation paid by the employer is a fixed salary and is not based directly or indirectly on the quantity, price or value of the lumber in connection with which the service is rendered.

SEC. 14. *Applications for adjustment and petitions for amendment*—(a) *Government contracts.* (See Procedural Regulation No. 6 [4]).

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1 [5], issued by the Office of Price Administration.

(c) In treating with petitions for amendment or applications for adjustment, consideration will not be given to log and bolt costs which are higher than the applicable maximum purchase prices for logs and bolts established in Maximum Price Regulation 348,[6] Logs and Bolts, or any revision or amendment of that regulation. This rule shall be followed regardless of whether the petitioner gets logs and bolts by purchasing them, logging his own standing timber, contracting for the logging of his own standing timber, or any other means. All petitions in any way based on the cost of logs or bolts must show the actual cost to the petitioner of logs and bolts received at his plant during the three months immediately prior to filing the petition, and the cost which would have been incurred by the petitioner if all of these logs and bolts had been purchased by him at ceiling prices. To figure these ceiling prices the petitioner should refer to the regulation which fixes the maximum prices for purchases and sales of the kinds of logs and bolts received at his plant.

SEC. 15. *Records.* All sellers of yellow cypress lumber must keep, for two years, records which show a compete description of the items of lumber sold, the name and address of the buyer, the date of the sale and the price. Buyers must keep similar records, including the name and address of the seller. These records must be kept for any month in which the seller or buyer sold or bought 5,000 feet board measure or more of yellow cypress lumber.

SEC. 16. *Enforcement.* Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for suspension of licenses provided for by the Emergency Price Control Act of 1942, as Amended.

SEC. 17. *Licensing.* The provisions of Licensing Order No. 1,[7] licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license, or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

SEC. 18. *Price tables.* The maximum prices for yellow cypress lumber, f. o. b. mill per 1,000 feet board measure (or per 1,000 pieces of lath) shall be as follows:

For working:
1. S1S, S2S, add $3.00.
2. S3S, S4S, S1S1E, S2S & M, shiplap, grooved roofing, add $4.50.
3. Casing, base, jambs, sill stock, casket moulding or any other pattern stock, (except moulding), add $6.00. For lots of less than 1,000 feet board measure any pattern (except moulding), add a flat $5.00 machine set up charge.

For grade:
4. Heart face selects, add to selects, $5.00 for 4/4 and 5/4; $14.00 for 6/4; $23.00 for 8/4 and thicker.
5. No. 2 shop, all thicknesses, deduct $10.00, from No. 1 shop prices.

For size:
6. For any average width, charge the specified width prices for the widths shipped.
7. Extra standard thickness or width other than American Lumber Standards, add $1.50 when stock is dressed clean. No addition may be made for extra standard thickness or width, hit or miss dressing.

For length:
8. For precision cutting to a specified exact length, with tolerance of not more than ¼" allowed, add $1.50. No addition is permitted for customary double end trimming.
9. For any specified average length, except odd lengths, 16' or longer, charge the specified length prices for the lengths shipped.
10. Specified lengths, add to Standard length prices:

	16'	18'	20'
4/4, 5/4, 6/4, 8/4, all grades (except box)	$5.00	$7.50	$10.00

Box, all thicknesses	3.00	3.00	5.00

11. Any length 6' or shorter, cut to a specified exact length, all grades (except No. 1 Shop and Box) charge the Standard length price and add $1.50 for each necessary cross cut, but the total charge may not exceed 26.00 and must be based on the nearest Standard multiple length. No additional charge may be made for precision cutting. If length breaks on even one half foot, compute footage on actual length, otherwise compute on 6" breaks, on the next break above. This footnote covers lengths under 6' in No. 1 Shop and under 4' in Box.
12. No additional charge may be made when 18' and 20' are excluded from standard lengths, either at request of buyer or through inability of seller to supply.

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation 136, as amended, is amended in the following respects:

1. Section 1390.15 is amended to read as follows:

§ 1390.15 *Emergency service charges.* Notwithstanding any other provision of this regulation, any manufacturer or machinery service supplier may add to the maximum price for a machine or part or machinery service the extra material cost resulting from his purchasing materials (not including parts and subassemblies), in an emergency and at the request of the customer, from a source more expensive than the current usual source. Also, any manufacturer, other seller, lessor or machinery service supplier may add to the maximum price for a machine or part or a machinery service his extra transportation cost resulting from his shipping the machine or part or materials used in the production of the machine or part or the supplying of the machinery service, in an emergency and at the request of the customer, by means more expensive than the current usual method of shipping. No markup, overhead or profit shall be applied to the extra material or transportation cost. (ii) *Definitions.* When used in this paragraph, the term:

24. Section 1394.7904 (a) is amended to read as follows:

(a) *General rules for issuance.* The Board shall determine the amount of gasoline required for the three- or six-month period referred to in § 1394.7903 (b), and, subject to the provisions of paragraphs (b), (c) and (d) of this section, shall issue to the applicant a sufficient number of Class E or R coupons to enable the applicant to acquire the amount of gasoline determined by the Board to be necessary for such period, subject to the following provisions:

(1) The Board may refuse to issue such ration for the operation of machinery or equipment, other than boats or airplanes, used for athletic, recreational or amusement purposes, if in its opinion, taking into consideration the gasoline supply available, the use of gasoline for such purposes is not essential to the welfare of the area which it serves.

(2) If the ration is issued in the form of a ration book or books, the Board shall remove from the book or books and cancel any coupons in excess of the number allotted.

(3) If the ration is issued in the form of strip coupons, coupons of the same class must bear serial numbers in consecutive order. The Board shall issue a folder for each class of coupons issued and shall note on the folder the serial numbers of the coupons issued, the date of issuance, the earliest renewal date, the name and address of the applicant and the non-highway purpose or purposes for which the ration is issued.

(4) If the ration is issued for use in connection with farming, the Board shall issue appropriate ration evidences sufficient to provide either a part of the amount of gasoline determined for the six-month period or the total amount. If the Board has issued ration evidences sufficient to provide only part of the gasoline determined, it shall issue, upon the request of the applicant, additional ration evidences in an amount not to exceed the remainder of the ration originally determined or such portion of such remainder as the Board determines the applicant requires for the balance of the ration period.

25. Section 1394.7904 (b) is amended by inserting a headnote to read as follows: *"Allowance of a non-highway ration for use with a boat for a non-occupational purpose."*

26. Section 1394.7904 (b) (2) is amended by substituting for the second sentence the following two sentences:

The Board shall, in such a case, issue coupons in a separate ration book, or coupons bearing serial numbers in consecutive order and accompanied by a separate folder in sufficient number to provide the quantity of gasoline so determined. The Board shall note on such ration book or folder, in addition to the usual information required, that the coupons are issued for a non-occupational purpose.

27. Section 1394.7904 (c) is amended by inserting the following headnote: *"Allowance of non-highway ration for operation of a gasoline engine."*

28. Section 1394.7904 (d) is amended to read as follows:

(d) *Limitation on issuance of non-occupational ration.* Except as provided in § 1394.8102 (f) (1), no non-occupational ration may be issued for an inboard motorboat or an outboard motor during any three or six-month period for which such a ration has already been issued.

29. Section 1394.8004 (b) (4) is added to read as follows:

(4) If the ration is issued in coupons in strip form, the serial numbers of the coupons issued.

30. Section 1394.8004 (c) is amended to read as follows:

(c) *Notations by Board on non-highway rations.* At the time of issuance of any non-highway ration represented by coupons, the Board shall make a notation on the cover of the ration book or folder of the name and address of the applicant, the date on which the ration becomes valid for use and the earliest renewal date. If serially numbered coupons are issued, the Board shall also note on the folder the numbers of the coupons.

31. Section 1394.8153 (b) is amended to read as follows:

(b) *Coupons issued for non-highway rations.* Bulk transfer may be made in exchange for Class E and R coupons under the following conditions:

(1) (i) In the case of a coupon issued in a ration book, the transferor at the time of transfer, must require presentation of the book and must detach therefrom coupons having an aggregate unit value equal to the number of gallons of gasoline transferred. No transfer may be made pursuant to this subparagraph in exchange for a coupon detached prior to the presentation of the coupon book to the transferor.

(ii) In the case of serially numbered coupons issued in strips in connection with an identifying folder, the transferor must require presentation of the coupons and identifying folder at the time of transfer. No transfer may be made pursuant to this subparagraph in exchange for a coupon which does not bear a serial number included in the sequence of serial numbers specified on the cover of the identifying folder.

(2) No transfer in exchange for Class E or R coupons may be made into the fuel tank of, or knowingly made for use in, a registered motor vehicle, commercial motor vehicle, or a motor vehicle held by a motor vehicle dealer for sale or resale or operated on dealer or other interchangeable plates, nor shall any such transfer be made into, or knowingly made for use in, the fuel supply tank of machinery or equipment mounted on a commercial motor vehicle.

(3) Transfer may be made only in exchange for coupons bearing the notations required by § 1394.8004 (e).

This amendment shall become effective the 25th day of February 1944.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

MISCELLANEOUS AMENDMENTS TO CHAPTER

PART 2—ADJUDICATION: VETERANS' CLAIMS

Filing of Claims and Supporting Evidence

§ 2.1026 *Application for benefits.* (a) A properly completed and executed Form 526, 526a or 526b, upon receipt by the Veterans' Administration, constitutes an application for benefits indicated below and will be adjudicated under the applicable laws:

Form 526: Veteran's application for Pension or Compensation for Disability Resulting from Service in the Active Military or Naval Forces of the United States.

Form 526a: Application for Compensation or Pension under Section 31, Public No. 141, 73d Congress, section 12, Public No. 866, 76th Congress, and section 2, paragraph 4, Public No. 16, 78th Congress.

Form 526b: Veteran's Application for Pension for Disability not the Result of Service in the Active Military or Naval Service of the United States.

(b) Applications for compensation, pension, or burial allowance shall be sworn to before a court of record, or some officer thereof having custody of its seal, or before some officer who has authority to administer oaths for general purposes, or employees of the Veterans' Administration to whom authority to administer oaths has been properly delegated, or, if the person is in the active service at the time of making application, before an officer duly authorized by the Army, Navy, Marine Corps, or Coast Guard to administer oaths for the purposes of military or naval administration. In connection with the execution of applications in foreign countries, see § 2.1032. (February 21, 1944) (54 Stat. 1197, 57 Stat. 44, 554–560; 38 U.S.C. 501a)

§ 2.1027 *Informal claims.* Any communication from or action by a claimant or his duly authorized representative, which clearly indicates an intent to apply for benefits under Publics No. 2, No. 141, No. 484, 73d Congress, as amended, or Public No. 196, 76th Congress, as amended by sections 7 and 8, Public No. 866, 76th Congress, may be considered an informal claim for compensation or pension, or an informal claim under section 31, Public No. 141, 73d Congress, as amended by section 12, Public No. 866, 76th Congress. When an informal claim is received and a formal application is forwarded for execution by the claimant, such application shall be considered as evidence necessary to complete the initial application, and unless a formal application is received within one year from the date it was transmitted for execution by the claimant, no award shall be made by virtue of such informal claim. If received within one year in such instances, it will be considered filed as of the date of receipt of the informal claim by the Veterans' Administration. However, a communication received from a service organization, pension attorney, or pension agent may not be accepted as an informal claim, if a power of attorney was not executed at the time the communication was written. In cases not covered by this rule, where the probability of an informal claim appears to be indicated, but the facts are too obscure or complicated for determination, the file will be referred to the director of the service concerned for decision upon the facts in the particular case. When benefits are being resumed under § 3.1299, and an informal claim has been filed for a disability incurred or aggravated in the second period of service, the requirements of the second and third sentences of this paragraph are not for application. (February 21, 1944) (54 Stat. 1196, 1197, 57 Stat. 554–560; 38 U.S.C. 501a, 703b)

Determinations as to Basic Entitlement

§ 2.1066 *"Line of duty" under §§ 35.011 and 35.012.* (a) Sections 35.011 and 35.012 require that a disabling condition for which pension or compensation is claimed, shall have been incurred in line of duty, except in cases where a right to pension or compensation is preserved by § 35.04. The records of service departments will be accepted in determining line of duty status of diseases and injuries, unless considerations set forth in § 35.10 (h) may warrant a different finding. Any evidence which is properly admissible or acceptable according to the practice of the Veterans' Administration, and which is of a nature competent to demonstrate that the incurrence of disability was or was not in line of duty, according to conditions specified in § 35.10 (h) may be used as a basis for adjudications, despite any official military or naval record with respect to manner of incurrence. These determinations will be made by the officials of the Veterans' Administration charged with the responsibility of deciding claims for monetary or other benefits in the administration of laws in which line of duty is a factor. Such determinations will be final, subject to appeal procedure, except when the determination of the service department with respect to line of duty in the case of a living or deceased veteran is not concurred in by those having the foregoing responsibility and the file shows that the service department's determination was approved personally by the Secretary of the Navy, Secretary of War, or by the Secretary of the Treasury. Generally, for purposes of naval administration the only cases involving line of duty of personnel of the Navy or Marine Corps that are required to be referred to the Secretary of the Navy for his personal determination are those pertaining to the retirement of officers of the Navy and Marine Corps and the reserve components of these services; there is no procedure in the War Department by which line of duty determinations are normally brought to the personal attention of the Secretary of War, but in the exceptional case calling for his personal action, the record will reveal it. Such excepted cases, in which the line of duty determination has in fact been personally approved by any one of the Department Secretaries named as unmistakably shown by the context of the record, will be forwarded to the director of the service concerned together with a full statement of the reasons why the line of duty decision as made by the Department Secretary should not be accepted. If the decision of the Department Secretary is concurred in by the director of the service concerned the case will be returned to the agency of original jurisdiction for adjudication accordingly. But if such determination is not concurred in, the case will be forwarded to the assistant administrator. If the assistant administrator concurs in the Department's de-

termination the file will be returned to the office having jurisdiction for adjudication accordingly. But if he does not concur the case will be referred to the Administrator for his determination. Whenever a decision is rendered by the board of veterans appeals in which that board does not concur in the decision as to line of duty approved personally by the Secretary of War, Navy or Treasury, such decision will be referred to the Administrator for his determination. For the purpose of ascertaining line of duty status for periods of time prior to June 16, 1938, continuous periods of leave will be considered as one extended leave in determining whether a leave of absence is of such duration as to interfere materially with the routine performance of duty. The provisions of § 35.10 (h) will be observed carefully in effecting all adjudication where a question of incurrence of disease or injury in line of duty is pertinent: *Provided*, That on or after June 16, 1938, the date of approval of Public No. 648, 75th Congress, the fact that the injury was suffered or the disease was contracted while the person on whose account benefits are claimed was on authorized leave (irrespective of the duration of such leave) will not of itself bar a finding that the disability or death resulting therefrom was incurred in line of duty. If the injury was suffered or the disease was contracted while the person who served was away from camp or his post of duty, the burden is upon the claimant to establish line of duty. If, however, the injury was suffered or the disease was contracted while the person who served was at camp or his post of duty, even though in a leave status, the burden is upon the Government to show that the disability or death resulting therefrom was not in line of duty.

(b) Whenever the veterans claims service, the dependents claim service, or the insurance service has made a determination of the question of line of duty status for the purpose of compensation, pension or insurance, under the provisions of § 2.1066 and § 4.2046, such determination shall be binding upon any of these services for any of the purposes mentioned, unless it be clearly and unmistakably in error. This determination shall not be subject to question by reason of a difference of opinion, except as to whether such determination is clearly and unmistakably erroneous, in which case such question shall be referred to the Administrator for his determination. (February 21, 1944) (48 Stat. 8, 9, 57 Stat. 554–560; 38 U.S.C. 701, 707)

PART 3—ADJUDICATION: DISALLOWANCE AND AWARDS

§ 3.1299 *Action where veteran returns to active duty status.* Compensation or pension may not be paid concurrently with the receipt of active service pay, and where any person in receipt of compensation or pension returns to active duty status with any of the armed forces of the United States, or active service in the United States Coast Guard, benefits will be suspended effective the day preceding reentrance. Payments may be resumed the day following release from active duty, provided the person is otherwise entitled. If a disability is incurred or aggravated in the second period of service, the benefits payable on account thereof cannot be paid unless a claim therefor is filed. (See § 2.1027.) The period of active service must be verified by Form 3101 series. (February 21, 1944) (48 Stat. 9, 57 Stat. 554–560; 38 U.S.C. 707)

PART 192—OIL AND GAS LEASES

EXTENSION OF FIVE-YEAR LEASES

§ 192.14e *Extension of five-year leases.* Pursuant to the Act of December 22, 1943 (57 Stat. 608), the term of any five-year lease expiring prior to December 31, 1944, maintained in accordance with the applicable statutory requirements and regulations and for which no preference right to a new lease is granted by the act of July 29, 1942 (56 Stat. 726), is extended to December 31, 1944.

Inasmuch as the statute requires that rentals must be paid annually in advance, no lease will be considered as extended under the provisions of the act until rentals are paid to and including December 31, 1944. Compliance must be made with all other statutory requirements and regulations.

The statement shall set forth the amount of each kind of explosives and ingredients of explosives which you had on hand at each location at the opening of business on the date of this order, the amount of each kind acquired by you that day and each day thereafter, the dates on which acquired, the names and addresses of the persons from whom acquired, the amount of each kind used by you, the dates on which used, the places where used, the amount of each kind sold or otherwise disposed of by you, the dates on which sold or otherwise disposed of, the names and addresses and the numbers and dates of Federal explosives licenses of the persons to whom sold or otherwise disposed of, the amount of each kind destroyed by you, the dates on which destroyed and the places where destroyed.

COLORADO-BIG THOMPSON PROJECT

REVOCATION OF FIRST FORM WITHDRAWAL

DECEMBER 31, 1943.

THE SECRETARY OF THE INTERIOR.

SIR: By departmental order of November 27, 1943, certain described lands in the State of Colorado previously withdrawn for reclamation purposes as provided by section 3 of the act of June 17, 1902 (32 Stat. 388), in connection with the Colorado-Big Thompson project, were released from reclamation withdrawal.

The aforementioned departmental order contains a typographical error in that the NW¼SE¼ of Section 14, Township 1 North, Range 74 West, Sixth Principal Meridian, Colorado, has been described as the NE¼SE¼ of said Section 14.

It is therefore recommended that this departmental order be amended, effective as of November 27, 1943, to correctly show this tract as the NW¼SE¼ Section 14, Township 1 North, Range 74 West, Sixth Principal Meridian, Colorado.

Respectfully,

H. W. BASHORE,
Commissioner.

I concur: February 3, 1944.

FRED W. JOHNSON,
Commissioner of the General Land Office.

The foregoing recommendation is hereby approved, as recommended, and the Commissioner of the General Land Office will cause the records of his office to be noted accordingly.

In the case of a dealer who sells directly to consumers from a truck or wagon, the posting shall be done on the truck or wagon. All postings shall include the relevant terms of sale. The prices established hereby need not be reported under § 1340.262 (c) of Revised Maximum Price Regulation No. 122.

This paragraph shall not apply to sales of quantities of less than one-quarter ton unless the dealer customarily gave such a statement on such sales.

(3) In the case of all other sales, every dealer who during December 1941, customarily gave buyers sales slips or receipts shall continue to do so. WEST TEXAS UTILITIES CO. AND PECOS VALLEY POWER & LIGHT CO.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 16th day of February, A. D. 1944.

Notice is hereby given that a joint declaration or application (or both) has been filed with this Commission by West Texas Utilities Company (West Texas) and Pecos Valley Power & Light Company (Pecos Valley), indirect subsidiaries of The Middle West Corporation, a registered holding company, pursuant to sections 9 (a) (1), 10 and 11 (e) of the Public Utility Holding Company Act of 1935 and Rule U-43 promulgated thereunder.

All interested persons are referred to said declaration or application which is on file in the office of this Commission, for a statement of the transactions therein proposed, which are summarized as follows:

Pursuant to an Opinion and Order of this Commission issued on January 25, 1943 (Holding Company Act Release No. 4068), West Texas was permitted (as a step toward acquisition of property and assets of Pecos Valley) to offer to purchase all outstanding securities of Pecos Valley as follows:

1. First Mortgage Bonds held by the public in the principal amount of $963,000 at 76% thereof.
2. Income Debentures held by the public in the principal amount of $358,000 at 15% thereof.
3. Common stock held by the public in the amount of 3,582.66 shares at $1 per share.
4. First Mortgage Bonds in the principal amount of $313,000, Income Debentures in the principal amount of $369,500 and common stock in the amount of 3,892.34 shares, all held by The Middle West Corporation for the sum of $238,349.11 (equal to 76% of the principal amount of the bonds held plus $496.11 transfer tax applicable to the debentures and common stock being transferred).

Pursuant to such order, West Texas has acquired (as of January 31, 1944) all outstanding securities of Pecos Valley except the following securities held by the public:

$26,500 (2.08%) principal amount of First Mortgage Bonds.
$14,250 (1.96%) principal amount of Income Debentures.
286.511 shares (3.83%) of Common Stock.

West Texas now proposes to acquire at public or private sale all the assets and property of Pecos Valley at a price equal to

(a) The face amount of the net free assets of Pecos Valley and
(b) $637,860 for property which is subject to an existing mortgage (less depreciation on such property computed at the rate of 3% per annum from January 1, 1943, and less any moneys resulting from sales of property subject to such mortgage, deposited with The New York Trust Company, Trustee under said mortgage subsequent to January 1, 1943).

It is estimated that as a result of payment of said proposed price, the remaining public security holders of Pecos Valley will receive the following amounts (equal to amount permitted to be offered by said Order of January 25, 1943): bondholders 76% and debenture holders 15% of the principal amount of securities held, and stockholders $1 for each share held.

It appearing to this Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to said matters and that said application or declaration shall not be granted or permitted to become effective except pursuant to further order of this Commission, *It is ordered*, That a hearing on said matters under the applicable provisions of said act and the Rules of this Commission thereunder be held on March 6, 1944, at 10:00 a. m., e. w. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania. On such date the hearing room clerk in Room 318 will advise as to the room in which said hearing will be held;

It is further ordered, That the Secretary of this Commission shall serve notice of said hearing by mailing a copy of this order to West Texas Utilities Company and Pecos Valley Power & Light Company and that said notice of said hearing be given to all persons by publication of a copy of this order in the FEDERAL REGISTER. It is further ordered, That Willis E. Monty or any other officer or officers of this Commission designated by it for that purpose shall preside at such hearing. The officer so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a trial examiner under the Commission's Rules of Practice.

It is further ordered, That without limiting the scope of the issues presented by said application or declaration, particular attention will be directed at the hearing to the following matters and questions:

1. Whether the proposed transactions are in the public interest or in the interest of investors and consumers and whether in all respects the proposed transactions comply with all the applicable provisions and requirements of the Public Utility Holding Company Act of 1935 and the Rules, Regulations and Orders promulgated thereunder;

2. Whether, and to what extent it is necessary or appropriate in the public interest to impose terms or conditions in regard to the accounts of West Texas Utilities Company, or otherwise in regard to the proposed transactions.

CONSOLIDATED ELECTRIC AND GAS CO. AND CENTRAL ILLINOIS ELECTRIC AND GAS CO.

SUPPLEMENTAL ORDER APPROVING PLAN

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 18th day of February 1944.

Consolidated Electric and Gas Company, a registered holding company, and its subsidiary, Central Illinois Electric and Gas Co., having heretofore filed applications and declarations pursuant to the applicable sections of the Public Utility Holding Company Act of 1935, regarding the proposed reclassification of the common stock of said subsidiary company (all of which stock is owned by the parent company) and certain intercompany transactions incident to the consummation of such reclassification, which applications and declarations were, respectively, granted and permitted to become effective by order entered herein on February 4, 1944;

Consolidated Electric and Gas Company having also filed a plan pursuant to section 11 (e) of the act whereby it proposed to divest itself of all interest in Central Illinois Electric and Gas Co. by the sale through competitive bidding of all of the reclassified stock of said subsidiary company and to apply the proceeds of such sale, to the extent required for such purpose, in the retirement of certain bonds assumed by said holding company and known as Federated Utilities, Inc., First Lien Collateral Trust 5½% Bonds, due March 1, 1957, by payment of the principal amount of such bonds plus accrued interest to a fixed date after appropriate public notice of the impending retirement of such bonds but without payment of the premium payable upon voluntary redemption of such bonds under the applicable indenture;

The Commission having heretofore made further findings herein and entered a further order finding that portion of said plan relating to the sale by Consolidated Electric and Gas Company of the reclassified common stock of Central Illinois Electric and Gas Co. and the deposit of the proceeds of such sale with the trustee under the indenture securing the above-identified assumed bonds to be necessary to effectuate the provisions of section 11 (b) of the act and fair and equitable to all persons affected thereby, except in respect of certain fees proposed to be paid to Central Republic Company concerning which fees jurisdiction was reserved, and approving said portion of said plan, subject to said reservation of jurisdiction, but further reserving jurisdiction in respect of the definitive application of the proceeds of such sale after the deposit thereof with said trustee;

The Commission having now made and filed further supplementary findings in respect of the application of the proceeds of said sale as proposed, and finding the application of that portion of the proceeds of said sale required for such purpose to the retirement of all the outstanding bonds originally issued by Federated Utilities, Inc., and assumed by Consolidated Electric and Gas Company, in the manner proposed in the plan, as amended, and without the payment of any redemption premium, is necessary to effectuate the provisions of section 11 (b) of the act and fair and equitable to all persons affected thereby;

Consolidated Electric and Gas Company also proposing that any portion of the proceeds of the sale of said reclassified common stock of Central Illinois Electric and Gas Co. remaining after retirement of the assumed bonds above mentioned shall be utilized in the retirement of the bonds of Consolidated Electric and Gas Company known as its Collateral Trust Bonds, due August 1, 1957, and August 1, 1962, such retirement to be effected by purchases of such bonds in the open market, and the Commission having made no adverse findings in regard to the proposal last described but having found that certain terms and conditions should be imposed in connection therewith;

It is hereby ordered, That said plan so submitted by Consolidated Electric and Gas Company pursuant to section 11 (e) of the act be, and the same is hereby in all respects approved, except in respect of the reasonableness of the fees proposed to be paid to Central Republic Company concerning which the reservation of jurisdiction heretofore made is continued in effect pending the further order, or orders, of the Commission;

It is further ordered, That the proposal of Consolidated Electric and Gas Company that any proceeds of the sale of the common stock of Central Illinois Electric and Gas Co. which are not expended in the retirement of the assumed bonds above mentioned shall be applied to the acquisition and retirement of the bonds of Consolidated Electric and Gas Company known as Consolidated Electric and Gas Company Collateral Trust Bonds, due August 1, 1957, and August 1, 1962, to be effected through purchases of such bonds in the open market, be, and the same is hereby permitted to become effective as a declaration by Consolidated Electric and Gas Company pursuant to section 12 (c) of the act;

Provided, however, And the authorization hereby given in respect to the acquisition and retirement of the Collateral Trust Bonds last mentioned be, and the same is hereby, subject to the following terms and conditions:

(1) That at least seven days before purchases are commenced, Consolidated shall advise by letter each known holder of the Consolidated bonds fully with respect to its intention to make such purchases and the method to be employed, the form of such letter to be submitted to the Commission at least three days prior to release;

(2) That Consolidated shall not solicit or cause to be solicited from individual bondholders the sale of any bonds to the company;

(3) That no purchases shall be made directly or indirectly from persons or corporations in any way associated or affiliated with Consolidated; and

(4) That Consolidated shall furnish to the Commission, promptly after the last day of each month, a schedule showing for each day covered by such report the number of bonds purchased, the prices at which purchased, and the name of the broker through whom purchased.

Consolidated having requested that the order of this Commission concerning the application of the proceeds of the above described sale conform to the formal requirements of sections 373 (a), 371 (b), 371 (f), and 1808 (f) of the Internal Revenue Code, as amended;

It is further ordered, That Consolidated apply the proceeds from the sale of the common stock described above in the retirement of the Federated Utilities, Inc., First Lien Collateral Trust 5½% Bonds, due March 1, 1957 (assumed by Consolidated) and the Collateral Trust Bonds issued by Consolidated (in the manner hereinabove set forth), which application of such proceeds is hereby found to be necessary or appropriate to the integration or simplification of the Consolidated holding company system.

NOTICE OF PETITION FOR MODIFICATION

In re market agencies at St. Louis National Stock Yards (formerly styled as Alexander Conover & Company et al.), respondents.

By orders dated February 28, 1933, November 5, 1936, and December 6, 1937, made pursuant to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 1940 ed. 181 et seq.), maximum rates and charges for selling and buying livestock on commission by market agencies operating at the St. Louis National Stock Yards, National Stock Yards, Illinois, were prescribed. By an order dated December 26, 1942, pursuant to a petition filed by the respondent market agencies, the Assistant to the Secretary of Agriculture, with the consent of the respondents, temporarily suspended the provisions of the orders of February 28, 1933, November 5, 1936, and December 6, 1937, for a trial period. By a supplemental order dated December 27, 1943, the provisions of the orders of February 28, 1933, November 5, 1936, and December 6, 1937, were again suspended for a further period to and including December 31, 1944, unless such order is modified by further order prior to the expiration of such period. Under the terms of the orders of December 26, 1942, and December 27, 1943, the respondents have been permitted to file, assess, and collect higher rates than the maximum prescribed in the prior orders.

On or about February 4, 1944, the respondent market agencies filed a petition seeking a modification of the order of December 27, 1943, so as to permit the respondents to modify the rate structure of their tariff, in order to denominate cattle and calves as separate species for rate purposes. The effect of such proposed modification would result in some additional revenue to the respondents because its effect would be to place consignments of livestock containing cattle and calves into rate brackets calling for the assessment of higher rates.

It appears that public notice should be given to all interested persons of the request of the respondents and to afford all interested persons, including patrons of the respondents, an opportunity to manifest their desire to be heard on the matter.

Therefore, notice is hereby given to the public and to all interested persons of the request of the respondents for a modification of the order of December 27, 1943, and for the purpose of affording said respondents and all other interested persons, including patrons of the respondents, an opportunity to be heard upon the matters covered in the petition.

All interested persons who desire to be heard shall notify the Hearing Clerk, Office of the Solicitor, United States Department of Agriculture, Washington 25, D. C., within 15 days from the date of the publication of this order.

Copies hereof shall be served on the respondents by registered mail or in person.

Done at Washington, D. C., this 19th day of February 1944.

PART 1401—DAIRY PRODUCTS

CHEDDAR CHEESE AND PROCESS CHEDDAR CHEESE

Food Distribution Order No. 15 (8 F.R. 1704), issued on February 6, 1943, by the Secretary of Agriculture of the United States, as amended, is hereby further amended to read as follows:

The fulfillment of requirements for the defense of the United States will result in a shortage in the supply of Cheddar cheese and process Cheddar cheese for defense, for private account, and for export: and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1401.1 *Cheddar cheese and process Cheddar cheese*—(a) *Definitions.* When used in this order, unless otherwise distinctly expressed or manifestly incompatible with the intent hereof:

(1) The term "Cheddar cheese", frequently called "American cheese" or "American Cheddar cheese", means Cheddar cheese (produced in the United States) as defined in the definition and standards of identity for Cheddar cheese (21 CFR, 1941 Supp. 19.500), issued on January 6, 1941, pursuant to the Federal Food, Drug, and Cosmetic Act.

(2) The term "process Cheddar cheese" means the product prepared by grinding and mixing one or more lots of Cheddar cheese into a homogeneous plastic mass (i) by the action of heat, with or without the addition of salt, water, or color, and with or without the incorporation of not more than 3 percent of a suitable emulsifying agent, and (ii) containing not more than 40 percent, by weight, of moisture, and in the water-free substance containing not less than 50 percent, by weight, of milk fat (sweet cream may be added to increase the fat content to the required percentage).

(3) The term "person" means any individual, partnership, corporation, association, or any other business entity or organized group of persons, whether incorporated or not.

(4) The term "authorized cheese assembler" means any person who holds a letter of authority, issued to him by the Director, to receive Cheddar cheese set aside pursuant to the provisions hereof.

(5) The term "set aside" means set aside and hold for sale and delivery to any of the following designated agencies or to any other agency designated by the Director: (i) Office of Distribution (including, but not being limited to, the Federal Surplus Commodities Corporation); (ii) Dairy Products Marketing Association, Inc.; (iii) the Armed Services of the United States (excluding, for the purposes of this order, United States Army Post Exchanges, United States Navy Ship's Service Departments, and United States Marine Corps Post Exchanges); (iv) War Shipping Administration; (v) Veterans' Administration; and (vi) any person who, pursuant to a food distribution regulation, is entitled to purchase Cheddar cheese or process Cheddar cheese subject to this order.

(6) The term "Armed Services of the United States" means the Army, the Navy, the Marine Corps, and the Coast Guard of the United States.

(7) The terms "U. S. No. 1" and "U. S. No. 2" mean Cheddar cheese of U. S. No. 1 grade (U. S. Grade A) and U. S. No. 2 grade (U. S. Grade B), respectively, as defined in the "Tentative U. S. Standards for Grades of American Cheddar Cheese", issued by the Food Distribution Administration, effective as of May 1, 1943. Whenever new standards are issued by the Office of Distribution or promulgated by the War Food Administrator, "U. S. No. 1" and "U. S. No. 2" shall mean U. S. No. 1 grade (U. S. Grade A) and U. S. No. 2 grade (U. S. Grade B), respectively, as specified in such new standards.

(8) The term "Director" means the Director of Food Distribution, War Food Administration.

(b) *Restrictions.* (1) Each person who has produced more than 8,000 pounds of Cheddar cheese in any calendar month from January 1942 to February 1944, inclusive, shall set aside in March 1944, and in each subsequent calendar month, a quantity of Cheddar cheese equal to such percentage as the Director may order of all Cheddar cheese produced by such person in March 1944 and each subsequent calendar month regardless of the quantity produced by such person during or subsequent to March 1944.

(2) Each person who has not produced more than 8,000 pounds of Cheddar cheese in any calendar month from January 1942 to February 1944, inclusive, but who produces more than 8,000 pounds of Cheddar cheese in March 1944, or any subsequent calendar month, shall thereafter, in each calendar month, set aside a quantity of Cheddar cheese equal to such percentage as the Director may order of all Cheddar cheese produced by such person in each such calendar month regardless of the quantity of Cheddar cheese produced by such person in any month subsequent to the one, as aforesaid, in which he produced more than 8,000 pounds of Cheddar cheese.

(3) In the event of a change in ownership with respect to a cheese factory, the production record of the former owner with respect to such cheese factory shall be the basis for reporting and setting aside Cheddar cheese by the new owner; and the purchaser of the cheese factory shall so report and set aside Cheddar cheese, if (i) the person from whom he purchased the cheese factory was obligated to report and set aside Cheddar cheese or (ii) the purchaser is required by other provisions hereof to report and set aside Cheddar cheese.

(4) Any person who, during a particular calendar month, sets aside and sells to an agency or agencies designated in or pursuant to § 1401.1 (a) (5) hereof a quantity of Cheddar cheese in excess of the quantity required to be set aside by the provisions hereof or Director's order pursuant hereto may be permitted by the Director, if the Director determines that such is necessary or appropriate in the public interest and to promote the national defense, to utilize as a credit against his set-aside obligation, during any subsequent calendar month specified by the Director, the quantity which he set aside and sold to said agencies in excess of his set-aside obligation.

(5) Any person who is required by the provisions of this order to set aside Cheddar cheese may, at his option, sell or deliver all or part of the Cheddar cheese set aside, pursuant to the provisions hereof, to any authorized cheese assembler who agrees to set aside, out of the Cheddar cheese in his possession or control, a quantity of Cheddar cheese equal to the quantity of such set-aside Cheddar cheese received by him, and such authorized cheese assembler shall so set aside such quantity of Cheddar cheese. An authorized cheese assembler shall not, however, sell or deliver set-aside Cheddar cheese to another authorized cheese assembler unless the authorized cheese assembler to whom such Cheddar cheese is to be delivered has applied to the Director and received from him specific authorization to receive such Cheddar cheese. Each person delivering or shipping Cheddar cheese to an authorized cheese assembler shall deliver to such authorized cheese assembler a certificate, in duplicate, in substantially the following language (with the appropriate information inserted in the blank spaces):

"This is to certify that of the _____ pounds of Cheddar cheese shipped or delivered on _____, _____ pounds are Cheddar cheese set aside pursuant to the provisions of Food Distribution Order No. 15, issued by the Secretary of Agriculture of the United States on February 6, 1943, as amended, and such amount of set-aside Cheddar cheese is required to be set aside by you pursuant to the provisions of said order, as amended. The balance, _____ pounds, is Cheddar cheese free from the restrictions of said order, as amended.

_____
(Signature of manufacturer)

"This will acknowledge receipt of the above indicated quantity of Cheddar cheese set aside pursuant to said order, as amended.

_____
(Signature of authorized cheese assembler)"

The aforesaid certificate shall be signed in duplicate by the authorized cheese assembler who shall return one copy to the manufacturer who delivered or shipped the Cheddar cheese, and shall retain the original for one year after the date of receipt thereof.

(6) All Cheddar cheese set aside pursuant to the provisions hereof shall be stored under the same conditions of storage customarily observed to maintain the grade and quality of Cheddar cheese, and shall be packaged and assembled for delivery in accordance with requirements and specifications of the designated agencies purchasing such cheese. At least 80 percent of the Cheddar cheese thus set aside pursuant to the provisions hereof shall be U. S. No. 1 grade or better, and the remainder shall be not less than U. S. No. 2 grade: *Provided, however,* That if the manufacturer shows by grading certificates issued by the Office of Distribution, War Food Administration, that all of the Cheddar cheese of U. S. No. 1 grade or better produced by him is less than the quantity required to be set aside pursuant hereto, the quantity to be set aside shall include all of the U. S. No. 1 grade or better manufactured or received by such person and the remainder may be U. S. No. 2 grade: *Provided, further,* That if the manufacturer shows by grading certificates issued by the said Office of Distribution that the total quantity of Cheddar cheese of U. S. No. 2 grade or better produced by him in the month in which it is required to be set aside is less than the quantity of Cheddar cheese required to be set aside in such month, he shall set aside all of the Cheddar cheese of U. S. No. 2 grade or better produced by him in such month and an additional quantity of lower grade Cheddar cheese to fulfill the total set-aside requirements of this order. Grades as determined by official inspectors of the Office of Distribution shall be final in all cases.

(7) Any person who has contracted with or hereafter contracts with any of the agencies designated in or pursuant to § 1401.1 (a) (5) hereof for the delivery of process Cheddar cheese may deliver such cheese, in accordance with the contract, and credit it against such portion of his set-aside obligation, pursuant to the provisions of this order, at the rate of 95 pounds of Cheddar cheese for each 100 pounds of process Cheddar cheese delivered, as aforesaid, to a designated agency: *Provided,* That no person is authorized to convert such set-aside Cheddar cheese into process cheese prior to the execution of a contract, as aforesaid,

for the delivery of such process Cheddar cheese.

(8) Each authorized cheese assembler shall pay to the Commodity Credit Corporation the sum of 3.8 cents per pound of Cheddar cheese and process Cheddar cheese sold by him to any of the following agencies of the United States during the effective period of any regulation of the Office of Price Administration establishing the maximum prices on such sales equal to the maximum prices on other sales plus 3.8 cents per pound: War Food Administration and any agency thereof (including Dairy Products Marketing Association, Inc., acting for the War Food Administration); U. S. Army Quartermaster Market Centers (including Field Headquarters), and U. S. Army Quartermaster Depots; and the U. S. Navy Market Offices. Such payment with respect to each sale shall be made not later than 5 days after payment of the purchase price by the purchasing agency. Acceptance from the Director of a letter of authority to serve as authorized cheese assembler shall constitute such assembler's authority to such agencies to make payment, in his behalf and for his account, of the 3.8 cents per pound to Commodity Credit Corporation by deducting such 3.8 cents per pound from the purchase price and paying such 3.8 cents to Commodity Credit Corporation. Unless such deduction has been made, the authorized cheese assembler shall pay the 3.8 cents per pound directly to Commodity Credit Corporation.

(9) No person may serve as authorized cheese assembler unless he has received from the Director a letter of authority to serve as an authorized cheese assembler. Any letter of authority issued prior to February 29, 1944, by the Director shall not entitle the person to whom it was issued to serve as an authorized cheese assembler after February 29, 1944: *Provided*, That the set-aside obligations incumbent on any such authorized cheese assembler with respect to Cheddar cheese acquired or produced by him on or prior to February 29, 1944, shall continue subsequent to February 29, 1944. Any person who desires to become an authorized cheese assembler or to serve as an authorized cheese assembler after February 29, 1944, shall file with the Director an application, upon a form approved by the Director, setting forth the information requested in said form of application. The application shall contain, among other things, a statement by the person submitting such application that (i) he will make the aforesaid payment to the Commodity Credit Corporation, as required by the provisions hereof, and otherwise observe and comply with the requirements of this order, and (ii) he will not refuse to purchase or accept delivery of set-aside Cheddar cheese solely because the vendor is not willing to sell to the respective authorized cheese assembler an additional quantity of Cheddar cheese not set aside or required to be set aside hereunder. An authorized cheese assembler shall have the following facilities and be able to perform the following functions: (i) accumulate carlots of Cheddar cheese for shipment; (ii) storage space with ample capacity and satisfactory temperature and humidity controls; (iii) maintain adequate equipment and facilities for paraffining Cheddar cheese, moisture analysis, grading, branding, shipping, and ample capital for financing the inventories of Cheddar cheese; (iv) substitute for Cheddar cheese of quality unacceptable to an agency designated in or pursuant to § 1401.1 (a) (5) hereof and in packages not suitable for export, according to the standards specified by said agency, Cheddar cheese of acceptable quality and in packages meeting the specifications of said agency; (v) maintain a satisfactory system of records and accounts with respect to Cheddar cheese, and supply promptly, from month to month, correctly prepared reports with respect to Cheddar cheese and process Cheddar cheese; and (vi) make the aforesaid payment of 3.8 cents per pound to the Commodity Credit Corporation pursuant to § 1401.1 (b) (8) hereof with respect to all Cheddar cheese and process Cheddar cheese sold by such authorized cheese assembler to the War Food Administration or any agency thereof (including Dairy Products Marketing Association, Inc., acting for the War Food Administration); U. S. Army Quartermaster Market Centers (including Field Headquarters), and U. S. Army Quartermaster Depots; and the U. S. Navy Market Offices. The Director shall consider each such application and issue a letter of authority for such period of time as may be specified therein if the Director determines that the issuance of such letter of authority to serve as an authorized cheese assembler is necessary or appropriate in the public interest and to promote the national defense. No person shall represent himself to be an authorized cheese assembler unless he holds a letter of authority duly issued by the Director and in force and effect at the time of such representation. No person other than an authorized cheese assembler holding a letter of authority in force and effect shall receive or, after receipt, deal in Cheddar cheese or process Cheddar cheese set aside pursuant to the provisions hereof.

(10) No authorized cheese assembler shall, unless specifically authorized by the Director, contract to buy or accept delivery of a quantity of Cheddar cheese, set aside pursuant to this order, which will cause the total quantity of the set-aside Cheddar cheese owned, contracted for, processed or, in any other manner, controlled by him to exceed the total quantity of Cheddar cheese required to be set aside by him during the respective calendar month and the then immediately preceding calendar month (including set-aside Cheddar cheese received from others and Cheddar cheese required to be set aside from his own production). Each authorized cheese assembler shall maintain a physical inventory of set-aside Cheddar cheese commensurate with his obligation pursuant hereto to set aside Cheddar cheese.

(11) The Director may release any Cheddar cheese or process Cheddar cheese from the restrictions of this order if he determines that no agency designated in or pursuant to § 1401.1 (a) (5) hereof has contracted for, or declared its intention or desire to contract for, such Cheddar cheese or process Cheddar cheese within such period as he may specify, or that such Cheddar cheese or process Cheddar cheese is not required for such agencies. The Director may issue such administrative rulings, regulations, interpretations, and exemptions as he deems necessary to facilitate, expedite, and accomplish the purposes of this order.

(12) The restrictions hereof shall be observed without regard to the rights of creditors, existing contracts or payments made. This order shall not, however, be construed as reducing the amount of Cheddar cheese or process Cheddar cheese which any person is required to offer or deliver, under existing contracts or contracts subsequently entered into, to any agency specified in or pursuant to the provisions in § 1401.1 (a) (5) hereof.

(c) *Records and reports.* (1) The Director shall be entitled to obtain such information from, and require such reports and the keeping of such records by any person, as may be necessary or appropriate, in his discretion, to the enforcement or administration of the provisions of this order.

(2) Every person subject to this order shall, for at least two years (or for such period of time as the Director may designate), maintain an accurate record of his transactions in Cheddar cheese and process Cheddar cheese.

(3) The record-keeping and reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942. Subsequent record-keeping or reporting requirements will be subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(4) The provisions of this order shall not be considered as rescinding or terminating Food Distribution Order No. 15.3 (8 F.R. 14037) issued by the Director on October 14, 1943.

(d) *Audits and inspections.* The Director shall be entitled to make such audit or inspection of the books, records, and other writings, premises or stocks of cheese (including, but not being limited to Cheddar cheese and process Cheddar cheese) of any person, and to make such investigations as may be necessary or appropriate, in his discretion, to the enforcement or administration of the provisions of this order.

(e) *Petition for relief from hardship.* Any person affected by this order who considers that compliance herewith would work an exceptional or unreasonable hardship on him may file a petition for relief with the administrator of this order. Such petition shall be addressed to Order Administrator, Food Distribution Order No. 15, Dairy and Poultry Branch, War Food Administration, Washington 25, D. C. Petition for such relief shall be in writing and shall set forth all pertinent facts and the nature of the relief sought. The Order Administrator may take any action with reference to such petition which is consistent with the authority delegated to him by the Director. If the petitioner is dissatisfied with the action taken by the Order Administrator on the petition, he shall, by requesting the Order Administrator therefor, obtain a review of such action by the Director. The Director may, after said review, take such action as he deems appropriate, and such action shall be final. The provisions of this paragraph (e) shall not be construed to deprive the Director of authority to consider originally any petition for relief from hardship submitted in accordance herewith. The Director may consider any such petition and take such action with reference thereto that he deems appropriate and such action shall be final.

(f) *Violations.* The War Food Administrator may, by suspension order, prohibit any person who violates any provision of this order from receiving, making any deliveries of, or using Cheddar cheese or process Cheddar cheese, or any other material subject to priority or allocation control by the War Food Administrator, and may recommend that any such person be prohibited from receiving, making any deliveries of, or using materials subject to the priority or allocation control of other governmental agencies. In addition, any person who wilfully violates any provision of this order is guilty of a crime and may be prosecuted under any and all applicable laws. Further, civil action may be instituted to enforce any liability or duty created by, or to enjoin any violation of, any provision of this order.

(g) *Delegation of authority.* The administration of this order and the powers vested in the War Food Administrator, insofar as such powers relate to the administration of this order, are hereby delegated to the Director. The Director is authorized to redelegate to any employee of the United States Department of Agriculture any or all of the authority vested in him by this order.

(h) *Communications.* All reports to be filed hereunder and all communications concerning this order shall, except as provided herein or unless instructions to the contrary are issued by the Director, be addressed to the Order Administrator, Food Distribution Order No. 15, Dairy and Poultry Branch, Office of Distribution, War Food Administration, Washington 25, D. C.

(i) *Territorial scope.* This order shall apply only in the area included in the 48 States of the United States and the District of Columbia.

(j) *Effective date.* This order shall become effective at 12:01 a. m., e. w. t., March 1, 1944. With respect to violations, rights accrued, liabilities incurred, or appeals taken under said Food Distribution Order No. 15, as amended, prior to the effective time of the provisions hereof, all provisions of Food Distribution Order No. 15, as amended, in effect prior to the issuance of this order shall be deemed to continue in full force and effect for the purpose of sustaining any proper suit, action, or other proceeding with respect to any such violation, right, liability, or appeal.

TITLE 29—LABOR

Chapter VII—National War Labor Board

PART 802—RULES OF PROCEDURE

JURISDICTION AND PROCEDURE OF REGIONAL WAR LABOR BOARDS

Section 802.57 (a) (4) has been amended to read as follows:

(4) Rulings of the Regional Board on voluntary applications for approval of wage or salary adjustments shall take effect when issued to the parties. Such rulings may be issued to the parties when made, unless two or more public members of the Regional Board who dissent from a ruling request that the issuance of the ruling or any specified portion thereof be stayed and at the same time state the reasons for their request. In such event the ruling or the specified portion thereof and the accompanying request shall immediately be transmitted by the Regional Board to the National War Labor Board and may be issued to the parties only upon the expiration of ten days after its receipt in Washington, unless (i) the ruling is earlier approved by the Board or (ii) within such ten-day period the National War Labor Board sets the case down for review. In the latter event the Executive Assistant to the National War Labor Board shall communicate the National Board's action to the Regional Board, and the requested stay shall continue in effect until the case is finally disposed of. If only a specified portion of a ruling is asked to be stayed, as herein provided, the Regional Board may, in its discretion, issue to the parties any other unrelated provisions of the ruling at any time after the ruling is made.

Section 802.57 (b) (1) has been amended to read as follows:

(1) Regional War Labor Boards are authorized to issue directive orders in dispute cases in conformity with the policy of the National War Labor Board. Each such directive order shall bear the date of its actual issue and shall be issued to the parties when made. If after the issuance of such an order no timely petition for review is filed within the period provided in paragraph (c) below, and if the National War Labor Board within such a period does not review the order on its own motion, the order shall on the day following the last day for filing such a petition stand confirmed as the order of the National War Labor Board and shall immediately be effective according to its terms; *Provided*, That the National War Labor Board may at any time prior to the expiration of the time for the filing of a petition for review make such an order, or any part thereof, immediately effective pending any further proceedings. If a timely petition for review of a directive order of a Regional Board is filed by a party in accordance with the provisions of paragraph (c) below, or if the National War Labor Board reviews such an order on its own motion, the entire order shall be suspended, unless and until the National War Labor Board direct, or has directed, otherwise, or unless the parties otherwise agree. However, the date of expiration of the escape period fixed in a directive order of a Regional Board granting a maintenance of membership provision shall not be affected by the filing of a petition for review of this or any other provision of the order. If only a part of the order is sought to be reviewed, any party may petition the National War Labor Board to make the rest of the order immediately effective according to its terms. The parties may in any case mutually agree upon the date when the order, or any part thereof, shall take effect, except that where a wage or salary adjustment is made subject to the approval of the Economic Stabilization Director, the parties may not by their agreement make such adjustment effective prior to the date of such approval.

This restriction shall not apply to samples taken under a United States Bureau of Customs Sampling permit.

Equitable Distribution

(e) *Equitable distribution.* It is the policy of the War Production Board that the cotton described in this order not required to fill rated orders shall be distributed equitably. In making such distribution due regard should be given to essential civilian needs, and there should be no discrimination in the acceptance or filling of orders as between persons who meet the seller's regularly established prices and terms of sale or payment. Under this policy every seller of such cotton, so far as practicable, should make available an equitable proportion of his merchandise to his customers periodically, without prejudice because of their size, location or relationship as affiliated outlets. It is not the intention to interfere with established channels and methods of distribution unless necessary to meet war or essential civilian needs. If voluntary observance of the policy outlined is inadequate to achieve equitable distribution, the War Production Board may issue specific directions to named concerns. A failure to comply with a specific direction shall be deemed a violation.

General Provisions

In addition, such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

PINE AND HARDWOOD BOLTS IN TEXAS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation No. 348 is amended by the addition of Appendix C, Table 6.

TABLE 6

Area. In the State of Texas the Counties of Harris, Liberty, Hardin, Polk, San Jacinto, Walker, Grimes, and Montgomery.

Species. Pine and hardwood bolts suitable for the manufacture of woven picket fences (including snow fences and corn-cribbing).

Scaling and grading rules: All bolts are to be measured on the basis of a unit containing 133 cubic feet.

Bolts are to be cut into 4 or 5 foot lengths as specified by the buyer. Each bolt shall be cut 2 inches over in length to allow for trim. Thus, the unit must actually contain 133 cubic feet.

Bolts must be straight and cut from live sound timber from the main bole of the tree. Bolts cut from the tops will not be accepted.

The minimum diameter acceptable is 6 inches.

Maximum Prices

Pine	$7.60 per unit of 133 cu. ft.
Hardwood	8.00 per unit of 133 cu. ft.

These prices are for pine and hardwood bolts delivered to the mill by truck or f. o. b. cars at shipping point.

If the buyer takes delivery at some place other than on railroad cars or at the mill, the maximum prices must be reduced by

(a) The cost per cord to the buyer of trucking bolts to the closest rail siding and loading on cars if delivery to mill is by rail, or

(b) The cost per cord to the buyer of trucking bolts to the mill if delivery to mill is by truck.

This amendment shall become effective February 28, 1944.

SEC. 3. *Definitions.* When used herein, the following terms shall have the following meanings:

"Person" means an individual, corporation, partnership, association or other organized group of persons or the legal successor or representative of any of the foregoing, and includes the United States or any other Government or any political subdivision or agency of any of the foregoing.

"Processor" means, with respect to any lot of alfalfa hay products, a person who manufactures such alfalfa hay products or has his own alfalfa hay manufactured by others in alfalfa hay products to which he retains title. It includes an importer-processor.

"Jobber" means, with respect to any lot of alfalfa hay products, a person, other than the processor, who sells such alfalfa hay products without first having unloaded them into a warehouse or store. It includes an importer-jobber.

"Wholesaler" means, with respect to any lot of alfalfa hay products, a person, other than the processor, who sells such alfalfa hay products after having unloaded the same into a warehouse or store to anyone other than a feeder. "Retailer" means, with respect to any lot of alfalfa hay products, a person other than the processor, who sells such alfalfa hay products after having unloaded the same into a warehouse or store to a feeder. It includes an importer-retailer. "Importer" means, with respect to a lot of alfalfa hay products manufactured outside the continental United States, the person who first sells a lot of such products within the 48 states or the District of Columbia. On that sale, the importer will always also be either a processor, jobber, wholesaler, or retailer, depending upon which one of those classes he belongs to, and he will be referred to herein as "importer-processor," "importer-jobber," "importer-wholesaler" or "importer-retailer," as the case may be.

"Supplier" means, as to any seller, the person from whom he purchased the alfalfa hay product being priced.

"Feeder" means, with respect to any lot of alfalfa hay products, a person who feeds any alfalfa hay product to animals or poultry.

"Alfalfa hay products" means the products produced by a processor from alfalfa hay, and include alfalfa meal, alfalfa leaf meal, alfalfa stem meal, chopped alfalfa, and those products referred to in section 4 (b) (3) hereof. The term refers to alfalfa hay products for human consumption, animal consumption, or other use, and to domestic and imported products.

"Alfalfa meal" means the product obtained from the grinding of the entire alfalfa hay, without the addition of any alfalfa stems, alfalfa straw or foreign material, or the abstraction of leaves. It must be reasonably free from other crop plants and weeds, and must not contain more than 33 percent of crude fibre.

"Alfalfa leaf meal" means the product consisting chiefly of the ground leafy materials which have been separated from alfalfa hay or meal. It must be reasonably free from other crop plants or weeds and must not contain more than 18 percent of crude fibre.

"Alfalfa stem meal" means the ground product remaining after the separation of the leafy material from alfalfa hay or meal. It must be reasonably free from other crop plants and weeds.

"Carload lot" means a lot of 60,000 pounds of alfalfa hay products, or any smaller quantity which moves as a rail carload shipment under the Office of Defense Transportation or tariff requirements.

"Pool car lot" means a lot of alfalfa hay products sold to one person and being shipped to the purchaser as part of a rail carload lot of alfalfa hay products sold by one seller to two or more persons.

"Less-than-carload lot" means any lot of alfalfa hay products other than a carload lot or a pool car lot.

"Transportation expenses" mean:

(a) When the transportation is by for-hire carrier:

(1) If the shipment originates at a point in the continental United States, the actual lawful transportation charges incurred in delivering to the purchaser, except as provided in (3) and (4) of this definition;

(2) If the shipment originates outside the continental United States, the lowest rail rate of freight applicable to the shipment, from the point of entry to destination, except as provided in (3) and (4) of this definition;

(3) Loading charges not customarily included in such transportation charges may not be added, and

(4) On a shipment involving a rail movement, charges incurred in getting the lot of alfalfa hay products being sold to the rail point of origin may not be included;

(b) When transportation is by other than for-hire carrier, the reasonable value of the transportation service not to exceed the lowest common carrier rate (if any) nor the maximum price the person could lawfully charge a third person for a like service if performed as a for-hire carrier other than a common carrier;

(c) When the shipment is by a combination of the foregoing, the sum of the amounts computed for each factor of transportation, except as provided in paragraph (a) (4) of this definition.

SEC. 4. *Maximum prices for sales of alfalfa hay products by processors.* The maximum per ton price of a sale or delivery of alfalfa hay products in bulk by the processor shall be determined by adjusting the appropriate basic price set forth in Table I by the differentials listed in this section which are applicable to the particular sale and delivery being priced, and adding seller's transportation expenses. The appropriate basic price is dependent upon the type of alfalfa hay product (sun cured or dehydrated) being priced, and either the location of the production plant, in the case of domestically produced products, or the location of the point of entry in the case of products produced outside the continental United States.

(a) *Basic prices per ton for alfalfa hay products.*

(3) *Other alfalfa hay products.* The differential for any alfalfa hay product not listed above (including alfalfa hay products for human consumption, products resulting from the further processing of any alfalfa hay product listed above, and products not meeting the definition of alfalfa meal because of the presence of too much crude fibre) shall be the dollars and cents difference during July 1943 between the processor's price bulk, f. o. b. his production plant for No. 1 fine ground sun cured alfalfa meal having less than 15% protein, and his bulk, f. o. b. production plant price for the product in question. If the processor had no such differential he shall take the July 1943 customary trade differential between the two. This differential shall be added or subtracted as is appropriate in each case, pursuant to the practice during July 1943.

(c) *Differential for sale and delivery of less than carload lot.* If the purchaser buys and takes delivery in less than carload lots, $1.00 per ton may be added.

SEC. 5. *Maximum prices for sales of alfalfa hay products by any person other than the processor.* The maximum price for the sale of any alfalfa hay product not for human consumption, bulk, by any person other than the processor, shall be determined by adding seller's transportation expenses and the applicable markup, if any, set forth in paragraph (a) below, either to his supplier's lawful maximum per ton price on the sale to him, or, in the case of a sale by an importer, to the maximum price of a processor for a sale, bulk, f. o. b. production plant of a like amount of a like domestic commodity.

(a) Subject to the limitation set forth in subparagraph (1) of this paragraph, the markup from among those set forth in this paragraph applicable to the sale and delivery and to the class of seller:

Class of seller:	Maximum per ton markup
Jobbers	$1.00 for deliveries in pool car lots.
	.75 for all other sales and deliveries.
Wholesaler	2.50
Retailer	7.00

(1) Sales between two members of the same class are permissible, provided that the aggregate markup for all sales by any one class of seller shall not exceed the maximum per ton markup shown above, and the amount which a subsequent seller may add on resale is reduced or eliminated, as the case may be, by the amount of the markups taken by prior sellers of his class.

SEC. 6. *Increases for sacks.* The maximum price for the sale of domestic or imported alfalfa hay products, sacked or packaged, where the seller has furnished the sacks or packages, shall be the appropriate maximum price for a like sale in bulk, plus the reasonable market value of the sacks or packages used, not exceeding any maximum price for such sacks or packages at the time of the sale or delivery.

SEC. 7. *Sales of alfalfa hay products on the basis of a guaranteed minimum percentage of protein.* No person shall sell any alfalfa hay product, whether domestic or imported, except on the basis of a specified guaranteed minimum percentage of protein therein. If, upon analysis, a delivery falls short of the specified guarantee, the maximum price for such a lot shall be the maximum price that would have been applicable had the guarantee been fulfilled, less a differential determined by reference to the practice customarily followed by the trade in such situations prior to price control of alfalfa hay products.

SEC. 8. *Evasion.* The provisions of this revised regulation shall not be evaded whether by direct or indirect methods in connection with any offer, solicitation, agreement, sale, delivery, purchase or receipt of any commodity covered by this revised regulation, alone or in connection with any other commodity, or by way of commission, service, transportation or other charge, or discount, premium or other privilege or by tying agreement or other trade understanding or otherwise.

SEC. 9. *Records and reports.* (a) Every seller subject to this revised regulation shall keep for inspection by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect his customary records including, if any, all bills, invoices and other documents relating to every sale or delivery of alfalfa hay products and documents necessary to the determination of grade and quality, after the effective date of this revised regulation.

(b) Upon demand every such seller shall submit such records to the Office of Price Administration and keep such further records as the Office of Price Administration may from time to time require.

SEC. 10. *Enforcement.* Persons violating any provision of this revised regulation are subject to the license revocation or suspension provisions, civil enforcement actions, suits for treble damages, and criminal penalties, as provided in the Emergency Price Control Act of 1942, as amended.

SEC. 11. *Licensing.* The provisions of Licensing Order No. 1, licensing all persons who make sales under price control, are applicable to all sellers subject to this revised regulation. A seller's license may be suspended for violations of the license or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

SEC. 12. *Protests and petitions for amendment.* Any person desiring to file a protest against or seeking an amendment of any provisions of this regulation may do so in accordance with Revised Procedural Regulation No. 1, issued by the Office of Price Administration.

This revised regulation shall become effective February 28, 1944.

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

PART 1—RULES OF PRACTICE AND PROCEDURE

COOPERATION WITH STATE COMMISSIONS

The Commission on February 16, 1944, effective March 18, 1944, deleted § 1.451 *Applications under section 214.*

Effective immediately, the Commission adopted as Appendix No. 5 to Part 1, the following:

A PLAN OF CO-OPERATIVE PROCEDURE IN MATTERS AND CASES UNDER THE PROVISIONS OF SECTION 410 OF THE COMMUNICATIONS ACT OF 1934

(Approved by the Federal Communications Commission October 25, 1938, and approved by the National Association of Railroad and Utilities Commissioners on November 17, 1938)

PRELIMINARY STATEMENT CONCERNING THE PURPOSE AND EFFECT OF THE PLAN

Section 410 of the Communications Act of 1934 authorizes co-operation between the Federal Communications Commission, hereinafter called the Federal Commission, and the State Commissions of the several states, in the administration of said Act. Subsection (a) authorizes the reference of any matter arising in the administration of said Act to a board to be composed of a member or members from each of the States in which the wire, or radio communication affected by or involved in the proceeding takes place, or is proposed. Subsection (b) authorizes conferences by the Federal Commission with State commissions regarding the relationship between rate structures, accounts, charges, practices, classifications, and regulations of carriers subject to the jurisdiction of such State commissions and of said Federal Commission and joint hearings with State commissions in connection with any matter with respect to which the Federal Commission is authorized to act.

Obviously, it is impossible to determine in advance what matters should be the subject of a conference, what matters should be referred to a board, and what matters should be heard at a joint hearing of State commissions and the Federal Commission. It is understood, therefore, that the Federal Commission or any State commission will freely suggest co-operation with respect to any proceeding or matter affecting any carrier subject to the jurisdiction of said Federal Commission and of a State commission, and concerning which it is believed that co-operation will be in the public interest.

To enable this to be done, whenever a proceeding shall be instituted before any commission, Federal or State, in which another commission is believed to be interested, notice should be promptly given each such interested commission by the commission before which the proceeding has been instituted. Inasmuch, however, as failure to give notice as contemplated by the provisions of this plan will sometimes occur purely through inadvertence, any such failure should not operate to deter any commission from suggesting that any such proceeding be made the subject matter of co-operative action, if co-operation therein is deemed desirable.

It is understood that each commission, whether or not represented in the National Association of Railroad and Utilities Commissioners, must determine its own course of action with respect to any proceeding in the light of the law under which, at any given time, it is called upon to act, and must be guided by its own views of public policy; and that no action taken by such Association can in any respect prejudice such freedom of action. The approval by the Association of this plan of co-operative procedure, which was jointly prepared by the Association's standing Committee on Co-operation between Federal and State Commissions and said Federal Commission, is accordingly recommendatory only; but such plan is designed to be, and it is believed that it will be, a helpful step in the promotion of co-operative relations between the State commissions and said Federal Commission.

NOTICE OF INSTITUTION OF PROCEEDINGS

Whenever there shall be instituted before the Federal Commission any proceeding involving the rates of any telephone or telegraph carrier the State commissions of the States affected thereby will be notified immediately thereof by the Federal Commission, and each notice given a State commission will advise such commission that, if it deems the proceeding one which should be considered under the co-operative provisions of the Act, it should either directly or through the National Association of Railroad and Utilities Commissioners, notify the Federal Commission as to the nature of its interest in said matter and request a conference, the creation of a joint board, or a joint hearing as may be desired, indicating its preference and the reasons therefor. Upon receipt of such request the Federal Commission will consider the same and may confer with the commission making the request and with other interested commissions, or with representatives of the National Association of Railroad and Utilities Commissioners, in such manner as may be most suitable; and, if co-operation shall appear to be practicable and desirable, shall so advise each interested State commission, directly, when such co-operation will be by joint conference, or by reference to a joint board appointed under said section 410 (a), and, as hereinafter provided, when such co-operation will be by a joint hearing under said section 410 (b).

Each State commission should in like manner notify the Federal Commission of any proceeding instituted before it involving the toll telephone rates or the telegraph rates of any carrier subject to the jurisdiction of the Federal Commission.

PROCEDURE GOVERNING JOINT CONFERENCES

The Federal Commission, in accordance with the indicated procedure, will confer with any State commission regarding any matter relating to the regulation of public utilities subject to the jurisdiction of either commission. The commission desiring a conference upon any such matter should notify the other without delay, and thereupon the Federal Commission will promptly arrange for a conference in which all interested State commissions will be invited to be present.

PROCEDURE GOVERNING MATTERS REFERRED TO A BOARD

Whenever the Federal Commission, either upon its own motion or upon the suggestion of a State commission, or at the request of any interested party, shall determine that it is desirable to refer a matter arising in the administration of the Communications Act of 1934 to a board to be composed of a member or members from the State or States affected or to be affected by such matter, the procedure shall be as follows:

The Federal Commission will send a request to each interested State commission to nominate a specified number of members to serve on such board.

The representation of each State concerned shall be equal, unless one or more of the States affected chooses to waive such right of equal representation. When the members of any board have been nominated and appointed, in accordance with the provisions of the Communications Act of 1934, the Federal Commission will make an order referring the particular matter to such board; and such order shall fix the time and place of hearing, define the force and effect the action of the board shall have, and the manner in which its proceedings shall be conducted. The rules of practice and procedure, as from time to time adopted or prescribed by the Federal Commission, shall govern such board, as far as applicable.

PROCEDURE GOVERNING JOINT HEARINGS

Whenever the Federal Commission, either upon its own motion or upon suggestions made by or on behalf of any interested State commission or commissions, shall determine that a joint hearing under said Section 410 (b) is desirable in connection with any matter pending before said Federal Commission, the procedure shall be as follows:

(a) The Federal Commission will notify the General Solicitor of the National Association of Railroad and Utilities Commissioners that said Association, or, if not more than 8 States are within the territory affected by the proceeding, the State commissions interested, are invited to name Co-operating Commissioners to sit with the Federal Commission for the hearing and consideration of said proceeding.

(b) Upon receipt of any notice from said Federal Commission inviting co-operation, if not more than 8 States are involved, the General Solicitor shall at once advise the State commissions of said States, they being represented in the membership of the Association, of the receipt of such notice, and shall request each such commission to give advice to him in writing, before a date to be indicated by him in his communication requesting such advice (1) whether such commission will co-operate in said proceeding, (2) if it will, by what commissioner it will be represented therein.

(c) Upon the basis of replies received, the General Solicitor shall advise the Federal Commission what States, if any, are desirous of making the proceeding co-operative and by what commissioners they will be represented, and he shall give like advice to each State commission interested therein.

(d) If more than 8 States are interested in the proceeding, because within territory for which rates will be under consideration therein, the General Solicitor shall advise the President of the Association that the Association is invited to name a Co-operating Committee of State Commissioners representing the States interested in said proceeding.

The President of the Association shall thereupon advise the General Solicitor in writing (1) whether the invitation is accepted on behalf of the Association, and (2) the names of commissioners selected to sit as a Co-operating Committee. The President of the Association shall have authority to accept or to decline said invitation for the Association, and to determine the number of commissioners who shall be named on the Co-operating Committee, provided that his action shall be concurred in by the Chairman of the Association's Executive Committee. In the event of any failure of the President of the Association and Chairman of its Executive Committee to agree, the Second Vice-President of the Association (or the Chairman of its Committee on Co-operation between State and Federal Commissions, if there shall be no Second Vice-President) shall be consulted, and the majority opinion of the three shall prevail. Consultations and expressions of opinion may be by mail or telegraph.

(e) If any proceeding, involving more than 8 States, is pending before the Federal Commission, in which co-operation has not been invited by that Commission, which the Association's President and the First and Second Vice-Presidents, or any two of them, consider should be made a co-operating proceeding, they may instruct the General Solicitor to suggest to the Federal Commission that the proceeding be made a co-operative proceeding; and any State commission considering that said proceeding should be made co-operative may request the President of the Association or the Chairman of its Executive Committee to make such suggestion after consideration with the Executive Officers above named. If said Federal Commission shall assent to the suggestion, made as aforesaid, the President of the Association shall have the same authority to proceed, and shall proceed in the appointment of a Co-operating Committee, as is provided in other cases involving more than 8 States, wherein the Federal Commission has invited co-operation, and the invitation has been accepted.

(f) Whenever any case is pending before the Federal Commission involving 8 States or less, which a commission of any of said States considers should be made co-operative, such commission, either directly or through the General Solicitor of the Association, may suggest to the Federal Commission that the proceeding be made co-operative. If said Federal Commission accedes to such suggestion, it will notify the General Solicitor of the Association to that effect and thereupon the General Solicitor shall proceed as is provided in such case when the invitation has been made by the Federal Commission without State commission suggestion.

APPOINTMENT OF CO-OPERATING COMMISSIONERS BY THE PRESIDENT

In the appointment of any Co-operating Committee, the President of the Association shall make appointments only from commissions of the State interested in the particular proceeding in which the Committee is to serve. He shall exercise his best judgment to select co-operating commissioners who are especially qualified to serve upon Co-operating Committees by reason of their ability and fitness; and in no case shall he appoint a commissioner upon a Co-operating Committee until he shall have been advised by such commissioner that it will be practicable for him to attend the hearings in the proceeding in which the Committee is to serve, including the arguments therein, and the co-operative conferences which may be held following the submission of the proceeding, to an extent that will reasonably enable him to be informed upon the issues in the proceeding and to form a reasonable judgment in the matters to be determined.

TENURE OF CO-OPERATORS

(a) No State commissioner shall sit in a co-operative proceeding under this plan except a commissioner who has been selected by his commission to represent it in a proceeding involving 8 States or less, or has been selected by the President of the Association to sit in a case involving more than 8 States, in the manner hereinbefore provided.

(b) A commissioner who has been selected, as hereinbefore provided, to serve as a member of a Co-operating Committee in any proceeding, shall without further appointment, and without regard to the duration of time involved, continue to serve in said proceeding until the final disposition thereof, including hearings and conferences after any order or reopening, provided that he shall continue to be a State commissioner.

(c) No member of a Co-operating Committee shall have any right or authority to designate another commissioner to serve in his place at any hearing or conference in any proceeding in which he has been appointed to serve.

(d) Should a vacancy occur upon any Co-operating Committee, in a proceeding involving more than 8 States, by reason of the death of any co-operating commissioner, or of his ceasing to be a State commissioner, or of other inability to serve, it shall be the duty of the President of the Association to fill the vacancy by appointment, if, after communication with the Chairman of the Co-operating Committee, it be deemed necessary to fill such vacancy.

(e) In the event of any such vacancy occurring upon a Co-operating Committee involving not more than 8 States, the vacancy shall be filled by the commission from which the vacancy occures.

CO-OPERATING COMMITTEE TO DETERMINE RESPECTING ANY REPORT OF STATEMENT OF ITS ATTITUDE

(a) Whenever a co-operative committee shall have concluded its work, or shall deem such course advisable, the committee shall consider whether it is necessary and desirable to make a report to the interested State commissions, and, if it shall determine to make a report, it shall cause the same to be distributed through the Secretary of the Association, or through the General Solicitor to all interested commissions.

(b) If a report of the Federal Commission will accompany any order to be made in said proceeding, the Federal Commission will state therein the concurrence or non-concurrence of said Co-operating Committee in the decision or order of said Federal Commission.

CONSTRUCTION HEREOF IN CERTAIN RESPECTS EXPRESSLY PROVIDED

It is understood and provided that no State or States shall be deprived of the right of participation and co-operation as hereinbefore provided because of non-membership in the Association. With respect to any such State or States, all negotiations herein specified to be carried on between the Federal Commission and any officer of such Association shall be conducted by the Federal Commission directly with the Chairman of the Commission of such State or States.

TREASURY DEPARTMENT.

Office of the Secretary.

DECLARATION ON GOLD PURCHASES

On January 5, 1943, the United States and certain others of the United Nations issued a warning to all concerned, and in particular to persons in neutral countries, that they intend to do their utmost to defeat the methods of dispossession practiced by the governments with which they are at war against the countries and peoples who have been so wantonly assaulted and despoiled. Furthermore, it has been announced many times that one of the purposes of the financial and property controls of the United States Government is to prevent the liquidation in the United States of assets looted by the Axis through duress and conquest.

One of the particular methods of dispossession practiced by the Axis powers has been the illegal seizure of large amounts of gold belonging to the nations they have occupied and plundered. The Axis powers have purported to sell such looted gold to various countries which continue to maintain diplomatic and commercial relations with the Axis, such gold thereby providing an important source of foreign exchange to the Axis and enabling the Axis to obtain much-needed imports from these countries.

The United States Treasury has already taken measures designed to protect the assets of the invaded countries and to prevent the Axis from disposing of looted currencies, securities, and other looted assets on the world market. Similarly, the United States Government cannot in any way condone the policy of systematic plundering adopted by the Axis or participate in any way directly or indirectly in the unlawful disposition of looted gold.

In view of the foregoing facts and considerations, the United States Government formally declares that it does not and will not recognize the transference of title to the looted gold which the Axis at any time holds or has disposed of in world markets. It further declares that it will be the policy of the United States Treasury not to buy any gold presently located outside of the territorial limits of the United States from any country which has not broken relations with the Axis, or from any country which after the date of this announcement acquires gold from any country which has not broken relations with the Axis, unless and until the United States Treasury is fully satisfied that such gold is not gold which was acquired directly or indirectly from the Axis powers or is not gold which any such country has been or is enabled to release as a result of the acquisition of gold directly or indirectly from the Axis powers.

FEDERAL TRADE COMMISSION.

[Docket No. 5131]

FUNSTEN CO., ET AL.

NOTICE OF HEARING

In the matter of James J. Funsten, an individual doing business as Funsten Company; San Xavier Fish Packing Company, a corporation; and Pacific Marine Products Company, a corporation.

The Federal Trade Commission, having reason to believe that the parties respondent named in the caption hereof and hereinafter more particularly designated and described, since June 19, 1936, have violated and are now violating the provisions of subsection (c) of section 2 of the Clayton Act (U.S.C. Title 15, sec. 13) as amended by the Robinson-Patman Act, approved June 19, 1936, hereby issues its complaint, stating its charges with respect thereto as follows:

PARAGRAPH ONE: Respondent James J. Funsten is an individual trading as Funsten Company, with his principal office and place of business located at 260 California Street, San Francisco, California (this respondent is hereinafter designated as Funsten Co.), is engaged, and for many years prior hereto has engaged, as the exclusive sales agent of two packing and canning corporations over which he, together with his wife, Florence Funsten, exercise financial control namely, the San Xavier Fish Packing Co. of Monterey, California, and the Pacific Marine Products Co. of Astoria, Oregon. The respondent sells and distributes exclusively for these two corporations canned salmon, tuna, sardines, fish oil and fish meal and other sea food products. Such commodities are hereinafter designated as sea food products.

PAR. TWO: Respondent San Xavier Fish Packing Company is a corporation organized and existing under the laws of the State of California, with its principal office and place of business located at Monterey, California. The respondent corporation is now engaged, and for many years prior hereto has engaged, in the business of packing, canning, distributing and selling food products. The respondent sells and distributes its sea food products through its exclusive sales agent, Funsten Company. Respondent James J. Funsten and respondent's wife, Florence Funsten, own a controlling stock in this corporation.

PAR. THREE: Respondent Pacific Marine Products Co. is a corporation organized and existing under the laws of the State of Oregon, with its principal office and place of business located at Astoria, Oregon. The respondent is now engaged, and for many years prior hereto has engaged, in the business of packing, canning, distributing and selling other sea food products, which it sells and distributes through its exclusive sales agent, Funsten Company. James J. Funsten and his wife, Florence Funsten, own a controlling stock interest in this corporation.

PAR. FOUR: The respondent San Xavier Fish Packing Company and Pacific Marine Products Company sell and distribute their sea food products exclusively through their sales agent, Funsten Co., but by two separate and distinct methods; first, through intermediaries who act as the respective respondents' agents in

negotiating the sale of their sea food products at respondents' price and terms, and for which services such intermediaries are customarily paid commissions or brokerage fees; second, the respondents sell their sea food products through the Funsten Co. directly to buyers on and for their own accounts. Some of such buyers designate themselves as brokers but are paid directly or indirectly on their own purchases of sea food products, commissions or brokerage fees, usually in the amount of 5 per cent of the net purchase price of the sea food products purchased.

Respondent Funsten Co. is paid by San Xavier Fish Packing Company and the Pacific Marien Products Company the sum of 10¢ per case for its services as sales agent in selling and distributing canned fish foods for and in behalf of the two respective corporations mentioned.

To distinguish their sea food products from the sea food products sold by competitors and to facilitate sales, each of the packer respondents utilizes registered and unregistered trade-marks and brands for the various sea food products it sells and distributes, which brands and trade-marks are generally known as packer's or seller's brands. Representative of such brands are: "Golden Eagle", "Silver Beauty", "Sierra", "San Xavier", "AAA", "Triple A", "Saloroc" and "Skipanon".

The respondents also sell their sea food products unlabeled or unbranded, and under the labels or brands of some of their buyers, which labels or brands are generally known to the trade as private buyer's brands.

Some of such buyers who utilize registered and unregistered private labels and brands incorrectly designate themselves as brokers. Such private brand buyers are primarily engaged in the purchase and sale of sea food products in their own names and for their own accounts.

PAR. FIVE: The respondents San Xavier Fish Packing Company and Pacific Marine Products Company in the course and conduct of their said business since June 19, 1936, have sold and distributed a substantial portion of their sea food products through their exclusive sales agent, Funsten Co., directly to buyers who are located in states other than the states in which the respective respondents are located, and as a result of said sales and the respective respondents' instructions such sea food products are shipped and transported across state lines to buyers who are located in the various states of the United States.

PAR. SIX: The respondent Funsten Co., as sales agent for San Xavier Fish Packing Company and Pacific Marine Products, since June 19, 1936, in connection with the interstate sale and distribution of sea food products for and on behalf of the said two respective respondent principals has sold said sea food products in its own name to numerous buyers, and has been and is now paying, or has paid or granted, directly or indirectly, to such buyers commissions, brokerage fees or other compensation or allowances, or discounts in lieu thereof, sometimes under respondents' own labels, sometimes unlabeled, and sometimes under their respective buyers' labels.

A representative, but by no means complete, list of buyers who since June 19, 1936, have purchased sea food products from the respondent for their own account and for resale, and who have received and accepted, and who are now receiving and accepting, from said seller respondents on their respective purchases of sea food products, directly or indirectly, commissions, brokerage fees or allowances and discounts in lieu of brokerage fees, is as follows:

William H. Stanley, Inc., New York, New York.

Griffith-Durney Company, San Francisco, California.

Walter M. Field & Company, San Francisco, California.

John T. Leonard, Charleston, South Carolina.

James A. Seley & Company, Los Angeles, California.

The respondent Funsten Co. customarily pays such buyers a commission or brokerage fee of 5 per cent of the net price of the sea food products purchased by them, and charges to and collects said commissioner brokerage fee from one or the other of the respective corporations whose product he has sold.

PAR. SEVEN: The paying and granting by respondents, San Xavier Fish Packing Company and Pacific Marine Products Company, directly or indirectly through their sales agent, respondent Funsten Co., and the transmission and payment by it, to the buyers of said sea food products, of commissions, brokerage or other compensation and allowance or discounts in lieu thereof on their own purchases, and the acts and practices of each of the respective respondents in promoting their sales of sea food products by such payments as set forth above, are in violation of subsection (c) of section 2 of the Clayton Act, as amended.

Wherefore, the premises considered, the Federal Trade Commission on this 15th day of February, A. D. 1944, issues its complaint against said respondents.

Notice is hereby given you, James J. Funsten, an individual doing business as Funsten Company; San Xavier Fish Packing Company, a corporation; and Pacific Marine Products Company, a corporation, respondents herein, that the 24th day of March, A. D., 1944, at 2 o'clock in the afternoon, is hereby fixed as the time, and the offices of the Federal Trade Commission in the City of Washington, D. C., as the place, when and where a hearing will be had on the charges set forth in this complaint, at which time and place you will have the right, under said act, to appear and show cause why an order should not be entered by said Commission requiring you to cease and desist from the violations of the law charged in the complaint.

You are notified and required, on or before the twentieth day after service upon you of this complaint, to file with the Commission an answer to the complaint. If answer is filed and if your appearance at the place and on the date above stated be not required, due notice to that effect will be given you. The rules of practice adopted by the Commission with respect to answers or failure to appear or answer (Rule IX) provide as follows:

> In case of desire to contest the proceeding the respondent shall, within twenty (20) days from the service of the complaint, file with the Commission an answer to the complaint. Such answer shall contain a concise statement of the facts which constitute the ground of defense. Respondent shall specifically admit or deny or explain each of the facts alleged in the complaint, unless respondent is without knowledge, in which case respondent shall so state.
>
> • • • • •
>
> Failure of the respondent to file answer within the time above provided and failure to appear at the time and place fixed for hearing shall be deemed to authorize the Commission, without further notice to respondent, to proceed in regular course on the charges set forth in the complaint.
>
> If respondent desires to waive hearing on the allegations of fact set forth in the complaint and not to contest the facts, the answer may consist of a statement that respondent admits all the material allegations of fact charged in the complaint to be true. Respondent by such answer shall be deemed to have waived a hearing on the allegations of fact set forth in said complaint and to have authorized the Commission, without further evidence, or other intervening procedure, to find such facts to be true.
>
> Contemporaneously with the filing of such answer the respondent may give notice in writing that he desires to be heard on the question as to whether the admitted facts constitute the violation of law charged in the complaint. Pursuant to such notice, the respondent may file a brief, directed solely to that question, in accordance with Rule XXIII.

In witness whereof, the Federal Trade Commission has caused this, its complaint, to be signed by its Secretary, and its official seal to be hereto affixed, at Washington, D. C., this 15th day of February, A. D. 1944.

(d) The manager of the registration office, and each carrier, shall prepare and maintain such records, and make such reports, as the Office of Defense Transportation may prescribe, subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942. Such records shall be kept available for examination and inspection at all reasonable times by accredited representatives of the Office of Defense Transportation; and

PRODUCERS OF NARROW MOUTH GLASS CONTAINERS

MODIFICATION OF ADJUSTMENT PROVISIONS

Amendment No. 12 to Order No. A-2 Under § 1499.159b of Maximum Price Regulation No. 188. Manufacturers' maximum prices for specified building materials and consumers' goods other than apparel. Modification of adjustment provisions under Maximum Price Regulation No. 188.

An opinion accompanying this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

[1] 7 F.R. 5445, 6689, 7694; 8 F.R. 4660, 14582; 9 F.R. 947.

[2] Filed as part of the original document.

Paragraph (a) (12) is added to read as follows:

(12) *Narrow mouth glass containers.* This subparagraph permits the granting of relief to producers of certain narrow mouth glass containers who are unable to maintain their production under their existing maximum prices. The extent of relief to be granted under this subparagraph is set forth herein.

(i) *Scope of this subparagraph.* The provisions of this subparagraph shall apply only to producers of private mould narrow mouth containers and under the following conditions:

(a) The container has been affirmatively excluded from War Production Board Limitation Order No. L–103, and its continued production expressly authorized.

(b) The product packaged in the container has been declared essential by the appropriate government agency.

(c) The increase in cost to the first purchaser of the container will not be passed on to purchasers in the first sale of any commodity as packaged in the container nor made the basis of an application to the Office of Price Administration by the seller of such packaged commodity to increase his selling price. The applicant shall submit a statement from the buyer certifying to those facts.

(d) The producer's cost to manufacture and sell the container exceeds his established maximum price for such container.

(ii) *Extent of relief to be granted.* If the conditions set forth in this subparagraph have been met, the producer may apply for permission to increase his maximum price in an amount sufficient to cover his cost to manufacture and sell the container.

In determining the amount of adjustment which may be granted, consideration will be given to such factors as:

(a) Revenue from sales of the commodity which is the subject of the application and from all other sources; and

(b) Cost of production and general, administrative, and selling expenses for total company operations and as allocated to the commodity which is the subject of the application.

The "cost to manufacture and sell," for the purpose of this subparagraph, shall include the costs of batch materials, fuel, power, direct and indirect labor, cartons, royalties, depreciation charges, maintenance and repair expense, taxes (not including Federal and state income taxes), other manufacturing expenses, freight from plant to purchaser's destination, and reasonable general, administrative and selling expenses allocated to the cost of the container. Expenses not related to the conduct of manufacturing and selling operations connected with the particular commodity will be excluded.

(iii) Before filing an application for adjustment under the provisions of this subparagraph, it is suggested that the applicant obtain from the Office of Price Administration, Washington, D. C., a statement of the specific information that will be necessary in order that his application may receive attention.

This Amendment No. 12 shall become effective February 22, 1944.

NOTICE OF FILING AND ORDER RECONVENING HEARING AND DIRECTING CONSOLIDATION

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia 3, Pa., on the 19th day of February 1944.

In the matter of Koppers United Company, (File No. 31–481); The Brooklyn Union Gas Company, (File No. 31–467); Koppers Company, (File No. 31–165); Eastern Gas and Fuel Associates, (File No. 31–484); Koppers United Company, Fuel Investment Associates and Eastern Gas and Fuel Associates, (File No. 31–483); Brockton Gas Light Company, (File No. 31–473); Koppers United Company, (File No. 31–167); Fuel Investment Associates, (File No. 31–162); Eastern Gas and Fuel Associates, (File No. 31–164); and Koppers Company, (File No. 31–525).

Applications and amendments thereto having been filed under section 2 (a) (7) of the Public Utility Holding Company Act of 1935 by Koppers Company for an order declaring it not to be a holding company and under section 2 (a) (8) of the Act by Koppers United Company ("Koppers United"), The Brooklyn Union Gas Company ("Brooklyn Union"), Eastern Gas and Fuel Associates ("Eastern Gas"), Fuel Investment Associates ("Fuel Investment") and Brockton Gas Light Company ("Brockton") for an order declaring that (a) Brooklyn Union is not a subsidiary of Koppers United or Koppers Company, (b) Eastern Gas is not a subsidiary of Koppers Company, and (c) Brockton is not a subsidiary of Koppers United, Fuel Investment or Eastern Gas; and

Applications and amendments thereto having also been filed under sections 3 (a) (1) and (3) (a) (3) (A) of the act by Koppers United, under section 3 (a) (3) (A) by Koppers Company and under sections 3 (a) (1), 3 (a) (3) (A) and 3 (a) (3) (B) by Fuel Investment and Eastern Gas for an order exempting each of such applicants and every subsidiary company thereof as such, from all of the provisions of the act, and Koppers Company having subsequently withdrawn its application under section 3 of the act; and

The Commission having on May 10, 1940 issued its notice of filing and order for hearing and its order for consolidation of hearings with respect to said applications; and

The Commission having, by order dated June 13, 1940, denied motions of said applicants to revoke or amend said order for consolidation of hearings, but having modified such order so as to provide that all applications filed pursuant to section 2 of the act be determined prior to the presentation of evidence relating exclusively to the applications filed pursuant to section 3 of the act and that the evidence adduced in the proceedings on the applications filed pursuant to section 2 would, so far as relevant, constitute part of the record in the proceedings on the applications filed pursuant to section 3; and

Public hearings having been duly held in the consolidated proceedings on the issues arising pursuant to section 2 of the act and the Commission having on September 28, 1942, issued its findings, opinion and order denying said applications pursuant to section 2 of the act; and

An application and amendments thereto having been filed pursuant to section 3 (a) (3) (A) of the act by Koppers Company renewing its request for an order exempting it and every subsidiary company thereof as such from all of the provisions of the act; and

The order of the Commission dated September 28, 1942, denying said applications filed pursuant to section 2 of the act having been affirmed on review by decision of The United States Court of Appeals for the District of Columbia dated October 11, 1943; and

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to the application filed by Koppers Company pursuant to section 3 of the act, that the hearing be reconvened with respect to the applications of Koppers United, Fuel Investment and Eastern Gas under said section 3, and that none of said applications shall be granted except pursuant to further order of the Commission; and

It further appearing to the Commission that the issues presented by the application filed pursuant to section 3 of the act by Koppers Company and by the applications with respect to which hearings were directed to be consolidated by order of the Commission dated May 10, 1940 are substantially interrelated and involve common questions of law and fact, that the parties to the respective proceedings on the various applications are the same or are otherwise united in interest, and that a substantial saving in time, effort and expense will result and unnecessary cost or delay will be avoided if the reconvened hearings on all the said applications filed pursuant to section 3 of the act are consolidated and if the evidence heretofore adduced in the consolidated proceedings is permitted to stand as evidence in the pending proceedings under section 3, in so far as the same may be relevant.

It is ordered, That the proceedings on the application filed by Koppers Company (File No. 31–525) pursuant to section 3 of the act be, and they hereby are, consolidated with the said consolidated proceedings pursuant to sections 2 and 3 of the act, and that a consolidated hearing under the applicable provisions of said act and rules of the Commission thereunder be held on March 21, 1944, at 10:00 a. m., e. w. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania, in such room as the hearing room clerk in Room 318 will at that time advise. All persons desiring to be heard or otherwise wishing to participate in the proceedings should notify the Commission in the manner provided by its rules of practice, Rule XVII, on or before March 11, 1944.

It is further ordered, That Richard Townsend or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That without limiting the scope of the issues presented by said applications otherwise to be considered in this consolidated proceeding, particular attention will be directed at the hearing to the following matters and questions:

1. Whether the Commission should find with respect to Koppers United, Fuel Investment or Eastern Gas that such applicant and every subsidiary company thereof which is a public-utility company from which any such applicant derives, directly or indirectly, any material part of its income, are predominantly intrastate in character and carry on their business substantially in a single State in which such applicant and every such subsidiary company thereof are organized;

2. Whether the Commission should find with respect to Koppers United, Koppers Company, Fuel Investment or Eastern Gas that such applicant is only incidentally a holding company, being primarily engaged or interested in one or more businesses other than the business of a public-utility company and not deriving, directly or indirectly, any material part of its income from any one or more subsidiary companies, the principal business of which is that of a public-utility company;

3. Whether the Commission should find that Fuel Investment or Eastern Gas is only incidentally a holding company, being primarily engaged or interested in one or more businesses other than the business of a public-utility company and owning, directly or indirectly, substantially all the outstanding securities of all public utility subsidiaries from which a material part of income is derived;

4. Whether, if otherwise consistent with the applicable exemption requirements of section 3 (a) of the act, the exemption of Koppers United, Koppers Company, Fuel Investment or Eastern Gas, and every subsidiary thereof as such, from any provision or provisions of the act will be detrimental to the public interest or the interest of investors or consumers;

5. Whether, in the event an exemption or partial exemption should be granted any of the applicants, it is necessary or appropriate to impose terms or conditions in the public interest or in the interest of investors or consumers and if so, what those terms and conditions should be;

It is further ordered, That notice of this hearing be given to the applicants and to all other persons; said notice to be given to the applicants by registered mail, and to all other persons by general release of this Commission which shall be distributed to the press and mailed to the mailing list for releases issued under the act and by publication in the FEDERAL REGISTER;

It is further ordered, That jurisdiction be and is hereby reserved to separate, whether for hearing, in whole or in part, or for disposition, in whole or in part, any of the issues, questions or matters hereinbefore set forth or which may arise in these consolidated proceedings or to take such other action as may appear conducive to an orderly, prompt and economical disposition of the matters involved.

By the Commission.

Secretary.

Thorp, as trustees of Associated Gas and Electric Corporation, pursuant to section 11 (b) (1) of the Public Utility Holding Company Act of 1935, and said respondents having duly filed their answer on November 17, 1941, setting forth, among other things, that the properties of the operating public utility subsidiaries of respondents included in each of the following four groups constitute in the case of each group a "single integrated public utility system" within the meaning of that term as used in the Act:

(1) *New York-Northern Pennsylvania Group.*

on August 13, 1942, the Commission having issued its findings and opinion and order in which it directed respondents to dispose of their interest in certain named companies, other than the companies set forth above, and ordered that jurisdiction be reserved with respect to all issues not disposed of in said order; and the Commission having on July 9, 1943, granted respondents leave to file a supplemental answer and ordered further hearings in this proceeding; and the Commission further having on January 10, 1944, issued its findings and opinion and order granting respondents' application for an extension of time for compliance with the order dated August 13, 1942, until August 13, 1944; and the hearings ordered to be held by the Commission's order of July 9, 1943 having been held from time to time and presently being in recess and scheduled for resumption on February 24, 1944; and

Respondents at this time having filed a petition for leave to file an amended supplemental answer and to adduce additional evidence in the following regard:

Respondents request that the Commission grant leave to them to file an amended supplemental answer superseding the supplemental answer heretofore filed and to adduce evidence in support thereof, and, further, that the Commission direct that at the ensuing hearings in this proceeding additional evidence may be adduced on the retainability under section 11 (b) (1) of the act of any or all electric or gas properties, among the companies listed in the amended supplemental answer, contended during the proceedings to be additional systems, and on the retainability of the non-utility properties among the companies listed above;

Respondents further request that in connection with any order entered in this proceeding the Commission make its findings, after hearing, in accordance with the allegations contained in respondents' original answer as amended and supplemented by this amended supplemental answer, and that pending the making of such findings the Commission defer the making of any determinations with reference to (a) the number of integrated public utility systems, if any, under the control of respondents, and (b) which of such integrated public utility systems, if any, is to be considered as the "single integrated public utility system" retainable by respondents or by any successor thereto.

It appearing to the Commission that it is appropriate at this time and in the public interest that permission to file the respondents' amended supplemental answer be granted and that at the hearings presently scheduled or as hereafter continued, opportunity be afforded respondents or any other interested person to adduce evidence in regard to any issues raised by the petition and the amended supplemental answer;

It is ordered, That permission to file respondents' amended supplemental answer and petition be, and hereby is, granted;

It is further ordered, That at the hearing heretofore continued to February 24, 1944, at 10 o'clock a. m., in the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania, in such room as may be designated on said day by the hearing room clerk in room 318, opportunity be given respondents and any other interested person to be heard with respect to matters raised by the amended supplemental answer and the petition to adduce additional evidence.

By the Commission.

Chapter XI—Office of Price Administration

PART 1315—RUBBER AND PRODUCTS AND MATERIALS OF WHICH RUBBER IS A COMPONENT

[MPR 122,[1] Incl. Amdt. 9]

CERTAIN RUBBER FOOTWEAR

Section 1315.73, Table II amended by Amendment 9 effective February 28, 1944, so that Maximum Price Regulation No. 132 shall read as follows:

In the judgment of the Price Administrator, the prices of rubber footwear have risen and are threatening further to rise to an extent and in a manner inconsistent with the purposes of the Emergency Price Control Act of 1942. The Price Administrator has ascertained and given due consideration to the prices of rubber footwear prevailing between October 1 and October 15, 1941, and has made adjustment for such relevant factors as he has determined and deemed to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this regulation.

In the judgment of the Price Administrator the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of said Act. A statement of the considerations involved in the issuance of this regulation has been issued simultaneously herewith and filed with the Division of the Federal Register.[2]

Therefore, under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, and in accordance with Procedural Regulation No. 1,[3] issued by the Office of Price Administration, Maximum Price Regulation No. 132 is hereby issued.

Insofar as this regulation uses specifications and standards which were not, prior to such use, in general use in the trade or industry affected, or insofar as their use was not lawfully required by another Government agency, the Administrator has determined, with respect to such standardization, that no practicable alternative exists for securing effective price control with respect to the commodities subject to this regulation.

[Preamble amended by Am. 3, 8 F.R. 12302, effective 10-2-43 and Am. 6, 8 F.R. 16685, effective 12-15-43. Title as amended by Am. 6]

[NOTE: Supplementary Order No. 31 (7 F.R. 9694; 8 F.R. 1312, 2703) provides that: "Notwithstanding the provisions of any price regulation, the tax on transportation of all property (excepting coal) imposed by section 620 of the Revenue Act of 1942 shall, for purposes of determining the applicable maximum price of any commodity or service, be treated as though it were an increase of 3% in the amount charged by every person engaged in the business of transporting property for hire. It shall not be treated, under any provision of any price regulation or any interpretation thereof, as a tax for which a charge may be made in addition to the maximum price."]

§ 1315.61a *Terms and conditions of sale*—(a) *Credit charges.* The maximum prices established by this regulation shall not be increased by any charges for the extension of credit, unless (1) the manufacturer during December 1941, or, if the manufacturer was not producing a particular type of rubber footwear in December 1941, during the first month prior thereto but not earlier than January 1941 in which he was producing such footwear, required payment of a separately stated additional charge for the extension of credit by purchasers of the same class on sales of the same or similar types of commodities, and (2) the amount charged for the extension of credit is not in excess of the charge the manufacturer had in effect during December 1941, or, if the manufacturer was not producing a particular type of rubber footwear in December 1941, during the first month prior thereto but not earlier than January 1941 in which he was producing such footwear, for extension of credit involving the same amount and term.

(b) *Transportation costs.* No manufacturer shall require any purchaser, and no purchaser shall be permitted, to pay a larger proportion of transportation costs incurred in the delivery of rubber footwear subject to this regulation than the manufacturer required purchasers of the same class to pay during December 1941, or, if the manufacturer was not producing a particular type of rubber footwear in December 1941, during the first month prior thereto but not earlier than January 1941 in which he was producing such footwear, on deliveries of the same or similar types of commodities.

(c) *Service charges.* The maximum prices established by this regulation shall not be increased by any service charges, except that a service charge of 5 cents a pair may be added to the maximum price on all orders of six pairs or less.

§ 1315.61b *Sales for export.* The maximum price at which a manufacturer may make any export sales of any rubber footwear subject to this regulation shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation [4] or any revisions thereto. When used in this section the phrase "export sales" has the meaning given to it by section 11 (a) of the Second Revised Maximum Export Price Regulation.

§ 1315.61c *Federal and state taxes.* Any tax upon or incident to, the sale, delivery or processing of rubber footwear subject to this regulation imposed by any statute of the United States or statute or ordinance of any state or subdivision thereof, shall be treated as follows in determining the manufacturer's maximum price: If the statute or ordinance imposing such tax does not prohibit the manufacturer from stating and collecting the tax separately from the purchase price, and the manufacturer does separately state it, the manufacturer may collect, in addition to the maximum price, the amount of the tax actually paid by him or an amount equal to the amount of tax paid by any prior vendor and separately stated and collected from the manufacturer by the vendor from whom he purchased.

[§§ 1315.61a, 1315.61b, and 1315.61c added by Am. 3, 8 F.R. 12302, effective 10–2–43; amended by Am. 6, 8 F.R. 16685, effective 12–15–43]

§ 1315.61d *Transfers of business or stock in trade.* If the business, assets or stock in trade are sold or otherwise transferred after May 11, 1942, and the transferee carries on the business, or continues to deal in the same type of commodities, in an establishment separate from any other establishment previously owned or operated by him, the maximum prices of the transferee shall be the same as those to which his transferor would have been subject if no such transfer had taken place, and his obligation to keep records sufficient to verify such prices shall be the same. The transferor shall either preserve and make available, or turn over to the transferee, all records of transactions prior to the transfer which are necessary to enable the transferee to comply with the record provisions of this regulation.

[§ 1315.61d added by Am. 3, 8 F.R. 12302, effective 10–2–43]

§ 1315.62 *Less than maximum prices.* Lower prices than those set forth in this regulation may be charged, demanded, paid or offered.

[§ 1315.62 as amended by Am. 6, 8 F.R. 16685, effective 12–15–43]

§ 1315.63 *Adjustable pricing.* No person subject to the provisions of this Maximum Price Regulation No. 132 shall enter into any agreement permitting the adjustment of the prices of rubber footwear subject to this regulation to prices which may be higher than the maximum prices, except that any person may offer or agree to adjust or fix prices to or at prices not in excess of the maximum prices in effect at the time of delivery. In an appropriate situation, where a petition for amendment or for adjustment or exception requires extended consideration, the Price Administrator may, upon application, grant permission to agree to adjust prices upon deliveries made during the pendency of the petition in accordance with the disposition of the petition.

§ 1315.64 *Evasion.* The price limitations set forth in this Maximum Price Regulation No. 132 shall not be evaded whether by direct or indirect methods, in connection with an offer, solicitation, agreement, sale, delivery, purchase of or relating to rubber footwear subject to this regulation, alone or in conjunction with any other commodity or by way of commission, service, transportation, or other charge, or discount, premium or other privilege, or by tying-agreement or other trade understanding, or otherwise.

[§§ 1315.63 and 1315.64 as amended by Am. 6]

§ 1315.65 *Records.* Every person making a sale or purchase of rubber footwear subject to this regulation after May 10, 1942, shall keep for inspection by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, shall remain in effect, complete and accurate records of each such sale or purchase showing the date thereof, the name and address of the buyer and seller, the price paid or received, and the quantity of each type, kind, size and quality of rubber footwear subject to this regulation, sold or purchased.

[§ 1315.65 amended by Am. 3, 8 F.R. 12302, effective 10–2–43, and Am. 6, effective 12–15–43]

In the case of such a substitution the material substituted must have fairly equivalent serviceability to the required material and must serve the same use in the particular application in which it is applied. Prior to making any such substitution the manufacturer shall notify the Office of Price Administration in Washington, D. C., of the cause of the shortage of the required material for which a substitution is being made. The report shall include a full description of the substitute material.
